### AMERICAN PEONY SOCIETY.

Seventh annual meeting at Horticultural Hall, Boston, Mass., June 1910. B. H. FARR, Reading Pa., Pres.; A. H. FEWKES, Newton Highlands, Mass., Sec'y.

## Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements appear with each issue and should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

## AMERICAN CARNATION SOCIETY

Nineteenth Annual Meeting, Pittsburg, Pa., January 26-27, 1910.

Next Meeting at Boston, Mass., March, 1911.

### Convention Proceedings.

The Pittsburg Florists' and Gardeners' Club has every reason to feel proud of its success in entertaining the American Carnation Society at its nineteenth annual convention. The arrangements for the meeting and exhibition left nothing to be desired. There was ample accommodation for

Fred Burki.

President-Elect American Carnation Society.

The meeting room was full when President Burke of the local florists' club took the chair and introduced Prof. John Brashear, who cordially welcomed the visitors, Robert Craig responding. President Herr of the American Carnation Society was then called to the chair, and presented his address, which was followed by the reports of Secretary Baur and Treasurer Dörner. Invitations for place of meeting in 1911 were next in order and three were read from Milwaukee, including one from the florists' club of that city. At the Indianapolis convention last year Milwaukee gave way to Pittsburg on something of an understanding that the former city would be given preference for the 1911 event. Chairman Pierson of the National Flower Show committee sprung a surprise in nominating Boston, urging that all the special societies join the Society of American Florists in making the exhibition scheduled for March, 1911, the greatest event of American floriculture. This proposition was supported by ex-Presidents Rudd, Valentine and Craig, and was received with general favor. In the nomination of officers for next year, Messrs. Burki, Baur and Dörner were the only nominees for president, secretary and treasurer respectively. Secretary Baur then presented the judges' report, which was followed by W. T. Bell's admirable paper.

### Thursday's Proceedings.

At the morning session C. L. Washburn read his paper favoring a united exhibition and meeting of the carnation and rose societies. Eugene Dailledouze spoke in opposition, giving as his principal objection the difficulty of selecting a date suitable for both organizations. Joseph H. Hill then read an eminently practical paper on carnation culture. The recommendations of Chairman Nicholson of the committee on the president's address and secretary's report result-

everyone and everything at the Fort Pitt hotel, the management of which showed the visitors all courtesy. The exhibition was fully up to the average in the number of entries and exhibits and the quality of the stock, notwithstanding the dull, dark, weather generally experienced, showed considerable advance over previous efforts. There was a good, representative attendance, New York and vicinity leading in numbers.

Albert M. Herr, President.

A. F. J. Baur, Secretary.

F. E. Dorner, Jr., Treasurer.

## OFFICERS OF THE AMERICAN CARNATION SOCIETY.

ed in the increase of the secretary's salary to \$250 per annum and increasing the penalty on late entries from \$1 to \$2. The contest on next year's meeting place was in favor of Boston, that city receiving 57 votes against 25 for Milwaukee. The next meeting, therefore, will be held in the eastern city March, 1911. E. Allan Peirce was nominated for the vice-presidency.

At the afternoon session Fred Burki presented his paper and the officers already nominated were elected, including F. R. Pierson, as director, taking the place of Wm. Weber, retiring. The number of regular judges was increased from three to six and the new judges elected are Eugene Dailedouze, Jos. H. Hill and E. A. Stroud. W. N. Rudd, retiring this year, was re-elected. Invitations for the next convention were received from Rochester, N. Y. W. H. Breitensten was not present when his paper was called for and the secretary was instructed to receive and print it in the proceedings of the society. A committee to introduce members to their fellow-members was appointed as follows: Jos. H. Hill, R. Witterstaetter, Fred Burki, Eugene Dailedouze, M. A. Patten, W. N. Rudd, J. A. Valentine, S. S. Skidelsky. Committee on final resolutions: Wm. P. Craig, H. E. Dorner, M. A. Patten. Adjournment.

John Reimels, of Wood Haven, L. I., was seized with sudden illness on Wednesday and taken to the south side hospital Thursday, threatened with pneumonia.

The judges were W. N. Rudd, Morgan Park, Ill.; Wm. Nicholson, Framingham, Mass.; R. Witterstaetter, Cincinnati, O.; J. Birnie, West Hoboken, N. J.; E. Dailedouze, Brooklyn, N. Y., and M. A. Patten, Tewksbury, Mass.

The banquet was held at the Fort Pitt hotel, the headquarters of the American Carnation Society, on Thursday at eight o'clock in the evening. The viands were of the best and good feeling predominated.

## The Judges' Report.

## Section A—Vases of 100 Blooms.

White.—Cottage Gardens Co., Queens, N. Y., first, with Alma Ward; Strafford Flower Farms, Strafford, Pa., second.

Flesh pink, being those shades of pink of a flesh or salmon color.—F. Dorner & Sons Co., Lafayette, Ind., first, with No. 4206, and the same firm second with Pink Delight.

Light pink, being those lighter shades of pink verging on the true pink, and lighter than Lawson.—Cottage Gardens Co., first, with Mrs. C. W. Ward; Joseph Heacock Co., Wyncote, Pa., second, with Dorothy Gordon.

Dark pink, being as dark or darker than Lawson, including all so-called cerise not dark enough to be called red.—Nic. Zweifel, North Milwaukee, Wis., first, with Bright Spot; E. G. Hill Co., Richmond, Ind., second, with Afterglow.

Red or scarlet, to cover all shades generally included in these colors.—Cottage Gardens Co., first, with Beacon; F. Dorner & Sons Co., second, with Scarlet Glow.

Crimson, to cover those shades known as crimson and maroon.—The Wa-no-ka Greenhouses, Barneveld, N. Y., first, with Sultana; W. W. Coles, Kokomo, Ind., second, with Mrs. Walter W. Coles.

Yellow or yellow variegated.—E. G. Hill Co., Richmond, Ind., first, with J. W. Riley. Any other color.—H. Weber & Sons Co., Oakland, Md., first, with Toreador; Chicago Carnation Co., Joliet, Ill., second, with Conquest.

The Burki sweepstakes, \$25 for best vase in Section A.—Cottage Gardens Co., with Alma Ward.

## Section B—Vases of 50 Blooms.

White Enchantress.—A. T. Lorch, De Haven, Pa., first; A. C. Brown, Springfield, Ill., second.

White Perfection.—Chicago Carnation Co., first; Wagoner Floral Co., Columbia City, Ind., second.

Any other white.—A. T. Lorch, first, with White Lawson; Mt. Greenwood Cemetery Association, Morgan Park, Ill., second, with Mrs. J. C. Vaughan.

Enchantress.—Finleyville Floral Co., Finleyville, Pa., first; Wagoner Floral Co., second.

Any other flesh pink.—F. Dorner & Sons Co., first, with Pink Delight. Rose Pink Enchantress.—F. Dorner & Sons Co., first.

Winsor.—A. T. Lorch, first. Winona.—Finleyville Floral Co., first; E. G. Hill Co., second.

Mrs. Thos. W. Lawson.—A. T. Lorch, first. Afterglow.—E. G. Hill Co., first; A. C. Brown, second.

Any other dark pink.—Chicago Carnation Co., first, with Aristocrat.

Victory.—F. R. Pierson Co., Tarrytown on Hudson, N. Y., first.

Beacon.—Chicago Carnation Co., first; F. R. Pierson Co., second.

Any other scarlet.—Chicago Carnation Co., second, with Andrew Carnegie.

Any other crimson.—J. D. Cockcroft, Lockport, N. Y., first, with Harvard.

## Section C—Varieties Disseminated, 1909.

Vase 50 blooms Pink Delight, premiums offered by F. Dorner & Sons Co., Lafayette,

Ind.—Chicago Carnation Co., first; E. G. Hill Co., second.

Vase 50 blooms Mrs. Chas. Knopf, premiums offered by Chas. Knopf Floral Co., Richmond, Ind.—Chicago Carnation Co., first.

Vase 50 blooms May Day, premiums offered by E. T. Grove, Richmond, Ind.—E. G. Hill Co., first; W. Frank & Sons, Portland, Ind., second.

Vase 50 blooms O. P. Bassett, premiums offered by Bassett & Washburn, Chicago.—Chicago Carnation Co., first.

Vase 50 blooms Wa-no-ka, premiums offered by Wa-no-ka Greenhouses, Barneveld, N. Y.—W. A. Rowland, Whitesboro, N. Y., first.

Vase 50 blooms Apple Blossom, premiums offered by Wa-no-ka Greenhouses, Barneveld, N. Y.—W. A. Rowland, first.

Vase 50 blooms Georgia, premiums offered by Jas. D. Cockcroft, Northport, N. Y.—Walter Thomas, first.

Vase 50 blooms Gov. Deneen, premiums offered by A. C. Brown, Springfield, Ill.—Chicago Carnation Co., first.

Vase 50 blooms Alvina, premiums offered by Henry Eichholz, Waynesboro, Pa.—Chicago Carnation Co., first.

## American Carnation Society's Medals.

Gold medal for the best vase of 100 blooms, any variety, any color.—F. Dorner & Sons Co., with Hoosier Lad.

Silver medal for the second best vase of 100 blooms, any variety, any color.—R. Witterstaetter, Cincinnati, O., with President Valentine.

Bronze medal for the third best vase of 100 blooms, any variety, any color.—Dailedouze Bros., Brooklyn, N. Y., with White House.

## Society of American Florists' Medals.

Silver medal for the best vase of 50 blooms of a carnation of American origin not yet disseminated.—Cottage Gardens Co., with Mrs. C. W. Ward.

Bronze medal for the second best vase of 50 blooms of a carnation of American origin not yet disseminated.—Cottage Gardens Co., with Alma Ward.

## Certificates of Merit.

[To receive a certificate of merit a variety must score 85 points or over.]

Wa-no-ka Greenhouses, Sultana, 87 points; Rainbow, 85 points.

E. G. Hill Co., Annie Mae, 85 points.

R. Witterstaetter, No. 14076, 85 points; President Valentine, 86 points.

Miami Floral Co., Dayton, O., Miami Queen, 78 points.

W. W. Coles, Mrs. Walter W. Coles, 86 points.

F. R. Pierson Co., No. 40, 79 points.

## Preliminary Certificates.

Baur & Smith, Indianapolis, Ind., No. 653, 79 points.

Finleyville Floral Co., No. 163, 80 points.

A certificate of merit was recommended for the Pittsburg Cut Flower Co.'s handsome display of 10 vases of standard varieties.

Honorable mention was given Baur & Smith for handsome vases of Shasta and Rose Pink May, to the Lamborn Floral Co., Alliance, O., for display of carnations, and to J. A. Peterson, Cincinnati, O., for his new begonia, Glory of Cincinnati.

#### President Herr's Address.

Your president extends greeting and a welcome to our sessions; we hope to have them interesting enough to have you at each one of them. This society was organized in Philadelphia, and the first regular meeting held in New York, but it always seemed to me that it took the second annual meeting in this city to get us thoroughly acquainted with each other and Pittsburgh will always be a bright spot in the memory of those of us who were fortunate enough to have attended that meeting. Those of us who are here today will no doubt long remember the nineteenth annual meeting and our Pittsburgh welcome.

#### GETTING ACQUAINTED.

Getting acquainted is one of the chief benefits to be derived from these gatherings. I know of several instances where men have attended our meetings for the first time and gone home having met but two or three members. In one instance on the train going home a new member told me that the only person who spoke to him during the whole convention was the secretary. In cases of this kind the individual himself is largely to blame, but we should, during the few days we are together, be a more universal brotherhood, and have at least a "howdy" for each and every visitor. I would suggest a permanent committee of introduction and information to whom strangers can apply for assistance in getting acquainted.

#### IMPROVING BUSINESS METHODS.

Can we make our meetings more interesting and profitable to ourselves and our flowers than they now are? We have told and retold the story of production, the proper houses, etc.; there are, of course, new difficulties and advanced methods to discuss along these lines each year, but it seems to your president that we could and should devote at least one session to the improvement of our business methods; that they have improved no one can deny, but the improvement today over that of our meeting here 17 years ago is very little more than what

has been forced upon us by the general upward trend of all business. Other industries do not wait to have improvement forced upon them; they are continually searching for it, grasping and utilizing it.

We should know how much money each square foot of ground surface in our houses should bring us to meet our expenses, labor, heating, operation, wear and tear on the place. We should have a small but conspicuous tag attached to each bunch of flowers we send into market and let this tag follow them into the retail shop, so that in the course of time buyers would learn to ask for it and demand it as a guarantee of quality. This tag could be marked with the letters A. C. S. or some other special mark and the whole be copyrighted and for use only by paid up members of this society, and all infringements prosecuted. In addition to the special mark could be added the growers' name and the date the flowers were cut, this to be left to the discretion of each user. Poorly grown flowers and over-aged flowers by this method would soon be left in the race. To succeed and properly advance our business our flowers should give pleasure and satisfaction to the user and this suggestion is offered as a means to that end.

Can we improve our methods of selling carnations? Mr. Fox gave a talk in Philadelphia from the retailer's point of view on prices for special days of demand. We all know of instances when the retail market price of carnations was from \$1 to \$1.50 per dozen and the wholesale price was \$1 to \$1.25 per 100 less the 15 per cent commission to the middleman. This proportion between the grower and the retailer is not a good business proportion and if it were not for the advanced prices of special days the grower would be in a bad way. Adjustment will have to come some day and it should come through this society.

#### IS THERE OVERPRODUCTION?

Is there overproduction of carnation blooms? I was told by a Pittsburgh man that if roses had been plen-

P. J. Demas.

Julius W. Ludwig.

E. J. McCallum.

tiful for Christmas, carnations would have gone begging. All hail to the rose! but carnations have their devotees as well, and if given to them in proper shape and form I believe the day of overproduction is far in the future, providing the retailer, the grower and the middleman can get together and work toward a mutual end. Let us put on our thinking caps and see what we can do toward this. At our previous meeting in this city we had a paper by Thos. Cartledge, who stood at the head of the Philadelphia retail trade. He reviewed the various carnations then grown by name, giving his retail experience with each as per this example: "Grace Wilder has been our leading pink, only because we could get it in quantity. Aurora has sold equally as well when we could get it although it sometimes shows a slaty, ashy purple tint when a little old." We want to grow "best sellers" and a review of this sort each season would help us find them out.

Our exhibitions will admit of some improvement as exhibitions to the public, but as an educator to the grower the lines on which we are working are as nearly right as we can hope to get them; as a guide to the buying of new sorts each individual will have to work that out for himself with the new flowers for comparison with older sorts in front of him.

#### REPORTS ON NOVELTIES.

There is one point I would like to see worked out and that is to have a report, from those who buy novelties the first year, sent in to the secretary on December 1 of the following winter, giving their honest opinion of the variety from the buyer's point of view. Let the secretary publish these reports in pamphlet form and send them to applying members only. The buying of novelties is an experiment from a profit point of view no matter how much we may try to eliminate it, but a pamphlet of this sort would be a great help to buyers of new sorts in their second year. If necessary this pamphlet could also be copyrighted. You will note that I am trying to make membership in this society a necessity to all live carnation growers.

DeForest W. Ludwig.

We need also a permanent committee of finance to devise ways and means for the procuring of the funds necessary to the welfare of this society. In closing I want to compliment this society on its choice of a secretary; a better one would be hard to find. His work has been especially arduous for this first year but it certainly has been faithfully performed. Our secretary should have at least \$250 per year and the work would be cheaply done at that. Let us all work toward getting this society to the position it should hold and the prosperity of our society will bring prosperity to all its members.

FRED BURKI made a brave fight for Milwaukee.

JOHN A. EVANS was unfortunately delayed by a family bereavement, but was on hand with his order book on the second day.

BEGONIA PETERSON meant no harm when he called for that axe beyond opening up a superb display of Glory of Cincinnati, his new specialty.

#### Secretary Baur's Report.

Your secretary begs leave to report on the last year's work as follows: The former secretary, who is now our worthy president, turned over the secretary's office to me in good condition on April 1 of last year. He had got out the annual report and finished up all the work connected with the last convention. Hence my report will not cover the whole year.

#### MEMBERSHIP.

Our membership roll now contains 394 names. Of these 55 came in during the year 1909. Against these we have 27 who are delinquent for 1908 and 1909 and will be dropped from the roll except those who may pay up at this meeting. We also have about 50 who owe for 1909, but no doubt many of these will pay up here. During the past year four of our members have been called away from this life. They are: Geo. M. Kellogg, of Mt. Pleasant, Mo.; Herbert Heller, of New Castle, Ind.; Wm. K. Harris, of Philadelphia, Pa.; E. Sutermeister, of Readville, Mass. No official notice was received by your secretary of any of these deaths.

The board of directors at its meeting in Cincinnati, O., last August ordered the secretary to procure more vases, and have cases made for storing and shipping the vases from place to place. These have been secured, and it is hoped that our vases will be better preserved than could be done heretofore. We have also had made holders for securing name cards and entry cards to the cases. You will notice that these are so made, as to permit the cards to be printed and read from both sides. It will be unnecessary for anyone to handle the cards to read the name of the variety or the exhibitor. There will be less likelihood of confusion from getting the cards mixed in moving vases around. The premium list was got out early in December, as is customary. We were this year favored with a splendid lot of advertising, amounting to \$285. This will pay for all the printing and stationery con-

PROMINENT MEN IN THE TRADE OF PITTSBURG AND VICINITY.

nected with this convention and leave a balance of some \$150 to go into our treasury.

#### THE NOVELTY CLASS.

The greatest change in the list is the addition of the new section called section C for the previous season's novelties. It took considerable correspondence to get this section started, but after it became clear to the disseminators they responded liberally, and all except two have entered their varieties in this section. We hope that this arrangement will be a permanent one, and that in the future it will become customary for disseminators to list their varieties in this section without having to be coaxed. We have also divided the list in sections, designated by letters of the alphabet and numbered the classes in figures. In the judges' book we have adopted a system under which every entry has a different number, and it is impossible to recognize the owner of an exhibit by the number on another exhibit. In order to help make this system work smoothly I will ask this meeting to adopt some rule to limit the time for making entries in the competitive classes.

The rules printed in the list, requiring the payment of \$1 for each entry made after a certain date, does not seem to answer the purpose fully. It has never been enforced strictly, and unless a rule can be enforced strictly it cannot be made fair to everybody. We would suggest that one week before the convention opens all entries for competitive classes must be in the hands of the secretary. That will give him time to get everything into good shape before he leaves home, and the greatest cause of errors will be eliminated. The secretary should not be burdened at the convention with work which can just as well be done a week before he leaves home. In conclusion, I wish to thank the members for the interest shown by their ready responses to letters from the secretary, the vice-president and his local committees for the able manner in which they have handled the local preparations, and, most of all, my predecessor for his kindly advice and guidance during the past nine months.

#### • Treasurer Dorner's Report.

The following is Treasurer Dorner's report:

PRESIDENT HERR made them step lively with business.

THE exhibition was the smoothest affair of the kind we have seen.

W. N. RUDD had to leave Wednesday evening on account of business.

HERBERT GREENSMITH, the new park superintendent of Cincinnati enjoyed meeting so many of his old eastern friends.

#### Joint Meetings of Car. and Rose Societies.

BY C. L. WASHBURN.

The question of the advisability of holding a joint convention of the American Carnation Society and the American Rose Society is best considered from a business standpoint. There are now held the Carnation

Society meeting, the Rose Society meeting, the S. A. F. meeting, the various Chrysanthemum Society shows and the various club shows. The aim of these conventions is to do the most good to the greatest number of people in the trade, but by holding so many meetings, we are dividing our energies into too many channels which causes less attention by the trade to each meeting than would be the case if some of these meetings were combined into one. All are good, no doubt, but what is needed is a little more united work.

The importance of a convention of the combined societies would be such that the growers could not afford to overlook it. Men who in the past have felt that the time taken up in attending so many minor meetings could not well be spared would be glad to attend this one larger meeting. To those whose business necessitates their attendance at both meetings the matter of reduced expenses would be an important item. Also the general reduction of expenses to each society by having the two share the expenses would be quite an item, while the same amount of business would be accomplished.

The carnation and rose men have similar objects in view when holding their meetings and we certainly need a larger attendance at these conven-

tions. This can only be obtained by increasing the membership of both societies. In order to increase this membership, it is necessary to increase the knowledge regarding our business and products to be obtained by attending these meetings. We are in the business as a money-making proposition and any knowledge which increases the earning capacity of our houses increases our profits. The advancement in new varieties, better methods of growing and better means of handling the flowers are all questions being constantly brought up at these conventions, so that a wider scope of investigation and a wider discussion of these questions would be obtained by a joint convention. More interest would also be produced and better results obtained by the members of both societies, attending a joint convention.

There is such a broad field in this matter of new varieties of plants, new methods of construction and new everything almost pertaining to our business that a joint convention would stimulate a larger exhibition of these new things. No one will question the added importance of an investigation and certificate when backed by the united action of both societies.

The exhibition of flowers would, of course, be larger in a joint meeting and would be a matter of greater interest to the general public. This is a very important point as the general public are the flower buyers and it is for them our product is produced. The holding of a convention is a very serious expense and inconvenience to those florists located in the city where the convention is held and a joint meeting would reduce this to one city instead of two. The field for united work, it can be seen, is similar for both associations and the time for the exhibition of the flowers

FLOWERS AND BUDS OF CARNATION BRIGHT SPOT.

VASE OF NEW CARNATION, BRIGHT SPOT, GROWN BY NIC. ZWEIFEL, NORTH MILWAUKEE, WIS.  
Winner in the 100 Blooms, Dark Pink Class, at the Pittsburg Convention This Week.

is best suited for roses as well as carnations so that a joint convention would be very desirable for both societies.

#### Carnations at Nic. Zweifel's, Milwaukee.

As a compact, well built and well cared for greenhouse plant, that of Nic. Zweifel, of North Milwaukee, Wis., would be hard to beat. Directly one sets foot inside the houses the trim, neat appearance of everything is apparent; the plants are all supported properly, the benches in excellent repair and without a weed visible, while there is an air about the place that speaks of a careful and clever grower and constant watchfulness, for these things do not come by chance. In all there are 60,000 feet of glass, devoted entirely to carnations, and with the list below of the principal varieties grown, we will be through with statistics, which will doubtless be a relief to readers, as it evidently was to Mr. Zweifel when the writer finished his inquisition:

|                        |        |
|------------------------|--------|
| Enchantress .....      | 13,000 |
| White Perfection ..... | 12,000 |
| Beacon .....           | 6,500  |
| Winsor .....           | 5,000  |
| Bright Spot .....      | 4,000  |
| Victory .....          | 3,500  |

Not a very long list, but Mr. Zweifel believes in finding the best in each color and growing it in sufficient quantity to meet his demands. Besides those mentioned, Mrs. Chas. Knopf, May Day, Aristocrat, Rose Pink Enchantress and Badger State, a new seedling, are grown in smaller num-

bers. The cut is consigned to Holton & Hunkel, of Milwaukee, who rely on this place for first-class fancy stock, and get it. White Perfection here was a surprise. In so many places the last couple of years we have seen this carnation with straggling, poor growth and, although the flowers were good, there was not enough of them to make it worth growing. Here it is entirely different; the plants are in fine shape, growing freely and full of flowers and buds. When White Perfection is handled as is done here there is no need to look for any other white. Winsor, too, was in its best form, with long stems stiff and erect, as is the habit of this pretty variety, and beautifully colored large flowers.

What we came principally to see was Bright Spot, the new seedling raised by Mr. Zweifel. It is well named; the benches devoted to it, five of them, with 800 plants to each, certainly was a bright spot, and it is long since we saw so promising a variety. It is a good deal like Lawson was at its best, but with a deeper color, better stems and a most profuse bloomer. It may be noted in passing that this variety was awarded 24 points for color at the Indianapolis convention of the American Carnation Society last year, and this is only one of its good points. The stems are long and hold up the flowers finely, while these are round, of fine substance and built high in the center. Although the plants were propagated late they made a fine growth in the field and commenced to flower early, the crop now being taken

being the second already this season, while there are young shoots in abundance all around the plants. The flowers stand well and do not fade out as so many reds do. The calyx is firm and we did not see a single split flower in the whole lot. Bright Spot is undoubtedly a coming variety and more than one experienced grower of large quantities are after it. But it is not to be disseminated until next season, by which time Mr. Zweifel will have worked up sufficient stock of it to meet the demand which will surely be forthcoming for such a distinct and beautiful variety.

Besides this, another seedling, Badger State, is being tried out in quantity, but it has not yet been decided to send it out. Mr. Zweifel has been bitten too often himself with "novelties" to put out anything that does not conform to the high standard he has set and, so far, Badger State is in the probationary period. It is a free flowering, bright red with good stems and fine habit, but the flowers are a little on the small side. We shall await developments with this before saying much about it. In a large collection of seedlings there are several of merit, including a white, that is remarkably good looking. It grows and flowers freely, is of good habit and never goes sleepy. Another, a variegated, is so heavily striped with a deep Indian red as to almost hide the yellow ground. Mr. Zweifel thinks this is one that will suit the British growers and he is probably right. There are many other pretty things here,

and as the work of crossing is going on continuously we shall look for other fine things from this source. We should have noted that Winsor is grown inside entirely here and the splendid condition of the plants is sufficient proof of the wisdom of this plan.

### My Experience With Carnations Under Glass

BY FRED BURKI.

When I consented to read a paper on my experience in growing carnations under glass I meant carnations planted under glass in summer in place of the field, as it is still an open question with most of us which method is best, and with your permission I will confine my notes to this subject. In the early nineties I set out some plants under glass in the spring with the object of getting salable flowers in the early fall, as at that time we did not house carnations as early from the field as we do of late years. The variety was Mrs. Fisher which I at that time grew as my principal white and with which variety I had for some years great success, but only in solid beds. It did not do well for me on raised benches.

#### FLOWERS IN TIME OF SCARCITY.

I found that stock out of 3-inch pots planted under glass in spring gave me good flowers when such were scarce, say, in September, October and November, and bloomed through the season as well as did those planted from the field; they did not make as much surplus grass, but grew more slender with equally as good flowers and longer stems than the field grown produced and they could be planted closer. The soil I used at that time was taken from an ordinary piece of garden ground, as I could not procure sod, being located in one of the city suburbs. This piece of ground was manured heavily in the spring with cow manure ploughed in and kept ploughed through the summer; sometimes we manured it a second time and pulverized it with the harrow before taking it into the houses.

Another variety I grew with great success at that time was Hector, a scarlet, which did better with me than any other red at that time and for some years after. The only fault it had was weak stems; I had to give it up when the trade insisted on stiff stems, Hector grew very tall under glass in summer, but bloomed much better that way than when planted from the field. I simply could not make Hector pay when planted from the field, and it did its best when I planted it in beds prepared in spring and cultivated the same as if under glass, and before fall built a greenhouse over it. I am of the opinion that this way of growing carnations on beds with no glass over them in summer until fall would be an ideal if it were practical, but I find it impossible now where we are located and with the kind of houses we build now.

Some years ago Uncle John Wyland said to me one day about the beginning of June, "I am going to take the glass out of my carnation house, clean it out and plant the young stock in it in place of into the field." I said to him: "You are going to have

a big job on hand." About the end of June I met him again and he said to me: "You cannot believe how quick we got that glass out and put away; it took us about two days." I said to him: "Well, you will find it a bigger job putting it in again in the fall and you have now no carnations to sell when I can get good money for them, \$2 per 100." He never did it again, although the carnations were a success.

#### THE LAWSON VARIETIES.

Of late years we aim to plant the Lawson varieties under glass instead of in the field. In this way we get earlier flowers and longer stems than we can get from the field-grown plants and unless we can house these varieties from the field by the first week in July, they hardly give us a first crop before the holidays, and short stems, flowers not up to the mark. We propagate them during December and January and get them into 4-inch pots by May. I find, though, that unless planted under glass not later than the first week in June, field-grown plants at the end of June or beginning of July are more satisfactory, as the plants in pots are liable to suffer during June from one cause or another. The difficulty is, though—when carnations have a good sale during June as they do in some years and your plants are in crop—to make up your mind to throw them out and make room for young stock.

The spaces we are able to plant in May are the beds we had in chrysanthemums the fall previous. Following these we take off a crop of Grand Rapids lettuce then fill up potted up cuttings of carnations. We prefer them all in pots as they come from the cutting bench, so that when we plant in the field we have a good ball to them; then the plants will not suffer much if the ground happens to be dry and we cannot get them watered right away. Then, as soon as the plants are in the field, we set this empty space planted with Lawson and Winsor.

The soil we use is sod ploughed about four inches deep the fall previous; then before we bring it in we plough in a good coat of rotten stable manure, pulverizing it with the harrow. I have found that soil prepared in this way in the open field is sweeter than when it is put up in heaps, and the labor is less; besides, the sod piles are apt to sour unless they are turned and cut down, which means much work for the laborers. I have found that other varieties than Lawson also do very well when planted under glass in spring; I rather think nearly all the varieties would if we could only get the houses ready for them without having to sacrifice hundreds or thousands of dollars worth of flowers to do it.

### New Carnation Mrs. Walter W. Coles.

The carnation illustrated herewith is from the establishment of W. W. Coles, Kokomo, Ind., and is described by him as "a bright scarlet crimson; good stiff wiry stem. Average flower over three inches in diameter. Calyx absolutely perfect. The only variety on our place that never splits, and the most wonderful free, continuous bloomer."

### A Carnation—The People's Flower.

BY W. H. BREITENSTEIN.

Flowers are not more a luxury in modern life than are good clothes, comfortable homes and the many things in daily use that place living above an existence. There is probably no normal human animal without an inherent love of the beautiful, and that finds no commoner expression than in a fondness for flowers.

The indulgence in this expression, it must be conceded, is primarily a matter of cost. He of limited means, and he is legion, must have value received; be it in color, for cheer in dull environment, fragrance, to stimulate the sense, perhaps reminiscent of a happy yesterday or mayhaps to anticipations of the morrow. The influence is only for

CARNATION MRS. WALTER W. COLES.

BENCH OF CARNATION SHASTA, PLANTED AUGUST 1 AND PHOTOGRAPHED DECEMBER 1, 1909.

good, nevertheless, it must not be a "flower for a day." The carnation has been the people's flower, its beauty and fragrance appealing to the senses and its cost placing it within the means of all having more than enough for the common necessities of life, then its hardiness, gives prolonged pleasures.

Mark well the assertion. "Has been the people's flower." Perhaps it still is, and may be shall so remain; that it seems is "up to you." From observation it seems to lose in popularity. Why? Certainly not in that it is less beautiful. What is the answer? Is it not, in that it becomes more and more ephemeral each year as it loses its hardiness, its fragrance and gains nothing in beauty.

Admitting that it grows larger, size alone is not beauty, and bulk, at the sacrifice of natural charms, does not hold the affection of the people. Might it not be well to consider what qualities are most essential to the pleasures of the consumer, without which all were in vain. Color we have and from a decorative point of view no flower offers more. If given the proper treatment one can obtain from the most gorgeous to the softest tones, and now is perhaps the best time to make the one exception. We need yellow, now come to its own in popularity and deservedly so, as no color diffuses more warmth and nature uses it profusely.

One essential feature to a more general use of the flower is, naturalness.

One cannot obtain a very artistic arrangement without more natural environment, hence the obvious need of carnation foliage, with which the flower, for a table decoration, (perhaps its greatest use other than for memorial purposes) would be incalculably enhanced, also for personal adornment and for favors. A full bouquet, with its warmth of color relieved by a touch of foliage, makes an adornment any lady would be pleased to accept and proudly wear.

Simplicity is the keynote of art, be it in music, painting, sculpture, architecture or any other branch, and its highest expression is faithfulness to nature, as she reveals herself. Where are the monster chrysanthemums which were a fad some years since? They are replaced by the smaller and more natural ones having more uses. What rose has won favor more than the semi-single, fragrant, hardy ones? The American Beauty, a notable exception, not for the beauty of its color so much as for fragrance and especially endurance.

BOSTON was favorite in the betting. DORNER and Hoosier Lad are kings by right of conquest.

FRANK TRAENDLY is still after the artificial flower dealers.

CARL CROPP offered his vote at auction but there were no bidders.

FEELING ran high while voting was in progress for the place of meeting. M. A. Patten was so excited that he could only stand and wave his hands.

### The Calendar of the Carnation.

BY JOSEPH H. HILL.

It seems a trifle ludicrous for a person as young and as inexperienced in carnation culture as myself to stand before a body of representative men such as are gathered here today, and attempt to inform them

as to the best way to cultivate carnations throughout the year. Many a member of this society was successfully growing carnations before I was born; other comparatively young men, are already acknowledged authorities on the divine flower, and there are others here present who might, if they so desired, retire on their well-earned laurels and enjoy for the rest of their lives, their well-filled coffers, the result of hard work, close application, and an unceasing attention to the demands of their chosen flower. In some portions of my discourse will readily be recognized the teachings of such men as Wm. Nicholson and the Dailledouze brothers, to all of whom I am deeply indebted for kindly interest and instruction, and unfailing response to any inquiry propounded. Other portions of this paper are records of my own observations and experiences, many of the lessons being quite expensive, as every grower has at times cause to confess as he sums up his columns of success and failure.

## PROPAGATION.

The middle of November witnesses the first steps looking toward the production of the millions of carnation plants required for the annual planting in this and other countries. At this time the grower puts into the sand those varieties which fail to make good plants from later struck cuttings, and also those required by those of his customers who insist on "late December or early January delivery." While large numbers are taken in November and December, the bulk of the propagating is done considerably after the holidays, and often up to May 1. It is generally conceded that cuttings taken during January, February and March will give the best results to the average grower, though most of us have seen grand blooms produced in quantity from good April cuttings. Too much importance cannot attach to the careful selection of cuttings, which must be strong and healthy and from clean and vigorous plants; the old axiom quoted in Mr. Ward's book that "like begets like" must never be lost sight of in this part of our programme.

The cutting bench should have a brick or tile bottom, filled with three to four inches of absolutely clean sand and so constructed that a bottom temperature of 60° can be maintained. No draughts should be allowed to strike the cuttings, and they should also be protected from the direct rays of the sun by a perfectly clean and light weight curtain of muslin.

The cuttings should receive a very thorough watering when put into the sand and the detrimental habit of using the hose whenever they show signs of flagging should be avoided, as this wilting invariably shows that overhead conditions are wrong, and these must be corrected rather than that water should be added to an already saturated sand. The less amount of water used if the cuttings are kept fresh and plump the better will be the root formation, and it requires a nice discrimination to properly adjust the same. Varieties differ greatly in the fiber of the first roots, the Enchantress family being notable for producing good, tenacious roots quickly, while Afterglow, the sturdiest, toughest stemmed variety in existence, must be handled with great care to prevent the loss of roots when taking from the sand, and must be allowed a longer time to mature.

## POT PLANTS BEST.

Then arises the question, shall the cutting be dibbled into soil, or potted? The former procedure is the easiest and the quickest, but I feel sure that the extra work of potting and repotting is doubly repaid. The young carnation that is planted in the field or in the flowering bench from a pot, with its firm ball of earth, enwrapped with a net work of roots will show no ill effect from the shift and will start right off into growth without a day's hesitation, while the lifted plant, in handling and resetting, loses most of the soil from around the roots, and receives a severe check from loss of moisture from its tissues; and especially is this the case if not revived by frequent showers soon after planting. Another strong point in favor of

the young pot-grown carnation is exemplified when the plant is lifted from the field either for shipping or for immediate benching. The small pot ball of the springtime will still be found intact, greatly protecting the roots from serious injury. One might be led to suspect that the speaker was interested in the pottery business, for if all the carnation men decide to pot all their cuttings before planting, it means millions of pots, but such is not the case; nevertheless if any of the pot men present want to "fix it" with the speaker he will be glad to meet them after we adjourn. We endeavor to get our young stock up into 3's before planting out, but very often in the spring rush some lots have to remain in 2½'s and they grow on very nicely provided they have not become badly pot-bound.

When the first warm days come on about mid-April, the inclination is to rush the stock out into the field, but I feel sure that it is a serious mistake to do so; in the house it has grown up in a temperature of from 45° to 50°, and with moisture judiciously supplied, so that it cannot but suffer and be seriously checked when subjected to cold, severe frosts very often, and worst of all, to wet weather and a falling thermometer. In an ordinary season if the planting is fully finished by June 1, good, big, healthy stock is assured, providing the soil has been properly prepared and is possessed of full quantities of plant food.

We have come to the conclusion that cross-checking the plants in the field so as to cultivate them both ways with a hand cultivator is not so good as to give them more room between the rows and draw the plants closer together in the rows. By spacing the rows 28 to 30 inches, a horse and spiked-tooth cultivator can be used, greatly lessening the hand labor, beside loosening the soil to a greater depth; the inclination of the hand cultivator is upward rather than downward, thus failing of the intent to a certain degree.

## PREPARATION OF BENCHES.

About July 1 we begin to condemn the benches that are not producing a paying quantity of flowers, emptying the worn-out soil, and making them ready for our next year's hopes. It is now a recognized fact that the returns from carnations cut in June and July come nearer being "real velvet" than those cut at any other time in the year, providing the plants have had the proper care and have not been neglected during the late spring rush. If there is any time in the year when the greenhouse laborer approaches mutiny it is when the task of wheeling out and wheeling in presents itself. If at this particular period of carnation culture, the lady who strolls through the houses in the winter remarking on the delights of "cultivating the fragrant blossoms," comes around once more, she certainly finds herself rudely disillusioned, for it is as hard, hot, and disagreeable as working in a quarry or in the moulding room of an iron mill. The man who perfects a practical, mechanical soil carrier, not only has a fortune assured but the added blessing of every man relieved of this arduous and exhausting work.

## MODERN METHODS OF SOIL PREPARATION.

A word as to soil: The old prescription "three parts of soil to one of well-rotted manure, together with a generous sprinkling of bone, chopped fine and put on the benches," is bound to be superseded by more modern methods of soil preparation. There are a number of eminently successful firms in this country who take as long as five years in the preparation of their soil for indoor culture. The one vital principle to be observed is to have the manure and other fertilizers so thoroughly assimilated by the soil by means of leguminous crops and clovers, that the food is immediately available to the plant.

So much has been written concerning the careful lifting and quick resetting of the plants from the field,

THE CHICAGO CARNATION CO.'S GREENHOUSES, JOLIET, LL.

Bench of Carnation May Day.

THE CHICAGO CARNATION CO.'S GREENHOUSES, JOLIET, ILL.

Bench of Carnation Conquest.

that I pass this item of culture, but wish to emphasize the necessity of the use of the Bordeaux mixture promptly on the establishment of the plants, generously applied, and given once thereafter every three or four weeks; it not only acts as a preventive of spot, rust and other minor diseases, but of stem-rot as well. By beginning in August with a weekly spray of nicotine and continuing throughout the year we keep down aphids and also rid our plants of thrips; red spider is controlled by an occasional application of salt water, together with syringing under high pressure on bright days.

The antiquated proceeding of mulching heavily in late summer or autumn has given way to light top dressings, through which the surface of the soil is always pliable and open to the free air, thus preventing any tendency toward souring. Lime, wood ashes, sheep manure and pulverized cattle manure, always applied sparingly, constitute the menu for our plants after they are "up and doing." Plenty of fresh air whenever it is possible to admit it, insures a healthy, free-growing plant. Not until October and November do the plants throw characteristic blooms, but if by January 1 each plant does not show several blooms cut, something is decidedly wrong, either with the variety or with the culture given.

#### NEW VARIETIES.

In regard to new varieties, we need them and they are interesting, and we must not forget that every variety that we grow was once an untried novelty. But it behooves every general grower to ascertain as far as possible the exact value of a new one before displacing an old one to make room for it in quantity. This national meeting is of inestimable value to carnation growers in that it shows just how well the standard varieties are holding their early vitality and position, and just what new sorts are surpassing their seniors in brilliance of color, perfection of form and in size. Only the finest and most productive sorts can in this day and time pay for standing room in the modern, up-to-date greenhouse.

#### The Chicago Carnation Co.'s Novelties.

Several fine new varieties of carnations are being grown this season by the Chicago Carnation Co., Joliet, Ill., some of which have already been described in our columns. One of the finest, which is not to be disseminated until 1911, is Washington, a Lawson-colored sport from Enchantress, which originated with Henry Eichholz, Waynesboro, Pa., and has been purchased by this company. Already several large shipments of cuttings, rooted and unrooted, have been received at Joliet and this variety will

be largely grown there for cutting this season. This company is of the opinion that there is no variety so easy to cultivate and so generally satisfactory all around for commercial and exhibition purposes as this, as it has all the good characteristics of Enchantress, from which it is a true sport, with the popular Lawson color.

Sangamo, Alvina, May Day, Conquest and Mary Tolman are also largely grown at Joliet. Conquest is winning prizes wherever shown. It has all the good points of the old Prosperity and is easy to handle, the flowers a pretty shade of light pink, overlaid with a deep rose pink, the stems stiff, the blooms large and well formed, while the color will not fade. Sangamo is a most prolific variety and comes into crop very quickly and very early. The color is brighter than that of Winona or Winsor and the flowers are prettily fringed. Mary Tolman is making good on all points claimed for it. It is a clean grower with upright, rigid stems and exceptionally fine flowers, a little deeper in color than those of Enchantress, with a trace of salmon. It is an excellent keeper and does not fade. May Day and Alvina are both on the small side, but are very beautiful flowers.

NEWELL, W. VA.—A new board of directors has been elected by the Lake Newell Floral Co.

## History and Uses of the Carnation.

BY W. T. BELL.

So many papers have been read and discussed at the various meetings of this society that the essayist who can add anything new on the subject of carnations will be almost as great a curiosity as a 6-inch carnation, but as it has been found to be a good plan in our schools to require the pupils to review the lessons previously studied, perhaps a general review of the subject that we have met to consider may be of advantage to all present and especially to those younger members of the society who are modest enough to admit that they do not already know all there is about it.

## DERIVATION OF THE NAME.

The carnation, or, to express the name in strictly botanical terms, *Dianthus caryophyllus*, is, according to Loudon, a native of southern Europe and has been found growing naturally in England. The generic name, *dianthus*, is compounded of two Greek words, meaning the flower of the gods, or the deity, which has led certain writers to call it the divine flower, a name that might well be exchanged for one more simple and comprehensible. The specific name, *caryophyllus*, has reference to the clove-like fragrance of the flowers, while the common name, carnation, has for its base the Latin word *carnis*, meaning flesh, in allusion to the pink or flesh color of the flowers in their wild state.

There are many different species in the genus *dianthus*, including the familiar sweet william, but the one that most nearly resembles the carnation in appearance, is the pink, with its several varieties. Where it grows naturally, the carnation has single flowers, about one inch in diameter, having but five petals, but variation, selection and cultivation have so changed its character that flowers four inches in diameter are now produced, having a very great number of petals.

## EVOLUTION.

The ordinary garden carnation is a hardy perennial that blooms but once a year, and the florist's carnation of today is undoubtedly the result of changes that have taken place in its habits through selecting and cultivating the most promising plants produced by natural variation, until now it may be had in bloom during the entire year, but in the evolutionary operation, it has lost a portion of its hardiness, probably because of the higher temperature to which it has been subjected for generations during the cold season of the year. This loss could perhaps be regained by reversing the process that brought about the change and gradually hardening the plant until it could withstand the rigors of our severe winters.

This change from summer blooming to perpetual blooming is not confined to the carnation, but has been accomplished in the case of other plants. *Chrysanthemums* have been grown from seed that was saved from the ordinary seasonal-blooming kinds that have developed into varieties that have

been had in flower every month in the year, and the rose is one of the most familiar examples of a plant that has been changed from an annual, to a continuous bloomer, through the treatment accorded to it under modern methods of culture.

## THE CARNATION'S POPULARITY.

The carnation flower today, and especially in this country, is the most popular flower produced by the florist, having overtaken and passed the old-time favorite, the rose, in the race for popular favor and, instead of being referred to as the divine flower, it might very truthfully be called the people's flower. To become really popular, a flower must possess several qualifications, the first of which is beauty, a somewhat undefinable and elusive quality. In addition, it should have a pleasant odor and be capable of being used in a variety of ways and for various purposes. Its texture should be such that it will remain in fairly good condition for a reasonable length of time, and its successful cultivation should be so simple that it can be grown and sold profitably at such a price that the ordinary flower-user can afford to buy it freely.

All these various requirements are possessed by the carnation, and, in addition, it may be procured at any time during the entire year. Roses, violets, lily of the valley, *chrysanthemums* and many other flowers will continue to have their admirers and will always be in demand when in season, but some of them are difficult to produce with profit, and the most of them are more expensive, bulk for bulk, than are carnations.

Several years ago at one of the conventions of the Society of American Florists an essayist seemed to think that in a few years orchids would become as plentiful and popular as roses, but the prediction has not, and will not, be verified, for two reasons: First, they are more difficult to cultivate and produce, and, second, because of this difficulty their prices will never become popular.

## THE OLD VARIETIES.

The development and improvement of the carnation have taken place within a comparatively recent time, both as regards the size, color and quality of its flowers, and the number of desirable varieties. Thirty or 40 years since the florist was confined mainly to such kinds as *Edwardssii*, *De Graw*, *La Purite*, *Miss Jolliffe* and *Astoria*. *Buttercup*, one of the best of the earlier yellows, although like most of the later kinds of that color, decidedly bizarre, came later and was followed by *Grace Wilder*, *Albertini*, *Mrs. Bradt* and a host of other slowly improving kinds, until the list of aspirants for a place on the carnation stage reached well up into the hundreds.

Daybreak, originated and disseminated by Simmons of Geneva, O., was one of the best and most profitable carnations of its day, which is now over, and was probably one of the progenitors of the fine variety *Enchantress*, and other kinds having the Daybreak shade of pink. William Scott was another easily-grown and useful sort, but it, too, is now eclipsed. While the carnation is not a native of this continent, certain writers speak of the varieties now in cultivation here.

CARNATION DOROTHY GORDON.

BASKET OF CARNATION DOROTHY GORDON.

collectively, as the American carnation, but a better term would be the American varieties of carnations, as they nearly all originated here.

At the royal show, held at New-castle-on-Tyne, England, in 1908, and practically open to all exhibitors, many vases of British carnations were shown, having, in the main, stiff stems and large flowers, but the flowers were nearly all of coarse texture, and the most of them had split calyces, and decidedly the finest carnations in the great show were those of American origin.

#### THE USES OF CARNATIONS.

Carnation flowers may be appropriately used on many occasions, and in a variety of ways from a single flower on a coat lapel, to the most elaborate floral design, or other form of decoration. They are welcomed in the sick room or the hospital ward, are suitable for the placements or the centerpiece for the dinner table, and clusters or sprays of the flowers, when arranged with taste and skill, in combination with a sufficient amount of suitable greenery, are much asked for and appreciated for funeral occasions, while no flower can be used to better advantage in a pleasing arrangement to place beside the door of the house where death has entered, in lieu of the somber crape. Because of their excellent lasting quality they are among the best flowers to use for sending a long distance, or when they are required to be kept for a considerable time before being used. If it were not for being so wasteful, many of the arrangements of carnation flowers would be improved in appearance if carnation buds and foliage were combined with the flowers.

#### Convention Notes.

H. B. Beatty, who knows all the recesses of the hotel, worked hard in getting out Boston voters.

The trip to the pickle factory attracted a great many of the visitors.

Enchantress exhibits have fallen off greatly in number and quality.

Wm. Falconer and Fred Burki have a fine quiet way of doing things.

A cup of Java, please, and a plate of Boston strawberries.

Ed Winterson solemnly declares he voted for Milwaukee.

E. G. Hill and Peter Fisher were among the missing.

Eugene Dailedouze says he doesn't like beans anyway.

The ladies say they had the time of their lives.

Wm. Nicholson might have voted for Milwaukee.

Pittsburg hospitality knows no bounds.

The S. P. C. had no meeting this year.

The mantle of Flora covers them all.

#### Flowers in the South.

ED. AMERICAN FLORIST:—

Can roses, chrysanthemums and other northern flowers be cultivated with success in Florida (Ocala)?

C. M.

The climate and the nature of the soil in this locality are decidedly against success. Marechal Niel and a few of the tea roses, especially Golden Gate, do well outdoors, but the hybrid teas do very poorly. Chrysanthemums have been tried in the open, but without success. Sweet peas, candy-tuft, Princess Alice stocks, etc., might do during the winter months; at least the experiment might be worth trying. If "C. M." means to grow in greenhouses, I should advise him to use ground beds of heavy soil about two feet deep and grow varieties like American Beauty, Kaiserin, W. R. Smith, Perle des Jardins and Meteor.

WM. LEAR.

SCRANTON, PA.—A donor, who wishes to remain anonymous, has provided the funds for a new greenhouse in Nay Aug park.

## THE RETAIL TRADE

### Pillow of Roses and Lily of the Valley.

SEE SUPPLEMENT WITH THIS ISSUE.

The pillow as a funeral piece is becoming more and more popular and there is room for much artistic work in its proper makeup. It does not appeal to the very cheapest class of trade as, no matter how economical the decorator may be, considerable stock has to be used. Still, if the flowers are kept well apart and plenty of green used a moderate priced pillow can be made that will give greater satisfaction than a tightly packed arrangement that uses up twice the amount of stock and does not look so well when finished. Lily of the valley is an especially suitable flower for pillows. It is light and graceful and associates well with any other flower that may be used while the pure dead white of the bells cannot clash with them no matter what their color. Roses, too, are especially suitable, especially white while the pretty fronds of *Adiantum gracillimum* lightly arranged over these or other flowers have a most charming effect. It is a great pity this beautiful fern is not more grown for use as an ornamental green.

But practically any flower that is in season may be used for a pillow. White carnations and bulb stock such as tulips and narcissi make a pretty combination for the present season when roses are scarce and high; sweet peas, when they are plentiful, asters, chrysanthemums in their season, indeed almost any class of flower may be used, the idea being to give a good general outline of the pillow without making this stiff or hard. Common fern helps out a lot, giving the raised appearance that is necessary. Good forms for the purpose can be had of the wire workers and it is comparatively easy to tie the flowers on these securely. As to the lettering, simple words may be lined out with immortelles or chenille on a groundwork of white carnations and the whole thing can be cheaply made when this is necessary or as much money as the customer wishes to pay can be expended by the use of orchids, violets and more expensive flowers.

### A Philadelphia Function.

ELABORATE DECORATIONS.

One of the swellest decorations of the Philadelphia season was for the Widener ball at the Bellevue-Stratford on Wednesday last. Of the many elaborate affairs for which this hostelry is noted, this last function has been given the palm. As Ed. Habermehl said,—and it is Habermehl's by the way, that do all the work at this hotel—"We are put to it to get something new every time. It is the same room and each ball is largely attended by the same people and each one wants theirs to be distinctive and not at all like the others."

The feature of this last success was that when one stepped on the ball-room floor they appeared to have been transported across the water, for the surroundings were transformed, Aladdin like, into a French garden or

large court yard. The balcony boxes, which give to the hall a theatrical effect, were all enclosed with a lattice work which, while each box was a structure in itself, were joined together, each alternate structure being of the same architecture. Part of the lower lattice was hinged and folded together like casement windows, all the frames being covered with a fine gauze, which gave the appearance of glass. Around the edge of the dancing floor was a dense hedge of palms and other foliage plants, leaving between that and the wall a fine promenade, from which glimpses of the dancing floor could be obtained. The ceiling was festooned with long garlands of wild smilax tied as is laurel, only made with long sprays. In the center an immense chandelier of gilded scroll woodwork, which, when decorated with smilax and artificial pink roses, and illuminated with electric lights certainly looked stunning and added much to the beauty of the whole.

The spaces about the boxes, the front and above the lattice work to the ceiling, so as to completely hide the walls, was covered with southern smilax. In this upper tier of green there were also suspended baskets of artificial pink roses. Just under the lattice windows, entirely around the balcony, was arranged a solid row of Lorraine begonias, making a distinctly pink effect. The color scheme was pink and white. Lorraine begonias were also massed on the stage, where banks of palms and ferns concealed the orchestra. Tall white columns, on which were placed cibotiums, were a feature here. At the entrances to the ball room floor and at other intervals were large floor vases and baskets

filled with Killarney, Maryland and Jardine roses; thousands of these were used. Baskets of Enchantress and other light pink carnations were also arranged at intervals along the front of the balcony to break up the straight line of begonias. The lighting effects were very fine, there being apparently thousands of additional electric globes covered for the most part with pink shades, all of which work was done by the firm's force of electricians. All the halls and passages, dining and other rooms, set aside for the guests, were elaborately dressed. Splendid specimens of cibotiums, plants of *Acacia pubescens*, of which this firm have the largest stock in the country, handsome azaleas and quantities of Easter lilies in pots were seen at every turn and the 100 separately decorated dinner tables combined to make this one of the most elaborately decorated functions ever given in Philadelphia and a great credit to the house of Habermehl.

K.

### The Week at Peaceful Valley.

A QUIET TIME.

Another quiet week from a business standpoint, and a trip through the Boston retail stores convinces me that the Peaceful Valley folks are not the only ones who feel it. As to the cause? Probably, partly weather, partly the effect of the slightly enhanced prices of flowers at this season, and, quite largely, the advanced prices demanded for the necessities of life. Where the head of a family is dependent on a salary or other fixed income, an advanced cost of food products leaves less money to be spent for flowers or other luxuries; and it is from this class that the bulk of our

NEW CARNATION PRINCESS CHARMING.

FLORAL PILLOW OF ROSES AND LILY OF THE VALLEY.

business must come. The trust magnates and the idle rich contribute but a small per cent to the florist's income. If they are flower lovers, they usually have their own conservatories. Our interests, as florists, are with the great body of middle-class business men and salary earners. Don't forget this in studying present industrial conditions.

#### THE TAX PROBLEM.

Interest is still active in the proposed taxation of florist's growing crops. At Framingham, Mass., the contents of William Nicholson's greenhouses were assessed at \$5,000; S. J. Goddard escaped with an assessment of \$3,000, while Tom Butterworth, of orchid fame, had his stock valued at \$4,000. To show the utter absurdity of such valuations, it is stated that the Nicholson greenhouses contained about 17,000 carnation plants and some other odds and ends of stock. The assessment, therefore, was at the rate of 30 cents a plant. Wouldn't you like to sell your old carnation plants at that price, about May 1? As a matter of course, all these growers declined to pay on any such assessment. There will probably be a stiff fight before the legislature before the florists will submit to this class taxation.

#### E. H. WILSON'S TALK.

"The Optimist" attended the January meeting of the Boston Florists' and Gardeners' Club last Tuesday evening. About 200 members and friends listened to E. H. Wilson, who gave some account of his travels in central and western China, illustrated by lantern slides. These views consisted of scenes along his route, showing the rough and mountainous country, and in some cases the flora of the mountain sides and ravines. Again the pictures were of the plains and valleys along the banks of the rivers, or of the people and dwellings in these remote provinces.

Mr. Wilson explained that the habitat of many plants was restricted to a small area, often only a mountain side or valley, and consequently that the possibilities of China's flora was almost inexhaustible. He described some of the new things discovered and sent home and their probable usefulness in this country. Many of the plants received from Japan in former years and credited to that country were really natives of these sections of China, and existed in Japan only in a state of cultivation. The present, perhaps, might be termed the Chinese era in horticulture. He described many of the introductions of his first Chinese expedition, largely herbaceous subjects, primulas, meconopsis, etc. The whole talk was very instructive and interesting, and at its close, the speaker received a hearty vote of thanks.

Mr. Wilson's name is now before the club as a proposed honorary member. He is well worthy the honor, which is not a trivial one, as the Boston club is rather conservative in this respect, having at present only two names on its honorary roll. This third name, which will probably be added at the next regular meeting, is one that I feel sure will reflect credit on the largest and one of the most progressive florist's clubs in America.

#### New Carnation Lady Algy.

This splendid new introduction was exhibited by A. H. Wingett at the meeting of the Lenox, Mass., Horticultural Society, January 15, and was unanimously awarded a first-class certificate. This is one of the most promising new varieties in sight; in color it is a pure salmon pink, not the washed out color that is sometimes called salmon. It has been the good fortune of the writer to see it growing this winter, and among a house containing the best varieties splendidly grown, Lady Algy attracted instant attention. It is a sport from Beacon, and when we say it has all the good qualities of its parent, growers will know that there is not much amiss with it; in fact, it almost seems to outdo Beacon in vigor and floriferousness. Several commercial florists, as

## OBITUARY.

#### Mrs. Janet Hale.

The death took place at Hamburg last week of one of the original florists of Buffalo, Mrs. Janet Hale, who had a store on North Division street about 30 years ago, with greenhouses at West Seneca. Mrs. Hale was one of the self-instructed florists who worked in it for the love of flowers really more than the money gained, afterward turning the business over to her son, Geo. D. Hale, who conducted it for several years, gradually going into the decorating business with palms, flowers, bunting, etc., which now, under the name of Hale & Son is the largest in western New York. In business, Mrs. Hale was one whom any one would like and respect, her quiet manner and pleasant smile always speaking a welcome to all.

CARNATION LADY ALGY.

well as a number of private gardeners pronounce it the best thing in sight. Certainly we do not know of anything to equal it, especially in attractiveness of color either by natural or artificial light. Mr. Wingett believes it has a future and is handling it on the most approved methods, propagating nothing but the best of cuttings. The illustration herewith gives a good idea of the fine stems that hold the flowers erect and show them to advantage.

E. J.

#### John J. Kuratle.

After suffering a year as the result of a cancer, John J. Kuratle, aged 51 years, died at his home, No. 1613 Franklin street, Wilmington, Del., January 14. Mr. Kuratle was one of the best known florists in that section of the country and by his theories and work greatly advanced horticulture. He was born in Switzerland and came to this country in 1883 and located at Edge Moor. Later, he removed to Wilmington.

## Enroute Around the World.

Adam Graham, Mrs. Graham and Miss Effie J. Graham, of Cleveland, will sail from San Francisco, February 5, on a tour around the world, visiting Honolulu, Japan, China, India and Europe, returning by way of New York. Mr. Graham, like his illustrious townsman, Andrew Carnegie, wants to spend most of his money in the full enjoyment of this grand old land of the living. He was born in Dunfermline, Scotland, April 17, 1840.

John T. Withers, of Jersey City, N. J., started on a tour around the world January 20, going via New Orleans, and sailing from San Francisco, February 5.

YOUR name is rightly booked in our Trade Directory—at least we suppose it is if you do not advise us. If you make any changes this season, please drop us a postal.

LUTHER BURBANK writes to the New York Times, January 17: "To be misjudged is a passing trifle; to have lost a life of honest, earnest labor is a tragedy." Luther Burbank's life and labors have not been lost; on the contrary no man who is acquainted with him personally and who is in position to know what his life work has been, but holds him in highest esteem. The Carnegie institution did not honor him, but he honored it in accepting the grant for furthering that work to which he had devoted his life.

THE Horticultural Society of St. Louis held its annual meeting January 19, and elected the following officers: E. Mallinckrodt, president; L. Matthews, first vice-president; D. S. Brown, second vice-president; J. H. Gundlach, third vice-president; R. F. Tesson, fourth vice-president; Henry Young, treasurer; Otto G. Koenig, secretary. Executive committee (11 members): Otto Koenig, (secretary); F. W. Bruenig, Theo. Miller, C. B. Nicholson, C. C. Sanders, F. H. Meinhardt, Emil Schray, Fred H. Weber, Geo. B. Windler, Henry Young, Rudolph T. Windt.

## American Carnation Society.

## CARNATIONS REGISTERED.

Bon Ami.—Queen X. Lady Bountiful. Pure white, size 3 to 3½ inches; strong open growth, stem very stiff, 24 to 30 inches long; early and continuous bloomer and seldom splits. Granite State.—Queen X. Key 426, care American Florist.

## Retail Store Man.

The advertiser, located in the south, wants a good man to take charge of the retail cut flower department. He must be fully competent to turn out high class design work and decorations. One who has a general knowledge of the seed business would be preferred, as the cut flower department is carried on in connection with a general seed business. A good salary to the right man. Address

Key 431, care American Florist.

## TO RENT.

A very rare opportunity of one of the most modern and up-to-date florist establishments of about 15,000 sq. ft. glass; hot water heat; Superior tubular boiler; entire place equipped with electric lights, cement walks and floors; work building 20x115 two stories 8-room modern flat; good established business; the convenience and accommodations to all transportation, etc. are too numerous to mention; they cannot be excelled; if interested an investigation will convince.

RICHARD F. GLOEDE.  
1405-1407 Central St., Evanston, Ill.

## Nursery Foreman.

I want a Nursery Foreman, married man preferred, for city nursery in Oregon; a man who understands the propagation and growing of nursery stock and must be able to superintend all outside work, care for customers, take orders, etc. This is a good place for an ambitious young man. Address

KEY 998, CARE AMERICAN FLORIST.

## NOTICE

Members of the Illinois State Florists' Association:

Notice is hereby given that at the next annual meeting, to be held at Urbana February 15 and 16, a resolution will be presented proposing to amend Section 8 of the Constitution to read as follows:

"The Association shall hold its annual meeting and exhibition on the fourth Tuesday of February at Urbana, Ill. Ten members shall constitute a quorum."

J. F. AMMANN, Sec'y.

## LANDSCAPE GARDENER (MALE)

ENGINEER DEPARTMENT AT LARGE.

MARCH 3, 1910.

The United States Civil Service Commission announces an examination on March 3, 1910, to secure eligibles from which to make certification to fill a vacancy in the position of landscape gardener (male), \$2,400 per annum, Engineer department at large, Washington, D. C., and vacancies requiring similar qualifications when they may occur, unless it should be decided in the interests of the service to fill the vacancy by reinstatement, transfer, or promotion.

The examination will consist of the subjects mentioned below, weighted as indicated.

| Subjects                                            | Weights |
|-----------------------------------------------------|---------|
| 1. Practical questions.....                         | 30      |
| 2. Educational training (rated on application)..... | 20      |
| 3. Experience (rated on application).....           | 50      |

Total..... 100

The position to be filled is one requiring exceptional qualifications, as its duties include the designing, laying out and planting of most of the city parks of Washington, D. C., and general supervision over the propagating gardens and greenhouses. It is desired to secure a person who has had the technical education and training of a landscape architect, with several years, at least, of practical experience in work of a character similar to that required in the position to be filled.

The applicant's statements in the application regarding his Educational training and experience (Form 1312, questions 18 and 20, edition of October, 1909) must cover the following:

18. Give a statement of your general education and training, with special reference to work in botany, floriculture, and landscape gardening, giving the names of the institutions at which you have studied, the time spent in each (giving date), courses of study pursued, and the degrees conferred, if any.

20. Show fully and in detail all your experience in nurseries, parks, or arboreta; experience in the designing of parks, pleasure grounds or home plantations, and experience in the composition or planting of such places. This statement should show when (giving dates), where, and by whom you were employed, and the specific nature of your duties in each case. If you have designed or laid out any park or estate or done work of a similar character, copies of your designs should be submitted.

Men only will be admitted to this examination.

Age limit, 20 years or over on the date of examination.

This examination is open to all citizens of the United States who comply with the requirements. This announcement contains all information which is communicated to applicants regarding the scope of the examination, the vacancy or vacancies to be filled, and the qualifications required.

Applicants should at once apply to the United States Civil Service Commission, Washington, D. C., for application Form 1312. No application will be accepted unless properly executed and filed with the Commission at Washington. In applying for this examination the exact title as given at the head of this announcement should be used in the application.

As examination papers are shipped direct from the Commission to the places of examination, it is necessary that applications be received in ample time to arrange for the examination desired at the place indicated by the applicant. The Commission will therefore arrange to examine any applicant whose application is received in time to permit the shipment of the necessary papers.

Issued January 24, 1910.

American Beauties, Roses, Carnations.

PRICE LIST

Chicago.

STOCK STILL BELOW DEMAND.

Carnations have been coming in more freely and of excellent quality. They are about equal to the demand now, and although the price has eased a little, the best flowers are easily worth three cents, with smaller flowers at corresponding rates. On Saturday, stock of all kinds was well cleaned up and everybody was well satisfied with the volume of business done. Roses were decidedly scarce and the prices soared again. One thing we noted was that growers were not cutting the flowers so tight as they usually do in times of scarcity, apparently being wise to the fact that their interests lie in the other direction. White was again at a premium and the scarcity helped to move large quantities of Paper White narcissus and similar stocks for the cheaper class of funeral work. Violets have been moving better and there has been an active demand for gardenias, sweet peas and other flowers for street wear. Quite an exceptional demand is reported by some retailers for funeral work, especially in the way of bunches of white and colored carnations. Mignonette is in good shape, fine fresh-looking spikes and good foliage. Freesias are arriving in large quantities, very fair stock, also tulips, jonquils and other bulb stock. In orchids cattleyas have not been quite so much in evidence, but we noted a number of late Cypripedium insigne. Greens and galax are selling well and there is a good supply.

CARNATION CONVENTION VISITORS.

The following were among the visitors to the carnation convention, who left the Union depot over the Pennsylvania, Tuesday, January 25, at 5:30 p. m.: Fritz Bahr and wife, Highland Park; E. F. Winterson and wife, Carl Cropp, W. N. Rudd, C. W. Johnson, Geo. Asmus, J. A. Valentine, Denver, Colo., C. L. Washburn, Nic. Zweifel, Milwaukee, Wis., Aug. Poehlmann, J. French, A. T. Pyfer, Joliet, Peter Olsem, Joliet, H. V. Hunkel, Milwaukee, Wis., and M. Barker of the AMERICAN FLORIST.

NOTES.

Mrs. Moore, of the Flower Growers' Market, met with an alarming accident when going home January 17. The bus in which Mrs. Moore was being

## "THE LINDENS" GREENHOUSES

A. H. & W. S. SCHULTZ

Killarney  
The Bride  
Bridesmaid

261-273 Rosedale Avenue  
Telephone 19-R.

Madison, N. J., Jan. 20, 1910.

APHINE MANUFACTURING CO.,  
Madison, N. J.

Dear Sirs:—

Having just made comparative tests between Aphine and fumigation for our own information and benefit, we think you will be interested in the results.

For green fly on our rose plants we used Aphine as directed, 1 to 40, applying with an auto spray; choosing sunny days, and using a fine spray. We carefully sprayed the plants early in the morning. In a few minutes the fly began to drop, and later when we syringed with the hose we found the plants well rid of fly. In addition we found no discolored buds as in fumigating, but what attracted our attention, the foliage seemed to be improved and invigorated.

From a financial standpoint it costs us \$3 and \$4 to fumigate 2000 lineal feet of rose-houses each time, whereas we would only use a half gallon of Aphine for the same purpose.

The results have shown us that Aphine is higher in efficiency and lower in cost than fumigation.

Yours very truly,  
A. H. & W. S. SCHULTZ.

The manufacturers of Aphine guarantee a uniform product at all times, (if used strictly according to directions); that it will do all that is claimed for it and more.

**\$2.50 per Gallon.**

**APHINE MANUFACTURING CO., Madison, N. J.**

If your supply house does not yet handle Aphine, write us for names of our nearest selling agents.

driven to the Union depot collided with a street car and she was pinned in among the wreckage of the bus, not being able to extricate herself until this was lifted off. Mrs. Moore was badly bruised about the hip and has suffered severe pains in her back and nervous shock since the accident. She was, however, obliged to come to business on Saturday against her doctor's orders.

John Mangel reports excellent business, notwithstanding the high prices and scarcity. He is showing elegant bulb stock, such as tulips in rustic baskets, and his gilt boxes, filled with Lorraine and other begonias, make quite a hit with his customers. Fine stock in all the popular varieties of roses is used here in large quantities, as well as smaller stock, which has

been in great demand for funeral work.

Wiator Bros.' stock is coming in excellent shape, their Beauties, Mrs. Jardine and Richmond roses, as well as carnations in all the popular varieties, being of the best. N. Wiator says they are going to cut out Bridesmaid entirely this season, making up the deficiency in numbers with Killarney, Mrs. Jardine and other pinks. Bride will still be grown and a big stock of White Killarney.

Kyle & Foerster are especially strong on good bulbous stock this week though all classes of flowers are well represented. We noted fine LaReine tulips, lily of the valley and freesias more particularly. Evidence of progress is shown in the installation of another telephone, also a second dupli-

# :: Easter Lilies ::

We are cutting an average of one thousand lilies per day, very choice stock, long stems, large flowers and fine foliage. They are the best flowers in the market and are in great demand during this shortage of Beauties and Roses. We are selling them at \$15.00 per 100 or \$2.00 per dozen. Buy direct of the grower and get fresh stock. **American Beauties, Roses, Fancy Carnations, Tulips, Daffodils, Lily of the Valley, Easter Lilies and Greens.**

Write us for our weekly price list if you are not receiving it. We keep you posted on the flower market.

## Bassett & Washburn

Greenhouses: HINSDALE, ILL.

cate cash machine, both of which were needed to handle the push of orders at busy times.

"Quality counts" is John Kruchten's motto, and he is keeping up to it. His stocks of carnations, roses, and all popular flowers and greens is always of the highest order, and he has been kept hustling filling orders this week for this class of goods.

Bassett & Washburn are cutting heavily on O. P. Bassett carnation, and this fine red brings good prices notwithstanding the drop in other reds. Easter lilies also continue to arrive in large quantities daily from the greenhouses at Hinsdale.

Among the finest stocks of Killarney seen during the week, that of Weiland & Risch should be noted, good flowers in all lengths of stem being shown. This firm is also cutting out Bridesmaid this season, Killarney and My Maryland being the chosen pink roses.

Good carnations in all the popular varieties, and plenty of them, have formed the feature at Peter Reinberg's during the week. Beauties are also coming in excellent shape and the cut in all lines is getting larger and better right along.

Vaughan & Sperry have been showing remarkably good Beauties, their growers being right in crop, with prospects good for a continuance. The whole of the cut from some of the best known growers at New Castle, Ind., is consigned here.

The carload of cannas consigned to Winterson's Seed Store last week opened up fine, the roots being in splendid condition. Many were ordered beforehand and are being shipped out and orders for popular varieties are coming in rapidly.

At a meeting of the stockholders of the Flower Growers' Market, January 21, the following board of directors was elected: Alex. Henderson, John Sinner, Walter Tonner, Hertha Tonner and Frank Beu.

Roy Wilcox is likely to use up the cut of the famous Council Bluffs plant as well as large consignments from Chicago on January 31 when he joins the army of benedicts.

At the "busiest house in Chicago," J. B. Deamud Co. is selling everything in sight. Particularly good freesias were noted all the week and they cleaned up daily.

Poehlmann Bros. Co. has been keeping its customers going with good

## "The Busiest House in Chicago"

**W**HAT we want to impress on you is that, no matter what the condition of the market, you will always get the best that can be obtained on the market if you buy your stock of

**J. B. DEAMUD CO.**

stock, but there is no surplus. It has, indeed, been difficult to fill all orders.

Singler Bros., Morgan Park, are reported to have suffered considerable injury to their stock through the bursting of a gas main January 23.

Geo. Reinberg is fortunate in having an excellent cut of Bride roses on at this time of scarcity. Richmond is also coming in fine shape.

D. D. Johnson Co. reports excellent sales of the Evergreen brand fertilizer and that the jobbers are taking up this valuable manure with spirit.

C. W. McKellar, in addition to fancy stocks of gardenias, mignonette and others has been offering fine Cypripedium insigne all week.

Herman Fortman is sending nice stock into the market daily from his greenhouses at Rogers Park, principally carnations.

Joseph Ziska reports great activity in florists' wire work, large and unusual designs being most called for.

S. Muir reports business excellent at both his stores, funeral work being very heavy.

Visitors: J. A. Valentine, Denver, Colo., enroute to the Carnation Society's convention at Pittsburg; Harry Fisher, Kalamazoo, Mich.; J. A. Lisey, Davenport, Ia.; Adam Graham, wife and daughter, Cleveland, O.; Emile Glauber, Montclair, Denver, Colo.; C. W. Scott, of Vaughan's Seed Store, New York; Carl Hirsch, Hillsdale, Mich.

### BOWLING.

The Violets won three games from the Carnations on Thursday evening. In the middle game the last frame was left to the last man on each team, Yarnall and Allie Zech. With the first

# Beauties, Violets, Daffodils, Carnations, Valley.

**Killarney** White and Pink. The finest stock on this market; our growers have made a lucky hit on these popular varieties.

**Tulips** La Reine, Yellow Prince and others. Fine stock, long stems. Large supplies received daily.

**Jonquils** A good supply of fresh stock in the best and most popular varieties arriving regularly.

Our growers are in good crop with the finest long stemmed, medium and short Beauties. Let us hear from you.

**Brides and Maids** We have taken care of our customers through the scarcity and can continue to do so.

**Mexican Ivy** This popular long lasting green in any quantity; always fresh and bright.

**Violets** We are taking orders now for **St. Valentine's Day**; Everybody wants violets for this occasion.

Write for Special Prices.

## VAUGHAN & SPERRY, Wholesale Florists, 52-54 Wabash Avenue, CHICAGO.

ball each man left a pin standing. Zech missed his spare and Yarnall picked his up, thereby winning by seven points. This took the life out of the Carnations; they went "sleepy" and the Violets breezed in by almost 100 pins. The teams now stand: Violets, 1; Carnations, 2; Orchids, 3; roses, 4. This week the Violets meet the Orchids and the Carnations the Roses. A number of substitutes rolled on alleys 5 and 6. E. F. Winterson being the bright and shining star. Spares and splits looked alike to him and he cut down even railroads with the same easy grace and sangfroid. We are not quite sure about this expression, but think it is all right.

### Illinois State Florists' Association.

Especial interest is being taken in the coming fourth annual convention of the Illinois State Florists' Association, to be held at the seat of the University of Illinois, Champaign-Urbana, February 15-16. Preparations are well under way to make it one of the most interesting sessions of this growing young society, and for certain excellent reasons it deserves to be the most largely attended convention yet held by the state association.

Comparatively few florists over Illinois have visited the fine experiment station for floriculture on the ground of the College of Agriculture of the State University. It is a model in all respects—as nearly perfect in its plan and as complete and modern in its equipment as one might find in many a day's journey. As an object lesson for future building, the florists of the state ought to make use of this very favorable opportunity to go and see it.

The headquarters during the convention will be the Beardsley hotel, in Champaign. The banquet will be held there Tuesday evening, February 15, taking the place of supper, and beginning shortly after the regular supper hour. The sessions of the convention will be held in Morrow hall, in the agricultural building, on the university campus. But a few paces from the building, stands the beautiful new auditorium, in the foyer of which will be held the exhibition of cut flowers and novelties. It has been decided not to hold a show of

heavy trade exhibits, this being advised by the authorities of the university. All the florists who have it in their power to show anything in cut flowers which will add to the effectiveness of the display should lend their assistance. There are over 4,000 young men and women in attendance upon the various departments of the University of Illinois, and more than 400 members of the faculty of instruction. Surely such an educational opportunity will not be lost by the progressive florists of Illinois. Stock should be much more plentiful than at present by February 15, and even though the date follows so closely upon St. Valentine's day, it is urged that a creditable exhibit must be made in this great educational center, even if obliged to buy some select stock for the purpose. Let everybody lend a hand and give these twin cities a surprise in the extent and quality of the exhibition. A meeting of the executive committee of the association is called to meet in Chicago the first week in February to work up interest in the attendance at the convention and in the exhibition.

The state officers and the local management in the twin cities are working hard to make the convention a great success, and they will appreciate the cordial support of florists in all parts of the state. Only with this can a successful session be had. The officers are C. E. Gullett, Lincoln, president; George B. Franks, Champaign, vice-president; J. F. Ammann, Edwardsville, secretary; Frank L. Washburn, Bloomington, treasurer.

### Mediterranean Cut Flower Trade.

The creator of the Mediterranean flower trade with England was Albert Hernu, one of the founders of the French chamber of commerce. It is a marvel of organized expedition, and he was decorated for it with the Legion of Honor when M. Loubet came to London. He arranged for a collecting train to run along the coast from Menton-Garavan, and after years of urging induced the Paris, Lyons and Mediterranean company to add flower vans to their rapid passenger trains coming north. They now share with the Campagne du Nord and the Southeastern a seasonal revenue exceeding \$450,000, for in 15 years the consignments have increased from 15,000 to 500,000 packages. Not even the mails travel faster than these flowers. It is the Boulogne mail boat they catch at 8:30 p. m., and they are on the market 36 hours after leaving Marseilles. Puck did better, it is true, but this is fast enough to keep them fresh. They travel in small flat baskets or light boxes, two feet square and six inches deep, and the charges for each 11-pound package from Nice to Boulogne is 16 cents; from Boulogne forward 20 cents. British rates are heavier all round.—Pall Mall Magazine.

## Philadelphia.

## AMERICAN BEAUTY ROSES SCARCE.

The feature of the past week was the scarcity of roses. Beauties appear to be taking a vacation, there being a very small stock of this variety on hand. The orders of the day are always ahead of the supply and the retail men are very careful about taking orders for this rose; \$7.50 per dozen is asked for specials. Even the pink rose stock, which has been so plentiful, is scarce, Killarney and My Maryland being very much off crop, with prices up about 33 per cent. Golden Spur daffodils are now to be had in quantity. Freesia is more plentiful, while sweet peas are in good supply and very popular with buyers. White and yellow tulips are now offered in all the houses. Violets are scarce, but with "signs of relief," as the growers say. Quantities of buds are ready to open with a little sun. Cattleyas are a shade easier, 60 cents now being the price. Easter lilies are fairly plentiful, as are callas, there being a good demand for both.

## NOTES.

The event of the week was the opening of the Century Flower Shop No. 2 at Fifty-second and Walnut streets, West Philadelphia. The store presents a very attractive appearance, having two large bulk windows; the interior, about 30 feet long by 15 deep, is very light. Every inch of space was utilized and the various tables, stands and counters were covered with attractively arranged plants and vases of cut flowers, every article or group of a kind, having its price tag prominently shown. The feature and policy of the store is to sell all kinds of florist stock, plants and flowers at low prices. The windows were nicely decorated with stock ready and priced for sale. A prominent sign announced that "at last West Philadelphia had an up-to-date flower shop," which statement is apt to grate a trifle on the nerves of a few of those now some time in the field and who believed they kept their weather eye on the calendar. A souvenir was given out to all customers and visitors, and the business of the first day was reported as very satisfactory. John Holland, of the Century Shop, is in charge, with several assistants. Competition is the life of trade and this newcomer will undoubtedly make the rest of the boys put their best foot forward.

Dennis Connor, for Lord & Burnham, has closed the deal with the Joseph Heacock Co. for the new rose house, 55x600 feet. The ridge will be 23 feet 6 inches high and will have ventilators on both sides of the peak. There will also be side ventilation below the eaves. The house is to be completed by May 15 and will be up-to-date in every respect, having all the latest wrinkles in greenhouse construction, prominent among which will be the shadeless ridge, the southern slope being nine feet longer than the back. That this is but the beginning of a large plant is evidenced by the boiler capacity, there being installed two 100-h. p. return tubular boilers. At Wyncote, Dorothy Gordon carnation is now the feature and those who wish any of this fine variety will have to be quick, as orders were booked last week in lots of 5,000 each, with every mail adding to the list.

At the Niessen establishment *Acacia pubescens* is the novelty, the beautiful sprays of which will now be used for fancy table work, for which purpose there is nothing superior.

McKissick's violets are now much in demand; their large singles and doubles (local) are among the best in the market.

John McIntyre is still busy with white lilac and finds a good demand for all his grower sends him.

K.

## Boston.

## A QUIET WEEK.

The past week has been rather quiet; there has been no great amount of stock coming in, although roses and bulbous stock are more plentiful. There is plenty of funeral work. Killarney, Chatenay and My Maryland roses are all coming in in fine shape now; Bride and Bridesmaid are also showing up well, but are not in such good demand. There is a little shortage of good Easter lilies and some of the growers are cutting their stock much too tight to give satisfaction. An abundance of freesia of the finest quality is coming in and sells on sight. Golden Spur is coming down a little in price, but sells well. Violets are very plentiful and drag a little at times. Cut adiantum is extremely scarce and is coming in in very limited quantities. Cattleyas are more plentiful, but the price holds up. There is an abundance of good lily of the valley. The increasing demand for rose geranium during the winter has led several growers to take up growing it. Wallflowers are gaining favor steadily. There is a marked shortage of good Beauties and the prices are up from last week's quotations. Sweet peas in all colors are coming in more plentifully.

## NOTES.

The Gardeners' and Florists' Club held its monthly meeting January 18. The meeting was well attended and the features were a lecture on "Plant Collecting in the Heart of China," by Prof. E. H. Wilson, and the installation of officers for the coming year. The new officers are: J. W. Duncan, president; Peter M. Miller, vice-president; W. N. Craig, secretary; E. Hatch, treasurer.

Adiantum Farleyense, as grown by A. N. Pierson, of Cromwell, Conn., is amongst the most desirable plants the retailer can use. The plant itself is a thing of beauty and the fronds can be cut and used to advantage in many ways.

H. A. Wheeler & Co., of Newton, are making arrangements to add a new house to their plant. This firm is one of the largest specialists in orchids in this part of the country.

S. Goddard, of Framingham, is sending some exceptionally fine freesia to market. This stock is handled by Salesman Pegler and is sold before it reaches the market.

The Waban Rose Conservatories are not giving the space to American Beauty that they have in former years and the crop is proportionately smaller.

The double violets of L. Smith, of Tewksbury, are especially worthy of mention. They have been of fine quality from the first of the season.

The N. F. McCarthy Co. is handling an extensive line of florists' supplies and specialties and report trade as being good.

Welch Bros. are handling a large quantity of fine gardenias and report sales as being most satisfactory.

The pansies coming in from Ward, of Quincy, are well up to the standard of former seasons.

R.

BUFFALO, N. Y.—Chas. A. Brownell will start in the growing business here this year, intending to have his greenhouses ready by October. Ernest Stillman, late with Levant Cole, of Battle Creek, Mich., will be associated with Mr. Brownell.

## Washington.

## A BUSY WEEK.

We have experienced an unusually busy week, all hustling with decorations or funeral work. Stock is coming in fast, and in good shape, but it is being used up quickly, and in some instances there has been a shortage of some special colored rose or carnation.

## NOTES.

An unusual demand for orchids, lily of the valley and violets was created, owing to the death of Senor Joaquim Nabuco, late ambassador to the United States from Brazil. The services were held at St. Matthew's church and were attended by President and Mrs. Taft, the diplomatic representatives of every nation, the cabinet, members of the United States supreme court, and most distinguished representatives of America's legislative, official and civilian life. The floral offerings were so numerous and so massive that they could not be placed close by the catafalque nor before the altar rail as usual. One of the most conspicuous, both for size and beauty, was the wreath sent by the Bureau of American Republics. As in all the other wreaths and emblems in the church, the orchid, which is the national flower of Brazil, predominated. The tributes represented nearly every country of North and South America and many of Europe. Among the chief tributes were those of President and Mrs. Taft. Secretary of State and Mrs. Knox, President of Brazil, Secretary of State of Brazil, Republic of Chile, Portuguese legation, diplomatic corps of Washington, Republic of Mexico, Republic of Venezuela, Senor Quesada, minister from Cuba to the United States, Secretary of the navy and Mrs. Meyer and Mrs. Richard Townsend. Most of these designs were of the Roman style, and decorated with orchids, lily of the valley and violets, and in each arrangement they were entwined with the colors of the countries represented and the American colors. It is said that the amount of flowers used and tributes sent almost equaled that of the late President McKinley.

Geo. C. Shaffer executed the table decorations for the dinner given by Governor Magoon of Cuba at the Alibi club. The feature was a huge centerpiece of poinsettias and Easter lilies. A china fern dish filled with ferns and a poinsettia was placed at each plate, to be taken home by the guests as a souvenir.

Charlie Davis and H. C. Summers are breaking the record of the flower market with yellow and white marguerites.

J. D. Blackstone has had a busy week with funeral work and decorations.

The Gude Bros. Co., reports one of the busiest weeks of the season.

The Washington Florist Co. claims business could not be better.

Visitor: W. Van Court, of Pennock-Meehan Co., Philadelphia; representative of Reed & Kellar, of New York.

G. S.

RED BANK, N. J.—The sixth annual dinner of the Monmouth County Horticultural Society was held January 20 at the Sheridan hotel, and was a very enjoyable affair, being attended by 80 members and friends.

KANKAKEE, ILL.—Raasch Bros. have purchased five acres of land and will build a new greenhouse, 47x200 feet, for carnation growing. Both brothers are growers of experience and will grow for the Chicago market.

## Bulbous Stock

### TRADE FAIR.

A great January thaw, which continued throughout the past week, has practically obliterated the evidences of the great snowstorm. The cut-flower business of the past week has been moderate, not as good as we should have reason to expect at this season. It is a fact that, at the present time, the great majority of the people of this city are more concerned about the price of food than the price of flowers. Arrivals of cut flowers were not heavy during the past week, but there was more than enough to supply all demands. Very special American Beauty roses held up to 75 cents each, but many of inferior grade sold for from 40 to 60 cents. There has been a great quantity of inferior stock of all varieties of flowers on the market and prices have ruled according to quality. Good tea roses are usually good sellers, but many have been selling for less than they should bring at this season. There are splendid exhibits of cattleyas in the wholesale stores, but many of them are being practically sacrificed. Lilies, which a few weeks ago were up to 15 cents per flower, are now hard to move at 10 cents. There is some improvement in the quality of yellow narcissi and tulips, but not as much as we should have reason to expect at this season. Good stock of these varieties bring good prices, but is scarce. Carnations are holding their own. Violets are pouncing along in the usual way, with thousands of them in the hands of the street vendors.

January 24.—While business is not heavy, there is a fair demand, with plenty of stock to fill it. The weather continues moderate and favorable for business. A better quality of tulips and yellow narcissus is now arriving. Both lilies and lily of the valley are rather slow.

### NOTES.

The finest house decoration that has been seen in this city this season was executed by Alexander McConnell on January 18, for a house-warming given by George Gould and wife at their new residence, 857 Fifth avenue. It consisted largely of cattleyas, oncidiums and American Beauty roses. Three thousand orchids and 1,500 American Beauties were used in the decoration. A commendable innovation was the placing of the flowers on elevated

tables so as not to obstruct the view of the guests. There was an elaborate background in Alabama smilax and Cyathea medullaris. The whole was arranged in such a manner as to produce a fine tropical effect. Much credit is due Andrew Scott, decorator for this store, for his successful work.

A meeting of the executive committee of the American Rose Society was held in this city last week. The committee of the New York Florists' Club, of which Walter F. Sheridan is president, appointed to make suitable arrangements for the approaching convention and exhibition, also held a meeting. While we are not authorized to give particulars, it may be definitely stated that all who attend the convention and show will thoroughly enjoy themselves and go home convinced that "little old New York" can rise up to the emergency and cave in the emergency's head.

The next regular monthly meeting of the Florists' Club will be held in the Grand Opera house building on the evening of February 14, and the special feature will be "Carnations." Ladies are invited, and also those in the trade not members of the club, but who are interested in the carnation. Valuable prizes have been donated by Vaughan's Seed Store, Reed & Keller and the Stump & Walter Co.

On January 24 H. D. Darlington filled an order from Pennsylvania for a lot of his celebrated erica, to be used as a decoration for a banquet given by Scotchmen.

Eugene Dailedouze, of Flatbush, Chas. Weber, of Lynbrook, and Wm. Enggren, of Aqueduct, have gone to the carnation convention at Pittsburg.

Maurice Rosenblum, 909 Second avenue, was married January 22 to Miss Mary Green, daughter of Daniel Green, of Paterson, N. J.

J. K. Allen says that January 22 was the busiest day he has had for many years and that he was completely sold out.

The fine orchids handled by Traendly & Schenck continue to be features of the wholesale district.

CLINTON, IND.—J. H. Ricketts has again leased the Sunnyside Floral Co. of Herman Raabe and has possession. Mr. Ricketts has been running a store at Numa. Mr. Raabe will for the present be in a store in Terre Haute.

## Buffalo.

### ROSES SCARCE.

The weather has been very cold and inclined to snow. Trade is very good and stock scarce, this being especially noticeable with roses. Violets, lily of the valley, sweet peas and carnations are equal to demands. McKinley day, which falls on Saturday this year, should create a demand for his favorite flower. Weddings have been numerous, but decorations not very large. Receptions have taken a rest and several large banquets gave leading retailers some nice table work.

### NOTES.

Novelties noted at a recent funeral of one of our prominent people were a bunch of white roses and, for a background, a large piece of pink Porto Rican matting, extending about six inches outside of the ferns and roses.

S. A. Anderson had a fine window last week, spring flowers of all kinds including pussy willow and yellow daisies being shown. All in all it was a stunner.

R. A. Scott is confined to his home with an injured knee; we trust he will soon be around.

### BISON.

### Our First Botanical Garden.

The first botanical garden in America was established near Philadelphia about 1730 by John Bartram, a Quaker, who was also the first native American botanist. It was a small affair (the entire property comprised only five acres) and a part of the limited space was occupied by the house, built by his own hands; but the garden was a remarkable project, indeed, for those days, and is known to have contained many choice specimens.

William Bartram, son of John, is perhaps better known as a botanist because of the fact that his account of his extended travels in the southern Atlantic states was published and contains many important observations upon the plants of the regions explored by him. He maintained the garden established by his father and after his death the property remained in the hands of owners who were deeply concerned in its preservation for many years.

During a short period of neglect serious damage was done to the old

garden, but within the last 20 years it has become the property of the city of Philadelphia, and is now a city park. According to the Journal of the New York Botanical Garden, its collection of trees and shrubs has always been notable, and the old house is still in an excellent state of preservation.

 bronze, good lengths, 4.00 per 1000

Discount on large orders; quality strictly guaranteed.  
**The Tuscaloosa Evergreen Co., Sylva, N. C.**

### Flower Names.

It is interesting to know how certain flowers get their names. Many were named after individuals. For instance: fuchsias were called so because they were discovered by Leonard Fuchs. Dahlias were named after Andre Dahl, who brought them from Peru. The camellia was so called for a missionary named Kamel, who brought some magnificent specimens of the flower to France from Japan. He called it the rose of Japan, but his friends changed it to camellia. Magnolias were named in honor of Prof. Magnol of Montpellier, who first brought the beautiful tree to France from America and Asia, says the Washington Times. Trembling in the wind is the meaning of anemones. The Latin word to wash is lavare, and lavender received its name because the Romans put the flowers into water when they wished to perfume their hands.

Southern Wild Smilax:

**E. A. BEAVEN, Evergreen, Ala.**

FREEMONT, ILL.—All the glass in one of the greenhouses belonging to John Bauscher, Jr., was broken down January 15 on account of the great load of snow it supported. The snow forced the glass in for a distance of 310 feet, entailing a loss of from \$300 to \$400. Mr. Bauscher states that the cause of the accident was his inability to get coal to keep the houses warm enough to melt the snow.

SCARCITY OF STOCK.

Business continued good after the holiday rush, up to a few days ago, when things quieted down considerably. All kinds of flowers have been selling at Christmas prices, owing to a great scarcity, due to the extremely cold weather, the thermometer registering several nights as low as 22° above zero. As many of the growers are not prepared for such cold, most of the soft wooded plants, even under glass, when without artificial heat were frozen, especially such as cinerarias, heliotrope, asparagus, etc. All the late chrysanthemums grown in the open by the Chinese, turned black from the frost; this causes a great scarcity of cheap flowers for funeral work. Should the weather continue cold all kinds of stock will continue scarce for some time to come. For-mosum lilies are making their appearance in the retailers' windows; they are of good quality and sell well.

NOTES.

H. Plath, president of the California State Floral Society was recently presented with a very handsome diamond stick pin, by the members. The society proposes to distribute at its future meetings, plants, seeds and bulbs free of charge amongst the school children of the city, also offering prizes to encourage and foster the love of flowers amongst the children. Any one wishing to help this society along in its good work is requested to send contributions to the secretary, Mrs. H. P. Tricou, 852 Grove street. This society is the oldest of its kind on the Pacific coast composed mostly of amateurs. Before the advent of the Pacific Coast Horticultural Society it was the only one holding annual exhibitions of flowers in this city some of which were carried out on a large scale and were very successful.

At the annual meeting of the Pacific Coast Horticultural Society the following officers were elected: V. Matraia, president; John R. Atkinson, vice-president; T. F. Taylor, corresponding secretary; F. Grimshaw, financial secretary; D. McLaren, treasurer. Eight candidates were elected to membership. The society will hold its annual banquet at the new Palace hotel and it promises to be a very enjoyable affair. F. Pelicano, V. Matraia, J. R. Atkinson, D. McLaren and D. MacRorie are on the committee of arrangements.

Landscape gardeners are reporting business as very good. F. Taylor has refused several large contracts lately, not being able to get enough competent help.

RETAILERS BUSY.

There was a good trade last week in all lines, but funeral work was most in demand, and that of the better class. Some really original work of high class is being exhibited by some of our retailers, and this certainly is a step forward. The supply of cut flowers has been somewhat short lately, also the better class of pot plants, for which there has been a steady sale since the holidays; violets are beginning to get plentiful, also sweet peas and most of the bulbous stock with the exception of yellow daffodils, which are very scarce. The growers are active preparing the Easter stock; being so early considerable anxiety is felt as to the black stem Lillium giganteum being on time. This lily is thought to be the most profitable to grow. There will be a large variety of roses seen, both double and single, and the newest.

The annual dinner of the Gardeners' and Florists' Club was held January 20 at the Edinburgh cafe. It was the most successful in the history of the club; about 55 members were present. The after-dinner speeches were kept to the subject assigned to each speaker and the singing was first class. The following toasts were responded to: "Our Country," by Prof. Lochhead, of Macdonald College, who strongly recommended education and co-operation; "Sister Societies" was responded to by W. C. Hall, secretary of the Canadian Horticultural Society, and A. J. Bowles, of the Montreal Horticultural Society; R. W. Whiting spoke on "Private Gardeners." Ald. James McKenna on "The City Parks"; G. A. Robinson for the florists and R. S. Pinkerton for the seed trade. Songs were rendered by A. Ferguson, F. Allan, A. J. Bowles, J. Pidduck, E. Heyward, W. C. Hall and J. Pennington.

Carnations are rooting well this year. One firm has already their whole supply struck. A new seedling by Hall & Robinson named Outremount looks to be a winner, but will be tried another year.

Harry Eddy, a private gardener, 32 years of age, died of typhoid. He was a son of John Eddy and a well-known member of the Gardeners' and Florists' Club. He leaves a young wife but no children.

S. S. Bain, who spent a week in Toronto visiting, speaks highly of the hospitality received there.

LUCK.

Fred E. Cotton, N. B.

The weather is seasonal, bright and cold, 26° below zero January 14. Stock looks well and we are selling quite a lot of red geraniums, a fad borrowed from St. John. We happened to have quite a nice bench of S. A. Nutt in good order so are reaping the benefit. Yellow daffodils are in demand.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

J. W. EDMUNDSON, of the Braslan Seed Growers' Co., San Jose, Calif., visited Cincinnati this week.

C. E. KENDEL, Cleveland, recommends Nitro-Culture for sweet peas, inoculating the seed before sowing.

BIDS will be received by the United States Department of Agriculture up to February 4 on surplus vegetable and flower seeds which can be supplied up to September 1, 1910.

CHICAGO.—Contract prices on the board of trade January 26 for grass seed were noted as follows: Timothy, \$4.15. White clover, from 20 cents to 25 cents.—Carl Cropp, of Vaughan's Seed Store, will make a short trip east from the Pittsburg convention.—Visitor: E. M. Parmalee, of the John H. Allan Seed Co., Sheboygan, Wis.

NEW YORK.—Henry Nungesser, of Henry Nungesser & Co., who has been laid up with a sprained foot, is, we are glad to report, able to be again at his desk.—Remodeling goes on apace at the Peter Henderson & Co.'s store. They have moved Patrick O'Mara's office upstairs.—W. E. Marshall has returned from his western trip; he was snowbound, but suffered no hardship.—McHutchison & Co. report that business was never better.—Ralph M. Ward is on an extended business trip.

### Transparent Seed Packages Not Effective Before July 1, 1910.

Some time since the post office department made a ruling that seed packets must be transparent, so that it was possible to tell whether any written matter was enclosed in the package or not. I have just been informed that they have granted an extension of time up to July 1, 1910, on this ruling, thus permitting seedsmen to make use of stock on hand.

This will be welcome news to the trade and I hope that before that date the post office department will change its ruling in such a way that it will not interfere with the future mailing of seeds put up in the ordinary way.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

**SAN JOSE, CALIF.**

There have been no complaints of seed dealers ever taking advantage of this privilege by sending out any first-class mail matter in seed packets. There is, therefore, no legitimate reason for making a special ruling against them.

CHAS. N. PAGE.

### Important Seed Decision.

The New York state court of appeals decided last December the case of Geo. M. Depew of Canandaigua, against the Peck Hardware Co. Depew sued for \$842, consisting of \$700 loss of one year's crop of alfalfa, \$80 for expense in plowing and \$42 for new seed for re-seeding. Depew won his suit first in the county court. The Peck Co. appealed to the appellate division of the supreme court, which affirmed

Carl Cropp.

Sec'y-Treas. Vaughan's Seed Store, Chicago.  
A Seedsman Because He Likes It.

the decision of the lower court. The Peck Co. again appealed to the court of appeals at Albany, which affirmed the judgment of the two lower courts. Costs are estimated to be about \$600.

The history of the case in brief is that Depew in 1904 went to the store of the Peck Hardware Co. and asked to see some alfalfa seed, with the intention of purchasing. He examined some seed, which the manager of the company produced before him and is said to have said was alfalfa seed and "the best seed they could get."

Depew purchased five bushels of the seed and sowed it on 10 acres of his farm. In the fall of that year the stand of alfalfa appeared to be good, but in May, 1905, a large number of the plants supposed to be alfalfa appeared to have yellow blossoms, while alfalfa blossoms are purple. Depew forwarded some of the yellow blossoms to the Geneva Experiment Station, and the experts there found that the plants were trefoil and dodder.

It appeared that about half of the crop was of those plants. Another five acres, which was seeded with seed purchased from another dealer, showed the same proportion of weeds instead of alfalfa, and that dealer when threatened with suit paid the damages claimed. The Peck company refused to pay anything, claiming that it was not liable, not having warranted the seed.

[It is not stated whether the seedsmen's disclaimer was used in this sale or not, presumably not.—ED.]

### Gladiolus Bulb Disease.

It is well known to dealers and florists who keep these bulbs over winter in storage that there are frequently scabby looking spots, which appear on the sides or bottoms of the bulbs, and which continue to enlarge and often involve one third or more of the bulb and practically destroy it.

We have tried a solution of one part of formaldehyde to five parts of water on such diseased bulbs, using it in two different ways. First the diseased parts and spots were brushed with a solution; second, the whole bulb was soaked in it for about two minutes. Twelve bulbs of each lot were tried and were planted in the greenhouse with a result, so far, rather more favorable to those dipped than to the others.

The effect on the disease by the use of the solution shows immediately; the spots on the bulbs which are beginning their growth are soft so they may easily be scraped off; they become hardened and the growth of the same is checked. The soaking of the bulbs is recommended as the quickest and surest treatment. It may be well to use this treatment as a preventive, soaking the bulbs at planting time in the spring.

COLLECTOR.

### The Clover Seed Case.

There has been much interest manifested in the law suit which was instituted by a farmer near Des Moines against the Iowa Seed Co., which has just been decided. Plaintiff claimed to have purchased 5½ bushels of clover seed from the Iowa Seed Co., as medium or common red clover, that he sowed the same and did not notice any difference the first year, but that the second season it proved to be Mammoth Red clover. Defendant denies that it was Mammoth, claiming that the unusually large growth was caused by rich soil and wet weather. They did not press this point, however, as they preferred to have the case decided on the disclaimer, so as to establish a precedent in the trade. It was shown that the farmer had a good

# A PURE SEED ACT.

Draft of a Bill under consideration by members of the House of Representatives, and regarding which the seed trade has been consulted. Criticisms of the proposed Bill should be addressed to Secretary C. E. Kendel, Cleveland, Ohio.

A BILL to regulate commerce among the States, and with foreign nations, and to prevent the transportation of adulterated and misbranded seed and bulbs, and for other purposes.

## PAGE 1.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*  
3 That the introduction into any State, Territory, or District  
4 of the United States from any other State, Territory, or Dis-  
5 trict, or from any foreign country, or the shipment to any  
6 foreign country of any seed or bulbs adulterated or mis-  
7 branded, within the meaning of this Act, is hereby pro-  
8 hibited; and any person who shall knowingly ship or deliver  
9 for shipment from any State, Territory, or District, or to  
10 United States to any other State, Territory, or District, or to  
11 a foreign country, or who shall receive in any State, Terri-  
12 tory, or District from any other State, Territory, or District  
13 or foreign country, and having so received shall knowingly

## PAGE 2.

1 deliver or offer to deliver in original unbroken packages for  
2 pay or otherwise to any other person any seed or bulbs adul-  
3 terated or misbranded, within the meaning of this Act, shall be  
4 guilty of a misdemeanor, and for such offense be fined not  
5 exceeding two hundred dollars for the first offense and for  
6 each subsequent offense not exceeding five hundred dollars.

7 SEC. 2. That the Secretary of Agriculture shall make  
8 uniform rules and regulations for carrying out the provisions  
9 of this Act, and may from time to time establish standards  
10 for different kinds of seed and bulbs and for different grades  
11 of the same kind or variety of seed or bulbs.

12 SEC. 3. That the term "seed," as used in this Act,  
13 shall include vegetable, flower, cereal, grass, clover, forage  
14 plant, and other agricultural and horticultural seeds intended  
15 for seeding purposes.

16 SEC. 4. That for the purposes of this Act seeds and  
17 bulbs shall be deemed to be adulterated:

18 First. If seed purporting to be extra orchard-grass seed  
19 contain more than two per centum of seed of rye grass or  
20 meadow fescue; if seed purporting to be extra Kentucky  
21 bluegrass seed contain more than two per centum of seed of  
22 Canada bluegrass; if seed purporting to be extra red-clover  
23 seed contain more than two per centum of seed of yellow  
24 trefoil; if seed purporting to be extra alfalfa seed contain  
25 more than two per centum of seed of yellow trefoil, burr

## PAGE 3.

1 clover, and sweet clover, singly or combined; or if any seed  
2 or bulbs purporting to be of one kind or variety in connection  
3 with the word "extra" contain more than two per centum  
4 of another kind or variety, provided that no seeds or bulbs  
5 shall be deemed adulterated, within the meaning of this  
6 paragraph, when accompanied by a statement or label in  
7 the form and manner prescribed by the rules and regula-  
8 tions in this Act provided for giving the name and amount  
9 or proportion of each of the kinds or varieties of seeds or  
10 bulbs contained therein.

11 Second. If seed or red clover, alsike clover, alfalfa, or  
12 Egyptian clover, contain seed of dodder; or, if any seed con-  
13 tain weed seed rendering it unfit for seeding purposes: *Pro-*  
14 *vided*, That the provisions of this paragraph shall extend only  
15 to seed intended or offered for export to or imported from a  
16 foreign country.

17 Third. If any seed or bulbs contain, respectively, dead  
18 seed or dead bulbs, or any other matter in sufficient quantities  
19 to materially reduce the value for seeding or planting pur-  
20 poses: *Provided*, That this paragraph shall extend only to  
21 seed or bulbs intended or offered for export to or imported  
22 from a foreign country.

23 Fourth. If there shall be added to seed any weed seed  
24 or dead seed, or any other matter materially reducing its  
25 value for seeding purposes: *Provided*, That it shall not be

## PAGE 4.

1 construed as a violation of this paragraph to mix different  
2 lots of seed of the same kind or variety which are not them-  
3 selves adulterated under the provisions of this Act.

4 SEC. 5. That for the purposes of this Act, seed and  
5 bulbs shall be deemed to be misbranded:

6 First. When one kind or distinguishable named variety  
7 of seed or bulbs shall be offered for sale under the name of  
8 another kind or distinguishable variety of seed or bulbs.

9 Second. If in package form and the quantity of the  
10 contents is stated, they are not plainly and correctly stated in  
11 terms of weight, measure, or count.

12 Third. If the seed or bulbs be falsely labeled or  
13 branded as to the State, Territory, locality, or country in  
14 which raised or produced.

15 Fourth. If the package containing it or its label shall  
16 bear any statement, design, or device, concerning the seed or  
17 bulbs contained therein, which statement, design, or device  
18 shall be false or misleading in any material particular, or, if  
19 the contents of the package as originally put up shall have  
20 been removed in whole or in part and other contents shall  
21 have been placed in such package.

22 SEC. 6. That whenever the Secretary of Agriculture  
23 shall have made public, in accordance with the provisions  
24 of this Act, any standards of seeds and bulbs, which he may  
25 have fixed and determined, it shall be lawful for seeds and

## PAGE 5.

1 bulbs complying in all respects with the standards so fixed  
2 and determined by the Secretary of Agriculture to bear  
3 upon the label, together with the name of the article the  
4 inscription "United States Standard;" and any person who  
5 shall use such inscription or words of similar import in any  
6 way as descriptive of any seed or bulb, subject to the pro-  
7 visions of this Act, which does not in all respects comply  
8 with the standards so fixed and determined, shall be guilty  
9 of a misdemeanor, and for each offense be fined not exceeding  
10 one thousand dollars.

11 SEC. 7. That no dealer shall be prosecuted under the  
12 provisions of this Act when he can establish a guaranty,  
13 signed by the wholesaler, jobber, producer, or other party  
14 residing in the United States from whom he purchases such  
15 articles, to the effect that the same are not adulterated or  
16 misbranded within the meaning of this Act, designating it.  
17 Said guaranty to afford such protection shall contain the  
18 name and address of the party or parties making the sale  
19 of such articles to such dealer, and in such case said party  
20 or parties shall be amenable to the prosecutions, fines, and  
21 other penalties which would otherwise attach, in due course,  
22 to the dealer under the provisions of this Act; but it shall  
23 not be lawful to place on any package or container of seed  
24 or bulbs any label showing that the same are guaranteed  
25 under this Act unless such label further shows that the

## PAGE 6.

1 guaranty is by the purchaser or wholesale or other dealer,  
2 nor unless such label further complies with the rules and  
3 regulations to be made by the Secretary of Agriculture, as  
4 herein provided for.

5 SEC. 8. That if any seed or bulbs that is adulterated  
6 or misbranded within the meaning of this Act and is being  
7 transported from one State, Territory, or district to another  
8 for sale, or, having been transported, remains unloaded, un-  
9 sold, or in original unbroken packages, or if the same be  
10 sold or offered for sale in any Territory or district, or is im-  
11 ported from a foreign country for sale, or is intended for  
12 export to a foreign country, shall be liable to be proceeded  
13 against in any district court of the United States within  
14 the district where the same is found, and seized for con-  
15 fiscation by a process of libel for condemnation. And if any  
16 such seed or bulbs is condemned as being adulterated or mis-  
17 branded, within the meaning of this Act, the same shall be  
18 disposed of by destruction or sale, as the court may direct, and  
19 the proceeds thereof, if sold, less the legal costs and charges,  
20 shall be paid into the Treasury of the United States, but  
21 such seed or bulbs shall not be sold in any jurisdiction con-  
22 trary to the provisions of this Act or the laws of that jurisdic-  
23 tion: *Provided, however*, That upon the payment of the  
24 cost of such libel proceedings and the execution and de-  
25 livery of a good and sufficient bond to the effect that such

## PAGE 7.

1 seed or bulbs shall not be sold or otherwise disposed of  
2 contrary to the provisions of this Act, or the laws of any  
3 State, Territory, or district, the court may by order direct  
4 that such seed or bulbs be delivered to the owner thereof.  
5 The proceedings of such libel cases shall conform, as nearly  
6 as may be, to the proceedings in admiralty, except that either  
7 party may demand trial by jury of any issue of fact joined in  
8 any such case, and all such proceedings shall be at the suit  
9 of and in the name of the United States.

10 SEC. 9. That the Secretary of the Treasury shall deliver  
11 to the Secretary of Agriculture, upon his request, from time  
12 to time samples of seed and bulbs being imported into the  
13 United States or offered for import, giving notice thereof to  
14 the owner or consignee, who may appear before the Secre-  
15 tary of Agriculture and have the right to introduce testi-  
16 mony, and if it appear from the examination of such samples  
17 that any seed or bulbs offered to be imported into the United  
18 States is or are adulterated or misbranded within the meaning  
19 of this Act, or is or are otherwise falsely labeled in any  
20 respect, or is or are of a quality forbidden entry into or forbid-  
21 den to be sold or restricted in sale in the country from which  
22 exported, or is or are intended for adulteration purposes,  
23 the said seed or bulbs shall be refused admission under such  
24 regulations as the Secretary of the Treasury may prescribe:  
25 *Provided*, That the Secretary of the Treasury may deliver

## PAGE 8.

1 to the consignee such seed or bulbs, pending examination  
2 and decision in the matter, on execution of a penal bond for  
3 double the amount of the full invoice value of such seed or  
4 bulbs, together with the duty thereon, and on refusal to re-  
5 turn such seed or bulbs for any cause to the custody of the

[Section 9, evidently incomplete.]

6 SEC. 10. That the term "Territory" as used in this Act  
7 shall include the insular possessions of the United States.  
8 The word "person" as used in this Act shall be construed to  
9 import both the plural and the singular, as the case demands,  
10 and shall include corporations, companies, societies, and asso-  
11 ciations. When construing and enforcing the provisions of  
12 this Act, the act, omission, or failure of any officer, agent, or  
13 other person acting for or employed by any corporation,  
14 company, society, or association within the scope of his  
15 employment or office, shall in every case be also deemed to  
16 be the act, omission, or failure of such corporation, company,  
17 society, or association as well as that of the person.

18 SEC. 11. That this Act shall be known, described, and  
19 designated as the Pure Seed Act.

stand, that the yield of hay was large, but that he deserted his crop and refused to harvest the same. It went on and produced a large crop of seed, variously estimated to be from four to seven bushels per acre, on his 50-acre field, but plaintiff let the seed go to waste and brought suit to recover damage claimed to be \$1,500, though, before suit was finished, he voluntarily reduced the said claim to \$850.

Defendant claims that, although they are at all times ready to replace seed when it does not prove satisfactory from any fault of the seed, still, in order to protect themselves against such suits, they publish in several places in their catalogue a so-called disclaimer, refusing to warrant seeds; that this disclaimer is also printed on large placards posted in various prominent places in their building; that the disclaimer is also printed on the receipt given to the farmer for the money paid for this seed. They also claim that this is a general custom in use by all seed dealers in the United States and Europe, which they confirmed by having on exhibition, not only their own catalogue but the catalogues of more than 100 American seed dealers and about 40 foreign seed dealers, all of which contained the disclaimer.

After four days' trial, which was contested on every point, Judge McHenry finally ruled in favor of defendant on every standpoint, holding that there was no warranty, either express or implied, and that it was a universal custom of the seed trade and had been for many years past, to sell seeds without warranty and that this custom and usage had become established as a law, of which the customer or purchaser of seeds is bound to take notice.

### Sand Binding Grasses.

Tying down the sand of the sea shore by means of binding grasses has been made the subject of a report in Great Britain, where troubles from sand blowing inland are frequent. The marrom grass (*Psamma arenaria*) is one of the grasses recommended for binding the loose, shifting sand. That the damage done is serious may be taken from old records. In the course of a few years more than 10 square miles of fertile land on the west coast of Scotland was completely inundated by blown sand, and this, it is thought, was caused by the thoughtless pulling up of the marrom grass. It owes its fixing properties to its ability to grow on poor, sandy soil, of resisting drought and of refusing to be buried, no matter how high the sand may be piled over it. It also grows from many nodes like the couch or twitch so that each bit of root severed from the parent stock forms a cutting which soon roots. In New Zealand other plants are grown like the sea lyme grass (*Elymus arenarius*), which grows like large wheat, *Spinifex hirsutus* and *Scirpus frondosus*. But the marrom grass is best of all, holding the sand firm and, by its decay, enriching the ground with humus and building up a fertile soil. This paves the way for the planting of conifers and other trees to make permanent reclaimed land.

ESTABLISHED IN 1824.

### Seeds By Flying Express.

Now and then comes something or other from the postoffice department or somewhere else calculated to induce a comforting thought that possibly our great mail-carrying system here in the United States is not such a mighty money-eater and tax-compeller as it is sometimes represented to be. Auditor Chance of the department has, for instance, just made up some figures from the business of the quarter-year ended September 30, 1909—the first quarter of the current fiscal year—from which it appears that for that period there was not only a large and very encouraging increase in the volume of the general postal and the money-order business over that of the corresponding quarter in 1908 but also an actual decrease of more than one-third in the postal deficiency as reported for that previous quarter. Now let all the treasury "watch-dogs" and all the pessimists over government conduct of the letter-carrying business sit up and take notice for a minute. Here are the figures:

The postal revenues for the last September 30 quarter were \$50,931,927,

an increase of \$4,729,821, or 10.23 per cent. The audited expenditures amounted to \$57,107,533, an increase of \$1,221,839, or only 2.18 per cent. The daily cost of the service averaged a little more than \$620,000, with revenues of about \$553,000. The postal deficiency showed a decrease from \$9,637,818 to \$6,183,597. Thus, while the revenues increased 10.23 per cent, the expenditures increased only 2.18 per cent—an indication that receipts may some day catch up with expenditures and perhaps outstrip them completely in the race; and the deficit for the quarter actually showed a reduction of nearly \$3,500,000. A chance for a ray of hope, surely.—New York Commercial.

### Pea Packers Not Worried.

The fact that local jobbers have not taken hold of future peas on the basis named by packers early in the week with any degree of freedom is not causing visiting sellers any particular uneasiness. Conditions surrounding the situation with reference to futures are regarded as rather more favorable than has usually been the case. In connection with the situation one of the best known of the western packers now on the market said to a reporter: "The situation may be considered one of the best in a good many years, from the point of view of stocks carried over. In most cases packers are sold out of grades under fancy and extra standards and there is no weakening in the ideas of the larger interests. The Wisconsin packers are decidedly firm in their ideas. Indiana packers seem to be carrying little or no stock in any grade. So far as futures are concerned the prospects look good in spite of the fact that buyers in this market are not ready to take hold yet. On the basis of values fixed, which are practically the same as those made last year, we look for a good buying interest as soon as the trade is ready to enter contracts. We consider that the prices fixed are as low as can be made this year under the conditions surrounding the pro-

MELONS can be grown in heavy soil by mixing half coal ashes.

TOMATOES in six-plant bundles are convenient for seedsmen and other storekeepers to handle.

### Lettuce Temperatures.

We note what D. Wolf says in regard to lettuce temperatures. Referring to our former article, we mentioned the fact that there is a great variation among different growers, in regard to temperature, to size of good lettuce, and even to color. The temperature carried determines to a nicety the kind of stock grown. A high temperature produces a soft yellow lettuce, which must be cut while young as it would not stand up to mature into large heads, weighing from one-half to one pound each. As before said, those growers who aim for heavy lettuce carry the lower temperature and their stock makes up for any loss in time, by adding great weight the last few weeks. Such lettuce is made tender by its own heavy growth as it practically bleaches itself. It is plain that Mr. Wolf does not grow this kind, as no one can mature five or six crops of such lettuce in one season. Most growers are well satisfied with three good crops. Markets differ and one must cater to demand. Where lettuce is sold per dozen they generally carry a smaller, softer lettuce than when sold by weight. The amount of water supplied has a great deal to do with color also, as a lettuce grown too dry is of a hard green color, while one properly supplied has the much-liked yellowish tint. Plenty of plant-food, water, air and a low temperature generally suit lettuce.

MARKETMAN.

### Cucumbers and Tomatoes.

Lettuce growers generally follow their lettuce crops with either cucumbers or tomatoes late in the spring, when it gets too warm or too late for another lettuce crop. It is of the greatest importance to properly time the plants of either cucumber or tomato. We never like to plant cucumber plants among lettuce, as the lower lettuce temperature is against the cucumbers; also the excessive moisture of a lettuce bed is not conducive to best results. We prefer to prepare excellent plants in 4-inch pots and remove all lettuce and then plant the cucumbers; by doing this we can run the temperature to suit the cucumbers and give them a brisk start which is everything to them. It requires about five weeks to produce a good cucumber plant.

Tomatoes will do well in a lower temperature; they need much more time than cucumbers and excellent results can be obtained by planting nice seedlings among the last lettuce crop.

## SEEDS FOR THE MARKET GARDENER

are our specialty. Quality, our first consideration. We have a very large and complete stock of all kinds of seeds and everything in the line of fruit trees, berry bushes, etc.

Our new 112-page catalogue contains true description and no overdrawn illustrations. Our prices are right, quality considered. Market Gardeners are requested to write for our Market Garden Wholesale Catalogue, sent free on request.

## GERMAN NURSERIES & SEED HOUSE BOX 245 Established 1886 BEATRICE, NEB.

We prefer to raise good pot plants and clean out the lettuce as for cucumbers; but if a grower is not experienced with pot culture he had better use nice young plants from flats and plant between the lettuce. Generally it takes a tomato plant all the time from January 1 on to get proper size for the spring work.

MARKETMAN.

### Double Cropping

Many forms of double cropping have from time to time been noted where it has been necessary to save space, but we do not remember seeing a better instance than that of growing radishes, young carrots and parsley on the same beds, as is practiced in British market gardens. A short topped, quick-maturing variety of radish is selected and sown in the same drills as the carrots and the former are up and gone before the young carrots have made much growth. The parsley is sown midway between the rows of carrot and radish and is allowed to spread out after the carrots are all drawn. Probably young onions could be substituted for the carrots with equally good results, provided the beds were made sufficiently solid. At all events it would be worth trying where room on early borders and protected beds is scarce.

### The Boston Vegetable Growers.

Some of the largest ranges of glass in this country, devoted to the forcing of vegetables, are located within 50 miles of Boston. Owing to unsatisfactory prices for the past year or two, many of the growers of lettuce are said to be considering a change to cut-flower growing. It seems there has been a quiet revolution going on in the lettuce markets of all the large eastern cities. A few years ago the large hotels and restaurants gave the preference to greenhouse lettuce, but now the call seems to be for the outdoor heading varieties. The result has been to knock the bottom out of the business of growing lettuce under glass. One of the places said to be seriously contemplating the change from vegetables to flowers is the mammoth establishment at Halifax, Mass., owned by Standard Oil interests. The addition of the cut of this range alone to the markets of New England would be perceptible, and if some of the larger growers in Arlington and Belmont would follow suit, as seems probable,—well—there would be little need of additional carnation or violet houses, in this section, for some years to come.

in the world has just been established within 20 miles of London. It includes eight acres, five of which are under glass. It is calculated that \$10,000 worth or more of produce can be grown in the year, the figures being founded on actual results of a large English garden organized by the same gardener.—Philadelphia Ledger.

### Prices of Indoor Fruits and Vegetables.

Chicago, January 26.—Mushrooms, 25 cents to 75 cents per pound; cucumbers, \$1.25 to \$1.50 per dozen; lettuce, 40 cents per box; tomatoes, 25 cents per pound; radishes, 60 cents per dozen; asparagus, 25 cents to 50 cents per bunch; grapes, Gros Colman, 75 cents per pound.

New York, January 22.—Mushrooms, 40 cents per pound; cucumbers, 75 cents to \$1 per dozen; tomatoes, 20 cents per pound; radishes, 3 cents per bunch; asparagus, \$6 per dozen bunches; rhubarb, 75 cents per dozen bunches; grapes, Gros Colman, 55 cents per pound.

NEW YORK.—Mrs. Annie Friedman, of 150 Clinton street, a retailer in a small way in a basement store, has been informed of the death of an aunt in Hungary under whose will she expects to benefit considerably. She says her aunt's estate is estimated at \$200,000, and after making a living by hard struggling for 12 years, Mrs. Friedman thinks she sees a way out.

## A GREAT CUCUMBER.

Theodore Roosevelt is being paid \$1.00 a word for his remarkable articles on hunting in Africa. We are sure, had he run across a vine of Salzer's Green Cross Cucumber in that far away clime, he could easily have used 10,000 words, or \$10,000 worth of description in extolling and setting forth the many merits of this wonderful cucumber, and then some more! Look at the illustration. We had, in a small field with ordinary cultivation, hundreds and hundreds of cucumbers larger than here illustrated, attaining this enormous size within 20 to 25 days after setting! It is the most remarkable Cucumber and surely the most beautiful cucumber mortal eye has ever seen. It's infinitely ahead in beauty and appearance and quality of any hot house cucumber—each one a picture!

## The Nursery Trade

### American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

**WILD ROSE, WIS.**—Henry Tolleth is now agent here for the Allen Nursery Co., Rochester, N. Y.

**NEW YORK.**—The American Nursery Co. is now located in commodious quarters in the Singer building, suite 530, 149 Broadway.

**SPRINGFIELD, ILL.**—It is reported that Thos. Cale has been arrested for violation of the law prohibiting the sale of diseased stock.

**MARSHALL, MO.**—The National Nursery Co., Lawrence, Kans., has established an agency here with an office in the Southern hotel. L. Preston is in charge.

**FORT WORTH, TEX.**—Tree planting is getting considerable attention here, and C. E. Papworth recommends the sycamore and the water elm as the best trees for street planting.

The Tennessee State Nurserymen's Association meets at the Tulane hotel, Nashville, this week, January 26-27 being the dates. The State Horticultural Society meets the first day.

J. S. BUTTERFIELD, secretary of the American Association of Railroad Gardeners, writes: "Our association is growing, new members coming in as fast as we can locate and get in touch with them."

**WILKESBARRE, PA.**—Warren H. Manning, of Boston, has been in the city looking over the old court yard, in his capacity as landscape adviser to the park commissioners, with a view of deciding on the necessary work to beautify it.

### Duty on Evergreen Seedlings.

The decision of the United States appraisers department at a meeting of all appraisers, held in New York last November, was that all Evergreen seedlings should be assessed at 25 per cent ad valorem; the wording of the new tariff being called ambiguous in regard to the duty. All custom houses were instructed to act accordingly.

### The American Civic Association.

The American Civic Association will, in future, have its headquarters at Rooms 913-914 Union Trust building, Washington, D. C. In an open letter to the members, President Horace McFarland and Secretary Watrous say that the national capital is easy of access and visited by more members of the association annually than any other city. The association will give more especial attention than heretofore to comprehensive city planning and during the year aims to forward a movement for civic education to make national a campaign against the house fly and to urge a safe and sane Fourth of July. It also plans to issue and distribute a large quantity of authoritative literature in the shape of bulletins, reports, clipping sheets and propaganda leaflets.

### The Ohio Nurserymen's Association.

The third annual meeting of the Ohio Nurserymen's Association was held at Columbus, January 11, and was a very successful one. A substantial increase in the number of members is reported and the old officers and executive committee were re-elected. These are:

J. W. McNary, Dayton, president.  
W. P. Cole, Painesville, secretary.  
W. N. Scarff, New Carlisle, treasurer.  
Executive Committee. — Robt. George, Painesville; S. R. Fergus, Tippecanoe City; W. N. Scarff, New Carlisle; F. D. Green, Perry; W. Gaines, Xenia.

After the reports of the secretary and treasurer and the president's address were given, a report on stock and business conditions was read, followed by a number of interesting and instructive papers. At the evening session, after dinner, a smoker was given and J. H. Dayton spoke on "The Great Northwest," especially as to its influence, present and prospective, upon the nursery trade in the east.

### Business Methods in Tree-Growing.

#### SYSTEMATIC HANDLING OF DETAIL.

Down on the peninsula of Maryland, in a section of country so fertile and with so favorable a climate that it has been called America's Eden, is one of the largest nurseries in the world—the great tree-growing establishment of J. G. Harrison & Sons at Berlin. This concern, founded nearly a quarter-century ago, has built up its business until it now occupies more than 2,000 acres of ground—all in the immediate vicinity of Berlin and all under the efficient management of Orlando Harrison. Next to its great size, probably the feature that most impresses the visitor is the systematic methods which prevail throughout. It requires a lot of men and teams to handle the work on 2,000 acres of land, but as one looks over this great plant, it is evident that here is a place where there is little waste, either of time or energy.

To supply the tremendous annual demand for stock, Harrison's Nursery often devote as much space to growing one kind of tree or plant as many growers have in their entire nursery tract. A great many acres, for example, are devoted to California privet, which is one of the many specialties propagated at these nurseries; the stock being offered this spring numbers nearly 300,000 plants, from four feet down. Strawberry plants form another prominent feature; millions of these are sold annually. Great pains are also taken in the growing of all kinds of deciduous trees, fruit trees, hardy perennials, roses, etc.

This firm advertises widely and issues attractive literature describing its product; but, believing that nothing can equal a personal inspection of its grounds, extends to all its friends a standing invitation to visit Berlin and the nurseries whenever possible. That this most interesting and instructive trip is well worth while is conceded by all who have been there. The courtesy accorded all visitors by the Harrison management is proverbial and does much toward making the event one long to be remembered.

The Pennsylvania railroad operates two lines through Berlin—one directly to Philadelphia, the other touching Chesapeake bay, where excellent steamer service makes quick connection with Baltimore and the west. When possible, the officials of Harrison's Nurseries request that notice be given in advance of the coming of visitors, in order that arrangements may be made for escorting them about the plant.

### Scraping Bark From Fruit Trees.

As to the advisability of scraping rough, or shaggy bark from apple trees, a Blair county citizen wrote to the state zoologist of Pennsylvania, Harrisburg, for information. The reply of Professor Surface was as follows:

"This depends upon the conditions in general. I would advise such treatment, especially for the rough, scaly bark of old trees; but if it be bark that has been roughened by the injurious action of oil sprays, or by burning with fire or by some other injury, I am satisfied it would be wrong because this is, to the tender bark beneath, just what a scab on an animal is to a sore which it is protecting. Therefore, if the bark beneath be tender, so that it would be injured by being scraped, it is best not to do it. In the case of an ordinary healthy tree it is certainly best, but at injured places, such as above mentioned, it is advisable to scrape gently, if at all. On an old tree one cannot apply enough pressure with a short-handled hoe or bark scraper to do any injury, and this will remove many insect pests, such as codling moth, wooly aphids and certain hibernating creatures, and expose scale insects and other pests to the action of the weather and of the insecticides to be applied before the leaves appear."

**GREEN BAY, WIS.**—The Brown County Horticultural Society has been discontinued.

THE DINGEE & CONARD CO.,  
West Grove, Penna.

These illustrations show how we grow California Privet here at Harrison's Nurseries—and the way our Privet looks when planted as hedges along driveways, walks, etc.

We have the right soil and climate here for growing California Privet, and take unusually good care of our plants. We cultivate the blocks each week, and during the dormant period last year we cropped the smaller sizes—one- and two-year—back to the ground. These plants developed a wonderfully bushy growth in 1909 and are now in prime shape.

The upper view represents a block from which tens of thousands of plants will be dug this spring. This is the kind of Privet you'll be proud to furnish your customers—fine, vigorous, well-rooted and branched plants, every one. In fact, Harrison's California Privet is so strong and thrifty as to be almost a distinct and separate variety in itself.

## California Privet Plants for Hedges By the Rod or by the Mile

Whether you want enough Privet to plant a rod or a mile, we want to supply you; write us NOW for particulars and prices. Owing to the mild climate of our locality we dig our Privet only as ordered; this does away with the necessity of digging and storing through the winter. When shipments are to be made, the roots are carefully protected and wrapped, and in this condition, Harrison's Privet can be shipped to any distance without drying out.

Try us on an order for California Privet; we have nearly 300,000 plants in sizes varying from 4-5 feet, down to 12-18 inches. We offer in addition very attractive stocks of Barberry, Arborvitae, Colorado and Koster's Blue Spruce, Norway Spruce, etc., also Fruit and Shade Trees of all kinds. Particulars on request. Address Box A.

BUSINESS FAIR.

Trade is fairly active, though the weather conditions have not been entirely propitious, snows and heavy rains, thaws and great freshets, marking the progress of the week. There have been a number of social events, involving considerable outlay of flowers and decorations and some funerals which made heavy drafts for fine material. Supplies in the cut flower line are quite abundant for the demand, No. 1 roses being, perhaps, somewhat deficient; white carnations are in excess. Violets are getting more plentiful and are about taken up by the daily calls.

NOTES.

At the Gardeners' Club meeting January 24, several ladies of the Equal Suffrage league presented their argument in favor of votes for women and were given a respectful hearing. Whether they made any converts remains to be seen. R. Vincent, Jr., spoke urging the closer identification and more efficient help of the club to the Maryland Horticultural Society which will hold a summer outing this year at Ocean City.

M. Thau. Govans, has a carnation from which he expects great results, its good qualities being numerous. It is a crimson, somewhat of the type of Harlowarden, with a more brilliant hue, good size and good stem, and very floriferous. It has been shown here and in Philadelphia and attracted attention.

Last week died William G. Atkinson, a prominent shipping merchant of this city, not in any way related to the florists' trade, but widely known for his attention to floriculture and the extent of his amateur operations. One of his specialties was the cultivation of the gladiolus, and one of the daily papers reports that last season on his place he planted 400,000 bulbs of this beautiful and showy plant.

James Hamilton, of Mt. Washington, who has gone quite largely into growing lily of the valley, is beginning to make shipments of his products, the quality being very acceptable to the purchasing contingent.

S. B.

## New Seedling Rose

# RADIANCE

A seedling from Cardinal, a brilliant rosy carmine with opaline tints in the open flower. The form is fine, large, with cupped petals, bud long, brilliant, radiant with extra long stems, a constant bloomer, fragrant, foliage abundant and of splendid substance.

2½-in. pots, \$18.00 per 100, ready for delivery in April and May. Cash or satisfactory reference.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

*Columnnea Magnifica*.—This should prove a useful and popular plant, especially with amateurs who possess a cool greenhouse. It is a gesneraceous plant, rather over a foot high, and the growths produce an abundance of axillary, tubular flowers of deep and brilliant orange color. The mouth of each flower is very interesting, as several of the lobes combine to form a sort of hood, while three other lobes form a lip, the central one being

more defined than the others. It is a very showy species, and deserving of extended cultivation.

**Megaclinium Purpureorachis.**--An extraordinary orchid found by Louis Gentil on the upper Lomani, a tributary of the River Congo, in 1903. It was not known as a flowering plant until 1908, when a specimen bloomed at Glasnevin. Subsequently it was flowered at Burford Lodge, and exhibited by Sir Trevor Lawrence, at a meeting of the Royal Horticultural Society held in April, 1909. The small

velvety brown flowers are not especially attractive, but the rachis on which they appear is broad, undulate, flattened, and spirally twisted, dull yellow, freely marked with purple.

*Euphorbia Ledeni*. — A freely-branched succulent plant from South Africa. It was first given specific rank in 1907, but appears to have been in cultivation since 1866, and has been at Kew since 1868. It has stout, grooved stems and branches, stout spikes in pairs, and little clusters of small yellow flowers.

# Carnation Dorothy Gordon

You are looking for the variety that will show the most profit plus the greatest satisfaction to your customers.

Very well, this Carnation will do both. Dorothy Gordon is vigorous and disease-free, with flowers of uniform color—a shade darker than Pink Enchantress.

It produces at least a third more carnations than does Enchantress, and much larger—average flowers of Dorothy Gordon measure 3 inches or more in diameter. It has a stiff stem, and is a long keeper.

It has regularly brought us double the profits of the leading commercial sorts—Enchantress for instance. Let us illustrate:

"Enchantress," sells at wholesale in the Philadelphia markets at \$6 per 100; "Dorothy Gordon" has REGULARLY brought us \$9 per

100. In addition, "Dorothy Gordon" produces easily one-third more flowers, or an additional \$3—giving a return of \$12 from the same greenhouse space that would be required to grow \$8 worth of "Enchantress."

We are selling strong rooted cuttings at \$10 per 100, or \$75 per 1000.

We are ready to demonstrate to you that you can grow Dorothy Gordon with greater profits than any other commercial carnation. We invite you to come to Wyncote and see it growing in our houses; if you cannot do this, write for full particulars—we'll furnish some carnation facts that will interest you.

**Joseph Heacock Co., Disseminators, Wyncote, Pa.**

## Our Blooming Stock for Easter

Will consist of Azaleas, Lilies, Hydrangeas, White and Crimson Ramblers, Souperets, Hermosa, Cyclamens, Primroses, Cinerarias.

We are crowded for room and can give you extra good bargains for cash.

Plants for Easter bloom can be shipped any time.

**GEO. A. KUHL, Pekin, Ill.**

### Cincinnati.

#### A. GOOD DEMAND.

There has been quite an improvement in the demand for flowers the past week, all special stock being ordered in advance or sold on sight. About the only scarcity existing was in roses and white carnations, otherwise the market was nearer the normal state in point of arrivals and sales than it has been for some time. At this writing, January 24, the market opened up with a good demand and excellent supply. Everything in the cut-flower line is moving nicely at living prices and we are hoping the same conditions will prevail the balance of the week.

#### NOTES.

About 25 of the boys gathered at Wiebert's bowling alleys last Monday night and maybe they did not have a good time. As Frank Dellar remarked: "It is just the thing to get together about every two weeks and forget your troubles." Well, we are going to keep it up and Monday evening, January 31, everybody in the business, whether members of our society or not, will be welcome at Wiebert's bowling alleys to spend an evening with the best fellows in the business.

Wm. Murphy, Ray Murphy, Richard Witterstaetter, C. E. Critchell and Herbert Greensmith will comprise the party from this city that will leave for the meeting of the American Carnation Society at Pittsburg, going by the Pennsylvania road Tuesday evening.

Albert McCullough, president of the J. M. McCullough's Sons Co., is spending the week in Washington, D. C., in the interests of the American Seed Trade Association.

Visitors: J. W. Edmundson, of the Braslan Seed Growers' Co., San Jose, Calif.; Peter Weiland, New Castle, Ind.

S. D. BRANT, Clay Center, Kans.

St. Louis.

TRADE HOLDING UP WELL.

The market has held up well all week; roses, being decidedly scarce, have helped carnations. The coming week is expected to be a busy one. Graduating exercises, opera and other social entertainments will give the retailers all they can do. The plant men are getting ready to have everything in shape for an early Easter. Greens are selling well. Mexican ivy is being quite extensively used and makes a beautiful addition to floral work of any kind.

NOTES.

On January 18, the bankrupt stock of the Michel Plant & Bulb Co. was sold at auction. It was bought by H. Bourdett for \$4,500 and to assume \$6,000 due on the mortgage later. This deal did not mature and another sale was held January 24 attended by several florists who bought the stock. The fixtures and greenhouses were not sold, they being as yet held to satisfy a claim.

Henry Lawrence, who was injured during the cyclone, was removed to a sanitarium to enquire into his mental condition. He was manager of the Park Floral Co.

George Hecht is now bringing his flowers to the wholesale house in an automobile, the first grower to come to the wholesale district in a machine.

William C. Smith is busy preparing his essay on "The Troubles of a Wholesaler" which will be the feature of the next club meeting.

J. J. Beneke was the sole florist bowler who competed for prizes at the middle west bowling tournament held in this city this week.

J. C. SCHMIDT,

Bristol, Pa.

Cleveland.

ROSES SCARCE.

This city was visited by the worst snowstorm in years on Saturday, making deliveries in town very uncertain, both city and suburban car lines being snowbound. There is nothing exceptional doing in the cut-flower line, and it is well, for stock has been very scarce lately, the greatest shortage being in roses for funeral work, and also in the better grades for brides' bouquets. Carnations are about holding their own as far as supply and demand are concerned. Harrisii lilies are in demand, but rather scarce. Callas sell readily, but are only limited in supply. Asparagus plumosus is not overplentiful. Brown and green leucothoe are being used quite freely. Lily of the valley and orchids have had less call the past week; violets also were a little slow. The demand for spring flowers is increasing, but only frezias, daisies, forgetmenots and calendula of limited quantity appear.

NOTES.

Westman & Getz had the floral decorations for the annual supper at the Euclid avenue Baptist church. The pillars and walls were hung with garlands of laurel wreathing, hemlock sprays, white wistaria and pink blossoms; pot plants and palms were also used in the decorative scheme.

Peter Nichols lost a \$215 diamond ring in a very peculiar way last week. He gave it to Rube Marquardt to sell to a lady. The sale was not made, neither was the ring returned. The police are looking for Marquardt in Pittsburgh.

The carnation convention at Pittsburgh was attended by quite a few from this city, a number of them going Wednesday morning. C. B.

Every letter marked.

A. HERRMANN,

Cape Flowers, all colors, Cycas Leaves, Metal Designs and all Florist Supplies.

—Send For Prices—

404-412 East 34th St., NEW YORK.

THE BEST WAY

to collect an account is to place it with the

National Florists' Board of Trade

56 Pine Street, NEW YORK.

WHY? Because many debtors will pay the Board fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

IT IS NOT...

what you pay for the advertisement but what the advertisement pays you. It pays to advertise in the American Florist.

Wittbold Watering System

The saving in time and labor for one season will pay for a complete equipment.

For particulars write to

E. H. HUNT

76-78 Wabash Ave., CHICAGO

Ready Reference Section.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

PRACTICAL FLORICULTURE (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. \$1.50.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

HOW TO MAKE MONEY GROWING VIOLETS (Saltford).—This is by a practical grower who has made a success of the business. No grower of violets can afford to be without it. 25 cents.

OUTDOORS (McGaffey).—A breezy little book of the woods, fields and marshlands. Interesting to the lover of outdoor sports, the fisherman, hunter or botanist. Readable from cover to cover.

CHRYSANthemum MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

American Florist Co., 324 Dearborn St. CHICAGO

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It.

The American Florist Company's Directory of
Florists, Nurserymen and Seedsmen of the United States and Canada.

(Copyrighted and Title Trade-Mark Registered.)

DIRECTORY REVISION.

We are revising our **Trade Directory** of the **Florists, Nurserymen, Seedsmen**, etc., of the United States and Canada, and as there have been many changes in firm names and considerable extension of the area under glass, nursery grounds, etc., you would greatly oblige by filling out this sheet.

When was business established?

Whom did you succeed?

Are you a Florist?

Grower? Retailer?

How many square feet under glass? *

Are you a Nurseryman?

Wholesale? Retail?

How many acres operated?

Are you a Seedsman?

Dealer? Grower?

What are your specialties?

.....

Firm name

Proprietor's name

Manager's name

Street

Postoffice

State

* To ascertain the number of feet under glass in a given house, 12x145, multiply the length (145 feet) by the width (12 feet) and you have in that house 1,740 feet under glass, thus.....1,740.

Horticultural Supply Concerns.

We also list all lines of **Horticultural Supply Concerns**, such as manufacturers of

Greenhouse Building Materials, Boilers, Ventilators, Glass, Insecticides, Pots, Labels, Seed Bags, Fertilizers, Wire Designs, Tinfoil, Vases, Implements, Machinery, Sprayers, Seed Cases, Etc.

The specialties are also listed under these heads in the case of advertisers.

Advertising Rates.

Including Copy of New Edition.

Page (3½x6½ ins.).....\$25.00
Half page (3½x3¼ ins.)..... 15.00
One-fourth page (3½x1⅝ ins.)..... 9.00

A CRITICISM OF THE GROWERS.

It is fair to presume that the eccentricities, cleverness and shortcomings of growers located near all distributing centers, will average about the same. This fact renders their examination all the more useful because a greater number may profit by the discussion of their ways, and pass a New Year's resolution to eradicate some of them. No matter who may be the owner of a greenhouse, the commission house, the retailer and the supply market have an interest in it, and a very vital interest at that. Whichever member you may be of this quartet of interests you will not concede the right of the other three to dictate, but you have to recognize the interdependence of the four and see that their appreciation of your co-operation is your capital as truly as the dollars you may have invested. Growers are usually most sensitive about things related to their own weakness (we all have our weak spots). Just where he should solicit council, he is inclined to repel it; for this reason these observations are made general as exemplified by local conditions so as not to annoy any friends whom we would like to help by a pointer occasionally.

As business is now conducted the commission house is the pulse of what

VENTILATING
APPARATUS.

we may call the commercial side of our affairs. It is the most economical method for co-operation of growers in serving the retailer, and the more efficient the service is made, the better the public may be served, and the fact that the public is our mainstay should never be lost sight of. Of course the public and grower do not come in personal contact. The public has become more critical and exacting, requiring greater skill and efficiency on the part of the grower. This has caused a division of labor whereby the grower can watch his plants more closely, entrusting the marketings to an agent. The grower's skill is more quickly appreciated today than ever before, and his indifference to public requirements likewise rebuked, as evidenced by his financial returns. The grower who puts in 23 good flowers and two inferior for a bunch has his number spotted for a boycott by the retail florist. The few who never put in an inferior flower are best known, and their stock is continually asked for in preference to others. It would be quite an education for some growers to read the letters referring to their number. "Don't send me any more No.—'s carnations, I never make good on them." "Give me No.—'s roses if possible or No.—'s as second best." "Can you promise me 500 No.—'s violets for next Monday? No others will do." In this way retailers who can pay the price for good service get to know the growers by number and the commission man is obliged to give the stock asked for while it holds out. These differences may be occasioned by quality; there is another factor which will be easiest explained by the following apology written on an invoice. "This is not your favorite grower, but one who was accommodating enough to make a special trip in town for you; otherwise we could not have filled order on time." There are just a few growers whose stock is not of the very highest grade that become known and appreciated for their readiness to help out in emergency cases.

Some pickled stock found its way into the retailers' hands this Christmas for which the growers have received their money, but 10 times the amount involved would be no recompense for the boycotting caused. The commission agent has his oil can out all the time trying to smooth out these petty eruptions that continually come to the surface on account of narrowness of character and near-sighted reasoning. He is between two fires most of the time and for self-protection develops a few tricks of his own.

AT THE GREENHOUSES.

One prominent feature among smaller plants may be the cause of their smallness. When going into one of these places one is greeted by an explanation that such a house is in bad shape; they had not been able to attend to it in time and it don't pay to hire help. There are several such growers here; there is usually 25 per cent more stock on hand than the place is capable of housing properly, and only one-half or two-thirds of the place is kept in order. Of the three factors, greenhouses, stock and labor, one cannot make good if either falls below the capacity of the other two. Several growers here did well at first, starting exceedingly small, adding to the plant until it grew beyond their own labor capacity. To save \$10 a week on labor and fall short \$25 on returns in consequence has been known. We have also seen where the saving of two tons of coal has injured a crop and reduced the returns at least \$200, and other instances are not rare. A bunch of Asparagus Sprengeri is in full crop; by looking closer one can

see that the older stems were not cut and several layers are decaying; eight or ten months growth is there, and the owner says that as soon as he can get to it he will throw it all out; as it don't pay. This stock has been quite profitable for the last four years and the grower sent in a lot during a dull season last summer when regular shippers were being guided by advice from the commission house when and how much to ship, so as not to waste it. During such a market our friend dumps a lot in and loses much of it. He can show you how much he sent in and what he got for it; is that not proof that asparagus does not pay? For the sake of argument admit it does not pay, that proof is four months old, none of it has yet been marketed and the bench is not filled with a succeeding crop. To have a bench idle for four months is "saving labor" we know, but it is not growing anything more profitable.

ROCKFORD, ILL.—The Florists' and Gardeners' Association held its annual meeting and banquet January 17 and elected J. J. Soper, president; Max Sadewater, vice-president, and George Birks, secretary and treasurer. Park Commissioner Fred Carpenter gave the members an interesting talk on parks and civic improvement. The association will give C. H. Woolsey, the retiring president, a banquet March 14.

Size of Hot Water Flow Pipes.

ED. AMERICAN FLORIST:—

I have a house 28x200 feet piped as follows: A 5-inch flow running 10 feet above the boiler from which run two 2½-inch mains, hung on columns on a decline to end of house, there dropping into six 2-inch returns each, returning under benches on a decline into boiler. The overhead flow pipes get very hot the entire length of house, but the returns under benches become so cool that by the time they enter the boiler they are about lukewarm. Do you think that larger flows are necessary, and what size? The above is a hot water system. The temperature desired is 50° to 55°. Would like to add that the 2½-inch flows are taken off a 4x5 caulked tee, which will not allow a larger size pipe than 3½-inch being used.

H. A. M.

The trouble with the heating system is probably due to the fact that the two 2½-inch mains have to supply about 1,800 square feet of radiation which is fully twice as much as is desirable. The remedy will, of course, be to double the number of the flow pipes, or better yet to put in three additional flow pipes, and take out two of the returns, thus leaving two returns for each flow pipe. If, as is understood, it is necessary to connect with the main by means of a 3½-inch pipe this should be increased to 4-inch and broken up into the five 2½-inch flows just as soon as possible. The returns should be of the same capacity as the flow pipes.

Unless the returns are well above the top of the boiler it will be well to carry them with a very slight fall towards the boiler, as the higher they are the better will be the circulation. A drop of one foot in 15 or 20 will answer, provided care is taken to give the pipes an even grade, so that the air cannot collect. It is always better to keep the returns as high as possible and then drop vertically than to carry them at a steep pitch so that they will be nearly as low as the inlet at the boiler end of the coil.

The Mystery of Color.

"Color is food for the eye," as an eminent scientist has said, "without which the vision would be so weary that the brain would become a prey to melancholy, and even bodily health decay." Indeed, many doctors state that we have not yet sufficiently learned or appreciated the medical value of hues; experiments have been tried now and again, but on no vast scale, and have gone to prove that red, yellow, green, violet and blue, as well as white and black, have a real influence upon both mind and body.

To the gardener there is practical as well as poetic interest in all this; it is not too much to say that by the right use of flower colors he can add to the cheerfulness and well-being of the occupants of the home. Naturally, the beds and borders immediately before and behind the house are the most important in this respect, but the whole of the pleasure grounds should possess healthful influence, and distant masses of brilliance, if sufficiently large, are certain of effect as seen from the building.

Many residences, small as well as large, are grey or white, and, if these have on either side a north aspect, the absence of sunshine upon them leaves a sad note in the landscape. To plant dark evergreens by such homes, and then have few gay-colored flowering plants, and those few dotted about so that they give no display, is to make the scene additionally mournful, and miss a fine opportunity, for white walls and deep green foliage are the perfect background for gold and vermilion, or carmine and purple blossoms.

Scarlet is, no doubt, the most valuable hue, but it is infinitely improved by being associated with a great deal of orange and of gold, the absence of sunshine scarcely proving noticeable where the two latter are represented in sufficient quantity. Crimson is much less advisable, unless it is largely accompanied by purple and mauve, which lead the warm tone down to white, grey or cream. A Crimson Rambler rose on a grey house does not materially enliven it therefore, but the scarlet of the geranium certainly achieves wonders; there is great need of a scarlet-blooming climber sufficiently hardy for north or north-east walls; the gorgeous flame flower, *Tropæolum speciosum*, should always be trained up painted wire

netting, but is so uncertain that it may die, or prove flowerless.

Last year a noteworthy experiment was tried upon a north front of a dull grey house; this was the partial covering of the walls with a trellis painted vermilion. When yellow variegated euonymus had partly clothed the base, and the white rose, *Aimée Vibert*, had mounted above it, the effect was altogether admirable. A few golden privets were induced to thrive in a side border facing west, and scarlet geraniums, orange and yellow day lilies, and montbretias were lavishly employed in the beds, aided by golden calceolarias and pansies. *Tropæolum speciosum* flourished on the east side of an outstanding rustic porch, where it received shelter, and amber-tiled window boxes, filled with fuchsias helped in the whole result.—Gardeners' Magazine.

Scents.

Very many of the perfumes of an earlier age would not be tolerated at the present day. They were largely obtained from animal sources, and were heavy, clinging, and, according to modern notions, very disagreeable. Civet, to which Shakespeare frequently alludes, was in common use in Elizabethan times, but anybody scented with it now would be quickly shown the door. Though mention is made of various flowers, perfumes extracted from gums and aromatic herbs seem to have been preferred. They were supposed, says the *Journal of Horticulture*, to have some mysterious influence in keeping disease at bay, and, curiously enough, modern science shows that some of them may have had that effect, and they are now placed among disinfectants or destroyers of disease germs. Though most perfumes can be, and often are, produced by artificial means, they are still very largely obtained from flowers, and enormous quantities of jasmine, violets and roses are grown with this special object. The commonest method of extraction is to lay the petals in shallow pans containing clarified beef or pork fat, and to renew them daily so long as the same kind of flowers is procurable. The fat seems capable of absorbing an almost indefinite amount of essential oil, and all that is done to it is to scratch its surface with a knife so as to expose a fresh surface when each new layer of petals is placed on it.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements appear with each issue and should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

THE WEEK AT PEACEFUL VALLEY

By The Optimist.

Seasonable Work.

The past week has been given up to seasonable work, as potting up the rooted carnation cuttings, making up the first batch of chrysanthemum cuttings (new varieties) and shifting some 2-inch geraniums into larger pots. We are following the usual procedure, hereabouts, with our young carnation stock, which consists of potting on to 2-inch from the sand, and then, when well rooted through, planting out in flats, about three inches apart. This method works well and gives good healthy stock for planting out the end of May. We find ourselves overstocked with geraniums this year, having propagated a lot for fall sales. The fall sales proved a minus quantity, and we now find ourselves hard pressed for room. It looks as though we would have to carry them through for May and June sales. Memorandum for next year: "Grow only enough geraniums for retail sales." At the best prices obtainable there is no profit in them for us, and if overstocked the surplus must be sold far below cost. We don't like that kind of a crop at Peaceful Valley. How many of my readers can tell just what it costs them to grow 1,000 geraniums from October 1 to May 30? Will some of those not specialists please answer this inquiry. The geranium factories need not answer. I take it for granted that they find some profit, or they would grow something else.

The Meat Boycott.

The whimsical protest of the people against the high prices of meat is now in full swing, all over the country. It is a good thing, in two ways: It voices a warning to the representatives of the people in the house and the representatives of the trusts in the senate, that the aforesaid people are getting restive, and it also will show us that we can get along with much less meat, and still remain healthy and happy. But, as affecting the meat trust, it will probably result in their profit. Every reduction they may be forced to make, as a result of this agitation, will be taken out of the

cattle raiser, or out of the consumer, finally, and threefold. They have the power to fix the price and they do so. At the time of the big coal strike, the coal trust, after government intervention, compromised with their men, and gave them about nine cents a ton more for mining coal, at least that was about what it amounted to. The consumer has been paying at least \$1 a ton more ever since. It was necessary, you know, in order to pay the advanced wages. The eastern railroads are now considering a raise of about 10 per cent in wages of their employees, but they wish to advance freight rates from 20 to 30 per cent, so that they can afford to do so. Eat meat or refrain from meat, as it seemeth to you good, but don't for a minute think that the meat trust cares particularly, except as the agitation may force legislative or court action.

Wonderberry or Blunderberry.

I notice that, despite the hue and cry raised last year against this plant of Burbank origin, the introducer is pushing it this season, harder than ever. This speaks well for his courage, and few will dispute that J. L. C. has also a fair share of discretion. We have this plant, at Peaceful Valley, but confess that we have never given it much attention or a fair test. When it first fruited, we did not like its taste, and being neglected, the plants soon became choked with weeds. Later, some of our neighbors informed us that the fruit, after remaining on the plants two or three weeks, became quite palatable, and was especially fine for pies. So I do not really know whether this new fruit is a wonderberry or a blunderberry. But that it is the common nightshade or that it is poisonous, I do not believe. As a yielder of fruit, it is certainly a wonder. Next season we shall give this plant a thorough test and satisfy ourselves whether it is a wonder or a blunder.

How all the little dogs did bark and snap at Luther Burbank, when the first unfavorable reports came in. It was a good chance and they improved

it. "The Optimist" has known Luther Burbank, lo, these many years. He knew him when many of these critics were probably in the kindergarten, or should have been. While I never placed him on a pedestal, or joined in exploiting him as a marvelous "wizard" of horticulture, I did know him as an honest man and a tireless worker. I can not believe that all this magazine "gush" has so turned his head as to completely change the nature of the man. To those who think that the book of Burbank is closed, I would say: "Wait until the final chapters are written."

THE ROSE.

WM. H. ELLIOTT, Brighton, Mass., says he will discard Richmond for Rhea Reid, the latter producing better stems and more blooms with him.

Propagating.

It is now time to turn our attention to the propagation of the young rose stock by cuttings. In our last article we gave a detailed account of propagating by the grafting method, so we will now endeavor to offer a few timely suggestions in reference to rose cuttings. In almost every section of the country we may find excellent stock grown on own roots; this we think is due chiefly to the soil, which must be especially adapted to the culture of own-root stock. At all events where such soil is found there is little need of grafting and as there is a general demand for good stock on own roots as well as for grafted stock it is quite essential to be ready to offer the trade only one grade of stock, the best, and in order to do this a thorough competent man must be put in charge of the propagating house and kept there.

To begin with the benches in the propagating house should be thoroughly overhauled. If it should be a wooden structure remove all the boards showing decay. If new benches throughout the house are required we would suggest replacing the wooden benches, using a bench with a bottom made of bricks. A bench of this kind will last many years and it is a simple matter to construct it. The very cheapest grade of bricks (that are not burned too hard) will answer every purpose. If the bench is to be built against a wall (that is a side bench) begin by spiking a row of 2x3 bench legs against the wall. Then measure off the width from the wall desired to make the bench, and stretch a line for the outside row of bench legs. The legs should be about four feet apart, and they should rest on cement piers. After cutting the legs to correspond in height with the row against the wall, nail a 2x3-inch Georgia pine cross-piece from one post to the other. This forms a bridge for the stringers. Now take some strips one inch square and cut them in 9-inch lengths and nail them against the wall over the posts. Against these strips and resting on the cross-pieces nail a 2x3 scantling, running it the full length of the bench. A 6-inch board resting on this scantling and nailed to the back strips will furnish the back to the bench, leaving an air chamber behind

WM. F. KASTING.

Treasurer-Elect Society of American Florists.

the bench which should be tightly closed at the top by nailing a 1x2-inch strip over the opening the full length.

We are now ready to finish the bottom. Take another 2x3-inch scantling and run it the full length, but, before nailing it, take a brick and place it against the stringer at the back and move the next stringer out far enough so that the brick will rest on half of it—and so on until the bench is of the width desired, leaving the last row of bricks fair with the outside row of posts and covering the outside stringer. A face board can now be nailed on, using either a 12 or 9-inch board as desired, letting the facing project about four inches above the bricks. This will allow four inches of sand in the bench when finished. Place the bricks flat side down on the stringers and as close together as they can be made to fit; then go over the whole and cement up all the cracks. Do this carefully and avoid covering the surface with cement as it would destroy the drainage which the porous brick furnishes.

We are now ready for the sand. Use a medium grade of sharp bank sand absolutely free from any vegetable or foreign matter. After filling the bench and leveling carefully, give it a good soaking and pack it as firm as it can be done; don't be afraid of overdoing this packing. Before attempting to make the cuttings be sure that the sand can be brought up to a

bottom heat of 65° to 70°, with the temperature of the house overhead 50°. This will require a curtain to retain the heat under the bench. A better way would be to board it up with thin boards with doors here and there wide and large enough to have easy access to sand and other material that can be stored underneath. Also provide a tank or several barrels sunk in the ground to furnish water for spraying the cuttings, as this should be of the same temperature as the house. Use dairy thermometers to determine the temperature of the sand; these should be placed 10 or 15 feet apart.

Select only perfectly healthy and clean wood for the cuttings. On almost any of the varieties an abundance of heel cuttings can be procured which make excellent stock. A heel cutting is a short growth of three or more eyes cut off where it joins a previous growth and they should be just about ripening up at the tips to strike easily. Do not take off the wood too close at this season as the very best of wood is obtainable in February. Sprinkle the wood often, laying it on clean paper in a cool place where the cuttings are to be made up, and do not take off more wood than can be easily made up before wilting. Also place the cuttings in the sand soon after making them, keeping them sprinkled constantly. The Killarneys, both pink and white,

H. B. BEATTY.

Retiring Treasurer Society of American Florists.

throw very little blind wood, so if one desires to get up a large stock of these varieties it is necessary to use flowering wood. Select the wood as soon as the buds show color, using the short, slender stems of uniform ripeness. The same must be done in reference to evenly ripened canes when taking American Beauty cuttings, only, in the latter case, the canes may be apparently blind but not too long between joints. Killarney and Beauty cuttings can be made up into two sized cuttings, taking off the leaf above the lower eye and making a clean slanting cut just below the bottom eye, nearly touching it. Do not trim the foliage too hard. A little room may be saved by doing this but it is not necessary otherwise.

The average cuttings from Bride, Bridesmaid, Richmond, Killarney, My Maryland, etc., can be placed about one inch apart in the rows and far enough between the rows to allow a free circulation of air; about three inches will be right. The Beauties will perhaps take more room and should be placed so that the foliage does not overlap. Use an old table knife with a 3-inch blade to open up the rows and try to open up the sand about the same depth. The cuttings which are to be planted will vary somewhat according to the size they are made. They should be packed firmly with the finger tips after placing and labeled carefully. If any part

of the sand reaches a temperature of 70° this is about right for My Maryland. Give the sand and cuttings a good soaking after putting them in and syringe or spray them overhead on all bright days, doing this early. If the house is to be used throughout the season for propagating a permanent shade can be put on the glass, but for the best results we strongly advocate the use of cheese cloth or common cotton cloth arranged so it can be drawn up or down on wires, to be used on bright days and removed during cloudy weather. The shape of the house will suggest an idea of how this cloth shading should be arranged and it will be found to work with great satisfaction after the cuttings begin to make roots, for they can then stand some light late in the afternoons on clear days, which will in a measure cause them to receive less of a check when being potted off before they become established. They should be ready to pot off in from 21 days to four weeks, according to the weather and attention given them.

E.

WESTPORT, CONN.—Edwin B. Jennings has been stricken with hemorrhage.

FAIR RIVER, MASS.—The G. L. Freeman Co. has been incorporated to raise and deal in orchids. Geo. L. Freeman will be president of the new corporation.

Roses in the South.

The past fall and the winter so far have been exceptionally clear and cool, even the inevitable warm spells being dry and of very short duration. The roses, consequently, have made vigorous growth and produced fine flowers. As the days lengthen the plants will require rather more water and plenty of fertilizer. The teas and hybrid teas are throwing up numerous ground shoots and for these to develop proportionate flowers plenty of fertilizing is necessary. Use the bone flour, blood, sheep manure and manure water as directed in former articles. American Beauty will probably require a little special treatment. If the shoots are growing strong, rank and threaten to reach the glass they can be stretched across the bed and trained up another stake. Where the foliage touches the ground it can be removed and so avoid damage from black spot. Keeping the beds on the dry side for a couple of weeks or even longer has a tendency to develop buds on the shoots, after which plenty of water and fertilizer are in order.

The most fruitful source of black spot in the south is leaky roofs. American Beauty is very sensitive to drip and where this cause is eliminated black spot hardly ever develops. Of course, a serious check of any kind may bring it on but where the roof and gutters are good there is little to fear from it. The ventilators will require close watching now especially in the morning so that old Sol may not steal a march on the grower. As soon as the thermometer reaches 65° the ventilators must be raised slightly and no other work must interfere with this operation. Raise them by degrees as the thermometer rises and lower the same way in the evening as it falls. Thrips is very liable now to show up at any time and it is better to take precautions against it than try to kill the insects after they have nearly ruined a crop. Use red pepper on the punk papers or distribute pyrethrum powder with the bellows. This is generally a persistent enemy in the spring but he can be effectually checked by using either of these remedies.

WM. LEAR.

Roses for Easter.

ED. AMERICAN FLORIST:—

I have a house of field-grown Kaiserin and Killarney which I would like to get in bloom for Easter. The plants were lifted in November and planted on raised benches in a temperature of 50° until they showed root action and broke, then the night temperature was raised to 58° to 60°. The plants are clean and healthy, but fail to make heavy growth or break at the roots.

SUBSCRIBER.

We would have preferred a lower temperature for the roses lifted in November, which would have kept the heads dormant until the new year, when they should have been cut back fairly hard and started at 50°, gradually raising the temperature as the growth developed until 58° was reached. "Subscriber" should even now cut back any growth that appears to be breaking weakly, look after the

roots carefully and avoid overwatering, and probably with the increased light good bottom shoots will be produced. There is still time to get them in for Easter without undue forcing. G.

Holding Over Roses.

ED. AMERICAN FLORIST:—

We have a bench of roses here in the second season doing well. Is it worth while leaving them in the same bench for three seasons. I know some florists advocate three and four seasons, but I have never heard the results. Any information you can give me will be appreciated.

G. T.

If the plants are healthy and of varieties it is desirable to grow there is no reason why they should not be held over another season if properly pruned and mulched with rich soil during the summer.

G.

Baby Ramblers for Easter.

ED. AMERICAN FLORIST:—

Is it time to pot up Baby Rambler roses for Easter?

Yes. Forcing will have to begin pretty soon if they are to be on time.

HACKENSACK, N. J. — Frederick Kuhnert, of Kuhnert & Son, believes he has solved the problem of aerial navigation. He tried out a model a short time ago and the success it made induces him to construct a regular sized machine on which he is now working.

THE RETAIL TRADE

Plant Baskets.

SEE SUPPLEMENT WITH THIS ISSUE.

The high prices that cut flowers reach during such holidays as Christmas and Easter have led to a greatly increased trade in plants, not only in individual pots but in the form of plant baskets which now form a considerable portion of the retailers' stock at such times. There is no more acceptable gift than a nice plant basket, for, unlike cut flowers, the plants, if judiciously selected last a long time, while they show a nice profit to the retailer. Leaving out the most expensive class of plant there are many that, with the addition of a little ribbon and a basket can be turned into good money with very little trouble or expense.

The foliage begonias are more grown the last few years than they have been and there is evidence that these pretty plants will, in the not very distant future, return to something like their old-time favor. This is not to be wondered at for they are easily grown, very attractive and last well in good condition. Primula obconica is also cheap and continues to flower over a long season and though the smaller roses and azaleas cannot be said to be long lasters they add a touch of bright color and are very attractive. In making up baskets of this kind the retailer should carefully steer between Scylla and Charybdis by

avoiding overcrowding on the one hand and a too thin arrangement, that will not be satisfactory to customers, on the other. Although we hardly like to say it there is probably less risk in overcrowding than the other way, when viewed from a commercial standpoint but from an artistic point of view it is the other way around. Most of us, however, are in the business for the money there is in it and not with a view to educating the masses, so, while keeping the artistic side to the front as much as possible, we have, perforce, to look after the customers' likes and dislikes first.

Flowers in the Chicago Stores.

All the principal retailers report very fair business and the worst trouble has been to secure good stock in sufficient quantities to meet the demand for good funeral work. Roses have been showing of excellent quality in all the popular varieties, but the supply is extremely limited. Killarney has been in strong force and it is difficult to see how this fine rose could be replaced. White Killarney has been the most plentiful of the whites, Bride being very short in supply. Mrs. Jardine has been in its best form and My Maryland has also been well shown. Good Richmond has not been over plentiful and the rush of American Beauties, which occurred during January, has ceased, they being on the short side now.

Carnations have helped out considerably, there having been good stock in

INTERIOR OF THE RETAIL STORE OF A. W. SMITH CO., PITTSBURG, PA.

BASKET OF AZALEA, PRIMULA, RAMBLER ROSE AND BEGONIA.

all the most popular varieties, good red being the most difficult to obtain. Carnation or McKinley day did not cause any great rush for this flower, the day being about the same as an ordinary Saturday. Easter lilies have been plentiful and good, and they have been extremely useful in the better class of funeral work. Lily of the valley is also much more plentiful, but, in common with violets, gardenias and other flowers for street wear, have not sold any too well. Sweet peas are on the short side and it has been difficult to get enough of good stock. Tulips are excellent and have been of great assistance during the scarcity of roses. Greens are somewhat scarce and retailers have found the fir branches (sent out as a new cypas) very useful, as they are bright and clean and last well. Plants are being shown more prominently than usual at this time and there are good cyclamens, azaleas, begonias, primulas, and other popular kinds.

Azaleas After Flowering.

ED. AMERICAN FLORIST:—

Please tell me what treatment to give azaleas after flowering, also the proper time to trim them into shape.

A. E. P.

Whatever trimming is necessary should be done immediately the flowers are over and before the plants have made any new growth. The plants that were imported this season are usually in good shape and need little trimming. After this the plants should be placed in a moist greenhouse to make their growth and frequently sprayed to keep red spider and thrips in check. By the end of May, in a cool house, the growth will probably be finished and the plants can go outside to a shady position in order to set their buds. They should remain here until the approach of frost when they must again be housed for flowering. Keep the roots moist at all times but do not water more than is necessary to do this as the roots are very small and will not stand extremes either way.

Packing Sweet Pea Blooms.

ED. AMERICAN FLORIST:—

I should like to know the best method of packing sweet peas to be sent to distant markets, say 150 miles.

A. J. Y.

After picking and tying in bunches of twenty-five flowers each they should be placed in water for a few hours, and when preparing them for shipping the stems should be wrapped with damp tissue paper. Pack in shallow boxes, which should be lined so as to exclude the air. In no instance will sweet peas shipped a distance be as good as local stock.

D.

Remedy for White Fly.

What is the best remedy for white fly?

Fumigating with hydro-cyanic-acid gas is generally admitted to be the best remedy for this pest.

DAVENPORT, IA.—J. W. Davis started on a trip through northern Texas, February 1.

HALF HOUR CHAPTERS FOR FLOWER GROWERS

Asters.

A good bench or two of white and pink asters are always useful to the retailer with a regular demand for funeral work and seed should be sown at intervals from now until the end of March, when sowing for planting outdoors is in order. Frequent transplanting is good for asters, as it produces a good "wig" of fibrous roots that will take plenty of feed later in the season. Clear a space on a bench large enough to take sufficient seed to produce as many plants as are likely to be needed, allowing say 300 plants to the square foot. This admits of sowing moderately thin and is better than very thick sowing, as the plants will be sturdy and stout from the first. Rake the soil down fine to produce a good seed bed and then water thoroughly, sowing the seed as soon as the superfluous water has drained away. Cover first with a little light, dry soil and then with papers or mats to exclude light. After the first five or six days the covering should be lifted every morning and removed entirely as soon as the seeds are seen to be germinating. Let the plants have the full light from the first and they will soon be large enough for transplanting to a bench at about two inches apart each way. Here they will thicken out and may grow until the benches can be made ready, when plant firmly at eight to 10 inches apart. If the plants were pricked out on the same bench that is to be used for growing them in, it will be advisable to thin them to the requisite distance, transplanting the spare seedlings only. The Queen of the Market varieties are earlier than the branching kinds and may be planted rather more closely. Both are supplied in separate colors or mixed, as desired, but the former is best for the cut-flower grower, as he can select colors best suited to his demand. The single varieties have come to the front considerably of late years, and they produce a large number of artistic and pleasing flowers. They are very easily grown and a bench of them early or a border outdoors should prove profitable.

Antirrhinums.

For late flowering inside and for planting outside in May the present is a good time to sow antirrhinums. These give a great quantity of flowers in the open if sown early enough, and the plants looked after carefully until ready to plant out, but, if sown thickly and allowed to run up to flower, either in the seed bed or after being pricked out once, they are useless. The best way is to sow in the greenhouse and transplant once for the plants to thicken out a little; then pot the plants for outdoors singly in 3-inch pots and run them cool in a protected frame until the quarters can be prepared for them outdoors. If more convenient, they may be planted in frames with about four inches of soil on a hard bottom, from which they will raise easily and transplant even better than

from pots. The one thing to keep in mind is to keep them in a good light with abundance of air and a fairly low temperature. This will keep the plants growing gently and the growth solid. They need rich, light soil when planted outdoors in order to get long stems.

Sweet Sultan and Cornflowers.

In order to have early flowers of sweet sultan sow now and plant the seedlings on a bench when ready. There is always a call for the pretty flowers of this plant, and as it will grow practically anywhere not much valuable space is needed. It is too early yet to sow for outdoor plants, but even for these seed should be sown earlier than most things, as the plants flower more profusely and throw larger flowers when the weather is cool than after the heat of summer sets in. If a shady place can, however, be given them, the plants continue in good shape well into the summer and the flowers produced under such circumstances are particularly fine and delicate in color. Much the same treatment should be accorded the blue cornflower, which is also a popular flower early in the season and, like its near relative just mentioned, does not relish the very hot weather. The real blue is the only one worth growing, the other colors being washy looking and undecided, while the white is white only in name. There is a double form of the blue cornflower now being offered by seedsmen. It may not be as beautiful as the single, but the flowers last extremely well and those who like novelties should try it. It is certainly one of the best plants for cut flowers outdoors early in the season.

Coreopsis.

One of the older writers on horticulture said years ago that no garden was complete without coreopsis, having in mind the pretty little annual *C. tinctoria*, a remark that was quite true at the time and carries some weight today. But the cut flower grower will prefer the larger flowers of *C. grandiflora*. When plants of this species were raised from seed as described last autumn they will be good stock now and ready for planting on the benches. Grow them along quite cool as it is a hardy plant and does not relish forcing. If annual varieties are wanted *C. Drummondii* and its varieties are better than the small flowered species named above and seed sown at once in a cool house and grown as described for other annuals will produce abundance of flowers in May before they can be obtained outdoors.

MOUNT PLEASANT, IA.—S. Palmer has secured the post of superintendent at the State hospital. He has had considerable experience in the formation and laying out of parks and gardens in this country, England and Italy, and the authorities have made a good choice from the number of applicants for this position.

THE CARNATION.

Carnations at Pittsburg.

Among the newer carnations at the Carnation Society's convention at Pittsburg, Hoosier Lad, the gold medal winner, is a grand intense scarlet, bright enough to show off to fine advantage. The form and especially the substance are good and a grand stem carries the blooms erect. This variety and Alma Ward were right to the front as the best vases of blooms in the show. It was shown by Fred Dorner & Sons Co., Lafayette, Ind.

Seedling No. 1400E is a beautiful, well-formed flesh pink; the color of this variety is particularly good. It is large, with good stem and grand texture to petalage, the winner of the silver medal. It was shown by R. Witterstaetter, Cincinnati, O.

White House is a very large, glistening white on the order of White Enchantress, but larger. A few of the blooms in this vase were a little past their best. The winner of the bronze medal, shown by Dailedouze Bros., Flatbush, N. Y.

Anna May is a light flesh pink bordering on the rose, and was given a certificate of merit. It was shown by the E. G. Hill Co., Richmond, Ind.

Rainbow is a closely built flower of the Prosperity type, with a better stem, but not as large a flower as the old variety. Shown by Wa-no-ka Greenhouses, Barneveld, N. Y.

Bright Spot, from Nic. Zweifel, N. Milwaukee, Wis., is a fine looking commercial variety; the color a bright cerise.

Mrs. C. W. Ward is a well-formed rose pink shading to the Lawson color and was shown by the Cottage Gardens Co., Queens, N. Y.

Miami Queen is a bright rose pink, but it arrived in poor condition. It was shown by Miami Floral Co., Dayton, O.

Seedling No. 40 is a beautiful bright rose pink, the size of bloom, stem

and petalage extra good, but many of the flowers, as shown, were a little faded at the edge of the petals. It was shown by F. R. Pierson Co., Tarrytown, N. Y.

Dorothy Gordon is a deep rose pink resembling Rose Pink Enchantress, but deeper in color and of better form. Shown by Jos. Heacock, Wyncote, Pa.

Superba is a heavily fringed flower, rose, pink in color, but the flowers arrived in poor condition. It was shown by A. C. Brown, Springfield, Ill.

Admiration is a light pink, in color between rose and flesh pink, of good form and size. It was shown by Chas. Knopf Floral Co., Richmond, Ind.

Alma Ward is a finely formed white with good stem; the flowers showed traces of pink, otherwise this was a fine vase. It was shown by the Cottage Gardens Co., Queens, N. Y.

No. 214 is a white with traces of pink; a large flower and good calyx, stiff stem, but a little weak on petalage. It was shown by the Wa-no-ka Greenhouses, Barneveld, N. Y.

No. 303 is a fine flower of the Prosperity type and looks good as a commercial sort of this type. It was shown by Dailedouze Bros., Flatbush, N. Y.

No. 607 is a light flesh pink shading to salmon. Shown by W. N. Rudd, Morgan Park, Ill.

No. 1407-O is an improved Afterglow, having more petals and a more pleasing color. It was shown by R. Witterstaetter, Cincinnati, O.

Spellbinder is a very deep pink; it, arrived in poor condition and was shown by the E. G. Hill Co., Richmond, Ind.

Mrs. Beckwith is scarlet, a fine bright color, but a little small for present day requirements. Shown by the E. G. Hill Co., Richmond, Ind.

No. 2807-A is a fine large crimson, a brighter color than is general in this class; shown by W. N. Rudd, Morgan Park, Ill.

Mrs. Walter W. Coles is crimson, bright, lively color of this type; it looks to be good commercially for

this color, and was shown by W. W. Coles, Kokomo, Ind.

Columbia is a crimson, but too weak in stem for any use; shown by Wagoner Floral Co., Columbia City, Ind.

Red Prince is a bright red, but not good enough to travel in this class; shown by Backer & Co., Billerica, Mass.

Scarlet Glow is a fine scarlet, on the order of Victory, but of better form; shown by Fred Dorner & Sons Co.

Mrs. Thomas Harvey has dark pink, finely formed flowers; it looks good in color and form; shown by Cottage Gardens Co., Queens, N. Y.

No. 34 is a dark pink with good stem, bright color and fine form, but a little ragged on the edge of petals; shown by A. L. Enggren, Aqueduct, N. Y.

Sangamo is a pretty bright rose pink, good stem and form of flower; shown by A. C. Brown, Springfield, Ill., and the Chicago Carnation Co., Joliet, Ill.

Conquest is a variegated, on the Prosperity order; shown by the Chicago Carnation Co.

Toreador is of the Prosperity type, but with very intense pink shadings; it was shown by H. Weber & Sons Co., Oakland, Md.

Mary Tolman is deep salmon with good stems; shown by Chicago Carnation Co.

No. 4206 is flesh pink, an improved Pink Delight in every way; shown by Fred Dorner & Sons Co.

Greenwood is salmon pink, extra large flower, strong stem; suffered in transit; shown by W. N. Rudd.

J. Whitecomb Riley was the only yellow on exhibition, clear in color, but lacking in form; shown by the E. G. Hill Co.

Niagara looks like a good commercial white, resembling White Lawson; good stem and clear color; shown by the E. G. Hill Co.

No. 68-06 is a fine white, clear and pure, good stem, with lots of substance to the petalage; shown by Fred Dorner & Sons Co.

NEW CARNATION SANGAMO.
Raised by A. C. Brown, Springfield, Ill.

NEW CARNATION WASHINGTON.
Dark Pink Sport of Enchantress.

PITTSBURGH CARNATION CONVENTION VISITORS AT FRED BURKI'S PLANT, BAKERSTOWN, PA., JANUARY 28.

Norwood is a large fringed white, a little weak in the stem; shown by Robt. Craig Co., Philadelphia, Pa.

No. 168 is a deep rose pink, good stem, fine form, pleasing even color; shown by Finleyville Floral Co., Finleyville, Pa.

No. 653 is a fine large crimson, a little dark in color, but with fine calyx and form; shown by Baur & Smith, Indianapolis, Ind.

Shasta is a fine fringed white, good form, calyx and stem; looks very promising for commercial purposes; shown by Baur & Smith.

The Pittsburgh Cut Flower Co. staged fine vases of Winona, Mrs. T. W. Lawson, Afterglow, Beacon, O. P. Bassett, Winsor, Pink Delight and White Enchantress not for competition, all of the varieties showing remarkable cultural skill.

The Lamborn Floral Co., Alliance, O., showed fine vases of standard varieties and a mixed vase of promising seedlings.

The display as a whole was remarkable for its general excellence, not a poor vase of blooms in the show, though one particular feature was the lack of white varieties in comparison with the colored varieties, the flesh and rose pink predominating, closely followed by the scarlets.

C. W. JOHNSON.

The Kroeschell Carnation Measure.

ED. AMERICAN FLORIST:—

Referring to the new carnation measure which we are just getting ready, several years ago the writer circulated among the florists of the country, the Kroeschell carnation measure, which is so well known. This measure was four inches in diameter. At that time there was no carnation that would entirely cover the measure, and when asked why the measure was made so large, he stated: "I want to set a mark for the growers to work to, and I am sure that many will make the effort which will result in finally covering the disc."

The prediction of the writer has come true. In an issue of your journal following the last carnation convention, we note a grower showing a

photographic reproduction of one of his carnations completely covering our carnation measure, and we certainly wish to congratulate that gentleman from the bottom of our heart. Today we set a new mark. Our new carnation measure has been increased to five inches in diameter, and while this may seem to be asking a great deal, yet, we feel that the growers are moving forward steadily and surely, and that with this new mark continuously before them, some growers will in time put even this 5-inch carnation measure out of business. To help the good work along, we offer as a special inducement a prize of \$25 in gold or a beautiful gold medal of equal value, to the grower who exhibits the best dozen of carnations at either of the following shows, covering the new carnation measure of five inches in diameter.—National carnation show, Pittsburg, 1910, Chicago flower show, 1910 and the National Flower Show, Boston, 1911.

KROESCHELL BROS. CO.

Carnations in the South.

These are now in full crop. The cool weather the last month has been of great value in hastening the growth and improving the quality of the flowers. Strict attention to routine work is the order from now on. The plants have to be disbudded and kept neatly tied up, and these two operations must be attended to as soon as needed to get the full benefit from them. Avoid as much as possible extremes in temperature. The varieties grown in the south will do well at 50° at night, but it is well to get them two to four degrees warmer to equalize, or rather neutralize, the changes of temperature. Ventilate freely and, if possible, keep a little air on when firing except on very cold nights. The plants will stand quite a lot of feeding now. A good mulch is made of half soil and half cow manure, with a good sprinkling of bone flour, and this can be applied roughly between the rows. Pulverized sheep manure is also excellent, and a watering with liquid manure

once in two weeks will be of benefit. Later in the season the manure water may be given every week or oftener, but at this time it is better to let the roots do most of their own hunting. Too much manure water, combined with poor ventilation, is apt to blight the flowers by causing a rot in the center.

Red spider and thrips are the two insect pests to keep a close watch for. One or two good syringings every week, done thoroughly with a good pressure and a fine spray, will keep the spider down, but no part or corner of the house must be neglected. Do this early on bright days and pick the flowers as close as possible before doing so. For thrips use red pepper along with the fumigating material and they will give little trouble. The early spring is generally the time thrips is most troublesome, and the insects must be cleaned up or they will soon clean the crop up. Cuttings, to make strong plants at lifting time, ought to be in the propagating bench now or rooted. Take the cuttings from the best flower stems, avoiding the extreme top and bottom cuttings. No bottom heat is required; just keep the temperature the same as the plants grow in. Some growers prefer small plants at lifting time, claiming that they transplant better than large ones. A large plant has just as many roots in proportion to its top as a small one, and if the same care is exercised in the lifting and planting, the danger of loss is no greater in the one case than in the other. WM. LEAR.

Rooting Camellia Cuttings.

Please give the best method of rooting camellia cuttings. Can it be done in pits, and if so kindly give best method?

R. C. T.

Camellia cuttings root rather slowly, but, otherwise, this method of propagation is satisfactory. Make the cuttings at once of the semi-ripened shoots of last season's growth. Place them in pots of sand in the pit and keep moist or, if more convenient, on the greenhouse propagating bench. Cool, moist conditions are most favorable.

Chrysanthemum Arlee.

CHRYSANTHEMUMS

Timely Work.

Those interested in the sale of plants and cuttings are busy inserting cuttings in the sand; in fact, this work has been under way for some time. There is plenty of time for those whose chief object is to produce prime commercial stock. All that requires their immediate attention is looking to the welfare of the stock plants, propagating such kinds as are slow to respond, and those where the stock is so limited as to require extra exertion to have the required number by planting time. The purchase of such novelties and standard sorts as are to be given a trial next season will require early consideration. The exhibition grower usually makes his deductions at the time of the shows and so those whose interests center in this direction have arranged the line-up for the 1910 campaign. The cuttings will soon have to be made and doubtless many of the private gardeners have them now under way. Cuttings for large specimen plants will need to be made at once. **ELMER D. SMITH.**

Stock Plants and Cuttings.

Working over the stock plants preparatory to propagating should now receive attention. If the plants are stored away under the edge of the benches or in shady places they should be brought to the light, cleaned up and given a general overhauling, at the same time making sure the soil is well firmed around the roots. They need plenty of light, with a night temperature of 45°, a rise of 5° during the day and free ventilation on every favorable occasion, fumigating regularly as a preventive for aphids. The plants should be held a little on the dry side, watering only as necessity demands to prevent wilting and the wood becoming hard. Any new or rare varieties, of which the stock is short, can be planted on a bench near the glass in a warmer house. The soil for this purpose should be very light

to insure quick root action and, as soon as the growth has advanced enough to make a cutting, it can be taken off, after which in a short time the plant will throw up several growths which can be propagated as they get into fit condition. By following this up several batches can be taken off and grown into good plants by planting time.

The time for putting in the cuttings is governed by the varieties grown and the class of stock wanted. Exhibition varieties intended to be grown on in pots or planted in the benches early in May for exhibition cut blooms should be propagated at once. Take the large Australian exhibition varieties for examples. To get these full, solid blooms at their best the cuttings will have to be got under way without delay. During February is the best time to put in the pink and white Ivory, Mrs. Jerome Jones and its sports, and others that are hard, short-jointed growers. March is the best month for propagating varieties that are intended for exhibition in large bunches, such as

Chrysanthemum Itaska.

vases of 25 and 50 blooms. The time for planting this stock into permanent quarters is around May 20, therefore plants propagated in March and grown along steady will be in the best possible condition for planting at that time. March is also the best time to start the first batch of the early varieties, such as Polly Rose, Monrovia and Pacific Supreme. Timothy Eaton, Yellow Eaton, Col. D. Appleton and Dr. Enguehard, where they can receive plenty of head room in their permanent quarters, give best results also from March struck cuttings. April propagation will give the best results for late October and early November commercial stock, also for W. H. Chadwick, Yellow Chadwick, Golden Wedding, Mayor Weaver and Maud Dean. The cuttings of the late varieties should be timed to go in the sand around April 15-May 1, which will give them ample time to make fine stock for planting the latter part of June or early July.

C. W. JOHNSON.

Elmer D. Smith's Novelties for 1910.

COMMERCIAL VARIETIES.

Donatello.—While this variety is not a counterpart of Monrovia, it is in many respects an improvement; the color is bright yellow, slightly incurving with good stem and foliage and excellent substance. It is especially suitable for those who bench their plants late as it produces double flowers from late buds. It grows 3½ feet high and is fully matured October 20. The best time to take the bud is August 20. It has been awarded a certificate by the Chrysanthemum Society of America.

Oroba.—A large early white in the way of Beatrice May being of the easiest culture with fine stem and foliage. It may not excel Beatrice May in size but its other splendid characteristics are so much superior that it will soon gain ascendancy with the commercial grower. It grows three feet high and is ready October 20. Take buds August 15.

Tonkawa.—Deep golden yellow Japanese reflexed with bronze shadings. The foliage is produced very close to the bloom and the stem is the very best. Those requiring a midseason golden bronze will not be disappointed. It grows four feet high. Best bud September 1; ready October 25. It was awarded a certificate by the Chrysanthemum Society of America.

EXHIBITION VARIETIES.

Naomah.—Large Japanese incurved, a seedling from Merza, more conical in form than its parent. This variety was not judged by the C. S. A. committee, but E. D. Smith & Co. have decided to send it out on its merits as a worthy addition to the exhibition section. If the stem were a little more rigid this would be an ideal commercial sort as it possesses every other qualification and may prove very acceptable to those who plant early and give generous treatment. It is pure white, grows four and a half feet high and is ready November 1. The best bud is Aug. 25.

Randee.—A large, ball-shaped Japanese belonging to the exhibition section. The early buds come pure white and the later ones are shaded pink;

Chrysanthemum Clorinda

petals toothed at the extremities and rather irregular in their arrangement. Take the bud August 25. It grows three and one-half feet high with heavy stem and foliage. It was awarded a certificate by the Chrysanthemum Society of America.

Adonis.—A light pink of a slightly deeper shade than Gloria. The narrow petals reflex and interlace forming an artistic bloom of the largest size in which the depth exceeds the diameter. It grows five feet high. Best bud August 25. Also certificated by the Chrysanthemum Society of America.

SINGLE VARIETIES.

Arlee.—A rich golden amber of dwarf sturdy growth, excellent either as a pot plant or for cutting. Is a true single of the large flowering section producing large sprays which are borne erect. Entirely distinct and of exceptional merit. Certificated by the Chrysanthemum Society of America.

Itaska.—Properly defined this variety is a semi-double incurved, but so near single we have included it in this section. A seedling from A. J. Balfour, but a few shades lighter. The incurving petals give the appearance of pond lilies and, being a most pleasing shade is very useful for decorative work.

POMPON.

Clorinda.—A semi-dwarf producing erect sprays of an even shade of bronze. Certificated by the Chrysanthemum Society of America.

California Chrysanthemums.

The illustration herewith shows a bunch of chrysanthemums grown outdoors in California. E. V. Upton, who grew the flowers, writes: "The stems are 48 to 60 inches long with perfect foliage. I grew 1,260 flowers from 300 plants the largest shown in picture being F. S. Vallis, 13 inches in diameter (the lowest one near my waist). I should like to have a few acres of this soil and climate near Chicago to run the greenhouse men out of business."

Propagating Chrysanthemums.

ED. AMERICAN FLORIST:—

Will you kindly tell us the proper time to propagate cuttings from Golden Glow chrysanthemums to secure a succession of blooms from September 1 to October 1? The introducer of this variety states in his catalogue that this can be done and there will doubtless be others interested. We would also like to know the proper time to take cuttings of the two Chadwicks, Helen Frick and J. Nonin to secure extra late blooms of good length stem.

T. R. J.

Cuttings of Golden Glow chrysanthemums inserted during March and April and worked along as they need it can be timed to produce a succession of blooms from September 1 to October 1. The plants should be grown along in batches, using those propagated earliest for the earlier blooms and the later ones to follow. While the blooming time of the chrysanthemum is governed to a great extent by the time of propagating and it is necessary to have a well established plant for planting by June 1 to be able to get a reasonable amount of stem and growth for September 1,

OUTDOOR CALIFORNIA CHRYSANTHEMUMS.

Grown By E. V. Upton.

yet, owing to the bud formation being so free and rapid, the taking of the bud times the blooming period more than anything else. Buds taken July 20 to August 1 will mature by September 1, but at the expense of fine foliage compared with growth from buds taken later. My personal opinion relative to this is that unless the flowers are specially needed for September 1, it is much more satisfactory to take the buds August 1-15, which will allow for the flowers to mature from September 15 to October 1. Blooms developed between these dates are the equal in size and finish of flower to many of the midseason varieties, the stem and foliage being also good. For the best results with the two Chadwicks, the cuttings should be well rooted and ready for potting by April 10; the same with Helen Frick. Jeanne Nonin needs different treatment, in fact, different to any other chrysanthemum. Cuttings should be taken from the sand June 1, potted and grown along in the pots until the roots are well through the soil and planted as soon as possible, so that there is not any chance of their becoming hard and woody. They should not remain in the pots more than three weeks,

just long enough for their roots to get a good hold of the soil by the early part of July, this being the best time to plant this variety.

C. W. JOHNSON.

Leaves for Leaf Mold.

ED. AMERICAN FLORIST:—

Will you or some of your readers tell me the best way to rot forest leaves? I find rotting them in pits very slow; it takes so long that I have almost become discouraged.

R. C. T.

It takes a couple of years to rot down leaves sufficiently to fit them for use for potting purposes. If the leaves are very dry sufficient water should be thrown on them to set up fermentation, otherwise they may lie for years without decaying sufficiently. On the other hand many people allow the leaves to rot too much. A heavy close soil-like mass is not needed. Leaf mold should be sharp and rustling with partly decayed leaves, as such material keeps the soil in good mechanical order, which is its principal use, or one of its principal uses. The leaves must be trodden down firmly when placing in the pit or wherever they are to go, and of course the leaf mold must be used from the bottom when ready.

Carnation Convention Echoes.

Robert Craig, who at the banquet responded for "The Old Men," spoke of John Thorpe, Peter Henderson, Wm. Scott, Wm. K. Harris, Wm. R. Smith and Edwin Lonsdale, and concluded by singing a few bars of "The Brave Old Duke of York." The latter venture, "for old time's sake," was received with great enthusiasm, the audience joining in.

Toastmaster Falconer had to omit many important speakers, but Benjamin Hammond and Harry Bunyard found other opportunities to advance the interests of the rose and sweet pea societies, respectively, in calling attention to their coming exhibitions.

During the convention the executive committee of the Society of American Florists held several meetings. H. B. Beatty, who has held the office of treasurer for many years, tendered his resignation, and, Wm. F. Kasting was appointed to fill the vacancy.

President Pierson and party were waiting for a Bakerstown street car when a bystander came up and said: "You look like greenhousemen away from home." It developed that he was a son of John Hackett, formerly in the business in Philadelphia.

The visit to Fred Burki's establishment at Bakerstown, on Friday, was greatly enjoyed by the large number participating. The arrangements for the trip were very carefully planned and a fine luncheon was served.

President Pierson, of the Society of American Florists, and Robert Craig, of the executive committee, missed no opportunity to exploit the National Flower Show and they are at all times on the alert for suggestions.

Pittsburg street car men call off the greenhouse area of local growers in square feet as accurately as if they had been in the business all their lives.

The banquet in the new English room of the Fort Pitt hotel was a splendid affair, the music and floral decorations being especially fine.

Carl Cropp proceeded to Philadelphia and New York after the convention.

A. W. Smith's store was a wonder to many who saw it for the first time.

Eugene Dailedouze and wife went on to Lafayette, Ind.

Robert Craig left for Youngstown on Saturday.

All to the Point.

Written by Arthur Burgoyne, of the Pittsburg Chronicle Telegraph:
Where the sign "Fort Pitt," suspended
From a palace vast and splendid,
Offers standing invitation to the traveler to step in.

If today you chance to enter,
Guided by some knowing Mentor,
You will find a bow'r of loveliness to Paradise akin.

There in friendly contest meeting
And for honors high competing
Are the kings of horticulture, with ambitious pride aglow,
Each his best endeavor making
To achieve a record-breaking
And astounding grade of merit at the Prize Carnation Show.

Oh, the gems that they're displaying,
By their wizardry essaying
To excel the work of nature, as apparently they do,
Since their art today discloses
Blooms as fine as Beauty roses
And with nuances of color which Dame Nature never knew.
There's the glorious Perfection
With its snowy-white complexion
And the Mrs. Thomas Lawson with its rosy tint and, oh,

There in all its gay bravado
Is the golden El Dorado,
And the scarlet Craig illuminates the
Prize Carnation Show
There's the pink Enchantress beaming
And the Daheim darkly gleaming;
There's the Victory, the Manley and the dainty Queen Louise,
And a host of new ones render,
By their fringed and penciled splendor,
Joy unbounded to the connoisseur who
Raves o'er blooms like these.
And our town is in the running.
Hands that never lose their cunning
Vindicate the fame of Pittsburg and let all our neighbors know
That we're up in floral science
Hence with joyous self-reliance
We bid welcome to all comers at the Prize Carnation Show.

Ferns and Their Place in Horticulture.

A paper read by N. D. Stover at the meeting of the Grand River Valley Horticultural Society at Grand Rapids, Mich.

In the entire plant world there are probably no forms of growth that attract more general notice than the ferns, although they are not sought for general cultivation as much as they ought to be from the fact that their culture is not generally understood. They are very fine for conservatory fern cases or window decorations, and as single specimens in the windows and when dried and pressed add to the culture of many a domestic circle by serving as household decorations. They furnish to the botanist a broad and inviting field for investigation and he who examines their more minute structure with the microscope will find deeper and still more mysterious relations than those revealed to the unaided eye. In olden times the fructification of the common brake (*Pteris aquilina*) led to many superstitious ideas among the common people, and the older poets have woven these popular notions into our literature.

To fully understand a fern we must search where Nature has planted it, watch it as it uncoils from the bud, matures, produces its fruit and finally returns to the earth. Our native ferns comprise plants varying in height from less than one inch to six or seven feet, or even more in some few cases. Some are stout and fleshy, others are very delicate, but most of them are herbaceous. When we look to these peculiar forms of our own country, those of foreign lands, and include the immense tree ferns of tropical countries, we find our mind inadequate to cover this diversity of form. Without attempting an accurate definition of a fern, it may be said to be a flowerless plant, producing spores instead of seeds. Ferns vary greatly in their method of growth, yet each species has a plan that, within certain limits, is fixed and definite. Some, like the common brake, have their fronds ris-

PROGRESS OF THE ARTIFICIAL CRAZE.
What We May Expect Soon.

ing from more or less distant portions of the creeping root stock; others are tufted, many fronds rising in a cluster, while others grow in crowns or circles. The same species will often present wide differences in the size of the fronds. This depends to a great extent on the kind of soil and climatic conditions. In some instances some varieties under good conditions grow from two to four feet, and in other cases the same variety, under adverse conditions, will only grow from four to six inches and yet regularly produce spores; in other cases a variation is noticed in the forking of the fronds at or near the end of the branches.

We would naturally expect to find ferns reaching a maximum in size in warm swamps and shady places. While this is true we find, nevertheless, many spores growing only in rocky places, pushing their roots in the crevices of the rocks, and many often exposed to hot sun; others again are found in rocky wet places, and certain others thrive in open fields that are dry and unshaded. While moisture, shade and warmth are the best conditions to promote heavy growth, it still continues when all these conditions are reduced to a minimum. All of our native ferns which are perfectly hardy, and many of them make beautiful specimens, can be transplanted with good success late in the summer or early fall. They will thrive in almost any good rich soil, but if possible woody soil should be added. Plant them in a sheltered location, or in shrubbery on the outside of the groups, or in a corner around the house where they can be watered. Grouping is much preferred, by carefully selecting the tallest growing ones for the background and grading them down to the lowest growing ones for the front of the group, they will make a grand addition to the lawn.

I find in looking up the number of species there are in the island of Mauritius, having an area of about three of Michigan's counties, 235 species; the island of Java, 460 species; Brazil, 387 species, and Panama, 117. We find in all Europe only 67 species, and only 26 in the arctic zone. We find in coal mines that ferns and many other forms of growth have been in great abundance, and their delicate foliage is impressed in the rock above the beds of coal. The names of the principal varieties growing in Michigan are *Adiantum pedatum* (maiden hair fern), *Aspidium acrostichoides* (Christmas fern), *Aspidium cristatum*, *Asplenium augustifolium*, *osmunda*, *claytonia* (beech fern). In speaking of ferns for the house we find the Boston fern, *Nephrolepis exaltata Bostoniensis*, the very best for all purposes. It is the ideal fern and the most popular of all house ferns. It will thrive in almost any house where the temperature is above 55° or 60°. Its merits are so apparent that they appeal to us at first sight, and the sale of this one variety is probably double that of all other varieties combined. There are a great many sports from this well-known variety. Among them are *Scottii*, *Whitmani*, *elegantissima*, *superbissima*, *Amerpohli*, and many others, but each and every variety, though most beautiful and many of them just like large feathers, must bow their head to their parent, the old Boston fern. There are many small growing ferns which are used for fern dishes, for the center of tables and for stands around the room or for the sideboard. The best varieties for this purpose are *Adiantum cuneatum*, *Aspidium Tussimense*, *Cyrtomium falcatum*. *Pteris hastata*, *P. adiantoides*, *P. cretica albo lineata*, *P. serrulata* and *P. Wim-*

setti. It seems to me that ferns are so beautiful and thrive so well, even under adverse conditions, that they ought to have a large place in horticulture.

RECENT BOOKS.

The American Flower Garden.*

"The American Flower Garden," by Neltje Blanchan, is a well got up book of nearly 400 pages and 92 full page illustrations from color prints and halftones. In the chapter on "The Partnership Between Nature and Art" the authoress maintains that the landscape artist and gardener seldom get credit for their work either from poets or from their employers and do not remain in charge of their work long enough to bring it to perfection. But if garden owners would study this charming work there would be less risk of the landscape gardener's work being spoilt afterwards by well meaning people and irresponsible laborers who can do more in a week to spoil a garden than can be outgrown in many years. The text is not pedantic or stilted but runs along smoothly to speak of the adaptation of the design of the garden to its situation and describes the formal garden, wild garden and many others, the illustrations helping to show the authoress' points.

After a chapter on "The Old Fashioned Garden" a list of the surviving plants of the old New England home gardens is given and much the same system is followed after the "Wild Garden," many of our native plants with their popular as well as their botanical names being given. There are some beautiful pictures in the portion of the book devoted to water gardening and these are suggestive for planters. Trees and shrubs are dilated upon at considerable length and here again useful lists are given while bulbous plants, the "Rose Garden" and "Garden Furniture" are all well done. It is not in any sense a book for a florist but rather one for the home and garden lover to have on the table handy to dip into at any and all times and full of interest to such. Its perusal by anyone who is about to make a garden, no matter how large or how small, will prevent many of the glaring errors so frequently made by beginners, while none is so experienced in garden making but that they can find something of interest in every chapter. The price is \$5.35.

House Plants.*

"House Plants," by Parker T. Barnes, is the most recent of the "Garden Library" series and an attractive little book of 236 pages. The author goes very thoroughly into his subject and by means of suggestive illustrations and clear simple instructions in the text tells the whole story of plant culture as adapted to the conditions obtaining in the dwelling house. He describes in detail how to procure and prepare the soil, gives instructions as to potting, seed sowing, raising plants from cuttings, treatment of plants in sickness and health, watering and destroying insects. Bulbous flowers, as may be expected, come in for a good deal of attention and the instructions given are clear and to the point. The "Window Gardener's Calendar" at the end of the book is useful, as the work is described briefly, while by turning to the very complete index it is easy to locate further particulars and instructions as to

*We can supply any books here noted on receipt of price quoted.

the various plants. The work is nicely bound in cloth, finely printed and contains 30 illustrations. The price is \$1.20.

VAUGHAN'S GARDENER'S CALENDAR 1910 is a useful little publication for the pocket. It has been issued by Vaughan's Seed Store for several years and has proved very popular among private gardeners, so much so that the demand for it this season is much greater than ever before. It contains useful lists of plants for various purposes and reminders of the work to be done in each month, a space being left under each for memoranda. A host of other information is given in tabulated and other forms that cannot fail to be of assistance to any gardener.

Floral Tournament in Honolulu.

Honolulu is to have on February 22 a grand floral parade, which fact is being communicated to the people of the northwest by means of flaming posters. The Gould railway lines office at Portland, Ore., has just received one of the brilliant pieces of advertising art, depicting a Hawaiian woman on superb mount, dressed in the costume of the higher class women, and bearing the banner of the floral parade. As a piece of strong color work, this poster eclipses San Francisco's strongest Portola lithographs or the best that was sent out for the rose festival of Portland. The season when the floral parade is held is ideal in Hawaii, and a great throng of tourists will flock in there. By visiting Hawaii at this season, time is given to see the islands in proper fashion and then proceed to Japan for the famous cherry blossom season, which begins the last week of March or the first week of April.

OBITUARY.

Wallace Leonidas Scott.

Wallace L. Scott, father of C. W. Scott, of Vaughan's Seed Store, New York, died at his home at Grand Rapids, Wis., January 30. Mr. Scott was born at Clyde, N. Y., in 1838, and his principal occupation was farming. He was a Civil war veteran and in later years added a retail flower business to his farming operations. Mrs. Scott and four children, two sons and two daughters, survive. Alexander Henderson and M. Barker went on from Chicago for the funeral, which was largely attended by the local friends of the family. The floral offerings included two handsome wreaths from Vaughan's Seed Store employees, Chicago and New York.

WINCHESTER, MASS.—The greenhouses of the late George Milne on Lincoln street are to be conducted by his wife.

NORTH BRIDGTON, ME.—Chas. L. Chadbourne is building an addition to his potting shed and one greenhouse 20x50 feet.

WELLESLEY, MASS.—Thomas Heskey, who has been foreman at Tailby's greenhouses, has resigned to accept a position in Newton.

NEWTON CENTER, MASS.—M. Orcutt has purchased the greenhouses of Frank Brooks, on Brookside avenue, and will continue the business.

MARYSVILLE, CALIF.—F. Evans has taken the well-known gardens of Mrs. Mary Karr at Fifth and F streets, and will use them for trade purposes.

H. B. BEATTY'S retirement from the treasurership of the Society of American Florists, announced elsewhere in this issue, will be received with deep regret by his many friends in the trade.

Personal.

John N. May and wife, Mrs. Wm. K. Harris, Mrs. Robt. Craig and Miss Margaret Harris are in Florida.

SEVEN weeks to Easter.

THERE are three candidates for the S. A. F. presidency thus far.

MAKING concrete blocks and benches is good work for bad weather.

THE National Flower Show preliminary premium list is almost ready for the printer.

GROWERS in low lying localities should be prepared for floods when the snow melts.

THE high prices generally on carnations doubtless had a good deal to do with the scant demand for McKinley day.

LINCOLN and Washington's birthdays will doubtless be taken full advantage of by retailers to make suitable window displays.

IN a reply to his critics as to his "creations" Luther Burbank, in the New York Times, says he never made any pretense that he "created" the thornless cactus. At the time of introducing the spineless cactus he said in the catalogue, "for more than 50 years I have been quite familiar with thornless cactus." He also says it was eventually agreed upon that he should "have the privilege of supplementing their inadequate annual aid"—"by the sale of any productions as heretofore."

Society of American Florists.

RESIGNATION OF H. B. BEATTY.

Owing to impaired health, H. B. Beatty, treasurer of the S. A. F., tendered his resignation at a meeting of the executive board held at Pittsburg, Pa., on January 26-28, 1910. The resignation was accepted by the board. The appointment of Wm. F. Kasting, of Buffalo, N. Y., as the successor of Mr. Beatty was confirmed. Mr. Kasting having been duly qualified according to Article II, Section 3, paragraph (d), is now treasurer of the society. The following are the resignations passed by the board:

Pittsburg, Pa., January 27, 1910.

F. R. Pierson, President Society of American Florists:

I hereby tender my resignation as treasurer of the Society of American Florists and Ornamental Horticulturists, to take effect as soon as my successor can be elected and qualified. As a large majority of the directors of the society are in the city, I trust that you may be able to get them together today or tomorrow to elect my successor, as I desire to turn over all funds of the society as soon as possible.

H. B. BEATTY.

Fort Pitt Hotel,

Pittsburg, Pa., January 27, 1910.

Whereas, The executive committee of the Society of American Florists and Ornamental Horticulturists has received the resignation of H. B. Beatty, as treasurer of the society,

Therefore, Be It Resolved, That in accepting this resignation we desire to place on record our appreciation of his long and valued services to the society and his unbounded liberality with the office. We part with him with the greatest regret which we feel sure will be shared by every member of the society. It is only our consideration for his impaired health, which

we are assured is due to overwork in his many interests, that compels us reluctantly to accept his resignation at this time.

H. B. DORNER, Sec'y.

Crops for Small Houses.

ED. AMERICAN FLORIST:—

Being a reader of your helpful paper and desiring a few suggestions in regard to the culture of flowers any little help will be greatly appreciated. I have four houses 12x55 feet heated with hot water and would like to know what I could grow that would be the most profitable for this type of house. The houses were originally built for violets but have been idle for a couple of years. From the highest point on the beds to the ridge is a trifle over six feet, although I have one house with seven or eight feet to ridge. The beds are solid, having no heat beneath the soil. They are in a good location and get plenty of light. I can run them to 60° in the coldest weather. I can sterilize any of these houses with my boiler as it is fitted for this work. Any suggestions will be greatly appreciated.

W. M.

The first thing to do is to find out what is most in demand in the neighborhood as there are many crops that could be grown in such houses. The plant would not be large enough to go into growing for the wholesale cut flower market with any prospect of success, but if there is a local demand at retail for bedding plants these should be a very profitable line. During the summer the houses could be filled with tomatoes which could be taken on until early winter when they usually command good prices. In most places there is quite a demand in spring for tomato, pepper, lettuce, cabbage and other vegetable plants which can be grown along with the bedding stock and if there are amateur gardeners in the district these will be glad to get hold of plants and vines for their homes, window plants, seeds and sundries. If there is any chance of working up a trade in wreaths or funeral flowers a few carnations could be grown, also any outdoor flowers if there is room around the houses to grow them. Ferns would do well in small houses such as those described and anything that could not be grown could be purchased whenever a trade was worked up. Always keep in mind the fact that it is harder to create a demand than to supply one already existing. This making it important to find out what is really needed in the neighborhood. This can be more easily done there than here and when decided on what is to be grown write again should there be any further advice needed.

Situation Wanted.—Practical single florist. German, 28 years of age; good experienced grower of roses, carnations, mums, pot plants, etc.; Wisconsin preferred; state wages in first letter.

Key 435, care American Florist.

Situation Wanted.—As gardener, private or public; experienced in all branches; trained in Scotland; special experience in chrysanthemums and pot plants; Canada preferred; married; abstainer; age 28. Address

Key 431, care American Florist.

Help Wanted.—An assistant on roses; wages, \$12 per week, with show for advancement.

WILLIAM DITTMANN, New Castle, Ind.

Help Wanted.—Experienced vegetable grower for under glass; must be sober and industrious; steady situation, send reference.

Key 428, care American Florist.

Help Wanted.—Strong young man not afraid of work; some experience in greenhouse work; state wages expected, with room and board.

GEORGE ALLAN, Princeton, N. J.

Help Wanted.—Young man as assistant in growing of pot plants; wages, \$12.00 per week. Address with copy of references, and experience.

Key 437, care American Florist.

Help Wanted.—Florist and gardener; must be an experienced all-around man, sober and competent; good job if you want to work; married man preferred. Answer at once and send references.

OTTO SCHWILL & Co.,
Seedsmen and Nurserymen, Memphis, Tenn.

Wanted to Rent.—Greenhouses of 5,000 to 20,000 feet of glass, retail or wholesale; or will go as partner; good grower and good worker.

FRANK H. WILHELM, Florist,
Downer's Grove, Ill.

Wanted to Rent.—Greenhouse establishment; 15,000 to 20,000 feet; must be in good repair, good location and good rose soil required, shipping distance of Chicago preferred.

Key 438, care American Florist.

Wanted.—Greenhouse, about 5000 ft. of glass, dwelling, one or more acres of land.

Key 436, care American Florist.

Wanted.—Information of a man by the name of Zina Tanner; his father would be very thankful.

CLARK TANNER McGREGOR, Minn.

For Sale.—First class florist business in city of 30,000; reason for selling; other business.

Key 999, care American Florist.

For Sale.—Some 3-inch pipe guaranteed sound, 7c per foot. Also several good small boilers cheap.

W. H. SALTER, Rochester, N. Y.

For Sale.—Cottage, house and barn and three acres of land; good greenhouse, hen house, fruit; easy terms.

Box 24, Milldale, Conn.

For Sale.—A good florist retail business in growing city in western New York; 5,000 feet of modern built glass, with work room and living rooms attached; best place in town; a good trade. A good place for the right man. Reasons for selling, other business. Price and details on application. Key 429, care American Florist.

FOR RENT.

Greenhouse, 12,000 feet of glass; stocked with sweet peas, carnations, bedding plants; good house; 10 acres of land; near Chicago; \$50.00 per month.

Key 425, care American Florist.

WANTED

At once, a competent rose and carnation grower; permanent position to sober, reliable man; wages \$18.00 per week. Address

Key 941, care American Florist.

Help Wanted.

A thoroughly competent plantsman well posted in trees, shrubs and all hardy planting material. A good promising position for the right man who knows his business and can handle men. State references and salary wanted.

"Practical Hustler," care American Florist.

Ornamental Nurseryman Wanted

One familiar with varieties, propagation and growing of ornamental trees and decorative plants. Address

THE SILVA-BERGTHOLDT CO.

Newcastle, California.

Situation Wanted.

By first-class young Hollander, married, no children, four years' American experience and ten years' experience in different countries in Europe and East Indies; private situation preferred; experienced in landscape gardening and managing a private estate; also capable of managing an ornamental nursery; eastern states preferred; age 30.

Key 426, care American Florist.

TO RENT.

A very rare opportunity of one of the most modern and up-to-date florist establishments of about 15,000 sq. ft. glass; hot water heat; Superior tubular boiler; entire place equipped with electric lights, cement walks and floors; work building 20x115 two stories 8-room modern flat; good established business; the conveniences and accommodations to all transportation, etc. are too numerous to mention; they cannot be excelled; if interested an investigation will convince.

RICHARD F. GLOEDE

1405-1407 Central St., Evanston, Ill.

Store and Retail Business For Sale.

A fully equipped and only store in a town of 15,000 in New York state; the entire good will and an established business for more than 15 years. Business now \$8,000 to \$10,000 per year, and can be much increased by a good live man. On account of poor health, are willing to sell at a sacrifice, and \$3,000 will buy it. If you mean business, address

Key 971, care American Florist.

Nursery Foreman.

I want a Nursery Foreman, married man preferred, for city nursery in Oregon; a man who understands the propagation and growing of nursery stock and must be able to superintend all outside work, care for customers, take orders, etc. This is a good place for an ambitious young man. Address

KEY 998, CARE AMERICAN FLORIST.

Retail Store Man.

The advertiser, located in the south, wants a good man to take charge of the retail cut flower department. He must be fully competent to turn out high class design work and decorations. One who has a general knowledge of the seed business would be preferred, as the cut flower department is carried on in connection with a general seed business. A good salary to the right man. Address

Key 431, care American Florist.

FOR SALE.

About April 1st we begin tearing down a range of 85,000 feet of glass to make room for more modern houses.

We will have for sale ventilating machines (Hippard), ventilators, ready glazed sash bars in length 8 ft. to 14 ft., gutters and 4-in. cypress and cedar posts, glass in small sizes. Just the material for building small houses, lean-tos, partitions, etc. Will sell any part or all of it.

J. M. GASSER CO., Rocky River, Ohio.

Greenhouse Construction

BY PROF. L. R. TAFT.

It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 210 pages and 118 illustrations. PRICE, \$1.50

Greenhouse Management

By the same author. Covers the subject completely. 382 pages. PRICE, \$1.50.

American Florist Co.,
324 Dearborn St., Chicago.

Our Beauties Are in Full Crop

We are receiving 500 per day of the finest quality Beauties ever seen on this market.

Wire us your orders and you will get them.

IN spite of the great scarcity of Beauties in nearly all wholesale houses we have the goods. Our growers have been exceptionally fortunate and are consigning splendid long stemmed flowers with grand foliage. The cut is only beginning and we shall be right in it with Beauties for the next few weeks. Let us hear from you; it will be to your advantage and ours.

Violets for St. Valentine's Day

The demand is already heavy but we are well prepared for it. All your customers will want violets for this occasion.

Killarney

White and Pink. The finest stock on this market; our growers have made a lucky hit on these popular varieties.

Brides and Maids

We have taken care of our customers through the scarcity and can continue to do so.

Tulips

Beautiful flowers of Lorraine, pink and white, and all the other popular varieties. Fine stock, long stems. Large supplies received daily.

Jonquils

A good supply of fresh stock in the best and most popular varieties arriving regularly.

Mexican Ivy

This popular long lasting green in any quantity; always fresh and bright.

VAUGHAN & SPERRY, Wholesale Florists, 52-54 Wabash Ave., ...CHICAGO.

Chicago.

LITTLE CHANGE IN CONDITIONS.

There was little change to report in the condition of the market at the end of last week. Roses continued far below the demand and orders had to be cut in half in many instances and some turned down entirely. The plants have evidently not recovered from their severe cutting at Christmas and though some say that bright weather only is wanted to bring them in plenty, growers of experience say that considerable growth has to be made in most cases before any crops of consequence can be cut. The scarcity, however, is helping the sale of carnations and McKinley day on Saturday, though not making any very great demand locally, helped out a little along this line, many carnations being shipped to out-of-town points, consignments to the Buckeye state naturally leading. The flowers are improving right along and there are excellent showings in all the popular varieties, red being, perhaps, the most scarce.

Early in the week, quite a scarcity in American Beauty roses developed and although the larger growers of roses said that their plants were setting buds well there is little relief in sight for some time in the case of the teas. Carnations were very firm on Monday and four cents were again demanded for the choicest reds and Enchantress of best quality. Good Lorraine tulips, pink and white, are arriving in increasing quantities and are bringing good prices for the growers. Should they continue to increase in quantity, as they probably will, they will relieve the rose situation somewhat. Retailers do not relish paying the same prices for roses now that they paid at Christmas but, as wholesalers say, they had more flowers around the holidays than now in comparison with the demand. Practically everyone agrees that roses were never so scarce at this season of the year. Cattleyas are more plentiful and the demand not quite so good. Quite a few flowers are being sent in from local growers, but why they cut them in such an undeveloped condition, when a few days longer on the plants would greatly improve them, it is difficult to say. Cold, stormy weather is against their sale as it is against violets, gardenias and other flowers for personal adornment. Sweet peas are improving but slowly and the price is still high, the best flowers being scarce. Greens of all kinds are high in price and scarce. A novelty in this line being handled by several houses is a species of fir, possibly the balsam, that has fine, deep green, lasting foliage and which we were introduced to as a "new cypress." There is a good deal in a name sometimes.

The coal situation has been considerably relieved and cars are moving

more freely, lower prices being now asked. Speaking of his experience at Pittsburg at the carnation convention C. L. Washburn of Bassett & Washburn, says that the growers there in the middle of the coal country were as badly off as here. Mr. Washburn came back suffering from an ulcerated tooth which has given him considerable pain.

Orders from New Orleans for the Mardi Gras celebrations began to come in early during the present week and these will doubtless continue until the week end, Friday and Saturday being probably the busiest days. Advance orders for St. Valentine's day also came along and the outlook for violets is good. Local singles are in elegant shape and the growers at Park Ridge and other points say they will have plenty for all.

NOTES.

Vaughan & Sperry have certainly the best of it in American Beauty roses. All through the week splendid long-stemmed flowers have been arriving to the tune of 500 or more per day and their growers report more to follow as the crop in sight and on the plants is a very large one. Violets are unusually good and all classes of bulb stock are well represented, tulips and jonquils being especially good.

C. Clemensen, 7801 Railroad avenue, South Chicago, is building a new store and show house 26x125 feet, also a residence, to cost \$9,000, and is remodeling all the old greenhouses. He will pay more attention to the store trade in future than growing for wholesale and will probably build more glass this summer.

Matters before the monthly meeting of the Florists' Club at the Union restaurant this week were the applications for membership from Edward J. Fichter, 1965 Summerdale avenue; J. F. Dumke, 7047 Wentworth avenue and Wm. Graff, 1332 Byron street,

"The Busiest House in Chicago"

IF you are in the market for cut flowers and greens—stock that is better than the average, but no higher in price than the ordinary—it will be to your advantage to consult

:: Easter Lilies ::

We are cutting an average of one thousand lilies per day, very choice stock, long stems, large flowers and fine foliage. They are the best flowers in the market and are in great demand during this shortage of Beauties and Roses. We are selling them at \$12.00 per 100 or \$1.50 per dozen. Buy direct of the grower and get fresh stock. **American Beauties, Roses, Fancy Carnations, Tulips, Daffodils, Lily of the Valley, Easter Lilies and Greens.**

Write us for our weekly price list if you are not receiving it. We keep you posted on the flower market.

Bassett & Washburn

Store and Office: 76 Wabash Ave.,

CHICAGO

Greenhouses: HINSDALE, ILL.

also the installation of the recently elected officers.

Bassett & Washburn's stock, now coming in from the Hinsdale greenhouses, is magnificent in every way and arriving in very fair quantities considering the general scarcity. C. L. Washburn says that the prospects are good for plenty of stock in the not very distant future.

Moss shipments from Wisconsin points are greatly delayed by the freight blockade. It is reported that the Chicago, Milwaukee & St. Paul R. R. has 30,000 freight cars blocked. The big fall of snow has put a lot of side tracks out of use.

The J. A. Budlong Co.'s stock continues to arrive in elegant condition and, considering the general scarcity, in large quantities. Bride roses and excellent carnations in all the leading varieties were specially noted.

The J. B. Deamud Co. is featuring magnificent Lorraine tulip, pink and white, grown by Fred Stollery of Evanston. This is certainly elegant stock and is selling at a great rate.

A meeting of the florists' advisory committee of the Illinois Experiment Station will be held at the Union Restaurant, Friday, February 4, at 6:30 p. m.

At Winterson's Seed Store cleaning up and renovating are going on as well as the preparation of the new spring catalogue and everybody is busy.

Good Cattleya Trianae is now to be seen daily at Poehlmann Bros. Co.'s store, the produce of plants growing at the greenhouses at Morton Grove.

Fred Klingel, until recently with Geo. Reinberg at the store at 51 Wabash avenue, has joined the staff of John Kruchten.

Visitors: Paul Berkowitz, representing H. Bayersdorfer & Co., Philadelphia; Wm. Swinbank, Sycamore; Frank Schramm, Arlington Heights; J. Carnehl, Park Ridge; Andrew Schlevogt, Brooklyn, N. Y.; J. A. Valentine, Denver, Colo.; Wm. Rynsbarger representing H. Zyp & Co., Lisse, Holland.

Cleveland.

ROSES SCARCE.

Roses are becoming more scarce as time goes on; the local wholesalers have a hard time filling orders, and a slight rise in price is the inevitable result. Sweet peas are plentiful and of excellent quality. Lorraine and Proserpine tulips are becoming more plentiful, while daffodils are still rather scarce. Callas are more plentiful, with a good demand. Violets of good quality arrive daily, with a fair demand. Carnations just about keep up with the demand. Fancy ferns of excellent quality are finding a good market.

NOTES.

The boys who attended the Pittsburgh carnation show report a good time; they say they also were benefited by the little talks they had with the different retailers.

L. L. Lamborn's store at Canton was burnt out completely January 27. The entire block, which is owned by Mr. Lamborn, was completely gutted.

H. Piggott, formerly at 4248 Pearl road, is about to open a retail store in the Taylor arcade.

C. B.

DeKalb, Ill.

J. Leonard Johnson has added a new house, 21x120 feet, to his range, giving him a total of 10,000 feet. At present he is using it for lettuce and bedding stock. He has been uniformly successful in the venture since commencing business four years ago. His trade has shown a steady improvement each year, as he has practically no opposition. He reports a very good business in carnations on McKinley day.

Carlson Bros. have begun business in Brown's drug store and will deal principally in cut flowers. They report sales aggregating 800 carnations on the opening day, which was McKinley day. The members of the new firm have had no experience to mention, but on account of their favorable location it is thought will do some business. The trade wishes them well.

Peter Reinberg

2,000,000 Feet of Modern Glass

35 Randolph Street, CHICAGO

Sycamore, Ill.

A visit to Wm. Swinbank's place is always a pleasure. He has about 24,000 feet devoted to a miscellaneous stock, though carnations and roses are his main reliance. He expects to rebuild one house in the near future, and erect another along his entire front for show house purposes. A separate hot water heater will be installed for heating both new houses and the residence. Mr. Swinbank has no competition, but does a considerable business in the nearby towns. The carnations are in apple-pie condition, as good as one could wish for.

B.

St. Louis.

A BUSY WEEK.

The past week was a busy one, opera, weddings and social events crowded in. On Saturday there was somewhat of a demand for carnations for McKinley day, but a great many avoided buying, as carnations could not be retailed at five cents; 10 cents was the price. This is to be regretted, as many would go without rather than pay 10 cents, while at five cents they would attract the multitude and thus assure a standing demand. Violets are selling well, although artificial bouquets hurt sales. Roses are decidedly scarce; sweet peas are selling at 40 cents to 50 cents per 100. Galax and all greens are selling well. Quite a few lilies are in. Graduating exercises greatly increased the demand on everything.

NOTES.

Julius Koenig can be seen daily on our residence streets overseeing the trimming of trees by the Kinloch Telephone Co. This work is done in the interest of the forestry department.

Wensel & Hecht Anglum have two houses 27x100 feet, with carnations, sweet peas and all kinds of pot plants. They will build this summer three houses 27x100 feet.

Martin Hecht, Wellston, has two houses, 32x100 feet, with carnations and sweet peas. One new house 32x100 feet will be built this summer.

Rudolph Gross is shipping some extra fine long stemmed violets. This is his first year at growing and he has been very successful.

Young & Sons' windows are very pretty with Begonia Gloire de Lorraine and a profusion of violets and lily of the valley.

At Smith's violets are disposed of by the thousand daily besides a great many carnations almost entirely from local growers.

The flower booth at the charity bazaar at the Coliseum will be in charge of Mrs. A. J. Bentzen.

Everette Creagh Burrows, formerly partner of N. Pilcher of Kirkwood, died January 27.

A. C. Brown, of Springfield, Ill., is shipping some fine carnations to this market.

Wm. Smith is very busy preparing his essay on the "Troubles of a Wholesaler."

W. F.

Milwaukee.

There are two serious problems which await solution, the regulation of quality and price: Richmond roses are quoted \$4 to \$8 today. If a retailer wants perfect flowers and orders the \$8 roses they prove to be satisfactory. Six weeks later he has another job requiring the same stock; they are then quoted \$5 to \$10, and he orders the \$10 stock, which proves to be inferior to that bought at \$8. We have progressed to a point in managing flower shows where the first prize is not always awarded to the best entry regardless of its merits, and we know instances where second and third prizes were awarded only. This is a hopeful sign. The fixing prices is frequently a dilemma for the commission man, a frequent predicament is to have a quantity of good stock left some day after the regular trade has been supplied. A faker makes an offer for it; if he makes a sale of that nature, it will save a few dollars for his growers, but when his morning customers find stock being sold for less than they paid, other pictures are drawn for him to gaze upon. Economy of gray hairs requires a speedy solution of these problems. However, signs are hopeful and the spirit of fairness and co-operation along these

lines is growing. There is a co-ordination of interests and a fellowship feeling here that could not have been predicted years ago. The "all pull together" for the last flower show has helped this progressive spirit wonderfully.

C. Valom has purchased 10 acres in North Milwaukee, about half a mile east of Nic Zweifel's plant. He will take possession in February and begin preparations for a growing plant.

Advantages of the Flower Shows.

A paper read by J. F. Ammann, Edwardsville, Ill., before the St. Louis Florists' Club.

This question could be answered in many ways and a very lengthy paper written, on account of the many benefits each branch of the profession derives from flower shows. I shall, however, try and point out a few of the most important facts pertaining to each branch of the trade.

The retailer derives much from the flower shows, especially if he is alive to the situation and takes an active part in the exhibition, while most retailers who do not exhibit give as a reason too much trouble and expense, yet it is a fact nevertheless, that a well managed flower show is the best educator and cheapest advertiser known to the profession today, when so many private individuals are ready to donate time and money to prizes for an exhibition which they consider educational and elevating to mankind, as is the case in flower shows. It is only the drones of the profession who will not grasp at the opportunity to advertise themselves as well as help the good movement along by taking active part in the exhibitions.

The retailer is nearer to, and the only branch of our profession that comes in direct touch with the consumer. The more ways and means he can provide to create a demand for the product the more he is benefited. Where is that means more at hand than at a flower show? Where can it be procured for less money than at a flower show? Where is he paid for filling his space and where are newspaper items published for him, (advertising he could not purchase at all) for absolutely nothing? I think, gentlemen, this is sufficient reason why a retailer derives much from a flower show.

THE WHOLESALER.

Next the wholesaler; poor fellow, I always have had a soft spot in my heart for this unhappy medium. He stands between two fires all the time. The growers expect high prices and the retailers to buy cheap, so in steps the wholesaler and says "we will split the difference" and it goes. I really believe if it were not for the wholesaler the retailer and grower would not be on nearly such good terms as they are. On one thing we can all agree I am sure and that is, if the retailer can devise a scheme by which he can create a stronger demand for his goods the wholesaler is also benefited by it, so the foregoing reason will suffice for the wholesaler being benefited by flower shows as well.

THE GROWER.

When we talk about the grower I begin to feel a little more familiar with my subject for I have been a may continue so another quarter). If flower shows are a benefit to the victim to this branch for nearly a quarter of a century (and I only hope retailer and wholesaler they are doubly so for the grower. On the success of either of the other two branches of the trade depends entirely (and well it should) the prosperity

of the grower. I am sorry to, but can, I think, without fear of contradiction say that no producer of any article, be it manufactured or grown, is so slow in taking advantage of exhibiting his wares as the average grower of flowers and plants. We can readily recall where farmers and stock raisers as well as manufacturers pay exorbitant prices for space at various exhibitions and fairs to show their product. Does the grower have to do that? No, on the contrary he is paid, and in most cases paid well, for his exhibition, and in addition gets just as much if not more advertisement for his goods than any other profession. I hope the day is not far distant when all the growers will see the flower shows in this light as so many of our leaders have already and help to make them a grand success everywhere. I only hope the contents of this paper will be received by all who hear it in the spirit it is given and every retailer, wholesaler and grower in St. Louis, in fact everywhere, will join me in giving three cheers for the flower shows and all hail to the men who work so hard in making them a success.

Beautiful Carnations from Union City, Tenn.

"The Banner received today a box of beautiful red and white carnations grown by the Postma Floral Co. at Union City. They are unusually large and hardy specimens and show what care and patience can accomplish. The white Mr. Postma has named for Gov. Patterson, because white is his favorite. The red he calls The Carmack, because the late senator loved that color best. Another he has named C. W. Farris, in honor of the president of the West Tennessee Fair Association. Still another is Mrs. J. K. Postma. It is a large red and a beautiful flower."

The above is a clipping from a recent issue of the Nashville Banner. The Banner is the best paper in Tennessee, but how its opinion will be regarded by the trade in general on matters now so all absorbing as the merits of the numerous varieties of carnations remains to be seen.

That the Postma Floral Co. should introduce these "large and hardy specimens" must be a matter of pride to the entire state. It is probable that Secretary Baur has the pedigree of these new comers. And again it is possible that P. F. Co. has by this time placed a representative quantity of these hardy specimens before the committee at the Fort Pitt.

Carnation growers from urban and suburban regions of the great carnation belt will be interested. These beauties should not be confined to the regions of Reelfoot lake. The specialists in other sections would now be interested as the carnation at the present time is in the limelight and looked upon with keen interest by commercial florists as well as many others of a speculative turn of mind that believe there are fortunes to be made in the further development of the divine flower.

In view of the warring factions in this state it is remarkable how a Pattersonian white and a Carmackian red could ever evolve from the same capsule. While the Postma Floral Co. is bringing forth so many notable productions of skill as hybridists the writer would suggest some combination of colors as represented at present by the friends of the "martyred hero" and the little "game rooster" of the democratic party. Some blending of the red and white with some such appellation as the "dove of peace" would be welcomed by all Tennesseans.

THE FLORISTS' EXCHANGE

—OF—

729-13-N. W., WASHINGTON, D. C. Phone Main 7576

Solicits Consignments of Cut Flowers. This is strictly a co-operative corporation composed of 19 Growers and Retailers of the District of Columbia, under the management of Albert Schnell, formerly in charge of the Washington Branch of The Pennock-Meehan Co. Consignors are welcome to inspect our books and see at what price their stock was sold, to satisfy themselves that they are credited with full amount.

Philadelphia.

GOOD STOCK SCARCE.

The scarcity of high-class stock continues the feature. Choice roses are particularly scarce, especially Beauties, for which \$9 per dozen is the price and they have to be ordered 24 hours in advance at that. Tea roses are not much better in this respect, as everything in the rose line appears off crop. Carnations are fairly plentiful and of very good quality. Sweet peas of select grades are to be had in good quantities and sell as well as anything. Daffodils, Golden Spur, and white and yellow tulips, giant daisies, freesias and pansies and all popular spring flowers, are seen in quantity and move well at good prices. Cattleyas are a trifle more in evidence, with prices a little easier, \$6 per dozen now buying the specials. Violets, single and double, are active and sell up close. There is a good shipping demand for all classes of flowers, many orders coming from men who generally have enough from their own greenhouses, but are now forced to buy to fill their orders.

The delegates to the carnation convention from this city returned full of enthusiasm for the divine flower, and praise for the Pittsburg brethren, who had so laid themselves out to give the visitors a pleasant time. Charles E. Meehan was very much pleased with the trip. The exhibition was of much interest. Of the new varieties his first selection was Conquest, a really striking flower on the order of Toreador, but quite distinct, and if it produces well, should be in the front rank among the fancies. May Day and Delight also took his eye. Of the entries from this city, Craig's new white showed up very well, as did Dorothy Gordon, which had many admirers. Mr. Stroud's carrying off the prize for White Perfection from about a dozen other entries, the best the country produces, was quite a feather in his hat, and the card will occupy a prominent place in the Stafford office. The trip to F. Burki's greenhouses was much enjoyed. Such a large place in such hilly ground Mr. Meehan had not thought possible. Here was found the finest Killarney roses he had seen this season, which is praise indeed. Oil wells working on the place were also interesting. The banquet Mr. Meehan described as a splendid affair, handsome decorations, a bounteous repast and the best of good cheer made the occasion one long to be remembered.

FLORISTS' CLUB MEETING.

The February meeting of the Florists' Club, held last Tuesday evening, was a spirited affair, the motive power being the paper of Adolph Farenwald on "Why the Small Rose Grower Should Join the American Rose Society." The paper itself was short and spicy. The writer received the thanks of the club. The discussion, however, while spicy, was long-drawn and the whole very entertaining, nearly

all members of the club accustomed to taking part in discussions being on their feet several times. Messrs. Skidelsky, Meehan and President Heacock told of the good time they had had at the recent convention and of the fine stock they had seen. The subject for next meeting is to be "Carnations" with Ex-President Herr, of the American Carnation Society, as the essayist. K.

Boston.

TRADE GOOD.

Business has been good the past week. Stock is not any too plentiful in any line and is kept well cleaned up. Violets are perhaps the slowest feature of the week. The weather has been mild and quantities of violets found their way to the streets. Carnations are holding up well and are a little on the short side. Bulbous stock is coming in rather heavily, but the demand seems equal to the supply up to the present. Good Golden Spur is selling remarkably well. Von Sion is coming in, in limited numbers, but not especially good. Tulips of several varieties are a desirable addition. Adiantum and Asparagus Sprengeri are both much short of the demand. Quantities of good sweet peas are finding their way to market and sell well. Gardenias, cattleyas and lily of the valley are more plentiful, much more so than for the past few weeks. Roses in the smaller and medium grades are more plentiful, with the single exception of Beauties. They have shortened up, as is always the case at this season of the year, and the only available stock is high priced and rather poor. The better grades of Richmond are very short. Bride and Bridesmaid are showing a marked improvement. Wallflower, myosotis and snapdragon complete the assortment and are all coming in rather freely. Easter lilies still hold a prominent place, as they have during the entire season. White lilac is showing in limited quantities. The plant trade is holding up well.

NOTES.

The annual banquet of the Gardeners' and Florists' Club held January 27 was a most brilliant occasion. The members and their friends turned out in large numbers. The decorations were appropriate and every detail of the arrangements was carefully attended to. Every one seemed to enter right into the spirit of the affair and all were loth to leave when their time was up. This was probably the largest gathering of its kind that the club has ever had.

The leading retail stores report general business as being good for this season, and unusually so in the line of funeral work. The shortage of Beauties at this time makes it almost unsafe to take orders. Firms receiving shipments from out of town often find their order cut down, and the local market offers but little relief to the situation.

Wm. Martin, of Milton, paid us a visit recently. He has had rather more than his share of sickness in his family this winter and is just getting over it. Two of his children were down with scarlet fever at the same time. Both are past danger now and recovering rapidly.

P. Carbone, the prominent importer of European novelties, sailed for foreign parts this week. He finds it necessary to make frequent trips abroad to replenish his stock and keep in touch with the makers of the many novelties now so closely associated with his name.

There have been several prominent weddings recently and the demand for white orchids for bouquets has been unusually heavy. Orange blossoms are also eagerly sought by many of the store men, and seem to be most difficult to obtain.

The strain of pansies brought to market by W. Turner, of Woburn, is attracting considerable attention. The size of flower and variety of color is remarkable.

Geo. Anderson, of Milton, has taken up growing pot plants for the market again and is meeting with his former success in producing fine salable stock.

The white lilac of Mann Bros. is just starting in. This firm is probably the largest specialist in lilacs in this section of the country.

E. Rogean is handling a fine line of white Killarney roses at this time and is disposing of large quantities of them daily.

Chas. Holbrow, of Brighton, is handling some especially good sweet peas in all colors.

Walter Ruan, of Peirce Bros., Waltham, is confined to his home with a severe cold.

R.

Cleveland Notes.

The wholesalers and retailers fought out a long standing grudge on Monday night on the Florists' Club alleys. The retailers have always been conceded the champions on "conversation" bowling, but the following scores tell what they think of themselves now:

| Retailers. | | Wholesalers. | |
|--------------|-----|--------------|-----|
| T. Smith | 99 | B. Hart | 163 |

New York.

A GOOD AVERAGE WEEK.

The business of the past week averaged very good. There were several days when bad weather had a rather depressing effect on retail trade, but Friday and Saturday were good days. There has been considerable indifferent stock reaching this market recently, which is doubtless due to the dark and damp weather which has prevailed throughout the area from which the flower supply of this city is drawn. The demand for American Beauty roses has not been heavy and prices have fallen off, though there has been no decided drop, most of the specials moving around 50 and 60 cents as against 60 and 75 cents for the previous week. Prices have held up well on tea roses, good stock going at good figures. Good carnation stock has been bringing from four to six cents. Lily of the valley has been running a close race with violets. It has been selling very low, fine stock going at \$2 per 100. When valley gets as low as that, the Broadway and Fifth avenue curb vendors add it to their violet stock, as it is easily handled, and the two go well together.

January 31.—The market has been very fair today. A leading wholesaler says: "Stock is selling for good prices and that is all we can expect." The supply is not heavy, consequently there is a fair clean up. A week of clear weather would greatly change the situation, as it would bring in a much heavier supply. Lilies and lily of the valley continue slow. Roses and carnations sell well.

NOTES.

The orchid section of the Horticultural Society of New York held a very interesting meeting in the rooms of the American Museum of Natural History, on the night of January 26. Clement L. Moore, Hackensack, N. J., occupied the chair, and Edward Roehrs, Rutherford, N. J., acted as secretary. Other leading growers present were John E. Lager and Henry Hurrell, Summit, N. J., and Jos. A. Manda, West Orange, N. J. Geo. V. Nash, secretary of the Horticultural Society, was present and offered valuable suggestions pertaining to successful work. Along these lines, there were remarks by Messrs. Lager, Hurrell, Kitchen, Manda and the president and secretary. It was decided that meetings should be held on the fourth Wednesday evening of each month. Secretary Nash announced that certificates and diplomas had already been arranged for. There was some discussion as to the authority which the Horticultural Society may delegate to the orchid section in the matter of offering prizes. A committee, composed of Jos. A. Manda, John E. Lager and Edward Roehrs was appointed to confer with the parent society on this matter. An entertainment committee was appointed as follows: John E. Lager, Dr. Kitchen and Edward Roehrs. It is understood that at the next meeting a lecture will be delivered by John E. Lager, illustrated with lantern slides, on his experiences as a collector of orchids in South America. There was a splendid exhibit of orchids by Lager & Hurrell, the Julius Roehrs Co., Jos. A. Manda and Clement L. Moore. The exhibit included not only cattleyas, cypripediums and other well known commercial varieties, but others little known outside the circle of fanciers.

The annual dinner of the Florists' Club will be held in the Fifth Avenue building restaurant, Broadway and Twenty-fourth street, on the evening of March 17, St. Patrick's day. It will be a representative gathering of florists and their wives, daughters and sweethearts. Walter F. Sheridan is chairman of the dinner committee, with an able staff of associates, and

there is no doubt that under such good management the event will prove a success. The admission will remain the same as last year, that is, gentlemen, \$4; ladies, \$3. W. H. Taplin, of Dailedouze Bros., will give a talk on "Carnations" before the club at the next meeting, carantion night, February 14. Ladies and men not members, who are interested in the carnation, are invited to attend. Mr. Taplin's writings are well known to and appreciated by readers of the AMERICAN FLORIST. He is a genial and intelligent talker and well qualified to handle this subject. If you want a seat, get there early.

The first reception and dance of the Florists' social club was held at the Leslie rooms, 260 West Eighty-third street, on the night of January 29. It was a very successful and well managed affair and credit is due Sam. Gilbert, Sam. Branch, Tony Pomper and other employes of Chas. H. Brown for their work of arrangement. The gathering was largely composed of young people connected with the retail trade, and their friends. Among those present were Chas. H. Brown, wife and daughter, and a number of others prominent in the trade. About 75 couples took part in the grand march and the music, dancing and other accessories of a successful social event were of a high order.

M. C. Ebel, of the Aphine Co., says that the test of Aphine, at the Boston Flower Market, January 29, was most satisfactory. He has arranged with the Henry F. Michell Co., of Philadelphia, for a test in its new store February 12. The results of past demonstrations have been so gratifying to the company that it is proposed to continue them indefinitely in the leading cities of this country.

Daniel F. Ryan, formerly employed in the park department, shot and killed one of his children on January 31, and shot another child and himself so seriously that both are likely to die. Ryan was unfortunate in losing his position and it doubtless drove him insane.

Much regret is felt on account of the illness of John Reimels, of Woodhaven. As announced in the last issue of the FLORIST he was taken suddenly ill in Pittsburg while attending the convention. It is not believed, however, that his condition is serious.

Ex-president Traendly, of the S. A. F., who attended the carnation convention and exhibition at Pittsburg, was well pleased with what he saw there, as well as with the hospitality extended by the Pittsburg people.

Miss Hannechen Andreae died at Central Valley, January 29, aged 64 years. She was a daughter of Otto Andreae, who for many years was a shipper to this market. Mr. Andreae is now over 90 years old.

The date of the New York Florists' Club dinner, it will be noted, covers the meeting of the American Rose Society in this city. It is expected that the rosarians will attend in force.

John Reimels, who, as previously reported, was taken seriously ill at Pittsburg, has reached home. He is yet a sick man, but it is believed that his condition has improved.

While the observation of carnation or McKinley day was not very noticeable, it helped to clean up carnation stock January 29.

John J. Phalon, a retailer of Pater-son, N. J., who buys from J. K. Allen, bought 1,000 carnations for McKinley day.

BOWLING.

The Astoria florists' bowling club gave a ladies' night January 25, 36 attending and all having an enjoyable time. The club provided prizes to be competed for by the ladies and in turn the ladies' bowling club, which is composed of the wives of the mem-

bers of the Florists' bowling club provided six prizes to be competed for by the gentlemen. Each lady received a prize. W. H. Siebrecht, Sr., received the prize for the greatest number of strikes, John Miesem that for lowest score in the first game, Herman H. Lorenz for making nearest to 77 in any frame, John Donaldson for the greatest number of spares, John Boese for the lowest score in the second game and Philip Einsman for making nearest to 95 in any frame.

The prizes received by the ladies consisted of fancy dishes, plates, bric-a-brac, vases, etc. Prizes received by the men were two boxes of cigars, cigar case, automatic cigar lighter, florist's knives, muffler and a diamond ring. The ladies' bowling club bowls Tuesday afternoons and the men's club in the evening. On this occasion the ladies remained in the building and the men joined them for supper. During the supper ex-Captain John Miesem was presented with a token of the high esteem in which he is held by the club and in recognition of his services as captain. All had a very enjoyable time. This is the second year of the club, and it is certain that it will have a prize-winning team at Rochester this year.

Orange Growers Warned.

The Satsuma orange, one of the Mandarin class, introduced from Japan, is the earliest and at the same time one of the hardest oranges grown. Owing to these qualities, it is gaining considerable popularity in the south. But one peculiarity of the Satsuma orange is that it is worthless as a fruit bearer unless grafted or budded on Citrus trifoliata.

Sour orange and sweet orange have been generally used as stocks by growers of citrus fruits in the south, and during recent years the hardy trifoliolate orange of China and Japan has come into prominence as a stock. For soils to which it is adapted it may be used with excellent success, but it is not adapted to light, sandy soils.

It has been found in practice that certain citrus varieties behave differently when grafted on stock of different species. This is particularly true of the Satsuma orange. Grafted on sweet or sour orange stock it is worthless, while on trifoliolate stock it succeeds admirably. As the trifoliolate stock is adapted only to fairly rich, moist soils, the mistake is sometimes made of using the other stocks named with a view to growing Satsuma oranges on light sandy soils. Some nurserymen have grafted Satsuma orange scions on sour orange stock, and are now offering them for sale. In order to warn growers against a serious mistake, the United States Department of Agriculture has issued a circular (No. 46, bureau of plant industry), prepared by Walter T. Swingle. Mr. Swingle says: "It is no exaggeration to say that he who plants a Satsuma orange tree grafted on sour stock might better bury a five dollar bill and burn the tree, which, if planted, will linger along for years, only to be finally dug up as worthless." He tells how the intending purchaser can distinguish between the trifoliolate and the sour-orange stock, and offers the assistance of the department to those who desire to make sure on this or other points.

ST. LOUIS, MO.—The Schisler Seed Co. has been incorporated with capital stock \$20,000, to deal in plants, shrubs, etc.

STREATOR, ILL.—A new carnation, Mrs. Fawcett Plumb, pink and white variegated, is reported from the W. C. Hill Floral Co.

Lincoln, Neb.

STATE FLORISTS' SOCIETY ORGANIZED.

A move has been made to organize the florists of the state into a society for the general welfare of the craft, a meeting having been held here January 19. Some of the local men are members of the Nebraska Horticultural Society, but it seemed that this society does not appeal to many, hence the new organization as an auxiliary. The following officers were elected to serve one year:

Irwin Fry, Lincoln, president.
 Louis Henderson, Omaha, vice-pres.
 E. Williams, Grand Island, secretary.
 M. Atkinson, David City, treasurer.
 Board of directors.—C. H. Green, Fremont; B. Simanton, Falls City; R. Dole, Beatrice.

By-laws were perfected and the first annual meeting will be held at this city during the meeting of the Horticultural Society. We believe that practically every florist in the state will take hold and we shall certainly be heard from in the near future. E. W.

Nashville.

There has been nothing startling in the floral world since the holidays. A very good quality of stock is coming in, sufficient for all demands, consisting of roses, carnations, lily of the valley, Roman hyacinths, narcissi, violets and lilies.

McIntyre Bros. are to be seen almost any morning in the market house with a beautiful display of plants, often when the thermometer registers below freezing. They have covered heated wagons and bring in the plants, for which there is always a ready sale, with perfect safety.

The funeral of the late John B. Ramson, millionaire lumber dealer, made an unprecedentedly large call. The retailers had all they could do. The designs were exceedingly handsome and they were sent out in wagon loads.

Geny Bros. have a house of sweet peas just coming in, from which they are making their first cut. They have

Flower Co.,**

Will carefully execute orders for
Kansas City and any town in

Missouri, Kansas or Oklahoma.

Worcester, Mass.

Business since Christmas has been the best ever in the history of the florist trade. At present the supply of flowers is about normal; carnations and violets are in good supply with a scarcity of good roses.

The interest of horticulturists was aroused January 27 at the winter meeting of the Worcester County Horticultural Society. Secretary Adin A. Hixon having been informed that George McWilliam would show one of his new orchid seedlings, he notified the members and the gardeners and florists attended in large numbers. The plant shown is the result of a cross between Calanthe vestita rubro-oculata and C. Regneri, the former being the pollen parent. The seed was sown May 3, 1902. The flowers are white with a purplish red center; there were four bulbs on the plant with three flower spikes and about 35 flowers on each spike. The plant is a valuable addition to the calanthes, inasmuch as it fills a long-felt want between the early and late flowering kinds. Mr. McWilliam has named the plant Calanthe Orpetiana, after Edward O. Orpet, South Lancaster, the well-known orchid expert.

Charles W. Wood was chairman of the meeting and with appropriate remarks introduced Professor Brooks, director of the Massachusetts Agricultural College at Amherst. Professor Brooks spoke of "The Uses and Abuses of Chemical Fertilizers." The talk was informal. Prof. Brooks spoke that all might be benefited by his advice and suggestions. All present took a keen interest in his remarks. He advised all to keep more live stock on the farm and deplored the fact that in the past three years 30,000 cattle have gone out of the state. The growing of clover and other crops for humus, he said, was indispensable in good farming and a good many crops could be grown after the regular crop was taken off, while the land in some cases remains idle. When asked what was the best brand of fertilizer to use Professor Brooks said it was almost impossible to answer that. Each one had to know the soil he had to work and each fertilizer acted differently, but all reputable manufacturers aimed to make the best, and by buying of reputable firms one may be assured that the fertilizers will contain what they are guaranteed to. At the experiment station they use those that can be used to best advantage.

Lange had the decoration for the society event of the year, the marriage of Miss Marguerite Elizabeth Thayer, daughter of the Hon. John R. Thayer, and Dr. William Carter Quimby, of Boston, January 28. The flowers used were American Beauty and pink roses.

John Coulson has completed a new greenhouse, 20x50 feet, at his place on May street.

The convention being over, business is back again to its normal state after a lull of a few days. McKinley day did not create the demand for carnations the florists anticipated, and Saturday evening found many of them loaded down. Roses are selling up pretty clean and Beauties are much sought, there being not enough in the market to fill one-third the orders. An abundance of fine lilies, jonquils, sweet peas, Roman hyacinths, lily of the valley and freesias are coming in. Tulips are very plentiful, but very short in the stem.

L. L. Lamborn, Alliance, O., visited the convention, but his visit was suddenly cut short by the news that his business block in Canton was in flames.

The Seed Trade.

American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice Pres.; F. W. Bolgiano, Washington, D.C., Second Vice Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1904.

THE Cannery convention will be held at Atlantic City, N. J., February 7-11.

HERB seeds and some other odd items are slow in coming in and of poor test.

THE trade is wondering to what extent the floods in the vicinity of Paris have injured stored stocks for seed growing.

ONION SET contract prices are being made on a basis of last year's figures. Prices for immediate delivery are probably a shade lower.

CONTRACT prices for tuberose bulbs the coming year probably will be affected by the high price of cotton, many of the southern farmers looking on the cotton crop as being more profitable in view of the present unprecedented high prices.

CHICAGO.—Contract prices on the board of trade February 2 for grass seed were noted as follows: Timothy, \$4.25. White clover, from 20 cents to 25 cents.—Visitors: A. Lehman, Lompoc, Calif., with wife and family; enroute to Europe; J. C. Bodger, Gardena, Calif., returning from the east; C. W. Scott, New York; E. L. Olmsted, of the Everett B. Clark Seed Co., Green Bay, Wis.

BRISTOL, PA.—On January 25, Alfred Landreth, a grandson of the founder of the well-known seed firm of that name, died at this place. Mr. Landreth was not identified with the business, but was a man of great gentleness and affability and won the affection of everyone with whom he was brought in contact. He was a soldier on the Union side in the war of the rebellion.

NEW YORK.—C. W. Scott, of Vaughan's Seed Store, has the sympathy of the trade in the loss of his father, who died at his home in Grand Rapids, Wis., January 30. Alex. Henderson and M. Barker attended the funeral. Carl Cropp, of the firm's Chicago establishment, is in the city with headquarters at the Barclay street store. Douglas Roy, formerly of the same store, has taken a position

in the Chicago house.—Harry Bunnard, of A. T. Boddington's store, was a delegate to the Pittsburg convention and enjoyed it immensely.—Arthur Watkins, of W. E. Marshall & Co., is confined to his rooms by an attack of inflammatory rheumatism.—The seedsmen, as a rule, report good business and there are indications that this will be a record breaking season.—Joseph Miller, 29, an employee of J. M. Thorburn & Co., lost his life attempting to board a moving freight elevator January 31.

Commission Seeds.

Persons having small garden patches commonly buy most or all of their vegetable seeds in small packages from what are known as "commission packages," i. e., boxes put up by dealers in seeds which contain an assortment of

"commission packages" from one season to the next. Whoever puts up the packages is responsible if he does not take the same pains to put seed of good quality into these packages that he takes in supplying those who buy in larger quantities.

The comparatively few tests made of these seeds during the last season are enough to show that some of these "commission boxes" contain seeds which are agriculturally worthless and can bring only disappointment and loss to those who buy them.

In the spring of 1909 our agent bought 83 packages, representing seven varieties of garden seeds. These were put up by 17 different firms and bought in different parts of the state. The results of the tests may be summarized as follows:

Lettuce.—Not less than 85 per cent

PACKING DEPARTMENT OF WILDPRET BROS., PORT OROTAVA, TENERIFFE.

During the Packing of one of their Largest Orders For 14,000 Pounds of Bermuda Onion Seed to One Customer in This Country.

the most commonly used garden varieties. The garden, cared for by members of the owner's family, contributes very materially to their support and its partial failure materially increases the cost of living. Fresh seed, true to name, is the first essential of success. Responsibility for the quality of the seed rests primarily with the retail dealer, if he carries over his

of lettuce seed should germinate. Six out of the 15 package samples showed inferior germination and four at least were unfit for use. One sample seemed to be a mixture of fresh and old seed; 85 per cent of the fresh-looking seed sprouted and only 25 per cent of the old seed.

Radish.—Ninety per cent of radish seed should germinate. Only four samples germinated as high as this. Of the other 13 samples, four were fairly good, the others quite inferior and four agriculturally worthless on account of low vitality.

Onion.—Seventy-five per cent of Connecticut grown onion seed should germinate. Half of the samples examined fell below this standard and five were worthless.

Cucumber.—Eighty-five per cent germination is the standard for this seed. Half of the samples equalled or exceeded this, the other half were inferior.

Muskmelon.—Of the twelve samples tested, five germinated 85 per cent, or more, and on the other hand three samples germinated less than 50 per cent.

Watermelon.—Only seven samples were tested. Over 80 per cent of the seed in three packages germinated and three others germinated less than 50 per cent. The package of one firm contained seeds of at least two varieties, quite different in size and color.

The number of tests is quite too small to justify a judgment as to the general quality of seeds put up by any seedsmen.

It is quite possible for the retailer to sell seed which has lain over in his hands from a previous year, and it may be that some samples were taken from such boxes. It appears, however, that some of the seed boxes from which small quantities of vegetable seeds are sold contain old and worthless stock.

Two firms sold by the ounce and all the other seeds were in five-cent packages. Examination shows that in four of the varieties some packages contained three times the weight of seed found in others.—Conn. Exp. Stn. Bull.

A Note From Muscatine, Ia.

ED. AMERICAN FLORIST:—

We think your seed page better than ever and enjoy it very much. Have had the longest spell of good sleighing here for years, and although the ground is white, yet we are starting to prepare our first hotbeds for early plants. The extreme drought last August cut some of our seed crops short, but orders are coming in nicely and we hope to grow lots of seeds this year.

Home-Grown Sugar-Beet Seed.

As a result of an experiment which has been conducted near Phoenix, Ariz., it has been found that sugar-beet seed can be grown successfully in that section of the country, and better still, that it can be grown in a single year. In Arizona it is customary to plant sugar-beet seed the latter part of November, harvesting the crop the following July. It has been found that if the seed is planted a month earlier in the fall the beets will produce a crop of seed the following year. This takes sugar beets, for that section of the country, out of the biennial class, and puts them in with the winter annuals. It means the saving of a year in the production of seed, and will greatly simplify the process.

Nearly 7,000,000 pounds of sugar-beet seed are used in the United States every year. At present the bulk of this supply comes from Germany, and costs the American grower about 10 cents a pound. The German method of producing sugar-beet seed is rather complicated. When the beets are dug in the fall a number of the best specimens, averaging in size from 20 to 24 ounces, are selected for "mothers." A sample taken from each of these mothers is analyzed for sugar content. In some cases the density and purity of the juice are also determined.

These mothers are divided into grades, according to sugar content, and stored in silos during the winter. Those that fail to come up to the required standard are discarded. In the spring these mother beets are set out and cultivated carefully. From them the seed of commerce is produced. By these painstaking methods the sugar-producing ability of the beets is kept up to its present high standard, and even increased from year to year.

Recently beet seed has been grown to a limited extent in the United States in Utah and Washington. This home-grown seed has shown greater yielding ability than the seed from

Germany. The beets from home-grown seed have better quality and higher vitality, and seem better adapted to American conditions. Owing to the difficulty of production, however, beet-seed growing in Washington and Utah has not spread very rapidly.

With more favorable climatic conditions prevailing in Arizona, especially the absence of severe winter weather and the dryness at harvest time, it may be possible to make beet-seed growing an important industry there. Of course, since the beets are not dug in the fall, they cannot be selected as carefully as is done in Germany. Whether the quality of the product can be kept up by other methods of selection remains to be proven. Perhaps some method of breeding like that which is giving such good results in the corn fields of the Mississippi valley may be adapted to sugar beets. The Department of Agriculture has been asked to investigate the matter. The results of this investigation will be awaited with much interest by the people of the sugar-beet-growing districts.—Scientific American.

Why the Crops Were Big.

We thought it would happen; and it has. Senator Depew has attempted to vindicate the new tariff law. He made a speech in the senate from which the following is quoted:

"With the passage of the new tariff bill, we enter upon a period of prosperity unknown in the history of this or any other country. From results gathered by careful examination all over the country, there will be an increase in the production of winter wheat, spring wheat, corn, oats, barley and rye in 1909 over 1908, in round numbers, of one thousand one hundred and sixty-nine millions of bushels, or 27 per cent, and that 27 per cent increase is in comparison with a normal year. There will be an increase in the hay crop in the same period of over three millions and a half of tons."

We shudder at the thought of the dismal crop failures that would have resulted from the passage of a new tariff law different from the one given to the country by Aldrich and Cannon!—Lafollettes.

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;
Franklin DeKleine, Grand Rapids, Mich.,
Vice-President; S. W. Severance, 508 Illi-
nois Life Building, Louisville, Ky., Secre-
tary; M. L. Ruetenik, Cleveland, O., Treas.

THE estimated annual output of fresh mushrooms through the Central Market of Paris is 15,000,000 pounds.

At the annual meeting of the Massachusetts Asparagus Growers' Association, held at Concord, January 28, the old officers were re-elected as follows: Chas. W. Prescott, Concord, president; T. Hollis, secretary-treasurer. It was an enjoyable meeting full of good feeling and intelligent discussion. It was voted to hold another field day in September and there is a universal feeling of satisfaction at the progress made.

Lettuce Temperatures.

I noted "Marketman's" reply to my experience in lettuce temperatures, but when I spoke of raising five to six crops in one season, I did not mention my methods of doing it. I raise my plants in shallow boxes, and when the plants show the fourth leaf transplant in the bed four inches each way. We renew the soil in the greenhouse every other year and prepare the soil as follows: In the spring we gather sod from the road, haul to manure yard and pile one load of sod to one-half a load of rotted cow manure, making the pile about three feet high; then we soak it with liquid cow manure, fork the pile over three or four times during summer, and in September, bring it into the greenhouse and spread it four inches thick. In this soil we raise two crops, for the following crops, applying a top dressing of liquid cow manure with nitrate of soda dissolved, eight pounds to the barrel of the liquid.

The next year we apply a good coat of cow manure, spade it deeply under, raise one crop, then stir the soil lightly, not touching the manure below; give top dressing as before mentioned to the following crops. After many years' experience we find this the best treatment for lettuce, and, with some sunshine, we always force a crop in 30 to 35 days. This means leaf lettuce, for which I prefer Grand Rapids, as it stands more heat than any other. We do not allow a stalk of lettuce to grow heavier than three ounces, as our customers prefer the smaller size, because of too much waste in the big stems. I am not as good in handling a pen as a hoe or fork, but I hope this will convince "Marketman" of the possibility of raising five or six crops a season.

DAVID WOLF.

Manure for Crops Under Glass.

The use of stable manure as a source of greenhouse plant food has been the custom for so many years, that more effective forms make headway slowly; yet the stable manure has many disadvantages. It always contains more or less weed seed as well as disease germs, and it supplies its plant

SEEDS FOR THE MARKET GARDENER

are our specialty. Quality, our first consideration. We have a very large and complete stock of all kinds of seeds and everything in the line of fruit trees, berry bushes, etc.

Our new 112 page catalogue contains true description and no overdrawn illustrations. Our prices are right, quality considered. Market Gardeners are requested to write for our Market Garden Wholesale Catalogue, sent free on request.

GERMAN NURSERIES & SEED HOUSE BOX 245
Established 1886 **BEATRICE, NEB.**

food in available form very irregularly. Also, by fermentation, it materially influences the temperature of the seed bed, a temperature we have no means of regulating. In the next place, the plant foods are sometimes non-available, hence for forcing it cannot be safely relied upon.

For greenhouse work the Evergreen brand fertilizer has been used extensively, where the highest marketable quality, rapidity of growth and early maturity are to be attained. All crops that are wanted early, with rapid and luscious growth, get the proper nourishment from such manures which are perfect plant foods, ready on the instant.

This fertilizer is peculiarly adapted for broadcasting over the plants, after they have made a partial growth, since it is so completely soluble that but a slight amount of moisture is necessary in order to distribute it throughout the soil, and, because of its ready availability, it is used by the plant as soon as it comes in contact with its roots. It possesses both these characteristics, and is therefore to be particularly recommended for those crops which need an early and abundant supply of food.

Prices of Indoor Fruits and Vegetables.

Chicago, February 2.—Mushrooms, 25 cents to 75 cents per pound; cucumbers, \$1.00 to \$1.25 per dozen; lettuce, 40 cents per box; tomatoes, 20 cents per pound; radishes, 50 cents per dozen; asparagus, 25 cents to 40 cents per bunch; grapes, Gros Colman, 75 cents per pound.

New York, January 29.—Mushrooms, 40 cents per pound; cucumbers, 75 cents to \$1 per dozen; tomatoes, 20 cents per pound; radishes, 3 cents per bunch; asparagus, \$6 per dozen bunches; rhubarb, 75 cents per dozen bunches; grapes, Gros Colman, 65 cents per pound; peaches, \$3.50 per dozen.

European Horticulture.

FROM THE BRITISH TRADE PAPERS.

Aphelandra Tetragona.—A bold and effective shrub from South America. It was originally called *Justicia tetragona*, and then *Justicia cristata*, but is now referred to *aphelandra*. A two-year-old plant that flowered at Kew in May, 1908, bore, on one growth nearly four feet high, 13 spikes of brilliant red-pink flowers. These spikes varied from four to seven inches in length. The flowers are tubular, and double-lipped, the lower lip being recurved and almost an inch long. A showy stove plant, with large ovate lanceolate leaves.

Veronicas at Kew.—Within the last few years the merits of the garden varieties of veronica as flowering plants for the greenhouse at this season have been made more prominent, and a representative collection makes a good show at Kew. Noteworthy among those now in flower are: *Admiration*, purple, shaded violet; *Attraction*, deep violet; *Diamant*, bright crimson; *Eveline*, salmon-pink; *Gabrielle*, rose-pink; *La Seduisante*, violet-purple, bronzy foliage; *Reine des Blanches*, white; and *Valerie*, blue.

Alonzo J. Bryan, Washington, New Jersey.

Abutilons at Kew.—There is a quite extensive group of abutilons, all comparatively small plants, with single, upright stems, grown in 5-inch pots. They are flowering freely, and are certainly very pretty. The best scarlet appears to be *Red Gauntlet*, the best white *Boule de Neige*, and the best pink *Roseflorum*. I did not note any yellows, the best of which, as far as my experience goes, is *Golden Fleece*.

Peliosanthus Violacea Clarkei.—A graceful orchid-like plant from southeastern Asia. The plant has a short root-stock, from which the foot-long leaves rise singly. The spikes of semi-pendulous purple flowers also rise independently from the underground leaf stalk.

Who Said Dock?

ED. AMERICAN FLORIST:—

It is probable that some of your readers may be interested in *Rumex optusifolius*. The enclosed clipping is from the Nashville Banner, being a special from Paris, France.

JAMES MORTON.

"Paris, January 22.—The investigation of chemists show that a certain plant growing all over the known parts of the earth, namely, *Rumex optusifolius*, contains an unusual amount of iron. More than one-half per cent of iron can be extracted from the dry roots of the plant, a greater amount than has been found in any other plant.

VAUGHAN'S SEED STORE,

25 Barclay St., NEW YORK. 84 and 86 Randolph St. CHICAGO.
803 W. Randolph St.

"It is intended to use this iron as medicine, especially as medicine for the green sickness so called. At the same time it is asserted that this plant, largely cultivated, might furnish iron, if at any time the iron mines give out, which they won't for the next million of years."

CLINTON, IND.—C. L. Ricketts, and not his brother J. H. Ricketts, as reported, was the purchaser of the Sunnyside Floral Co.'s place.

A Border of White Flowers.

A correspondent of the Garden publishes the following list:—Olearia Haasti, Weigela candida, lupin, Eremurus Himalaicus, a plant of great beauty which grows in the same soil that suits Lilium auratum; cerastium, Japanese anemone, Robinia semperflorens, a charming plant for lawn and shrubbery, flowering all the summer; funkia, lilac, broom, poppies, gypsophila, violas, pinks, carnations, yucca, dahlias, stocks, snapdragons, phlox,

sweet william, everlasting pea, sweet pea, corncockle, Mexican orange flower, myrtle, syringa, spiraea, nicotiana, Hydrangea paniculata, lilies of many kinds, Crambe cordifolia, white rhododendrons, peonies, iris, candytuft, moss roses, white bleeding hearts, sweet woodruff, vinca, Arenaria Balearica and other white rock plants, magnolias, double white rockets, Dictamnus Fraxinella alba, and many white-leaved grasses. This list is by no means exhaustive, but gives some idea.

The Nursery Trade

American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;
W. P. Stark, Louisiana, Mo., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-fifth annual convention to be held
at Denver, Colo., June 8-10, 1910.

BALTIMORE, MD.—The Thos. J. Brandt Nursery Co. has been incorporated with capital stock \$5,000.

F. A. BOLLES, East Tenth street and Avenue L, Brooklyn, N. Y., has been on the sick list for two weeks.

CHAS. BLACK, of Hightstown, N. J., has been sick for quite a long time but puts up a good front and keeps the doctors at bay. "No physic for me" is his motto.

J. W. HOARD, manager of Chase Bros.' nurseries at Waco, Fla., has mysteriously disappeared according to a local paper, his absence having caused much worry to his friends and his firm.

CHICAGO—Andrew Schlevogt, landscape gardener for a Brooklyn, N. Y., real estate firm, has been in the city this week planning street planting at Ravenswood Manor and looking up stock locally for planting.

"THE LILAC" is the title of an interesting little booklet by Wm. C. Barry, of Ellwanger & Barry, Rochester, N. Y. Mr. Barry, after paying a tribute to this popular and beautiful shrub, goes on to describe the many new varieties that have been distributed during the last 15 years, especially those of Lemoine's raising. Quite a list of varieties is given and many of them are illustrated while cultural notes and suggestions for planting are pleasingly written up.

Shrubs for Ornamental Hedges.

Hedges of ornamental shrubs are becoming very popular, and really add greatly to the attractiveness of our homes. A number of shrubs are used for hedges on the home grounds. One of the most popular at present, especially along the Atlantic seaboard, is the California privet, a plant that succeeds admirably where the influence of the ocean affects the temperature. This privet, a native of California, is not as hardy in the middle west as is desirable. There is a hedge of this near here (Indiana) planted 10 years ago in a favorable situation that some might think reasonably satisfactorily, the upper portion being compact and green. The base, however, up to about two feet from the ground, shows nothing but naked stems. This can never be filled up with green, living branches, and this defect will become more apparent as the years go by.

The Amoor River privet, from Asia, resembles California privet very much and has never been known to be injured by our severest cold, even in the tips of the branches where the California was killed to the ground. The Amoor River is not quite so nearly evergreen as California, though it retains its foliage until midwinter. There is a southern form, grown and sold as Amoor River that, it is believed, does not possess the hardiness of plant

nor beauty of foliage that is characteristic of the genuine Amoor River.

Regelianum privet seems to possess the hardiness of the Amoor River, and, in habit of growth, arrangement of the branches, and peculiar shape and conformation of the foliage is one of the most striking of shrubs. The Japanese privet is a strong grower, with remarkably large, glossy foliage, that is more persistently evergreen than any other privet. We think this will become popular either as a hedge plant or for ornamental planting. The

remarks being closely followed by fruit growers and others present. The programme was a long one, but was carried out in its entirety.

Belgian Certificate Not Acceptable.

The following letter has been sent by S. A. Forbes, state entomologist for Illinois, nurserymen of the state: "Recent authoritative information with respect to nursery conditions in Belgium and in France makes it necessary for me to reconsider the conclusion previously stated with ref-

THE WHITE RAMBLER ROSE.

Growing at Rockefeller Park, Cleveland, O.

Japan berberis (B. Thunbergii) is justly very popular as an ornamental hedge plant. It is of rather slender, compact, bushy habit, with small, glossy, bright green leaves that attain a brilliant crimson color in autumn. The plant is loaded with berries that assume a bright red color when ripe and remain on the plant through the winter. We have never heard of this plant being injured by the cold anywhere. Last, but not least, for an ornamental hedge, we will name Spiræa Van Houttei, a plant of extraordinary hardiness, and beauty in habit of growth, as well as of special beauty when loaded with its wreaths of white flowers, as easily transplanted as a tomato, as hardy as an oak. We have hedges of it 20 years old, of perfect form, from the ground up which, when in bloom in June, are strikingly beautiful. By cutting back, just after the flowering season, the hedge may be kept at a height of two, three or four feet, as may be desired.

E. Y. TEAS.

Rochester, N. Y.

The fifty-fifth annual meeting of the Western New York Horticultural Society, held at Convention hall, January 26-27, was described as the biggest in the history of the society, the registration being 1,350. Great enthusiasm was shown and the papers read and other attractions were followed with great interest. Fred L. Lamson's illustrated talk on "Irrigation Experiments in a Wayne County Peach Orchard," was a great success and his views were elegant. The round table talks were also a most popular feature. Dr. L. H. Bailey, of Cornell, and Commissioner of Agriculture Pearson, of Albany, were present and spoke, their

reference to the Belgian inspection, and to reiterate what I have said with regard to the dangerous character of nursery stock from France. No inspection certificate of either of these countries can be considered as acceptable, and stock coming from either, whether certified or not, must be inspected in the hands of the consignee by us before it may be used. Special warning is called for with respect to French stock, which is again arriving in this country seriously infested by the brown-tail moth. This statement applies to greenhouse stock as well as to that grown in open fields."

Fruit Culture in Pennsylvania.

OVERPLANTING NOT OVERPRODUCTION.

Owing to the public statement of Prof. H. A. Surface, that he feared an overplanting of fruit trees in Pennsylvania at the present time, some persons have construed his remark to mean that this would result in overproduction and profitless orcharding. The zoologist explains the difference by saying that while overplanting is easily possible, owing to the planting of many trees dominated by mercenary motives only, and which will surely be neglected, overproduction will not be possible for the reason that every tree that is of the right variety, and is given proper care, will produce fruit that can be marketed for a better price than ever before.

Modern facilities, in the form of refrigerator cars for transportation, and cold storage rooms for the storage of perishable fruit, make it possible for the orchardist to product fruit in great quantities and hold the same until the products can gradually reach the consumer. Under such circumstances the fruit can be sold for good prices and no one who will make a real study of orcharding, and produce first class fruit in abundance, need fear that he will have any difficulty to dispose of his crop.

The man who has more trees than he can give his attention to, or, in other words, who overplants, who will not study the subject of horticulture, and consequently does not become personally interested in it, is the one who will produce fruit of inferior quality, and consequently be unable to get rid of it promptly or at an advantageous price. Such a person will declare that he is suffering from overproduction, when, as a matter of fact, his real difficulties are overplanting and lack of care.

There has recently developed a common belief that it is possible for any one, especially a professional or a business man, to start an orchard, plant, spray his trees occasionally, and in the

course of time obtain good crops from them at highly profitable prices. This is a mistake. The only successful orchardists will be those who study their individual trees as the dairyman studies his individual cattle.

He will attempt to furnish each with the balanced ration of fertilizer, according to its own needs and possibilities, and will prune, spray and cultivate each according to the general needs of the orchard and the specific needs of that particular tree. Those who determine to raise first class fruits, and will study, master, and enjoy the subject, and live among the trees, rather than expect their employees only to do this, need not be discouraged with the outlook for the prospects of the new fruit culture in Pennsylvania.

The Horticultural Society is in a flourishing condition. Established in December, 1906, at a little meeting of nine gardeners, we have continued for three years, improving in all ways, attaining to a membership January 1 of 140, 20 of whom are life, the balance active members. We have held three exhibitions, one each season, and a committee is at work preparing for one for 1910, which we hope will exceed in interest and display those of the past. While expenses have been heavy, all bills have been immediately paid when due, and our treasurer reported a balance on hand January 20 of \$688.18.

Great interest has been taken by the cottage colony of this well-known seaside resort, in our annual exhibition, which has already become one of the leading social features. We aim for greater results, yet we are well satisfied with the steady, substantial and permanent growth of our society. Harmony exists among the gardening element, which is the brains and motive power of action, hence the great secret of our growth and success.

(No Gold Medal having been awarded.)  
The Lawson Gold Medal,.....Washington, 1908  
The American Florists' Society, Silver Medal,  
Washington, 1908

#### Mrs. C. W. Ward

MRS. C. W. WARD is a perfectly formed flower with full center; color deep pink, several shades lighter than Lawson, deeper than Winsor; having strong, erect stems, 24 to 36 inches in length. A vigorous, healthy grower, and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1, which bring from twenty-five to fifty per cent. more than any other variety on the market,

Rooted Cuttings, \$2.00 per 12, \$12.00 per 100,  
\$100.00 per 1000,

25 at the 100 rate. 250 at the 1000 rate.

**Delivery Feb. 20.**

#### INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see these varieties growing and to compare their good points with other standard varieties grown under the same conditions.

#### Alma Ward

This beautiful Carnation is pure white, except during dark weather, when it shows delicate splashings of pink similar to the Cattleya, increasing its popularity.

ALMA WARD is the largest, most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter, on strong, erect stems, 36 to 42 inches in length.

Rooted Cuttings, \$3.00 per 12, \$5.00 per 25, \$9.00  
per 50, \$15.00 per 100, \$35.00 per 250,  
\$65.00 per 500, \$120.00 per 1000.

**Delivery March 1.**

**Cincinnati.****GOOD CALL ON MCKINLEY DAY.**

A few days of sunshine have done  
 much to improve the quality of stock  
 but not much toward increasing the  
 quantity. There are liberal supplies  
 of carnations and it is possible to fill  
 all orders unless received so late in  
 the day that the grade or color want-  
 ed has been sold. The demand for red  
 carnations for McKinley day was  
 about 50 per cent better than last  
 year. This no doubt may be attrib-  
 uted to the fact that the Business Men's  
 club of this city seems to have taken  
 the matter in hand to advocate the  
 wearing of carnations on this day and  
 distributed several thousand blooms  
 which was instrumental in increasing  
 the demand. Roses are showing the  
 effects of the dark weather we experi-  
 enced the past month and a continua-  
 tion of the same would see us wholly  
 without any stock as receipts are  
 steadily on the down grade. There  
 are liberal receipts of double violets  
 which have been selling fairly well the  
 past two weeks, but there are not  
 enough of the singles to fill orders.  
 Paper White narcissus and Roman  
 hyacinths were none too plentiful,  
 while Easter lilies and callas are  
 scarce. Lily of the valley is in good  
 supply with a ready sale. A scarcity  
 of daffodils and tulips exists and the  
 receipts of Asparagus plumosus and  
 A. Sprengeri are rather light and all  
 received is cleaned up on sight.

**NOTES.**

Wm. Sunderbruch began clearing  
 up the Partridge greenhouses at  
 Lockland the past week. He reports  
 the woodwork in excellent condition  
 and, as soon as the glass is replaced  
 that was broken by the hail last sum-

**FRANK OECHSLIN**  
4911 Quincy St. **CHICAGO.**

Glen Cove, N. Y.

Over 60 members and guests of the Nassau County Horticultural Society assembled at the Oriental hotel January 25 to enjoy the annual dinner provided by the society. The decorations were not many, but they were superb. The centerpiece, two feet or more across, and composed of lily of the valley, was provided by Alexander Mackenzie. The vases of carnations, Mrs. Chas. Knopf and Winsor, were brought by J. Eccles from Norwood, Oyster Bay. A splendid dinner was served, interspersed with speechmaking, vocal music and story telling. Everybody at the table was required to say or do something, and nearly every responded. Among the guests were Arthur Boddington, the Burnett brothers, of New York; Chas. H. Totty, Madison, N. J.; John McNichol, of Cedarhurst, and many others.

**GEORGE GIATRAS,**  
463 Summit Ave., West Hoboken, N. J.

Baltimore.

Winter does not let go its grip in this latitude, and we are having a succession of storms of snow and wind, interspersed with occasional thaws and freshets, which will make the season long remembered for solid and continued discomfort. In contrast with December, which was noteworthy for clear days, the month of January has had more than the average of dull and dark ones. These conditions would appear unfavorable for social festivities, but the season has been of more than usual gaiety and the demand has been more liberal than for several years. Assemblies, balls, receptions, etc., have had the call, and the pace does not seem likely to abate until Lent sets in. All this makes for business. On the other and more somber side the demand for funeral flowers keeps perhaps above customary calls. The trying alternations of temperature, the dampness and piercing winds, have had the effect of increasing the roll of the sick and the dead, and the hospital and cemetery trade has correspondingly enlarged. The supply of flowers, with the unfavorable incidents of sunless days and cold nights, keeps fairly up, and carnations are almost ahead of the daily requirements. Roses keep about even with the demand and bulbous stock and lilies are making larger factors in the daily offerings. Violets seem scarcer, and the local contributions do not figure as they did formerly. Valley comes in with regularity now and is absorbed. There were some evidences on the streets on Saturday that the McKinley carnation remembrance was not overlooked, but the day did not contribute much, apparently, to the sum of business. The approach of Lent, while it puts a stop to large functions, by no means ends the gaieties of social life, but the events are smaller in extent and perhaps more numerous than where the bigger ones absorb the attention and require the preparation of the fashionable circles. Receptions, lunches, teas, card parties and similar entertainments make a pretty steady decorative demand.

### NOTES.

James Hamilton, of Mt. Washington, gave an account some weeks ago before the Gardeners' Club of his method of heating his expensive plant, and so interested the growers by his narration of the efficiency and coal-saving virtues of his boiler that his place is becoming quite a Mecca for florists who are not quite satisfied with their own heating apparatus. Mr. Hamilton has a self-contained tubular boiler without brick setting, the builders of which ought to be making its qualities known through the advertising columns of the *FLORIST*, if the interest he has aroused is to bring them fruit, since the question of economy in fuel is the one which is coming closer every year to flower-growers.

Frederick C. Bauer, of Govans, whose success in growing seedling Harrisii lilies aroused considerable in-

## Palms and Other Seasonable Stock

We have an extra good stock of *Forsteriana*, made up, three plants in a pot or tub all clean perfect plants. (We need to reduce our palm stock, and are giving extra values.)

— YOU ARE INTERESTED IN —

## Plants for Easter

We have **Azaleas**, **Hydrangeas** in all sizes. **Baby Ramblers**, **White Ramblers**, **Souperis**, **Lilies**, **Byacinths** and other bulb stock. Write us in regard to these.

We can furnish you now in bloom, **Azaleas**, **Cinerarias**, **Cyclamens** and **Primroses**.

**Young Rose Stock**. We have about 20,000 young rose plants that will be ready for a shift in February. If you are interested in them, ask for our list of varieties and prices.

**Ferns**. If you are interested in ferns of any kind or size, write and let us know what you will want.

**GEO. A. KUHL,**

**Wholesale Grower,** Pekin, Ill.

YOU cannot afford, if you grow Carnations and are looking for larger profits on your present capital, not to investigate Dorothy Gordon carefully before you complete your season's arrangements—for Dorothy Gordon has the other commercial Carnations excelled at every point, and it's simply a matter of justice to yourself to give it at

least a fair trial this year. We have asked our friends to visit our plant and see it growing, and a great many have done so. Have YOU? If not, we urge you to come now, for you will certainly be convinced, as others have been, after seeing it in our houses.

# Carnation Dorothy Gordon

Possesses all the points that you, a progressive grower, desire in the flowers you supply your trade. Large size (3 inches or more in diameter), fine uniform color (a shade darker than Pink Enchantress), long stiff stems, strong constitution and excellent keeping qualities, profusion of bloom—all these are big, important qualities in favor of our new Carnation—and best of all is the fact its buds command a price 50% higher than those of the ordinary commercial sorts.

If you want any Dorothy Gordon this year though, you'll need to get in your reservation at once, as our stock of rooted cuttings is being taken rapidly. Orders will be filled in strict rotation at these popular prices: \$10.00 per 100; \$75.00 per 1000.

Give us a chance to show what Dorothy Gordon will do. Come to Wyncote if you can; if not, write for further particulars—We'll gladly answer questions.

JOSEPH HEACOCK COMPANY, Disseminators,

Wyncote, Pennsylvania.

## 1/2 Million Roses

For February delivery in these and  
and 400 other sorts.

Summer grown, on own roots.

Jos. H. Cunningham, Delaware, O.

Flora Dale, Pa.

At the recent meeting of the State Horticultural Association of Pennsylvania all officers were re-elected. The banquet on the first evening was a great success, short speeches by a great number, giving an opportunity of becoming acquainted. We had decidedly the largest fruit exhibits shown at any of our meetings, and, without question, it was the best exhibition ever given in the state,—freedom from defects and general good quality considered. There was an opportunity to compare some boxed apples from Bitter Root valley Montana and Oregon, with boxed apples from our own state, to the decided credit of the Pennsylvania apples.

MIAMI FLORAL CO.,

George Bartholemew,  
Manager.

24 N. Main St., Dayton, O.

The Fruit Growers' Association of Adams County took first award for best display, with Wyoming county second. Notable in the former collection was the high color of practically all specimens, and their freedom from all defects of any kind. Notable in the latter was a collection of all varieties by Lewis Bros., of Pittston, which were very good, and a display of fancy Northern Spys by F. H. Fassett, of Meshoppen.

C. J. T.

## Snow White Sport of Helen Frick Chrysanthemum

Special Certificate of Merit at Maryland Horticultural Society. Heavy stock plants, \$3.00 per dozen; small stock plants, \$2.00 per dozen.

when you order stock, : : : :

# The Ideal Red Carnation

# O. P. BASSETT

It has been the *Leading Red Carnation* in this market, bringing the highest price of any and selling the best. It has paid us more money per square foot of bench than any other variety. The flowers are 3 1-2 inches in diameter, a deep brilliant red, and borne on long stiff stems. Winner of First Prize everywhere. Rooted cuttings, \$50.00 per 1000; \$6.00 per 100.

Buy Direct From the Originators.

## Bassett & Washburn,

Office and Store, 76 Wabash Ave., Chicago. Greenhouses, Hinsdale, Ill.

### McMinnville, Ore.

Since the first rains came the weather has continued rather bad. November and December were unusually wet, but the first killing frost we had came November 15. The first snow came December 4, but was soon gone, and the storm was followed by a dozen fine days and then the good and bad sandwiched in until now we are hoping the worst has past. Business has been exceptionally good this winter and we are looking forward to a heavy spring trade. To be sure, the weather has been dark and the flowers came slow, but the crop is healthy, with a good stand of buds.

In conversation with G. S. Crego (the aster specialist) the other day, he said he was very much pleased with the general appearance of his seed crop this season, and even though the threshing proved a little shortage in the bulk of seed, yet he hopes to be able to fill most of his orders, except in the rose pink and purple, of which the roguing took so many. It seems Mr. Crego is very particular as to what he saves for seed.

Warren C. McIntire has completed a greenhouse in the northwest corner of town. The house is 18 by 60 feet, and at present he has it filled with lettuce.

### Louisville.

Business the past week was excellent, with roses scarce and carnations plentiful. There is a good demand at this season for pot plants, cyclamens, azaleas, etc. The trouble is to get good ones to sell.

A firm under the imposing title of American Forestry Co. took orders last summer for Christmas trees and failed to make any shipment. This firm promised more and did less than any one we have come across.

## SHASTA

We are now shipping fine strong cuttings of **Shasta** as fast as they are ready to come out of the cutting bench. We have enough orders booked to take all that will be ready up to Feb. 15. If you want late February delivery you should get your order in at once. Come and see it growing; once you see it, you will want to grow it.

\$12.00 per 100; \$100.00 per 1000.

Send all orders to

**BAUR & SMITH, Indianapolis, Ind.**

A New Carnation Seedling of wonderful merit will be offered to the Florists' Trade in February, 1910. Orders booked now. This Carnation

**"The Constant"**  
GROWN BY WM. BESTER, of Hagerstown, Md. Color between Rose-Pink and Winsor. Produces long stems and large blooms from October to June. Free of any disease and no cropper. Calyx perfect. Blooms keep in good condition ten days. This Carnation grown and tested by Mr. Bester for three years and all prints guaranteed. The original seedling produced under the most scientific cultural conditions, and will supersede the Lawson. Price for Strong Cuttings, only \$10.00 per 100; \$90.00 per 1000. Before buying other varieties Florists should send for samples of this Carnation, as they will compare favorably on all points with any other Carnation on the market. Blooms mailed free on request. Address WM. BESTER, Florist, Hagerstown, Md., or C. S. FORD, Traveling Agent, Florists' Supplies, Novelties, Etc., P. O. Box 4515, West Park, Philadelphia, Pa. Established 1881.

## CANNAS

**Dahlias, Ferns, Asparagus, Ficus**

See classified department for prices.

**Wagner Park Conservatories, Sidney, O.**

Rupert Rayner was seriously injured by being struck in the abdomen by a wagon tongue, the horses starting up suddenly. For a time it was feared he had received fatal internal injuries, but he is improving.

Ernst B. Kretschmer & Son have started in the growing of pot and decorative plants and cut flowers.

H. G. W.

## SPECIALTIES.

Roses, from 3-in pots. Chrysanthemums  
Carnations for fall delivery. Smilax, Violets  
IN BEST VARIETIES.

Prices low. Send for list.

**Wood Brothers, FISHKILL, New York.**

### CANNAS.

We have a surplus of the following varieties, true to name, and offer them at a remarkably low price until sold. **Alsace**, Chas. Henderson, Duke of Marlborough, Capt. Drugeon, (one of the best yellows), Mlle. Berat, Defender, Kate Gray, Pennsylvania, \$1.75 per 100; \$15.00 per 1000; David Harum, Florence Vaughan, \$2.25 per 100; \$20.00 per 1000. Egandale, \$2.50 per 100. King Humbert, \$6.00 per 100. The above varieties mixed, \$8.00 per 1000.

WALTER W. COLES,

Kokomo, Ind.

# THE PUBLIC Aphine Tests

Held in New York in December, and in Boston in January, have given such satisfactory results to the manufacturers of APHINE, that another test will be held in Philadelphia on Lincoln's birthday, February 12th, 1910.

**Further Particulars in  
Next Week's Issue.**

If you are not familiar with the new insecticide discovery, APHINE, send for descriptive circular.

If your supply house does not yet handle APHINE, write us for names of nearest selling agents.

**APHINE MANUFACTURING  
COMPANY, Madison, N. J.**

## THE ALLIED TRADES

**From Hot Water to Steam.**

ED. AMERICAN FLORIST:—

Having a hot water system heated by sectional cast iron boilers, with 2-inch radiating pipes, I desire to change to steam, displacing the present boilers with return flue tubulars, and would like to know, if the same pipes can be used for carrying the steam, what, if any, changes are necessary?

K.

While a smaller size than 2-inch pipe is generally preferred for the returns in a steam-heating system for greenhouses, very good results can be obtained with returns of that size, especially in long houses. Without knowing anything as to how the present system is arranged, it is, of course, impossible to tell just what changes would be necessary to adapt a hot water system for use with steam. In case it is of the ordinary down-hill construction, with over-head mains, very little change would be necessary. The house can be heated with about one half the radiation required with hot water and hence the piping should be reduced to this extent, and valves should be provided at both ends of one half of the remaining pipes so that they can be cut off in mild weather. The expansion tank should also be disconnected and air-valves placed at the lower end of each coil; a check valve should be placed in the return near the boiler. If the arrangement is such as to afford a free return for the condensed water to the boiler and for the escape of the air from the coils, there is not likely to be any difficulty in changing over the system, as proposed.

L. R. T.

## BARGAINS IN GREENHOUSE MATERIAL

|                            |                             |                             |
|----------------------------|-----------------------------|-----------------------------|
| 5 - 72x20 Tubular Boilers. | 2 - 54x14 Tubular Boilers.  | 2 - 42x10 Fire Box Boilers  |
| 2 - 72x18 Tubular Boilers. | 3 - 42x12 Tubular Boilers.  | 1 - 36x12 Fire Box Boiler.  |
| 6 - 60x16 Tubular Boilers. | 2 - 36x10 Tubular Boilers.  | 1 - 36x10 Fire Box Boiler.  |

## Get Ready to grow plants for Spring

**It's time to learn all about:**

Try it for  
tomatoes.

Two  
layers  
of  
glass  
instead  
of  
one

The double-glass with air space is a transparent blanket. Covering and uncovering saved. Plants get all the light all the time and grow strong.

Thousands in use—north, east, south, west—get our catalog. It gives valuable information. Then get some sash. They yield big returns every season for a life time.

Write today to  
**Sunlight Double Glass Sash Co.**  
**934 E. Broadway,**  
**Louisville, Kentucky.**

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.  
The pump is of brass throughout, simple and powerful.  
The mixing device keeps the contents of the tank well stirred up from start to finish.  
When the machine is filled to within six inches of the top, a few stroke of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.  
Ask your dealer about our **Extension Hose, Extension Rods,** and the **Mastin Whitewash Nozzle** for Bordeaux mixture.  
Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.**

POUGHKEEPSIE, N. Y.—Chas. Schaumburg, of the Haggerty Floral Co., has returned to business after a week's illness.

SAN ANTONIO, TEX.—Walter Schumann was thrown from his buggy January 20 sustaining several body bruises. Fortunately no bones were broken.

WILMINGTON, DEL.—The business of John J. Kuratie, whose death was announced in our issue of January 29, will be continued by Mrs. Kuratie, who has made arrangements to that effect. The Kuratie greenhouses are well known as being among the best cared for in this vicinity, and Mr. Kuratie had built up a good trade.

## A. HERRMANN,

Cape Flowers, all colors, Cypas  
Leaves, Metal Designs and all  
Florist Supplies.

—Send For Prices—

404-412 East 34th St., NEW YORK.

## THE BEST WAY

to collect an account is to place it with the

## National Florists' Board of Trade

56 Pine Street, NEW YORK.

WHY? Because many debtors will pay the Board  
fearing otherwise a bad rating in our Credit List.  
Full information as to methods and rates given on  
application.

## IT IS NOT...

what you pay for the adver-  
tisement but what the adver-  
tisement pays you. It pays  
to advertise in the American  
Florist.WIZARD  
BRAND  
MANURES

Dried, screened and packed in bags of 100 lbs. each

## PULVERIZED SHEEP MANURE

Pure - Uniform - Reliable

A strong and quick acting manure highly  
recommended for carnations and chrysanthemums

## SHREDDED CATTLE MANURE

Easy to Handle and Apply

Stronger and better in every way than rough  
manure. Lasts much longer on the benches.  
Unequalled for mulching and feeding roses, liquid  
manuring and mixing with bench and potting soil.  
Used by all the largest growers.Ask your supply man or write  
for circulars and prices.

## BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

**PRACTICAL FLORICULTURE** (Peter Henderson).—A guide to the successful propagation and cultivation of florists' plants. Illustrated. 325 pages. \$1.50.

**THE HORTICULTURISTS' RULE-BOOK** (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

**HOW TO MAKE MONEY GROWING VIOLETS** (Saltford).—This is by a practical grower who has made a success of the business. No grower of violets can afford to be without it. 25 cents.

**OUTDOORS** (McGaffey).—A breezy little book of the woods, fields and marshlands. Interesting to the lover of outdoor sports, the fisherman, hunter or botanist. Readable from cover to cover.

**CHRYSANTHEMUM MANUAL** (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

**HEATING AND VENTILATING BUILDINGS.** (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

**CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES** (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

American Florist Co., 324 Dearborn St. CHICAGO

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It.

## Superior to All Others FOR HOT WATER HEATING

**RANDOLPH & McCLEMENTS, Successors to**  
**Chas. T. Siebert, Baum & Beatty Sts., Pittsburgh.**

Dobbs Ferry, N. Y.

The Horticultural Society held a dinner at Prucey's restaurant January 19, which was largely attended. An excellent menu was prepared by the restaurant management and the service was all that could be desired. The tables were handsomely decorated with carnations, roses, and other flowers. President Thomas Lea presided and, after coffee had been passed, introduced John Dunbar as toastmaster for the evening. His first call was on J. Smith, of Tarrytown Horticultural So-

# NOW IS THE TIME

## The King Iron Frame Construction

Is acknowledged the best. Minimum Shade. Maximum Strength.

ciety, who gave a very able address on the good work being done by horticultural societies in general. W. Scott was the next speaker, who spoke on the good fellowship existing between Tarrytown and Dobbs Ferry societies. J. Scott delivered the real horticultural speech of the evening. J. Oths entertained with some of his reci-

tations. F. Walter, of Yonkers, and C. Kurkevich entertained by several selections on the violin. H. Kastberg, secretary, gave an insight to the good work of the society during the past nine years. B. Husted, T. Lea, P. Clinton and others made very entertaining remarks.

## Superior Crimped Invisible Carnation Staple

(PATENT APPLIED FOR.)

For repairing split carnations. 1000 for 50 cents  
Postpaid.

L. J. WAITE, 293 Main St., Springfield, Mass.

Syracuse, N. Y.

"This is positively the best season I have ever had," says Henry Morris, in speaking of the condition of trade during the past few weeks. Continuing, he said: "There have been more coming out parties here in two months than ever occurred before in the same length of time. And more varied bouquets were carried, including the old-fashioned stiff bouquets with bouquet papers. Other bouquets in demand were made of lily of the valley and orchids. The call has been for the more costly flowers. There has been lots of good funeral work, including wreaths and a broken column six feet high for the funeral of Edward B. Judson, president of the First National bank. The column was of white carnations and the base of white roses. For funerals there have been lots of orders for designs and bouquets, many of the latter being of valley, sweet peas and maidenhair ferns. I do not know that times were ever any better." Mr. Morris was also commissioned to trim Mr. Judson's desk and chair at

## Iron Frame House Built for Asher M. Coe, at North Olmsted, Ohio.

It is built with our No. 1908 gutter on this side, as he contemplates joining another house to it.

Here is a letter from Mr. Coe which makes interesting and convincing reading:

"Am very much pleased with the 30x100 Iron Frame House you sold me a year or so ago. Am just cutting an immense crop of Carnations—the biggest I ever saw and they are fine. The only thing I am sorry for, is that I didn't tear out the old house south of new one, and put in an Iron Frame House—it would have paid big—well, I will in a year or two."

(Signed) ASHER M. COE, Cuyahoga Co., North Olmsted, O.

P. S.—"Everybody who comes in is very much pleased with the new house. It is so very light and is much cooler in hot weather."

Pa., Pres.; A. H. FRWKES, Newton Highlands,  
Mass. Sec'y.

## Our Supplements.

Subscribers should see that they get copies of  
the fine supplementary illustrations showing  
high grade design and decorative work. These  
fine supplements appear with each issue and  
should be carefully preserved, as they mean  
much to the retail florists in dealing with their  
customers, illustrating as they do the various  
kinds of work that the everyday florist is called  
upon to perform.

The papers in which the supplements appear  
should be likewise preserved, as they contain  
much valuable data with regard to these special  
illustrations. Subscribers should see that they  
get every issue as otherwise they may miss  
some of this high grade work.

## HALF HOUR CHAPTERS FOR PLANT GROWERS

### Azaleas.

Many growers think that azaleas  
are not worth carrying over after the  
first year and, if not sold when in  
flower, throw them away after flower-  
ing. If they do not intend to culti-  
vate them properly but just allow  
them to lie around the greenhouses  
without attention until they flower  
again next season then it would be  
better to throw them away at once  
for they will never do any good or be  
worth the room they take up. On the  
other hand, if given suitable treat-  
ment, there is no reason why they  
should not be as good, or even better,  
the second season as the first. The  
Indian azalea makes its growth direct-  
ly after flowering, the new leaves  
starting even while the flowers are  
opening in many cases. They should  
be encouraged during the growing  
time by a moist genial, growing tem-  
perature but not by strong heat as  
this only tends to soft growth and in-  
sects. By midsummer buds for next  
season's flowering can usually be felt  
forming in the new growth and when  
this occurs the plants may go out-  
doors, giving them a rather shady po-  
sition and watering carefully until  
September or the beginning of Octo-  
ber, when they can go under glass  
again for flowering in the usual way.

### Hydrangeas.

Probably fewer hydrangeas than  
usual will be prepared for Easter this  
year, the date being too early for  
these plants to be in their best form.  
Where they have been especially  
grown and were ripened up and start-  
ed early they can be had in time but  
they bring equally as good prices at  
Memorial day when they can be had  
with less expenditure for heat. Plants  
to stand hard forcing must be well  
established and, unless they are really  
forward, it will be better to let them  
come along slowly and both flowers  
and foliage will be finer than those  
produced in strong heat. A frequent  
mistake made in the culture of hy-  
drangeas is feeding too early. We do

not want big leaves like cabbage  
leaves and as long as they keep deep  
green and healthy this is all that need  
be expected. When the flowers begin  
to form is usually quite early enough  
to feed unless the plants are extra  
large in comparison with the size of  
the pots. A liberal addition of soot  
water to the liquid manure is of great  
assistance to the foliage, keeping the  
color good but if this is not at hand  
nitrate of soda used regularly but in  
small quantities in conjunction with  
good liquid manure is a very fair sub-  
stitute.

### Pot Chrysanthemums.

Experienced growers of pot chrys-  
anthemums for market find they get  
better results by propagating early and  
growing their plants on by slow de-  
grees, giving small shifts, than by  
striking the cuttings later and grow-  
ing them more quickly. The reason is  
that the growth becomes more con-  
solidated as it is produced and is  
harder and ripened more when flow-  
ering time comes around, producing  
flowers of better substance and more  
of them. The finest plants of Halli-  
day and Wm. H. Lincoln we saw last  
year, were from cuttings inserted at  
the end of February and grown and  
shifted on as described above. For  
pot culture one has to choose the  
varieties, but almost any kind is im-  
proved in habit by this method. It  
is less needed perhaps for the pomp-  
ous and singles than for the larger  
growers, but even with these natu-  
rally dwarf growers, moderately hard  
and well ripened wood produces finer  
and brighter colored flowers than that  
which is soft and green, and bright  
color is a great advantage for pot  
plants. In this kind of culture a great  
point to keep in mind is the avoid-  
ance of exciting conditions; these are  
harmful in every way. Plenty of air  
all through the early stages gives the  
plants a robust constitution and an  
ability to stand up against unavoid-  
able checks that is impossible with  
stock coddled and rushed along in  
close, heated houses or frames.

### Petunias.

Petunias of a good strain are among the most useful cheap bedding plants, keeping up a bright show all through the summer with a minimum expenditure of time or money. Seed of a good strain costs only a little more than the commonest and it is no more trouble to grow good varieties than poor. Sown now good plants in 2½-inch pots will be produced by planting out time at the end of May. The seed is very fine and must not be deeply covered when sowing but, if it is new and good, no seed is more to be depended upon for germinating. Sow very thinly or the young plants will become crowded and drawn before they have become large enough to handle for pricking out. It is surprising what a large number of plants can be raised from just a pinch of seed and how much ground it will cover if sown thinly. As soon as the plants are up grow them cool right along and pinch the point out of each as soon as they recover from the first transplanting, to induce a bushy habit.

### Treatment of Newly Potted Plants.

No matter how well plants might have been rooted in their pots before repotting, there is always a danger when they are moved to a larger size and have a lot of new soil around them that the roots will suffer, either from over watering or too little. The danger is less, of course, in the hands of an experienced grower who, by reason of long practice, has almost a second sight that tells him by the look of a plant and the soil whether it is in need of watering or not. This necessitates a knowledge of the soil and its peculiarities. The grower who has a good fibry loam, with plenty of substance, has a good deal the advantage over others with an extra light or brashy soil, for the roots produced in the former are stronger and less liable to injury from slight mistakes in treatment than the weaker, softer roots produced in loose unsubstantial soils. Supposing that the plants were well rooted before being repotted—and no plant should be given a larger pot until it has obtained a good hold on the soil in the pot in which it is growing—then it is safest to give one thorough watering directly after potting. Stand the plants on a level bench or floor, in order that the soil will not be washed out of place, and water until every inch of soil is wet, going over the plants two or three times. Besides insuring them against lack of moisture this also makes it certain that there are no air cavities around the roots, settling the soil around them. But after this first heavy watering considerable care is required and the grower must be sure that most of the moisture in the soil is used up by the roots before giving a fresh supply. As before noted an experienced grower can tell by the look of his plants whether they are dry enough to want water or not. This knowledge has to be gained by the beginner in the work, not by watering them "willy nilly" but by examining a plant here and there carefully, going so far, if doubtful about it, as to lift it and tell by the weight whether it is dry

or not. Very little practice along this line will aid the beginner considerably until, almost before he is aware of it, he has the hang of the thing and can go right along with his hose or watering can and feel confident that he is doing right.

Besides root treatment, that of the atmosphere is important. A plant or species that needs a moderately dry atmosphere when established will, when its roots have been disturbed, require more atmospheric moisture to enable the foliage to remain fresh and plump and to avoid wilting. Unless the leaves are kept in good order

Casket Spray of Callas.

By D. L. Vincent, Ionia, Mich.

the roots will remain inactive and the whole system of the plant fails. There must be a reciprocal action between roots and leaves, easy to maintain when the plants are well established but more difficult when the roots have been disturbed by the potting and are unable to send up the requisite moisture to the leaves. What is lacking then, through the ordinary root and leaf action must be supplied through the atmosphere to the foliage, either by absorption, as some authorities declare, or by a reduction in the amount given off by evaporation or by the principle of osmosis, a principle that all plant growers would find an interesting study and useful in their work. The supply of atmospheric moisture may be kept up by means of damping

between the pots and under the benches just as easily as by wetting the plants overhead, as this makes it difficult to decide whether or not the plants need root moisture. There are times, especially during hot summer weather, when a good washing from the syringe or hose does the plants a great deal of good, replenishing wasted moisture supplies and refreshing the plants greatly, but it is easily overdone, with almost any class of plant, especially in dull weather.

## THE RETAIL TRADE

### Casket Spray of Callas.

The spray or loose bunch of flowers of any kind as a funeral offering is much more popular of late than a set piece, where only a low price can be obtained. It is true there is not the scope for artistic arrangement in these small bunches that there is in more pretentious pieces, but they suit the retailer's customers and he has the chance to turn a few dollars this way which could not happen if only large and expensive designs were offered. The principal point to keep in mind in making up these sprays is to keep the flowers well apart and yet make a well finished bunch. Callas are always more or less stiff in appearance. This cannot be helped when no other flowers are used, but the picture herewith of a bunch by D. L. Vincent, Ionia, Mich., well illustrates the point in question.

### Wreath of Orchids and Valley.

SEE SUPPLEMENT WITH THIS ISSUE.

Where patrons are willing to pay the price there are few more exquisite wreaths than one made with orchids and lily of the valley. The valley sprays give a bright appearance and break up any flatness that may be caused by using cattleyas alone while their snowy whiteness helps the neutral tints of the orchids. A good decorator will get a better effect with a dozen orchids than a flower butcher will with fifty, for orchids are flowers that need to be properly displayed, so that their full beauty can be seen. There is an individuality about the flower of a cattleya when it is "looking out" of a bouquet, wreath or other floral piece that is entirely lost when the flowers are huddled together or placed in unnatural positions. With this provision anyone with an eye to a beautiful arrangement can so place orchids that they never fail to be satisfactory. The lily of the valley should be used as a foil to the orchids. Alone, this flower is not effective, unless it is in small sprays or bunches with its own foliage, but in connection with others it is a very beautiful foil to rich colors while retaining its own individuality more than do most small flowers. The sprays should not be put in just because there is a vacant space in the wreath but where they will have the best effect and where a little of their own foliage can be added, as they can when used with orchids, their appearance is greatly enhanced.

For a green to use with cattleyas nothing can approach *Adiantum Farleyense*. The broad flat pinnules of the fronds and their peculiar soft green

STANDING WREATH OF ORCHIDS AND LILY OF THE VALLEY, BASE OF GLADIOLI.

shade harmonizes well with the pinks, mauves and purples of the orchids and makes a delightful setting for them. As to the base of the wreath, almost any flower that stands up well and does not clash in color with the orchids will do well. *Gladiolus America* is frequently used and with good effect and there are other varieties of this flower that do equally well. One of the most satisfactory bases to a wreath of this kind was made with a snowy white *gladiolus* and its own foliage, a few sprays of *leucothoe* being introduced at the bottom to give a spreading appearance and good finish. Easter lilies too are fine for this purpose, callas, chrysanthemums of good shape and even good long-stemmed asters all being suitable. The idea is to have something bold and striking, something in strong contrast to the wreath above and if this is kept in mind and glaring incongruities of color avoided then a good result is almost certain.

#### Preparing for St. Valentine's Day.

St. Valentine's day is not exactly a big day for the retailer, but there is quite a little extra doing, and if he lays himself out to get the business by showing neat boxes, baskets and other arrangements of flowers dear to the feminine heart, then probably he will be well repaid. In Chicago the supply men have been busy shipping out violet boxes and hearts, ribbons and the hundred and one little trifles that go to make up an up-to-date display. The retailers are not behind hand and are making pretty and effective window shows with the great variety of flowers now on the market.

Fleischman is showing some novel and pretty baskets of flowers, such as sweet peas, orchids and violets which can hardly fail to attract. The neat yet attractive way in which these are put up and their surroundings in this well appointed store have more to do with the success of the thing than even the quality of the flowers, though this is excellent. We do not see any of the cheap, trashy material here; everything is good and well displayed. Chas. A. Samuelson, being so near the Coliseum, has introduced an automobile for the auto show at this hall, the model being very well worked out in immortelles. But he has not forgotten St. Valentine and the pretty little trifles around the store are put up in his own inimitable style.

John Mangel has a very attractive store and is laying himself out to catch the St. Valentine's Day trade. In his Monroe street window, in addition to fine stock of all kinds, violets and violet boxes and many little things to tempt the eye there is a quaint and pretty conceit consisting of a table with an immense open red flower and a cupid rising from the center. All around are pretty little red shades and ornaments, hearts and others, the table cloth being similarly decorated. It causes quite a little crowd to gather all the time and will doubtless prove a good drawing card. Elegant bulb stock in pans is shown as well as azaleas, cyclamens in Delwood gilt boxes, and other good plants. Harry Rowe is going strong on violets and expects a heavy demand. He is well prepared with pretty and attractive

boxes and hampers and the usual paraphernalia of St. Valentine's day.

H. R. Hughes at West Van Buren street has celebrated St. Valentine's day by putting out one of his illustrated stories, this time addressed to the "West Side Bachelors" with a subtitle "and married men." It is illustrated with a cut of an attractive girl holding a rose which is a little on the fashion plate order and a happy looking individual taking one of Hughes' valentine boxes of flowers to his wife—or sweetheart—it is not quite clear which. Anyway, it is good advertising and Mr. Hughes deserves the greatest credit for the trouble and expense he goes to along this line. Incidentally we may mention his excellent window and store display for Lincoln's birthday, the old frame house and rail fence being well done. These shows are a never ending source of interest to passers-by and cause his store to be talked about, and this is what he wants.

#### An Open Letter.

ED. AMERICAN FLORIST:—

Having been a reader of the *AMERICAN FLORIST* for several years, keeping in touch with the advancement in the trade through such a valuable paper, I appreciate the widespread publication of opinion granted to its readers whereby all may benefit by some advice given through its columns.

During the past year, many new varieties of carnations have been originated and disseminated. Descriptions are given by the originators which naturally call attention to some special feature of flowers or the vigor of growth, their productiveness, etc. Every grower whose object is to advance, naturally desires to procure the variety which will yield the largest crop and the best quality under general conditions. As each season brings forth its new varieties many additions are required, but in the course of a year most of these are never heard from again. Many good varieties pass that are never heard of by the small grower who plants say 6,000 carnations as stock. He needs all the space available to devote to special varieties that his trade demands, consequently he never has a chance to try the new varieties that appear each year.

There is only one solution to the problem as it appears, one that guarantees absolute surety, and the advice received from such a source would be invaluable to the small as well as to the large grower. It is the experiment stations. They exist in every state and it is right here a variety test should be carried on to benefit every florist. They could judge for themselves the good qualities as well as the poor qualities of the many new kinds. It would not be one man's opinion but that of many, as the florists could see them growing at all times and judge for themselves in making a final decision.

The stations are established for the benefit of the florist as well as the farmer, yet how few ever seek the advice that would be beneficial to them. Most sit back after having paid their taxes and become pessimistic if an experiment station is mentioned. Some claim it cannot benefit them because

it does not pursue special lines in horticulture. This may be true, but we each pay a tax that demands the creation of a department in floriculture. Don't let this slip your minds. Meetings are held in many cities, but very seldom is an experiment station given consideration or seldom is news forthcoming that florists have visited them. It takes just a simple movement among the growers who are really interested in their own welfare to get together and have a talk with their representative in the legislature to bring about the necessary requirements to assist their interests.

We might ask, in concluding, "What does an experiment station really mean to us?" The answer is very simple: It is the best bureau of practical information we can get. Still there seems to be a misunderstanding among the growers who have had life experience in the business and who feel they need no advice. We are never too old to learn to accept advice that will correct an error that may mean great financial loss to us. Co-operation is needed and this we must have if our object is to advance. The experiment station would not only be the place to test varieties of plants, but to disseminate broadcast the knowledge of commercial fertilizers and their effects when applied under artificial heat. This alone would mean valuable service for a little time spent among us at our meetings, getting together to forward a petition to the legislature demanding a reasonable return for our taxes. We are falling behind each day we neglect this duty. How many of us have a peculiar soil to deal with in growing our stock year after year? The same poor results coming each season. Some will pay a chemist to analyze the soil to determine the cause of such hard luck. Right here is a loss of money even though it be a small consideration. What is our experiment station chemist for? He is paid to give us the same service as the farmer. How many use him? There are a great many other points that would be interesting that cannot be touched on at this time, but every florist owes it to himself and his own welfare to give this subject consideration before passing it up, for all it costs is a few names added to a petition to fill their needs. The assistance is waiting for the asking. What are we growers going to do about it?

D. MANLEY JOBBINS,

FRAMINGHAM, MASS.—During the last year S. J. Goddard added 10,000 square feet to his glass area.

ORANGE, N. J.—F. C. Read's greenhouses at Chapel street were damaged by fire, which started in the furnace January 30. There was no insurance.

PORTLAND, ORE.—The E. J. Harmon Co. has been incorporated, with capital stock \$10,000, "for producing and dealing in seeds, bulbs, plants, etc." E. J. Harmon is president, Mabel I. Hayes, treasurer.

FALL RIVER, MASS.—The G. L. Freeman Co. has been incorporated, to deal in flowers, with \$30,000 capital stock in 300 shares of \$100 each. The officers are G. L. Freeman, president, and Wm. E. Braley, treasurer, the directors being the president, treasurer and E. F. Hoffenreffer.

### National Association of Gardeners.

The preliminary premium list for the annual flower show and convention of the National Association of Gardeners to be held at Philadelphia, March 15-17, has just been issued. Numerous prizes are offered for carnations, roses, bulbs, tubers, orchids and miscellaneous, the donors including Robert Craig Co., Philadelphia, Pa.; F. R. Pierson Co., Tarrytown, N. Y.; Peter Henderson & Co., New York; Rickards Bros., New York; Benjamin Hammond, Fishkill, N. Y.; Bobbink & Atkins, Rutherford, N. J.; Hitchings & Co., New York; Ellwanger & Barry, Rochester, N. Y.; P. H. Goodsell, New York; Weathered Co., New York; Lager & Hurrell, Summit, N. J.; Julius Roehrs Co., Rutherford, N. J.; Joseph A. Manda, West Orange, N. J.; J. T. Withers, Jersey City, N. J.; Lord & Burnham Co., New York; Wilson Plant Oil & Fertilizer Co., Chatham, N. J.; W. Atlee Burpee, Philadelphia, Pa.; Burnett Bros., New York, and W. & T. Smith Co., Geneva, N. Y.

The exhibition will be held in connection with the spring show of the Pennsylvania Horticultural Society. Robt. Craig, Wm. Turner and Chas. H. Totty will officiate as judges. The officers of the society are as follows: Wm. Kleinheinz, Ogontz, Pa., president; James Bell, Garrison, N. Y., and A. J. Smith, Geneva, N. Y., vice presidents; Chas. Dumper, Bay Shore, L. I., N. Y., treasurer; W. E. Maynard, New York, secretary; Edwin Jas. Day, West Philadelphia, Pa., assistant secretary. The members of the executive committee are: Wm. Kleinheinz, Chas. Dumper, James Bell, John Shore and W. E. Maynard.

### New Water Lily Pond at Kew.

Outside Museum No. 2 and between that building and the melon ground a new water lily tank has been built in the open air on the site that for years has been devoted to medicinal plants at Kew. The pond itself is sunk two or three feet below the general level of the surrounding garden and is approached from several points by steps. The pond is severe in outline, with stone banking and a cement bottom. Hot water pipes run all around and through the pond so that the temperature of the water may be kept at a certain point if necessary. Only the choicest varieties of hardy or half-hardy water lilies are grown here and the fact that a government establishment like Kew has gone to the expense of constructing the pond, is in itself an indication of the popularity of these nymphæas.

Many of the large private gardens in England have had open air tanks constructed for the culture of these plants and during the summer months ingenious exhibits are made at many of the shows. Temporary tanks are improvised out of tarpaulins placed in shallow wooden tanks and when these are filled with six inches or one foot of water and planted with nymphæas and other aquatics they give a realistic effect to the herbaceous groups, or dwarf trees and shrubs planted on the artificial banks.

W.

## THE CARNATION.

"CAROLA, a deep crimson carnation, is in small supply in the Covent Garden Market, London, and will supersede Harlowarden and Roosevelt," says the Horticultural Advertiser.

HOOSIER LAD, Dorner's fine scarlet, winner of the gold medal at the Pittsburg convention of the American Carnation Society, does not bloom freely and on this account is not likely to be offered to the trade.

### Carnation Culture.

For use in funeral decorations and other display work, carnation flowers should be of good quality, and to produce such, the propagation and culture of the plants producing them and the gathering and care of the flowers after being grown, must be carefully and properly attended to,

Wm. Kleinheinz.

President National Association of Gardeners.

necessitating unflagging attention on the part of the grower. This is not alone the case with the carnation plants and flowers, said W. T. Bell in a paper read at the recent convention of the American Carnation Society, but applies as well to all the stock in the florist's domain, a fact which all plantsmen do not seem to appreciate. If eternal vigilance is the price of liberty, it is no less the price of good plants and flowers and the difference in the success of different florists may generally be ascribed to the continuous care bestowed on his stock by the successful grower, and the intermittent care and partial neglect in this respect of his less successful neighbor.

### PROPAGATION—OLD AND NEW METHODS.

There are different ways of propagating carnations, and the older English authorities seem to have preferred layering, which is necessarily a very slow method, and is practically unknown in this country. Another means that they practiced was propagation by pipings, which were practically the same as our cuttings, and the

directions for the operation are as follows: "Prepare as many pots as are wanted. Fill them nearly full of compost, and the remaining space with silver sand. Prepare the pipings, by cutting off a stem quite smooth at the third joint, then carefully split the joint just through and insert the pipings in the sand."

How would our growers, who propagate carnations by the million, like to be confined to the slow and tedious method just outlined? Undoubtedly their patience and their pots, with some of the other material mentioned, would soon become exhausted. Judging from the directions concerning many of the horticultural operations described in the English works on gardening, and especially those of an early date, silver sand was a very important substance in the gardener's equipment, and, while it is a very nice and cleanly material to work with, we have proved by long practice that it is not indispensable.

The best material from which to make carnation cuttings are the shoots springing from the sides of the flowering stems, but taken before they are old enough to have developed the three joints mentioned in the directions concerning pipings, just read. These will make better plants than the tips of terminal stems, such as are produced on young plants, and which are sometimes used. Cuttings should never be taken from plants showing any signs of disease, such as yellow or spotted foliage, notwithstanding the temptation to do so, in the case of varieties that it is desired to increase to the limit.

### PREPARATION OF THE CUTTINGS.

Only so many cuttings should be taken off at once as can be prepared before they show any symptoms of wilting. They should be handled at a distance from stoves or hot pipes, and not in bright sunshine, and it will do no harm to freshen them by a gentle spray of cold water, if it seems necessary. While some growers insert the cuttings in the sand almost in the condition in which they are taken from the plants, it is very much better to prepare them first by judicious pruning, as follows: Pull off two or three of the lowest leaves, but without removing too much of the substance of the stem of the cutting, then, with a sharp knife, shorten any of the remaining leaves that are long enough to require it, leaving from one to two inches of the base of each leaf.

### THE PROPAGATING BENCH.

The cutting bench should have been prepared in advance, with three or four inches of clean, sharp sand, free from loam, or any vegetable substance, and should be provided with some means of keeping up a gentle under heat. It is the practice of some of the best propagators, and a very good one, too, to renew the cutting bench with fresh sand after each lot of cuttings have been taken out, but it is a laborious operation, and is not absolutely necessary. If the sand is stirred and loosened and thoroughly soaked with boiling water, applied with a watering can having a spray hose on the spout, so as to destroy any fungoid growths it may be used for

BENCHES OF NEW CARNATION, BRIGHT SPOT, AT NIC. ZWEIFEL'S, NORTH MILWAUKEE, WIS.

A Fine Seedling of Lawson Habit But Brighter in Color and With Better Stem.

a number of times with safety, as has been proved by actual experiment.

#### INSERTING THE CUTTINGS.

In preparing the bench to receive the cuttings, the sand, which should have been thoroughly watered some time previously, should be firmed by using a clean brick, or something similar, and scored for each row of cuttings with a table knife. If the cuttings have been properly trimmed, the rows should be about two inches apart and the cuttings placed one-half or three-quarters of an inch apart in the rows. They should be inserted from one-half to one inch deep, depending somewhat on the condition of the sand and the character of the cuttings, and should be firmed by pressure of the finger and thumb on the sand during the operation of setting them, which may soon be learned.

As soon as a lot are set, they should be given a good watering, with a can as recommended for scalding the bench and should never be allowed to get so dry that the sand becomes light-colored and dry to the touch, or the cuttings show any signs of wilting. The watering should be done, if possible, during bright days and in the morning. While the bench should have all the light it will bear without injury to the cuttings by making them wilt, it will be necessary to shade it from bright sunlight, at least until the cuttings have become so thoroughly established that sunshine does not harm them.

#### POTTING.

As soon as the cuttings have formed roots half an inch in length, they should be potted in 2-inch pots, using a good quality of potting soil, with little or no fertilizer in it, and firming the plants well in the pots. This course is preferable to planting the cuttings in trays or boxes of soil, a plan followed by many growers. The plants should then be placed in a rather cool, well-lighted house, having about the same temperature as that in which the cuttings were rooted, and one in which top ventilation can be given when needed. For a short time at first they will require to be shaded from bright sunshine, but the shading should be dispensed with as soon as possible.

#### WATERING.

One of the most important things requiring attention at this stage of the growth of the plants is the watering. They should never be allowed to get quite dry, and, on the other hand, should never be watered while the soil is wet, as neglect or carelessness in this respect is likely to lay the foundation or sow the seeds of future stem rot. This operation should be in charge of the most experienced and careful person employed in the establishment, and if the watering is done with a hose, it should have a nozzle furnished with a spray rose, having a flat and not a convex surface, perforated with very small holes. To water plants as it should be done is one of the most difficult things to

teach a beginner, and should never be entrusted to any one who cannot do it properly. A careful and experienced man knows by looking at plants when they need water, and how much they need.

While probably a majority of plantmen use an open hose to water with, regulating the amount of the flow with the end of the finger, this is not nearly as good a plan as to use the spray nozzle, as recommended for the newly-potted carnation plants. The flat perforated surface of the rose concentrates the spray, while a convex surface would cause it to be too much scattered, so that it is difficult to apply the water just where it is needed, without wetting other plants standing near, that may not require irrigation at the time. For general greenhouse use, the perforations in the rose should not be very large.

#### WEEDING AND FUMIGATION.

Weeds should not be permitted to grow among the young carnation plants, and fumigation must be attended to regularly, to keep down aphids, while the under side of the foliage should be sprayed with a good force of water to keep the plants free from red spider. As soon as the stems attain the proper height, say five inches, they should be stopped, which will induce the formation of side shoots and when the pots are well filled with roots, the plants should be repotted into 3-inch pots and so on to 4-5 inch pots, for those that are to be benched from pots.

## THE ROSE.

### Cultural Notes.

The rose grower at this time should be very careful when taking cuttings not to strip the plants too closely, as they are likely to remain almost at a standstill if this occurs. If the plants are vigorous and making rapid growth, cuttings will be easy to take in some quantity, and very often to the advantage of the plants they are taken from, provided, some judgment is used when removing the wood, cutting off the growth at a joint that is likely to break into stronger growth through the pruning process.

It is too early to attempt anything in the way of a heavy mulch, although if the plants require a topdressing of some kind, a light dressing of fresh soil to which has been added some finely pulverized sheep or cow manure, about half and half, put on loosely, barely covering the soil. This will give the surface roots something to work on until later, when they will require a heavier mulch, and this will encourage new strong growth. Liquid manure should now be used at full strength on all vigorous plants. If there should be a house that has slowed down, or in a semi-dormant condition, showing a tendency to go to sleep—try running it a little drier and cooler for several weeks until they begin to break again. A house in this condition, often the result of cutting a heavy crop, will require frequent syringing. One cannot overdo the syringing on bright days at this season, using all the pressure obtainable and care in spraying up through the foliage to loosen up the red spider.

During a long spell of cloudy weather raise the ventilators daily as far as possible to prevent chilling the plants. The plants require as much fresh air or more on cloudy days to prevent them growing soft. In order to keep the plants free of spider and to get the full benefit of spraying, they must be kept tied back. Frequently, where a plant now and then hangs over the walks, or where they are overhanging a coil of hot steam pipes for the want of tying, red spider gets a strong foothold, and then it becomes almost an impossibility to dislodge it.

While we are waiting for the cuttings to root, it would be a good idea to have a bench prepared to receive them; remember, the best location in a bright, airy house is none too good for the young stock, for this will require full sunshine after the first week when potted. About an inch of screened coal ashes should be placed on the bench that is to receive them, and they should be given a good soaking and then packed firmly before placing the plants on them. Never plunge pot roses in the ashes, as they will dry out slowly enough without doing this. Then, as the plants will require shading for several days, or until they begin to make roots, a few shades (or as many as may be required) should be got in readiness. Button cloth (the cheapest grade) can be tacked to light frames and placed about a foot above the plants. A few laths tacked to the sides of table will make a handy support for the shades. And shading of this kind can be removed quickly at any time and they

will answer for shading for many other things that require it throughout the season.

The soil for potting the cuttings can be prepared now. It should be a good compost, fresh, good, heavy sod soil containing considerable fiber, to which has been added some good well-rotted cow manure. One part manure to three parts soil is about right, screened through half-inch mesh, rubbing the sod through the sieve carefully to get the fiber; 2½-inch pots will answer for most of the cuttings unless there may be some exceptionally strong stock in the sand of American Beauty. For these a 2½-inch pot is preferable. Do not let the cuttings stay too long in the sand, pot them off when the roots are about half an inch in length, and when potting them take plenty of time, keep the roots well up towards the top of the pot, and pot firmly. Water them in small lots to prevent them from becoming wilted before watering; also shade as soon as they are watered, downspraying them overhead on bright days until they are able to take another thorough watering. E.

### Rose Foliage Falling.

ED. AMERICAN FLORIST:—

I am sending you some leaves of Bride rose to determine the cause of their dropping heavily for the last four weeks. About a month ago we had a night fireman who was caught asleep three times during his two weeks' employ. Of course the houses went down to 48°. Would that sudden change cause the leaves to drop even one month after he left? The house is so situated that it does not get the sun until 10:30 a. m., and is shaded again about 3:30 p. m. I keep the beds rather on the dry side, syringe only on very bright days, on account of its early shadows, and the roses, as far as I know, are doing well. They had given me good crops ever since fall and have been budding and blooming pretty heavily before Christmas. Every plant is throwing up shoots from 2 to 2½ feet, sturdy, healthy looking canes, with good, dark green foliage on them, and fair sized blooms. Some are bull headed. Why? Is it the fault of the past treatment, the conditions of the house, or my ignorance? Either way I will try to improve it, if you will tell me what to do and determine the disease, if any. H. J. P.

We are inclined to blame the drop in the temperature for some of your trouble, for the leaves, with the exception of a little red spider on some of them, appear perfectly healthy and, considering the limited amount of sun the house receives, fairly well consolidated. Beyond spraying with a fine nozzle for the red spider, taking especial care of any dry corner near the heating pipes, we would advise very little overhead watering and certainly would never spray at all unless the leaves become quite dry by nightfall. To counteract the loss of sunshine at this time of year keep the glass perfectly clear and turn on sufficient heat to allow of some ventilation at least early in the morning without lowering the temperature below 58°-60° rising gradually until the sun reaches the house. Use considerable judgment in watering at the roots for with the

loss of foliage these are apt to be less active for a time until nature has restored the balance between root and branch. It is probably this lack of root action that is causing the bull-headed roses. If a house is at command that obtains a better share of sunlight we would advise its use for the roses at future plantings, growing ferns, asparagus, smilax or some other green crop in the one now devoted to Bride. But we think that with due care along the lines indicated the roses will grow out of their trouble and it will probably not occur again if a regular temperature and proper atmospheric conditions are maintained. G.

### New York and N. J. Plant Growers' Ass'n.

#### SECOND ANNUAL BANQUET.

On the night of February 2 a "merrie companie," members of the above association, with their wives, daughters and other friends, gathered in one of the fine banquet halls of the Hotel Astor. This hotel is noted for its good cheer and good living and the menu for this event was all that could be desired. There was excellent music and fine floral decorations. Julius Roehrs, Jr., president of the association, made a brief speech welcoming the guests and introducing Fred L. Atkins, of Bobbink & Atkins, as toastmaster. Mr. Atkins is a clever speaker and always talks interestingly. In opening he referred in a feeling manner to the deaths during the past year of John Scott, E. V. Hallock and Herman Dreyer, all members of that association.

Anton Schultheis, F. R. Pierson, president of the S. A. F. A. L. Miller, president of the New York Florists' Club, and President Roehrs of the association all talked interestingly on the advantages of organization and co-operation. Other interesting speakers were: Herman C. Steinhoff, treasurer of the association, John G. Esler, A. J. Guttman, W. J. Elliott, Louis Dupuy, Wm. H. Siebrecht, Sr., Wm. H. Siebrecht, Jr., secretary of the association, Louis Schmutz and Wm. J. Stewart of Boston. Mr. Stewart made an earnest appeal on behalf of the National Flower Show to be held next year. He mentioned some of the delights of Boston, but said nothing about the sacred codfish, which is their mascot over there. Briefly stated, the gathering was very enjoyable and very creditable to officers and members of the association. Plant growing has come to be recognized as a separate and distinct branch of horticulture and the fraternal spirit shown by the members of this association was good to see.

BRIDGEPORT, CONN.—Wm. Pinchbeck is building a store in connection with his greenhouses.

WHEELING, W. VA.—John Dieckmann intends building two large, modern greenhouses at his establishment at Park View.

SANTA ROSA, CALIF.—An explosion of the boiler at Rudolph Spreckel's greenhouses caused a fire which resulted in \$5,000 damage, January 29. Fred Renzone, the gardener, had only just left. Distillate was used for fuel and it is thought there was a leakage in the supply pipes.

NEW YORK

**Illinois State Florists' Association.****THE CONVENTION PROGRAMME.**

Arrangements for the meeting of the Illinois Florists' Association at the University of Illinois, Champaign and Urbana, February 15 and 16, are practically completed and, according to C. E. Gullett, of Lincoln, president of the society, the convention this year is to be the best of the association. The sessions will be of unusual interest to local people, for the question of selecting the University of Illinois as the permanent meeting place will be vigorously contested. Then, too, the officers are making great arrange-

of the first day's session will be one by Prof. J. C. Blair, on 'The Value of the Experiment Station to the Florists, and the Duty of the Florists to the Station.' The banquet will follow at the Beardsley, with a programme of after dinner speeches to be arranged by the local committees of the twin cities.

"On Wednesday morning, the first address will be held in the interests of the newly organized Illinois Outdoor Improvement Association, and will be delivered by Prof. J. W. Garner of the department of political science of the university, and member of the board of directors of the Illi-

**OBJECTS OF THE ASSOCIATION.**

"The objects of this association are to promote in all possible ways the art of floriculture, ornamental horticulture, and gardening under glass, including educational and civic improvement benefits arising therefrom; and for making researches into diseases of ornamental plants and greenhouse vegetables, suggesting remedies, etc. The officers of the Illinois Florists' Association are: G. E. Gullett, Lincoln, president; George B. Franks, Champaign, vice-president; J. F. Ammann, Edwardsville, secretary; Frank L. Washburn, Bloomington, treasurer.

"The society was organized at Peoria in March, 1906, held its first convention at Bloomington, in February, 1907; its second and third conventions in Springfield, in February, 1908 and 1909, and will at the next session consider an amendment to the constitution to locate the convention permanently at the seat of the University of Illinois, on account of the value to the florists of an annual visit to the experiment station. It is known, however, that this resolution will be actively opposed."

**National Council of Horticulture.**

The National Council of Horticulture held a meeting at the Auditorium Annex, Chicago, January 17. There were present C. E. Kendel and C. Cropp from the American Seed Trade Association; E. D. Smith and W. N. Rudd from the Society of American Florists; J. H. Burdett of the Press Bureau service; J. C. Vaughan, chairman, and H. C. Irish, secretary. Letters or telegrams were read from J. Horace McFarland, J. Otto Thilow, F. R. Pierson and C. L. Watrous.

The term as delegates at large of Professors W. B. Alwood, S. A. Beach and S. B. Green having expired, Professors Alwood and Beach were elected to succeed themselves and Professor J. C. Blair of Urbana, Ill., was elected to succeed Professor Green. It was announced that C. Cropp and C. E. Kendel were the authorized representatives in the council from the American Seed Trade Association, J. Otto Thilow, E. D. Smith and W. N. Rudd from the Society of American Flor-

EXPERIMENT STATION GREENHOUSES, URBANA, ILL.

ments for a floral display such as has never been witnessed in this part of the state. President Gullett says:

"In common with the other officers I am putting forth exceptional efforts to make this the greatest convention in point of attendance and excellence of programme which our association has ever held. I think there are reasons why the florists of the state will back up our efforts and make it such. In the large and representative attendance of young men and women from all parts of Illinois and surrounding states, we recognize an opportunity of immense educational value to our business. For that reason we are urging the florists to send larger and better displays of cut flower stock than we have been able to stage in other years, and we feel very hopeful that they will respond. The exhibition will be held in the foyer of the beautiful auditorium on the campus. The sessions of the convention will be held in Morrow hall in the Agricultural building. Convention headquarters will be at the Beardsley hotel, where all florists will be asked to register during their stay in the twin cities, and where the banquet will be served on the evening of February 15.

**ADDRESS BY PRESIDENT JAMES.**

"The first day's session will be opened with an address by President Edmund J. James, of the University of Illinois, to which a response will be made on behalf of the florists by Phil. J. Foley of the Foley Manufacturing Co., Chicago. Mr. Foley designed the model greenhouses of the State Experiment Station, in the grounds of the horticultural department of the university. Reports of the various state officers will follow, supplemented by a report of the secretary of the advisory committee of the experiment station, Willis N. Rudd of Chicago. The last of the addresses

nois Outdoor Improvement Association. Following this an address on 'The Cut Flower Industry' will be delivered by C. L. Washburn of Chicago. It is expected that a fraternal address will be given by E. G. Hill of Richmond, Ind., but he has not been definitely heard from as yet. The closing formal address will be given by Prof. H. B. Dorner of the experiment station, who always has a helpful message on the practical side of the work to present to the florists. Routine work, including the report of the auditing committee, unfinished and new business, question box, election of officers, locating of next annual convention, etc., will complete the session. The exhibition will be open to the public and everybody will be welcome to attend from 7:00 p. m. to 10:00 p. m., Tuesday, February 15, and from 9:00 a. m. to 12:00 noon, Wednesday, February 16.

OFFICERS ILLINOIS STATE FLORISTS' ASSOCIATION AND EXPERIMENT STATION OFFICERS.

ists; C. L. Watrous and Guy A. Bryant from the American Association of Nurserymen; H. S. Watson and J. F. Wilson from the National Nut Growers' Association. The secretary reported \$183.22 on hand and \$200 available from the American Seed Trade Association or a total of \$383.22 for the current year's work.

J. H. Burdett made a report of the press bureau work in which he says: "By keeping faith with the newspapers of the country for several years, distributing articles which are interesting to the general reader, and at the same time free from suspicion of being advertising matter for any particular article, or firm, the Council of Horticulture has won a most valuable good will. The greatest newspapers in the country accept the articles with confidence in their freedom from that free advertising taint for which newspapers are always on the lookout. All the matter sent out by the council is printed in a great number of papers. The Chicago Daily News has printed every article sent out by the council in the last three years, and given each article a characteristic heading; crediting it to the council. The same method is followed by many other dailies. The service last spring was sent to 500 newspapers and news bureaus, and by the latter it was sent in the form of 'boiler plate' to several thousand country weeklies and small dailies. The position of authority which the council has obtained with these newspapers and bureaus should maintained by keeping up the press service. There is no room for doubt that the publicity given to horticulture by the bureau is worth many times its cost."

The possibility of instituting a paid service was suggested but after a further discussion it was thought inadvisable to do so at this time. After further discussion the secretary was instructed to ask the assistance of experts in the preparation of articles and to arrange a schedule for their distribution as soon as practicable. Some 60 subjects were suggested, one-half of which the members present pledged to prepare. It was arranged to send out at least 10 installments this spring beginning the latter part of February.

H. C. IRISH, Sec'y.

MARTINSVILLE, IND.—Chas. Trowbridge, an employee of the Martinsville Floral Co., and Miss Edna Opal Baker, were married January 28.

To Be Done Now.

IN THE GREENHOUSES.

Cover all seeds, directly they are sown, with paper or some other material. In nearly all cases they germinate more freely in total darkness than in light.

Soot water, clarified and used regularly in a dilute state, is about the best stimulant for foliage plants, improving the color of the leaves very rapidly.

Every bright day spray forcibly any plants that may be ever so slightly attacked by red spider and any doubtful places near the heating pipes in the rose house.

"Make haste slowly" is good advice for growers of tuberous rooted bego-

The Late Eugene Diemer.

nias at the beginning of the season.

Never pinch geraniums at the flowering joint—always one above or one below.

Spirea Japonica can be hastened at this time by the application of heat. See that the roots are kept always moist.

The spikes of Odontoglossum citrosmum will soon be showing in the tips of the new growth. When this occurs give the plants a through soaking of water but not before.

Geraniums are often injured at this time by being left in the small pots too long. Keep them in cultivation.

Pot the leaf cuttings of Begonia Gloire de Lorraine as soon as they begin to grow and insert a later batch.

OUTDOORS.

Look over the shrubs and trees in storage and see that they are not drying unduly.

Where rhubarb is wanted early without lifting or forcing a good thickness of strawy manure laid over the crowns will forward it some.

Burning is a good way of disposing of any weed infested soil and rubbish of a like nature. The resulting ashes form a most useful fertilizer.

Screening ashes and clinkers to various sizes for different use and throwing out any coal or half burned cinders makes good cold weather work for the help.

Where there are herbaceous plants in protectors look over them on mild days and remove anything of a decaying nature. From now on they must have air except during the very coldest weather.

Frequent turning for at least two weeks is necessary in the preparation of manure for hotbeds or mushroom growing. Manure hastily prepared soon loses its heat.

Concrete has so many uses now that all spare time in winter might well be spent in preparing it in its various forms. There seems to be no end to the various uses this material can be put to when properly reinforced.

Do not allow bulb flats to lay around after being emptied. Keep them piled up neatly where they can be got at easily and repair any that need it. Many of them will be wanted for seed before long.

OBITUARY.

Eugene Diemer.

We regret to announce the death of Eugene Diemer, of the Diemer Floral Co., St. Louis, Mo., after a lingering illness. He was in the prime of life—aged 39 years. Many floral offerings were sent to his funeral, including designs from the wholesale houses. The widow will carry on the business, as the trade is well established.

W. F.

Henry A. Stone.

Henry A. Stone, Kingston, N. Y., died January 29 at his home, he having suffered for the last five years with rheumatism and heart weakness. Mr. Stone was born in New York in 1837 and early became interested in gardening and kindred work. He started to build greenhouses in Kingston in 1867 and was the pioneer violet grower of the state. For some time he disposed of his own cut in the New York market as a wholesaler and was known as the "violet king." He is survived by his wife and four children.

FLORISTS' employes are now under the regulations of the factory act in England.

## Important to Subscribers.

The date on the yellow address label on your copy of THE AMERICAN FLORIST will show when your subscription expires. Please renew subscription promptly on expiration to make certain of receiving your copy of each issue.

COLD WEATHER, retarding the growth of nearly all stock, is prevalent in the Santa Barbara (Calif.) district.

CORPORATIONS who pay their taxes only under protest cannot get their money returned: it can be got back if the law is declared unconstitutional only when paid under stress.

GOOD soil and manure have a high market value in the large greenhouse centers and in some cases it is impossible to secure adequate supplies, growers being compelled to use inferior grades.

THE fertilizer needs of soil can not be determined by chemical analysis, that process leaving unanswered many questions as to the availability of the constituents. Careful experiment is still the best way to solve the problem.

REPLYING to "T. C." we may state that the difference in the old ad valorem and the new specific duties on some items, such as lilies, hyacinths, narcissi, lily of the valley, etc., is quite considerable. Some dealers, we understand, gave their customers the advantage of the new schedule last year, where the duty was lower, while others took the profits made by the changes in duty.

AN exhaustive study of the fauna and flora of South America will be made by the Swiss government. The expedition will be under the leadership of Dr. Fuhrmann, Neuchatel, and Dr. E. Mayer, an expert in medicine and botany of the same university. The explorers will leave Switzerland for South America on July 1 of this year. The expedition will last a year. It is stated that several English and American men of science intend to join the expedition at their own expense, and their offers have been accepted.

## American Carnation Society.

### CARNATION REGISTERED.

Niagara—A cross between The Belle and an unknown variety. Pure white, 3 to 3½ inches, a free grower, strong and healthy. A. F. J. BAUR, Sec'y.

## The American Rose Society.

The executive committee and other members have held two conferences in New York in regard to the details of the coming spring show at the American Museum of Natural History in that city, March 16-18. The total amount of prizes offered in the schedule reaches some \$1,500. In conjunction with the rose show the Horticultural Society of New York has a preliminary prize schedule, the total of which comes to \$700.

The S. S. Pennock-Meehan Co., of Philadelphia, offer a special prize of \$25, to be awarded at the discretion of the committee.

Moore, Hentz & Nash offer a solid silver cup, valued at \$50, for the best six roses, two to be white and four red, pink or yellow, American Beauty excepted.

Wm. F. Kasting Co. offers a prize of \$25 wherever it can be best used. The Toronto Horticultural Society offers one of its silver and bronze medals.

Arthur T. Boddington offers a cash prize of \$25.

Stumpp & Walter Co. offers a special prize, for private gardeners only, for 25 Richmond roses, of \$10 and \$5.

A valuable paper is being prepared by W. S. Sibson on "Northern Pacific Coast Roses."

The Horticultural Society of New York will issue, jointly with the American Rose Society, the preliminary prize list and rules within a few days. Joseph A. Manda has been appointed superintendent of exhibits. President Pöhlmann is urging the Chicago people to make fine exhibits in New York. The New England people will be present with the best that they can produce. This exhibition is regarded by some of the strong people in New York as one of public education, at which it is expected thousands will be present. Vice-President Pierson, ex-President Simpson and Treasurer May are at work like beavers to insure the practical success of the undertaking.

BENJAMIN HAMMOND, Sec'y.

## Dahlias for Forcing.

### ED. AMERICAN FLORIST:—

What are the best dahlias for forcing for cut flowers? When is the best time to start them? E. E.

Dahlias for forcing can be planted at any time provided the roots are in proper condition. However, the best results cannot be had if new roots are planted before December 1 with still better chances at December 15 to 25. Good, well-ripened roots, planted any time after January 1 and given a night temperature of 60° will give far better results than in the open ground. For Memorial day, roots can be planted as late as March 1 and will continue to bloom until outdoor dahlias flower. Planted in July they will come into bloom just at the best demand and will sell much better than outdoor flowers not to speak of injury done by early frosts and heavy storms. The following information, sent in reply to an Ohio correspondent, will probably be interesting to "E. E."

"Jack Rose is a dwarf short jointed variety of robust constitution, an early and persistent bloomer. Besides, it always comes perfectly full at the center. Therefore, pinch out the leading shoot or shoots, (if more than one), when three pairs of leaves have formed. Repeat on the branch or succeeding shoots. When as many shoots as are needed to the plant are produced, begin disbudding, leaving the terminal bud and taking out all lateral buds or shoots far enough down to give the length of stem desired. This system is very hard on both plant and soil, so give a top dressing of any good complete fertilizer to keep up size of flowers as needed.

"By this method the plants will bloom until frost. The stems will average 20 to 30 inches long, slender yet stiff and the flowers will be large. Another advantage, and a most important one, the flowers keep so much longer when cut. For forcing under glass pinch once only and when buds form remove the first two, allow the third to bloom and disbud succeeding or lateral shoots to give length of stem desired; about 18 inches long is usually most profitable. Roots planted now will be in full bloom long before Memorial day."

L. K. PEACOCK.

## Meetings Next Week.

Baltimore, Md., February 14, 8 p. m.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange Hall, St. Paul and Franklin streets.

Boston, Mass., February 15.—Gardeners' and Florists' Club of Boston, Horticultural Hall.

By first-class young Hollander, married, no children, four years' American experience and ten years' experience in different countries in Europe and East Indies; private situation preferred; experienced in landscape gardening and managing a private estate; also capable of managing an ornamental nursery; eastern states preferred; age 30.

Key 426, care American Florist.

## TO RENT.

A very rare opportunity of one of the most modern and up-to-date florist establishments of about 15,000 sq. ft. glass; hot water heat; Superior tubular boiler; entire place equipped with electric lights, cement walks and floors; work building 20x115 two stories 8-room modern flat; good established business; the conveniences and accommodations to all transportation, etc. are too numerous to mention; they cannot be excelled; if interested an investigation will convince.

RICHARD F. GLOEDE,  
1405-1407 Central St., Evanston, Ill.

## FOR RENT.

Greenhouse, 12,000 feet of glass; stocked with sweet peas, carnations, bedding plants; good house; 10 acres of land; near Chicago; \$50.00 per month.

Key 425, care American Florist.

## Unexampled Chance

For a first-class grower with executive ability and capacity to take charge of 50,000 square feet of glass, most modern in construction and equipment, for growing cut flowers and plants, about to be erected in most progressive part of United States, where competition amounts to almost nothing. Can sell entire product now, and plant will have to be doubled in two or three years at most with right management. If you do not possess these requirements and have not got \$3,000 to \$5,000 to take stock in the \$50,000 corporation do not reply. But if you have and can produce the goods, you will get the chance of your life by addressing  
Key 440, care American Florist.

## Retail Store Man.

The advertiser, located in the south, wants a good man to take charge of the retail cut flower department. He must be fully competent to turn out high class design work and decorations. One who has a general knowledge of the seed business would be preferred, as the cut flower department is carried on in connection with a general seed business. A good salary to the right man. Address  
Key 431, care American Florist.

## FOR SALE.

About April 1st we begin tearing down a range of 85,000 feet of glass to make room for more modern houses.

We will have for sale ventilating machines (Hippard), ventilators, ready glazed sash bars in length 8 ft. to 14 ft., gutters and 4-in. cypress and cedar posts, glass in small sizes. Just the material for building small houses, lean-tos, partitions, etc. Will sell any part or all of it.

J. M. GASSER CO., Rocky River, Ohio.

## Greenhouse Construction

BY PROF. L. R. TAFT.

It tells the whole story about how to build and heat a greenhouse, be it large or small, and that, too, in a plain, easily understood, practical way. It has 210 pages and 118 illustrations. PRICE, \$1.50

## Greenhouse Management

By the same author. Covers the subject completely. 382 pages. PRICE, \$1.50.

#### ROSE SITUATION IMPROVING.

While there is by no means a full supply of roses on the market the situation is clearing a little. There were more roses at the end of last week and growers say that the few days of bright weather have had a good effect upon the plants. The growths are coming away in fine shape and in a week or two there will probably be good teas in the market in plenty. American Beauty is advancing for crop in several of the principal establishments but the fine weather of the late fall produced such an abundance of stock that the plants were cut about pretty badly and have not yet got over it. Carnations have probably never been better or more plentiful, yet the shortage in roses leads to so good a demand that everything of quality cleans up well. Winsor is in splendid shape and is one of the most popular in its color, if indeed there is anything else that can compare with it in this respect. The reds are also in good order, fine stems and large flowers. The culls and splits are all taken up for funeral work. Bulb stock continues to arrive in quantity and is good generally.

During the present week every day saw the rose situation improving. Killarney was among the short items for a time, also White Killarney. Richmond, Bride, Bridesmaid and others are coming better, but still scarce. Beauties are scarce in most places and difficult to obtain. Carnations are getting more plentiful right along, but wholesalers have been loosening up and giving retailers a chance. Telegraph quotations have been sent out and everything possible done to prevent anything like a glut, consequently the market has not suffered much. Easter lilies, lily of the valley and freesias have all been over-plentiful, one prominent grower describing the valley situation as a glut. The prices on all these have come down a little. Really good Paper White narcissus is scarce, but there is plenty of the other kind, also tulips which are coming in elegant shape. Violets are plentiful, but clean up fairly well. Good jonquils can now be had for \$3-\$4. Asparagus plumosus is very scarce, especially good tips in bunches. Galax, leucothoe and other greens are running along about even.

### THE COAL SITUATION.

It will not be safe for growers to neglect the signs of the times in the coal market. Although for the present the atmosphere seems to have cleared a little there is the possibility of a strike looming ahead, contracts are running out and there are several months yet during which large quan-

John Orseske.

ties of coal are used. Careful business men apprehend a shortage of coal in March and are keeping the bunkers full. This seems a pretty good lead to follow.

### NOTES.

Quite a gloom was cast over the market on Thursday, February 3, when it was made known that John Orseske, who for seven years had worked for Wiator Bros. and, by his genial, pleasant manner had become a general favorite, was dead. "Whitey" was at the store as usual on the Sunday previous to his death but complained of pains in his side. He did not turn up on Monday and his doctor pronounced his trouble appendicitis and sent him to St. Bernard's

hospital where he died on Thursday before an operation could be performed. John was 22 years of age and single. The interment took place at St. Adelbert's cemetery on Monday and over 100 people were present at the funeral which was held at the home. One carriage was entirely filled with flowers and floral designs, showing the respect in which the deceased was held by his friends and business acquaintances.

At the A. L. Randall Co.'s supply department the Delwood gold boxes

# :: Easter Lilies ::

We are cutting an average of one thousand lilies per day, very choice stock, long stems, large flowers and fine foliage. They are the best flowers in the market and are in great demand during this shortage of Beauties and Roses. We are selling them at \$12.00 per 100 or \$1.50 per dozen. Buy direct of the grower and get fresh stock. **American Beauties, Roses, Fancy Carnations, Tulips, Daffodils, Lily of the Valley, Easter Lilies and Greens.**

## Bassett & Washburn

Store and Office: 76 Wabash Ave.,

CHICAGO

Greenhouses: HINSDALE, ILL.

and baskets, for which this firm is special agent, are well shown. This is very tasty ware and sells on sight, many retailers stocking up on it just now. Persons interested in temperature alarms can also see here the excellent instruments manufactured by the National Clock & Electric Manufacturing Co., which we have already referred to in our columns. The cut flower end is being well taken care of and a big business is being done right along. A retailer would be hard to please who could not find what he wanted at this enterprising firm's establishment, for it is all there in quantity as well as quality.

Bassett & Washburn's roses are now arriving in larger quantities, the plants commencing to bloom more freely. Unlike those at some other firms the coal bunkers were kept well filled at Hinsdale during the scarcity and the temperatures maintained, the consequence being that the plants are pushing good growths and will be in full crop shortly. During January B. & W. bought and received delivery of 73 carloads of coal and they are keeping up at the same clip right along, for the danger point is not yet passed in the heating problem. Fine Easter lilies continue to be a leading feature at the store, grand blooms arriving by the hundreds, 1000 being the cut in one day this week.

At J. A. Budlong's we noted some extra fine Mrs. Jardine, this having proved itself an excellent winter rose. Killarney and My Maryland have also been of extra quality, indeed the whole of the stock is in excellent shape. Large quantities of carnations of magnificent color and substance have been arriving daily, also exceptionally good bulb stock, lily of the valley and extra fine sweet peas. Business here has been very brisk, stock moving in large quantities both out of town and to local retailers.

Kyle & Foerster are showing exceptionally good bulb stock and we noted the double tulip, Couronne d'Or, in better shape for thus early in the season than we ever remember seeing it. Lorraines are also in great order, as are all the other stocks offered. Carnations are a strong leader and great quantities are being handled daily. Business here is advancing by leaps and bounds and it takes some tall hustling to keep it all going.

A. Lange had the decorations at an important wedding at Ottawa on Tues-

## We Are Strong On CARNATIONS

Fine stock of exceptional quality in all the best varieties. We are also cutting large quantities of **Beauties, Roses** and other Seasonable Stock.

**PETER REINBERG, 2,000,000 Feet of Modern Glass**  
**35 Randolph Street, Chicago.**

day, when Geo. D. Buckley, an advertising man of this city, married Miss Helen Catherine Moloney. Large quantities of fine stock were used, the bill footing up about \$500. Herbert Stone, the capable decorator for this firm, was in charge. Several other important decorations have been carried out, making a very busy week.

Vaughan & Sperry's American Beauties are still the talk of the market. They are grand flowers in every way, large, good stems and foliage and of fine form and color. They are coming in big quantities, too, 1,500 in one day, more than half of them of the first grade long stems, being the order of arrival. Violets are also a heavy lead, 30,000 being booked one day last week for a single order.

D. D. Johnson, of the D. D. Johnson Co., has been in Michigan the past week arranging for tests of the Evergreen brand fertilizer in various establishments. The Grand Rapids Greenhouse Co. is using this fertilizer largely, having tried it out last season with good results. Orders are coming in rapidly from all points and jobbers report an excellent demand.

The J. B. Deamud Co. reports an exceptionally busy week and plenty of good stock, especially in carnations. A big consignment from the Chicago Carnation Co., Joliet, which arrived on Thursday, and consisted of some of this firm's novelties as well as standard varieties, was snapped up by discriminating buyers almost before the boxes were opened.

The members of the Florists' Club have decided on the Illinois Central train leaving depot at Twelfth street and Michigan avenue at 9:40 a. m., February 15, arriving at 12:40 p. m. (a 3-hour run), for the annual convention of the Illinois Florists' Association to be held at Champaign, February 15-16. Fare, \$2.52 each way.

Stock at Wiator Bros. has been of the usual fine quality this week. Their growers appear to have got the hang of Rhea Reid, for the flowers coming to market now are excellent in every way, fine color, good substance, and on stems carrying healthy, vigorous leaves. In this form it is a magnificent rose.

Bassett & Washburn received a box of J. Whitcomb Riley carnations from

Bertermann Bros. Co., Indianapolis, on Tuesday with a request that they exhibit it at the Florists' Club meeting, the senders being evidently under the impression that the meeting was held this week.

At a meeting of the Flower Growers' Market, February 1, officers were elected as follows: Walter Tonner, president; Frank Beu, vice-president; Alex. Henderson, secretary; John Sinner, financial secretary; Miss Hertha Tonner, treasurer.

John Zech, of Zech & Mann, has been suffering from a severe cold and what appeared like a case of grip. The supply of Bride and Richmond roses and all classes of bulb stock has been large here this week and of excellent quality.

At Peter Reinberg's good carnations have been the leading feature, large quantities of elegant stock arriving daily. American Beauty roses arrived more freely early in the week but the plants are not yet in full crop.

Daniel Branch of Indiana avenue and Fifty-first street is opening the retail store at 523 East Forty-third street, formerly occupied by the Radke Floral Co.

Business has been brisk at E. H. Hunt's and large lots of fancy carnations are moving out daily. One often sees good stock of interesting novelties here.

Roy F. Wilcox, son of J. F. Wilcox of Council Bluffs, Ia., spent several days of his wedding tour in the city last week.

Conrad Frauenfelder, who has been sick for some time, is now able to be around again.

Visitors: F. Washburn, Bloomington; J. F. Ammann, Edwardsville; C. E. Gullett, Lincoln; A. C. Brown and G. W. Jack, Springfield; E. Amerpohl, Janesville, Wis.; H. D. Robinson and Wm. Penn, Boston, Mass.; B. Eschner, representing M. Rice & Co., Philadelphia; Roy F. Wilcox, Council Bluffs, Ia.; J. C. Blair and Dean Davenport, of the Urbana Experiment Station; J. Heini, Terre Haute, Ind.; Wm. Dykes representing Ed. Jansen, New York; H. B. Dorner, Urbana; Geo. A. Kuhl, Pekin.

## BOWLING.

Owing to the absence of a number of members on Thursday night each team rolled one man short. The Orchids won two games from the Carnations and are now close on the latter's heels, only one game separating the teams. The Roses took two from the Violets.

The J. B. Deamud Co.'s silver cup has been on exhibition during the week at the company's store, 51 Wabash avenue. This is to be given to the bowler who makes the high average individual score for the season 1909-

1910 and becomes his property at the first winning. It is a handsome cup finely wrought and with three horn handles and will be known as the Deamud cup. The scores and team standings will be found on page 159.

## Chicago Florists' Club.

The February meeting of the Chicago Florists' Club was held February 3 at the Union restaurant, with Presi-

Treasurer Winterson's report was submitted, showing a balance of \$1,066.76 on hand February 1. President Asmus called the attention of the members to the coming convention and exhibition of the Illinois State Florists' Association at Champaign, February 15-16, urging the importance of these events to all florists in the state and the desirability of taking advantage of the opportunity to visit the experiment station greenhouses, where Prof. H. B. Dorner has much good work in floriculture under way.

J. C. Vaughan, of the experiment station advisory board, said a good beginning had been made in work on floricultural problems and that much remained to be done. The authorities have done good work for the fruit growers of the state whose interests are not nearly so extensive as those of the plant and flower growers. The men who have this work in hand must be informed as to what is needed in the way of investigation and experiment and the florists could best aid the work by telling those in charge about their difficulties and requirements. Mr. Vaughan went on to say that there are many new perplexities in modern cold storage and that the new varieties of plants coming to us year after year have their own particular troubles.

Ladies' night has been scheduled for March 3 and the good of the club committee will be assisted in the preparatory work for this event by H. N. Bruns, A. C. Kohlbrand and D. A. Robertson.

The best train for the Illinois State Florists' convention at Champaign leaves the Illinois Central depot, Michigan avenue and Twelfth street, February 15 at 9:40 a. m., arriving at 12:40 p. m., a three-hour run.

Secretary Winterson was instructed to tender the hearty thanks of the club to the Florists' and Gardeners' Club of Pittsburg for the many courtesies

The Deamud Cup.

## STOCK COMING MORE FREELY.

The extreme scarcity that prevailed for the past few weeks is off for the season, as quantities of stock in all lines are increasing, with the exception of American Beauty roses, which are still shy and very uncertain. Amongst roses, Killarney is undoubtedly the leader. My Maryland has sold very well, but when flowers of equal grade are offered the choice is nearly always for the Irish maid. Of the old favorites, Bride appeared to hold its own, White Killarney not appearing to be very plentiful as yet. It has proved its worth, however, and will be grown more extensively the coming season. Carnations are selling very well, there seeming a good demand for all choice stock. Dorothy Gordon stands head and shoulders above all others in this market, all flowers offered bringing \$2 above other sorts of high grade. Sweet peas are very popular and fine flowers are seen daily from a number of shippers. Bulbous stock is now at its best. Daffodils, although coming in quite large quantities, hold well, \$4 being the price. Tulips are also in good demand. White and yellow double and single are the best sellers. Violets have been scarce, but the increased sunlight of the past week is having its effect and there promises plenty for St. Valentine's day, when they will be in big demand. New York doubles are now quite a factor in this market. Acacia is offered by two of the large houses and finds a ready sale; it has no rival in its field. White lilac has become a stock flower, three growers in this vicinity giving almost their entire attention to the forcing of this crop. A sudden cold snap last Monday night when the thermometer dropped to zero found several of the storekeepers unprepared, and resulted in considerable loss, the stock in the windows and front of the stores being badly frozen. Much of the stock arriving by express was also damaged, resulting from insecure packing. Too great care cannot be exercised in this respect during these severe changes.

## NOTES.

At the Harris establishment everything looks timed for the Easter trade. First, however, let us mention the shamrock, two houses nearly full, 70,000 pots in all, an immense stock which has all to be cleared out in about 10 days. Mark Mills says they never have enough and that the demand is constantly growing. The finest collection of azaleas they have ever had is being spread out and will be brought on slowly. An interesting exhibit is a table of the original stock of the Easter lily, all perfectly healthy. Could this be transferred to a suitable clime where it could be grown outdoors there would soon be a stock free of disease that would be a pleasure to handle. Baby Rambler rose will be a feature here for Easter, as it can be forced better than Crimson Rambler. The plants are all three years old.

The stores appear to be making quite a bid for St. Valentine day business. Pennock Bros. have a very pretty window. On a blue plush foundation was arranged gilt boxes and baskets of heart shape filled with violets. Large glass shelves suspended from the top of the window by gauze ribbon held vases of choice flowers, and hanging all about were small heart-shaped boxes with ribbon bows. The top of the window was festooned with gauze and other fancy ribbon. A large vase of lilac and Bridesmaid roses, together with choice pots of heather, were the other features of this attractive window display.

M. Rice & Co. are living up to their slogan, "Watch us grow," by growing. There is plenty of room at the top and as the roof was in the way it

# Aphine on Ferns

Two Millions of Ferns  
Grown Annually.

Five Hundred Varieties  
of Ferns in All Sizes.

**J. F. ANDERSON**

FERN SPECIALIST

Short Hills, N. J., Jan. 31, 1910.

APHINE MFG. CO., Madison, N. J.:

Gentlemen,—Kindly ship me at once, by U. S. Ex., two gallons of Aphine. The last gallon received from you has been thoroughly tested, and proved to be a most effective exterminator of all such insects to which ferns are subjected. If your preparations are of uniform strength, a solution of one to fifteen will be safe on the most delicate ferns.

Yours respectfully,

J. F. ANDERSON.

The manufacturers of **Aphine** guarantee a uniform product at all times, and, if directions are carefully followed, that it will do all we claim for it.

## A Public Aphine Test

Will be held in Philadelphia on Saturday, February 12th,  
1910 (Lincoln's birthday) from 2 to 5 p. m.,  
at the new seed store of

**HENRY F. MICHELL COMPANY, 1018 Market Street.**

You are cordially invited to be present and to submit any plants, shrubs or stock that may be infested with insects or disease, so that we may demonstrate to you the wonderful merits of this new insecticide discovery—**Aphine**.

**Aphine Manufacturing Company,**

**Madison, New Jersey**

was removed and almost over night another story was added, just grafted on, as it were. How they do grow, these enterprising supply men!

The Leo Niessen Co. is making a feature of all kinds of spring flowers. Acacia is a leader and is sent out as fast as it arrives.

Wm. McKissick has something extra fine in sweet peas, a large stock just in time for the lover's holiday.

K.

### Boston.

#### MORE STOCK COMING IN.

This has been a week of fair business; stock in most lines is coming in in increasing volume. Roses are showing a marked improvement both in quantity and quality, with the single exception of American Beauty. This still continues scarce and high priced. Richmond is improving somewhat in stem. Killarney and My Maryland are coming in rather freely in the small and medium grades, but are scarce in the larger sizes. There seems to be an increasing demand for Bon Silene and Safrano as grown by Elliott. The new rose, Mrs. Humphrey Ward, is popular, but is a little off crop and the supply is rather limited. Bulb stock is coming in plentifully and the demand holds up remarkably well. Golden Spur seems to be the favorite; Von Sion is coming much better than last week. Good

freesia is scarce and only the smaller, inferior varieties are procurable at present. There are plenty of good lilies. Cattleyas are more plentiful and are coming in in rather large numbers. Gardenias and lily of the valley are also coming in freely. The valley flowers are of good quality but the foliage is very scanty. Green stock is coming in more freely and the shortage of adiantum and Asparagus Sprengeri, so noticeable for the past two weeks, seems to be over. Violets are coming in rather heavy, both in the single and double. They are of good quality and sell well. The large amount of funeral work about town the past week has done much to keep the markets from being overloaded. There is a most attractive line of flowering plants to be seen at this time, including lilac, genista, acacia, cyclamen, primula, etc., and the growers report sales as being good.

#### NOTES.

Ed. Rogean is fortunate in securing regular shipments from A. N. Pierson, Cromwell, Conn. This gives him a fine assortment of stock that is always of the best quality and will be a great help to the local market at times of shortage.

Wm. Sim started on his first big crop of sweet peas this week. They are undoubtedly the finest in the market.

(OTHER BOSTON NOTES ON PAGE 146.)

## Bulbous Stock

Single Daffodils, Golden Spur and Princeps.  
Tulips, Pink, White, Red and Yellow.  
Valley, Very Choice, \$3.00 and \$4.00 per 100.

## Acacia Pubescens.

Long graceful sprays of small yellow, ball shaped flowers, beautiful foliage, a very choice novelty  
\$2.50 per bunch.

## STOCK MORE PLENTIFUL.

The past week showed a large increase in the quantity of stock and a corresponding decline in the price of several stocks. Toward the last of the week the supply of carnations was particularly heavy and hard to move. American Beauty roses, lilies and other bulb stocks have also been affected. Lilies, which a few weeks ago were selling for 12 and 15 cents per flower, are now hard to move at half those figures. The supply of lily of the valley is more easily controlled and there are indications that it will soon regain the normal figures. There are plenty of orchids and gardenias on the market to supply all demands. Gardenias are now being used to some extent in funeral work by the larger stores. Freesias are plentiful and much of the stock is very attractive. Narcissi, of different varieties, are now arriving in quantity. Lent is looming large in the minds of dealers, though there are many who say that the effects of its observance is each year less noticeable in the trade.

February 7.—A cold wave, which, this morning, put the mercury down to zero, and lower in exposed sections, has practically demoralized the market. Considerable stock was frozen when it reached the wholesale district, but there was much more than enough to supply all demands. With the temperature near zero and a howling wind, it is not to be expected that there will be a great rush for flowers. There are twice as many carnations and three times as much bulb stock as there is any use for. The shorter grades of American Beauty roses are practically a glut.

February 8.—The condition of the wholesale cut flower market is very bad today. A few special American Beauty roses sold for 40 cents in the morning, but by noon they were being offered for 30 cents, with no buyers. The best carnations are being offered for two cents. Nearly every other stock is in a corresponding decline. Our market quotations are hardly a correct index to the situation, because prices are completely demoralized. The weather has moderated and conditions, so far as weather is concerned, are favorable for business, but it has not improved the situation.

## NOTES.

Herska's restaurant, 40 West Twenty-eighth street, much frequented by florists, was the scene of a serious accident February 7. During the night the pipes connecting with the hot water boiler of the range, froze up. When a fire was started in the range an explosion occurred, which seriously injured the proprietor and his wife, wrecked the kitchen and blew out the plate glass windows in front. Ex-president Traendly, of the S. A. F., had a very narrow escape from serious injury by flying glass. He had barely passed the place on his way to his store when things began to come out. Lindsey Nason, of A. L. Young Co., was in the restaurant eating breakfast. Though knocked to the floor and partially stunned, he got to his feet in time to save the proprietor's wife from being burned to death. The force of the explosion had thrown a mass of live coals on the woman's clothing. At the risk of serious injury to himself, Nason succeeded in extinguishing the fire.

Frank D. Hunter, for the past 25 years well and favorably known in the trade of this city, was knocked down and run over by an automobile just as he stepped off a Jerome avenue trolley car on the way to his home, 66 East One Hundred and Seventy-seventh street, on the evening of February 3. Mr. Hunter is 59 years old and was formerly in the wholesale

business, but for a number of years has held a confidential position with J. H. Small & Sons, the well-known retailers of this city and Washington, D. C. He is one of the many victims of a contemptible class of men and women that infest this city who manage to secure an automobile and being perfectly heartless or drunk, or both, are a menace to the lives of all who have to cross a street. Despite a long chase by the police in a taxi-cab the chauffeur managed to get away without being recognized and was last seen going in the direction of Yonkers.

Myer, of Fifty-eighth street and Madison avenue, had on February 3 the busiest day of this season, occasioned by orders from admirers of Mme. Fremstadt, a noted singer appearing at the Metropolitan opera house, for over 30 floral offerings, comprising baskets, wreaths, horse-shoes and bouquets. All the offerings were elaborately made up, gold and silver magnolia leaves being used in a number as borders. The American and Swedish colors were also prominent in the decorations. Much fine stock of orchids, gardenias and roses was used. The orders came in late and there was much hustling in the purchasing department to secure the necessary stock, but at the appointed hour Myer's automobile with a force of assistants was at the opera house door and delivered the goods.

The Greek-American Retail Association of this city gave a banquet on the night of February 3 at Healy's, Sixty-sixth street and Columbus avenue. It was in the nature of a fraternal event between the two retail associations of the city, the Greek-Americans on this occasion being the hosts. Over 100, comprising members of both associations, attended. The menu was both tempting and substantial and music was furnished by an excellent orchestra. The tables were handsomely decorated, Enchantress carnations being prominent. Much credit is due the officers and members of the Greek-American Association for the excellent management displayed.

David Clarke's Sons, 2139-2141 Broadway, executed several elaborate wedding decorations on February 2. The bridal bouquets were noteworthy features. The old-fashioned bouquet holders are again in use, but of finer workmanship than formerly. In the events mentioned the holders were of fine chiffon with lace borders; the bouquets were of White Killarney roses and forget-me-nots, with a shower. It is a very dull day when this firm has not something on hand in the way of a decoration.

Miss Elfrida S. Horn, for a number of years well known in the retail trade of this city as an expert designer, has formed a partnership with Miss Evelyn A. Hess and they have opened a retail store at the corner of Sixtieth street and Lexington avenue, opposite Bloomingdale's big department store. Though Miss Hess is not so well known in trade as Miss Horn, she is a clever and capable young woman and we predict that their venture will be successful.

Anton C. Zvolanek of Boundbrook, N. J., who has been in California for the past six weeks looking after his sweet pea interests, has returned and was in this market last week. He looks prosperous and robust and reports the sweet pea situation as very encouraging.

Mrs. A. Millang, mother of the well known Millang family of wholesalers, is in Flushing hospital under treatment for injuries received from a bad fall. Mrs. Millang is 80 years old, but it is believed that her robust consti-

tution will contribute to speedy recovery.

It is rumored that, on account of impending changes and improvements in Twenty-eighth street, several wholesalers have been served with notices to move by May 1. This is in line with previous announcements in these columns.

It is understood that the next meeting of the Florists' Club, February 14, ladies' night and carnation night, will be a very interesting event. John B. Nugent, Jr., says so, and he is reliable and a good entertainer.

John I. Raynor is receiving heavy shipments of good stock, but he is not particularly well pleased with this brand of weather.

Schloss Bros., dealers in ribbons, are manufacturing a fine line of the bouquet holders previously referred to.

## Buffalo.

## BUSINESS GOOD.

The weather has been fair and trade good the past week and all is activity preceding Lent. Weddings have been numerous with work for all. Several pre-lenten receptions have taken place. Stock is good and equal to all demands with the exception of Killarney and Bon Silene roses. For Sunday we had the coldest of any day this winter, which made it hard to deliver stock safely. Funeral work has kept all busy.

## NOTES.

The Florists' Club held its nomination for officers last Tuesday evening when the following were nominated: For president: W. J. Palmer, Jos. Streit, W. H. Grever. For vice-president: Geo. McClure, Jr., C. T. Guenther. For secretary: Wm. Legg. For financial secretary: Jerome Deutcher, who was highly recommended by E. C. Brucker, who could not longer accept the office, 10 years being his limit. For treasurer: Chas. Sandiford, Otto Gillis and Wallace Eiss.

S. A. Anderson, his wife and boys, are enjoying a trip down in North Carolina. S. A. has made extensive improvements by taking the upstairs in his building for an office, thereby giving considerable additional room in the store.

We are pleased to hear that R. A. Scott is about again after his illness.

## BISON

CUMBERLAND, MD.—Elmer Bendle formerly with John A. Bopps, has secured a position in Pittsburgh and left for that city January 31.

FAR ROCKAWAY, N. Y.—Wm. Scully, bookkeeper at John F. Marsden's greenhouses, fell through an open hatchway into the cellar recently. He received a bad shaking up but, fortunately escaped serious injury.

POUGHKEEPSIE, N. Y.—The Dutchess County Horticultural Society held its annual banquet at the Nelson house January 26. It was largely attended and was one of the most successful dinners in the history of the society.

WAYNESBORO, PA.—Peter Olson of the Chicago Carnation Co., Joliet, Ill., made a flying trip recently to Henry Eichholz's to inspect his new carnation, Washington, and the other seedlings.

PORTLAND, ORE.—A consignment of roses from Japan has arrived here. They are apresent from the people of Yokohama to the city and will be planted in the parks and squares on rose planting day, February 22. Many other nations have sent or will send trees through their individual consuls. Luther Burbank will be a guest at the festival.

TRADE FAIR.

With extremely cold weather, as low as 15° below zero, business holds up fairly well. There are a number of fairly good decorations around, but it is difficult to move plants in this weather without having more or less of them frost-bitten. The few days of sunshine we have had lately have had a good effect on stock, especially in the rose line, and, excepting American Beauties, all are more plentiful since the holidays. Richmond and Killarney are coming in fine shape and Mrs. Jardine is superb though not as plentiful as other varieties. Carnations are of exceptional quality and plentiful, the heavy supply of bulbous stock being noticeable on the sale of carnations. Violets and lily of the valley are plentiful and other varieties of flowers about equal to the demand.

NOTES.

We have been favored with a continual supply of cattleyas all season. Grobba & Wandrey have recently added an expert grower of these to their staff, and with an additional number of plants this section will soon be noted for orchids.

The bulb season is now on in full swing, with the different growers try-

FANCY.

FLORAL DECORATORS

2139-2141 Broadway

Telephones: 1552-1553 Columbus. Choice Cut Flowers

Wichita, Kans.

Improved weather conditions for the past two weeks have made a noticeable improvement in the quality and quantity of stock produced locally. However, trade conditions have not shown so marked a change; while there is always something doing, the volume of business has not been out of the ordinary, except in a very few instances. Social functions have been modest in their demand and the usual stiff run of funeral work for January was hardly a reality this month. Still it is altogether likely that the total of business done will equal that of any past January. McKinley day was much more generally observed than last year and the demand for carnations thoroughly cleaned up the town by 4 p. m., even short stem culis selling for a nickel in the final clean-up. There was no advance in prices on regular grades, in fact, in order to have plenty for the popular demand for a five-cent flower for the coat, a good many were sold singly at that price that ordinarily bring 75 cents per dozen when boxed, furnished with extra green and delivered in the usual way. Hence there was no kicking on prices, and if McKinley day dies out it will not be because high prices killed the trade.

M. Sourdry, of Sourdry Bros., Girard, was visiting the florists and lettuce growers in this vicinity early last week. They have about 200,000 feet of glass devoted to carnations and lettuce. Mr. Sourdry states that the season so far has been very satisfactory, and that their entire output keeps cleaned up at wholesale.

A look at the various establishments around town shows Easter stock in fair quantity and condition. So far lilies are up to schedule and under favorable conditions should strike about right.

Chas. P. Mueller is cutting, on an average, about 500 carnations a day and the plants are in fine order.

W. I. CHITA.

GREENSPRING, O.—A fire, supposed to have originated from the heating apparatus, considerably damaged the Unser greenhouses and stock before being got under control by the fire department January 27. The greenhouses will be repaired at once. The loss is covered by insurance.

**HENRY SMITH,**

Wholesale and Retail Florist of GRAND RAPIDS

Oklahoma City, Okla.

Trade is fine here and promises to continue brisk owing to so many social functions. Cut flowers especially look promising and general business also. All the retailers sold out of carnations on McKinley day.

B. Angel now has charge of the flower department at Mellon's, the largest department store here.

Furrow & Co. of Guthrie have opened a nursery on West Main street.

A.

RED BANK, N. J.—Wm. Mears has enlarged his greenhouses and built a residence for his gardener.

Kansas City, Mo.

**WILLIAM L. ROCK,  
Flower Co.,**

Will carefully execute orders for  
Kansas City and any town in

Missouri, Kansas or Oklahoma.

Cincinnati.

STOCK STILL SCARCE.

Business is all that can be expected and a scarcity of stock prevails accordingly. Flowers of all kinds are bringing good prices and everything in the cut flower line is selling. Orders for roses have to be placed in advance, as everything in this line is bought up as soon as it reaches the wholesale houses. Carnations, however, are holding their own, as they usually do at this season of the year. There is just about enough bulbous stock to go around and tulips have been added to the list of offerings. Lily of the valley is in good demand and moves well at quoted prices. Violets, both single and double, are of exceptionally fine quality and prices are about the average for the season. Callas and Lilium Harrisii are taken freely when of good quality and the same may be said of green goods of all descriptions.

NOTES.

A well-attended meeting of the Florists' Society was held at the Sinton hotel on Monday evening, February 7. The committee on revision of by-laws brought in its report, which was adopted. Those who were fortunate enough to attend the meeting of the American Carnation Society gave a little talk on what they saw at Pittsburgh and all report having had a delightful time and praised the hospitality of the Pittsburgh florists.

The bowlers come together again next Monday night at Wielert's alleys. That 225 score has been tied but not broken, and Al. Heckman says he is going to beat it at the next meeting. Hope so, "Heck, old boy!" Henry Schwarz and Aleck Ostendorp say it takes Wurzbarger to make one roll a good score.

C. C. Murphy has decided to hold his new red carnation another year before sending it out to the trade. C. C. has a good thing in this new variety and when he gets ready to disseminate it carnation growers can buy liberally, for they can take it from the writer that they are not going to get stung.

J. A. Peterson is well satisfied with the way the trade is taking to his new begonia, Glory of Cincinnati. He has a pocketful of letters from the leading florists of the country who compliment him on his new acquisition.

F. W. Ball, the wire design man, has the sympathy of the craft in the death of his grandmother.

Visitors: F. J. Farney, representing M. Rice & Co., and Martin Reukauf, representing H. Bayersdorfer, of Philadelphia; M. Shattls, Chicago.

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice Pres.; F. W. Bolgiano, Washington, D.C., Second Vice Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1906.

**ASPARAGUS PLUMOSUS NANUS.**—The first early deliveries of new crop seed are now on hand.

**TUBEROSES.**—There are quite a few of these remaining in the hands of the growers in the North Carolina district.

**SENTIMENT** is divided as to whether the price of clover seed shall go up or down; but all agree as to the deep snow.

**THE Roamers' Club** of the Cannery Convention is expected to do a double turn this week at the Jewdolph hotel.

**THE** garden seed trade is good and it is more a question of where to get the supply than one of securing more orders.

**DROUGHT** exists in the southern France bulb-growing district (January 24) while in most other parts of the country there are terrible floods.

**A. BILL** has been introduced in the Ohio senate making it a misdemeanor to deliver any seed guaranteed, recommended or advertised as pure, unless the same is 98 per cent pure.

**CHICAGO.**—Contract prices on the board of trade February 9 for grass seed were noted as follows: Timothy, \$4.25. White clover, from 20 cents to 25 cents.—Visitors: L. W. Wheeler, growers' representative; L. M. Kimberlin, Santa Clara, Calif.

### The Proposed Pure Seed Act.

The proposed pure seed act, reproduced in **THE AMERICAN FLORIST** of January 29, page 31, was discussed at the La Salle hotel, Chicago, February 9, by representatives of the American Seed Trade Association, the Wholesale Seedsmen's League and the Wholesale Grass Seed Dealers' Association, including Chas. M. Dickinson, C. D. Boyles, Geo. S. Green, W. W. Barnard, S. F. Leonard and J. C. Vaughan, Chicago, J. Chas. McCullough and Albert McCullough, Cincinnati, O., J. C. Robinson, Waterloo, Neb., Chas. N. Page, Des Moines, Ia., C. F. Wood, Louisville, Ky., J. G.

Peppard, Jr., Kansas City, Mo., Kirby B. White, Detroit, Mich., D. I. Bushnell, St. Louis, Mo., and C. S. Burge, Toledo, O.

### Sweet Peas in California.

In answer to a request for a few particulars of his California trip, Anton C. Zvolanek, of Boundbrook, N. J., says: "You ask me what I have been doing on the Pacific coast at this time of year. I must say that I did not go there on a pleasure trip, but for earnest work. As you know, for many years our specialty has been winter-flowering sweet peas, which are sold exclusively by commercial seedsmen and florists in all parts of the civilized world. Many years ago we began to give out contracts for the growing of our seed, but the results were never satisfactory. Finally, we began to raise our own seed in small quantities, contracting for only a part. While the seed of our own raising had always proved satisfactory to our customers, we regret to state that we cannot say the same for much of what was grown for us on contract. Being finally disgusted with the methods of the 'seed trust,' we secured several large tracts of the best land in California and hereafter, in addition to our specialty of seed of winter-flowering sweet peas, we will be well equipped to grow practically all kinds of flower seeds.

"In less than two months, the time which I have spent in California, we have seeded down 186 acres in sweet peas. Of this area, 65 acres are for the seed of winter flowering varieties, the remainder for seed of the summer varieties, largely the Spencer and Union types. About 15 acres have been seeded with other varieties of flower seed. In California it is difficult to secure small lots of productive land, say 100 acres, in one lot, but there are many 1,000-acre tracts to be had at very reasonable rent, in plots of from five to 50 acres, therefore our fields are scattered over many miles of country. On the whole, I think this is a good thing for us. By seeding varieties, miles apart, we avoid the dangers of mixing seed. For instance: we have one 25-acre tract, miles from any other, seeded entirely to the variety Nora Unwin. I feel sure that these will remain true. Our California seed growing will be conducted by my sons, who thoroughly understand it and are anxious to do business on their own account.

From start to finish, my trip was very successful. I met many old

friends and made many new ones. William N. Campbell, formerly of Vaughan's Seed Store, now conducts a very attractive seed store in Pasadena. In his company we visited the famous farm of Rudolph Fischer, where many acres of the noted free-sia, Purity, are cultivated. We did not forget to visit our old friend Edwin Lonsdale, now in charge of the Burpee seed farm. The winter weather has been ideal, with only a few light frosts, the lowest temperature being 29°. Roses, carnations, sweet peas and poinsettias have been flowering in the open and in many places without any covering. In some instances cheese-cloth is sufficiently heavy for covering in the nights that are considered cold for southern California."

### New Kind of Corn From China.

A small lot of shelled corn, of a kind that is new to this country, was sent to the Department of Agriculture from Shanghai, China, in 1908, and tested the same season. It proved to have qualities that may make it valuable in breeding a corn adapted to the hot and dry conditions of the southwest. The plants raised in the test averaged less than six feet in height, with an average of 12 green leaves at the time of tasseling. The ears averaged 5½ inches in length and 4½ inches in greatest circumference, with 16 to 18 rows of small grains. On the upper part of the plant the leaves are all on one side of the stalk, instead of being arranged in two rows on opposite sides. Besides this, the upper leaves stand erect, instead of drooping, and the tips of the leaves are therefore above the top of the tassel. The silks of the ear are produced at the point where the leaf blade is joined to the leaf sheath, and they appear before there is any sign of an ear except a slight swelling.

This corn is very different from any that is now produced in America. Its peculiar value is that the erect arrangement of the leaves on one side of the stalk and the appearance of the silks in the angle where the leaf blade joins the sheath offer a protected place in which pollen can settle and fertilize the silks before the latter are exposed to the air. This is an excellent arrangement for preventing the drying out of the silks before pollination. While this corn may be of little value itself, it is likely that, by cross-breeding, these desirable qualities can be imparted to a larger corn, which will thus be better adapted to the southwest.

The discovery of this peculiar corn in China suggests anew the idea that, although America is the original home of corn, yet it may by some means have been taken to the eastern hemisphere long before the discovery of America by Columbus. From descriptions in Chinese literature corn is known to have been established in China within less than a century after the voyage of Columbus. But this seems a short time for any plant to have become widely known and used. Besides, this particular corn is so different from anything in the new world that is must have been developed in the old world, and for that to happen in a natural way would take a very long time. These ideas are brought out in Bulletin 161 of the Bureau of Plant Industry, which gives also an account of some cross-breeding experiments with the new corn and the changes which crossing produces in the grains the same season.

### Soya Bean Utilization.

Oil millers of Liverpool are disposed to regard the products of the soya bean as additional articles of trade and not as competing to replace the manufactures of cotton seed, according to a report transmitted by Consul Horace Lee Washington, of that city. The consul adds: "The first complete cargo of soya beans that arrived in the United Kingdom reached Liverpool February 14, 1909, and the interest in this new industry has grown apace since then, experiments being made in various other parts of England as well as in Liverpool that range from a blend of soya flour, made by an expert Liverpool baker with flour and with meal, about one-fifth for mixing with flour and one-sixth for meal, to a soya dog biscuit.

"The blending of soya flour above referred to is desirable by reason of its demonstrated food value. In albuminoids soya beans are stated to be nearly three times as rich as oats and wheat and possessed of more fiber and ash. A few German millers are reported to have mixed soya and rye flour in experiments in the making of the black bread of that country, and local millers here are experimenting with a blend to improve their brown bread. A vegetable cheese is known to be produced from the caseine that the bean contains, but this has not advanced from the experimental to the commercial stage. It is reported that one or two important Liverpool merchants have sent their own investigators to Manchuria to study the products of that country, chiefly the soya bean. It is also stated that one of the large shipowners of Liverpool contemplates the introduction of the soya bean into west Africa, where soil and labor conditions are thought to be peculiarly favorable to the growth of good crops. This enterprise is cited as a parallel to the British cotton growing movement

### Imports.

During the week ending February 5 imports were received at New York as follows:

McHutchison & Co., 146 cases plants.  
P. Ouwerkerk, 80 pkgs. trees.  
Morris & Wellington, 7 cases trees.  
Schulz & Ruckgaber, 250 bags seed.  
P. Henderson & Co., 94 bags seed.  
H. F. Darrow, 165 bags, 2 cases seed.  
J. M. Thorburn & Co., 148 bags seed.  
J. Fuller, 20 bags seed.  
F. R. Pierson & Co., 20 cases valley.  
Vaughan Seed Store, three cases bulbs, one case seed.

To others, 295 cases plants, 76 cases trees, 50 cases valley, two cases bulbs, 2185 bags, 115 cases, 46 pkgs., 42 bls. seed, 1233 bags clover seed.

### Sugar Content of Sweet Corn.

Studies of sweet corn have shown that it makes little difference whether the corn is grown in a northern or a southern latitude, so far as the sugar content is concerned, although the northern-grown "roasting ears" may have greater tenderness and a longer season.—Dept. of Agriculture Report for 1909.

### Disease Among Gladioli.

I never had any trouble with gladioli until this year, when I found that a good portion of the stock I obtained from the east (and this includes the "west" as far as Colorado, for they are all east of us), either entirely failed to start growth, or else died before reaching the blooming stage. I found that some succumbed even during the period of inflorescence. Where the plants were above ground, I noticed that the leaves or stalks, or both, would turn yellow and soon rot near the ground. Investigation below the surface of the soil revealed the fact that the bulb or corm, was in a bad state of decay. I am told that this is the "black rot," though I think it should be called the brown rot, as the color is more brown than black.

In one grower's stock I bought, I noticed that there were many corms more or less decayed; I did not think much of it at the time, though I discarded all corms that showed much deterioration. If I knew as much about the disease then as I do now, I should never have accepted the consignment. This was not the only lot I received in such condition; some of another lot were slightly affected too.

One corm seemed so bad when I received it that I at once planted it in a select situation, in hopes that I would save it. It grew well and flowered; toward the end it showed some yellow, but not enough to show that it was badly diseased. The fact is that it seemed to be affected in a different way from almost any other gladiolus I ever saw. The white spots do not occur in the others. It is probable that some white fungus growth developed. Whether this is beneficial or not I know not. Otherwise, the inroad of the disease is similar to those I found in all other corms.

Some state that it is best to refrain from planting gladioli in land that has been recently manured with fresh manure. Mine were not so planted;

## HOLLAND BULBS AND PLANTS

neither were they fertilized in any way. One eastern grower wrote me that he attributed the prevalence of this disease to the large amount of commercial fertilizers some growers use to produce large corms. I found that the large corms seemed to fare the worst. It is for this reason, and the further one of beating the outrageously high express charges we of this coast have to pay on goods we get from the east, that I am now getting nothing but very small-sized stock from eastern growers. Then, it is easier to try to stamp out disease germs in small bulbs than in the larger stock. We are told that the same solution that is used to destroy potato scab will kill the black-rot microbe, or whatever it is. I have not yet tried it, but I shall see that all stock hereafter is so treated before it goes into the ground. Last year some of my high-priced stock that I purchased in New York, Chicago, Philadelphia and elsewhere, never reached the blooming stage on account of the inroads of this scourge to the gladiolus grower.

I understand that the bureau of plant industry, at the station maintained in connection with the experiment station at Cornell University, Ithaca, is investigating the disease of the plant in question, and I hope it will not be long before a means is discovered to combat easily and successfully the further inroads of this enemy.—**W. A. Pryal, Oakland, Calif.,** in *Rural New Yorker*, November 20, 1909.

**THE AVENUE FLORAL CO.,**  
**3442 St. Charles Ave., NEW ORLEANS, LA.**

Thirty Thousand Sacks of Free Seeds.

NEEDED BY OUR LEGISLATORS.

The mind staggers at the suggestion of calculating the number of seeds there would be in these 29,890 sacks. Only scientists who count the germs in a drop of water or the microbes in a fly's track would be equal to it. Certainly if all the seeds were planted and germinated into crops there would be potatoes, beets, turnips and squash to make the tables of horticultural constituents groan with plenty, while morning glories would run riot over their porches, and their gardens would blaze with geraniums and smell swooningly of sweet williams, carnations and climbing roses. It would make a remarkable difference in the cost of living to everybody, of course, for not only would the seed growers supply and decorate their own tables, but constituents not favored with seeds would profit by the reduced demand for the stocks of the grocer and the florist.

### Reasons for Joining The Rose Society.

A paper read by Adolph Farenwald, Roslyn, Pa., before the Florists' Club of Philadelphia at its monthly meeting, February 1, 1910.

I have often wondered why so many small rose growers give the American Rose Society the cold shoulder while the large rose growers all seem to be members. Why should this be so? Have the small growers no benefit to expect as a member of the American Rose Society, or are they prejudiced against it? Surely there is no cause for either of these reasons. The most of them have not come near enough to see and understand. It is time then that they make an earnest effort to do so and, by doing so, they will soon recognize the value of this organization in the many tasks which it endeavors to fulfill, every one being of vital interest to every rose grower. As I said before, the large growers are all members. Did you ever stop to think why they are? Surely not for the fun of it. They are all too shrewd business men. The money they invest this way must bring them some interest. "Light your pipe," as they say, and think this over—it is worth while. It is high time that we, as rose growers, took notice that the carnation is pushing the rose into second place in the favor of the public.

It is impossible for me, in this short paper, to go into all the different subjects of usefulness of the American Rose Society, to pluck them apart and hold them up to the searchlight. I will merely confine myself to the yearly exhibition and convention, their value as an education and inspiration. On March 16, 1910, the yearly exhibition and convention will be held in New York. Now, fellow members: This gives you a fine opportunity to realize the value of such an exhibition as an education and inspiration. Most of us think we grow better roses than the other fellow. An exhibition will open our eyes. Roses that at home we thought wonderful often diminish decidedly in our estimation when placed in competition with others. Here is the education if we want to see it. We are in this business for money. If our roses are not up to the standard, we will not realize on them as we should. This may be a bitter pill to swallow, but it should be the inspiration for a greater and continued effort, which will easily pay in the future for the little time and money expended.

At the exhibition, we shall also have an opportunity to see, along side of the old standards, the new varieties. The originators of these new varieties are sure to be at hand, each man eager to explain the strong points of his particular favorite; his rival only too eager to point out the flaws. There, too, you will see many of the brightest lights in the rose growing profession, from whom you can get valuable pointers. You have also the great pleasure of meeting old friends. Besides, the social side of these gatherings have a charm which no one who has ever attended can forget.

While we can read, in our trade papers, the essays read at the convention meetings, yet we miss the after discussions and criticisms, which are a most important and essential part of such meetings. Then, too, the enthusiastic arguments of some mem-

# CANNAS

## F. O. B. New York or Chicago.

### For Immediate Delivery.

We are the largest handlers of Cannas in the world. Our prices upon Cannas will bear comparison with any house in the Canna business. Stock unequalled.

## WINTERSON'S SEED STORE,

45-47-49 Wabash Ave., Chicago, Ill.

# Arthur T. Boddington,

## SEEDSMAN,

342 West 14th Street. NEW YORK.

bers, the hair-splitting arguments of others, the sound advice of those who confine themselves strictly to business so that one fairly sees the dollars sticking out, all combine to make these meetings serve as food for thought for many a day thereafter. To make this Rose Society a success, it needs the interest and enthusiastic support of all rose growers, large and small, over the entire country.

Every one who grows roses for a living should feel it a sacred duty to belong to this society; in fact, every one interested in roses should belong and help bear out the motto of the society, "A rose for every home, a bush for every garden." Then, anyone growing roses for a living, who cannot, or will not, be interested in the work of this society will be the one who continuously kicks about bad times and prices, and howls about the

"good old times." He is a dead one—"Peace be to his ashes."

### Free Seeds Cause Amusement.

The annual discussion upon the free distribution of seeds by congressmen was precipitated in the house January 31 by Representative Moss of Indiana, who proposed an amendment to the agricultural bill increasing the appropriation for garden and flower seed from \$43,000 to \$100,000, with a provision that the seed should be distributed by the secretary of agriculture. This proposition was voted down. Amusement was created by Representative Kustermann of Wisconsin, who said his constituents criticized congressmen "because their arguments would not go down and their seed would not come up."—Washington Star.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;  
Franklin DeKleine, Grand Rapids, Mich.,  
Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Secre-  
tary; M. L. Ruetenik, Cleveland, O., Treas.

CALIFORNIA asparagus is expected about the end of the month.

### The Mid-Winter Lettuce Crop.

At this time of the year any number of growers report their crops at a standstill, which is generally evidenced by a sharp rise in the market price. We know of at least one prominent grower who claims the midwinter crop never paid him, that is, it never came in a success. With modern greenhouses such a grower admits that he does not know his business, or is too economical with coal. The latter is often the case. At this time we wish to point out a few of the troubles in order to help those who are looking for relief.

The first and most serious set back is often given the young plants when moving them from a warm plant house into a cooler growing house. Some start their seedlings on an enclosed bench with high bottom heat. Their system is one of the checks; each move means a downward one in temperature, which is wrong. We practice the opposite; our plants are grown cooler than the growing houses, or, if in the same house, we select the coolest end or corner for the plant bed. Thus started the reset plants go right to work, which is a great aid towards success.

The second trouble is either lack of food, or an oversupply. Either is serious. Well decomposed manure is generally safe at any time, but we never add chemicals at planting time. If, after 10 days or two weeks, our plants are growing vigorously we begin to feed with chemicals, using nitrate of soda and sulphate of potash, dry, between the rows. Our rule is to cultivate, then topdress, then water. Thus in another 10 days or two weeks they will be ready for a second feeding of same material. Just before the leaves lock we feed the third time, this time using soda and phosphates, either fine bone, guano or rock phosphate. Our rule for mixing these ingredients is very simple, based on experience only. We use one-half the weight of soda in sulphate of potash, or to 100 pounds of pulverized soda add 50 pounds potash. To the phosphates it is the opposite, we add one-half the weight of soda, or to 100 pounds of bone add 50 pounds of nitrate of soda. Thus when the soil activities are low we can stimulate our crops to make good time. To illustrate: We are now cutting a fine crop of lettuce, running close to one-half pound each, which was sown November 1, the first being cut February 1, while the ground used was crude yellow clay which had never been manured; by adding horse manure and feeding as above good results were obtained in a new house.

## Simon's Hot Weather Lettuce

Is the best firm heading variety offered today to grow through the summer months, because it will not rot underneath

**IT WILL NOT BURN OR SCALD IN THE HEAD AND MAKES A FIRM HEAD IN HOT WEATHER.**

### Early Tomatoes In Concrete Plant Protectors.

A tried and proven success. Keep out frost and draw heat. Equal for forcing to the famous bell jars used in France. Field trials show four times the yield, ripening a month ahead of season and value increased 100 times. No blight or insects. Useful for lettuce, rhubarb, melons, etc. Hold water for irrigation. Patent just issued on protection; and line wire opens or closes 100 instantly. Illustrated treatise tells how to make them quickly at 2c each, how to make mold at 25c. Also full information about this method. Each purchaser of book has privilege to make mold and protector. Mention this paper and send \$1.00 for book. Money back if not satisfied.

**J. A. HALEY, Seed Grower, Munith, Mich.**

## Wanted

Contracts to grow all kinds of Vegetable Plants, transplanted or not. Also Geraniums, Coleus, Cannas, Salvia, Verbena, Pansies, etc., for spring delivery. All stock only. Correspondence solicited.

**Alonzo J. Bryan, Wholesale Florist, Washington, New Jersey.**

The third factor is lack of air. Growers must learn to fire with ventilators open whenever necessary. Thus, whenever the outside temperature comes above freezing, we put on some air and sustain the temperature by firing if the sun is not shining.

MARKETMAN.

### Prices of Indoor Fruits and Vegetables.

Chicago, February 9.—Mushrooms, 25 cents to 75 cents per pound; cucumbers, \$1.00 to \$1.25 per dozen; lettuce, 40 cents per box; tomatoes, 20 cents per pound; radishes, 50 cents per dozen; asparagus, 25 cents to 40 cents per bunch; grapes, Gros Colman, 75 cents per pound.

New York, February 5. — Mushrooms, 40 cents to 55 cents per pound; cucumbers, extra, \$1.75 per dozen; tomatoes, 25 cents per pound; radishes, 4 cents per bunch; asparagus, \$6 per dozen bunches; rhubarb, 75 cents per dozen bunches; grapes, Gros Colman, 65 cents to 70 cents per pound; peaches, \$3.50 per dozen.

MOLINE, ILL.—Peterson & Eckstam Bros. have opened a retail store at 1229 Fifth avenue. They have greenhouses at Tenth avenue west of Sixth street.

NEWARK, O.—Kent Bros. report a big demand for carnations on McKinley day and say they could have sold many more if they had been forthcoming.

## You Need This Paper if You Force Vegetables

The Weekly MARKET GROWERS' JOURNAL is the ONLY paper published exclusively for market gardeners and truck farmers. It carries a special department devoted to the greenhouse forcing of vegetables and is the official organ of the Greenhouse Vegetable Growers' and Market Gardeners' Association of America. Recognized by Department of Agriculture and Experiment Station officials as authority on vegetable forcing.

## The Nursery Trade

American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.

Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

SAMUEL C. MOON, Morrisville, Pa., has been re-elected president of the Pennsylvania Nurserymen's Association.

PROFESSOR SURFACE, state zoologist of Pennsylvania, is very optimistic about fruit planting in the state and has no use for the croakers who are talking about overproduction. Plant the right varieties, Mr. Surface says, in effect, and look after the trees so that good fruit is produced and there will be a market for it all right.

THE well-known Holland firm of Jacs Smits, Ltd., Naarden, will, in future, be known as Jacs Smits & Co. The firm consists of Jacs Smits and P. Dwars, who has bought all the stock of the late firm and will continue to send out the same first-class grades of stock that have been sent from this nursery for many years.

SUFFIELD, CONN.—Notwithstanding the aid of clever "tree surgeons" it has been found impossible to prolong the life of the Trumbull elm and this historic old tree had to be felled, which was done February 5. A large elm standing near the National bank of Suffield, which was doctored at the same time as the Trumbull elm last summer, and under which General Washington is said more than once to have eaten his lunch, fared better and by the aid of several barrels of cement was made solid enough to last for many more years.

### Seedling Phloxes.

Some plants as well as animals have a remarkable prepotency, that is the power of impressing themselves on their offspring. Some phloxes like Mme. Meuret will reproduce themselves. Cross of Honor never does this, the plant almost invariably producing flowers of a lilac tinge. Crepuscule does not always reproduce its own color but invariably gives a symmetrical head and a very large floret and continuous bloom. We find this the most satisfactory of all to breed from. Plant the best sorts in close proximity and let the bees do the rest.

Nature makes no mistakes in the blending of colors. A large bed of seedling phloxes in continuous bloom until November 1 is one of the finest spectacles of the flower garden. Out of 1,000 many of marvelous beauty may be selected. The Phlox Manual tells how to raise from seed. A little girl following directions has raised some as fine as those produced by European experts. A correspondent said that from some well bred seed we sent him he secured one that \$10 would not buy. Said he "I first saw it in the dark. It shone like a lamp." Another secured one with variegated foliage. In short we find ourselves in wonderland. Some of ours have richly variegated blooms. Seed must always

be sown in the fall. The next summer the plants bloom and you know in a short time just what you are doing.

C. S. HARRISON.

Experiment Station, York, Neb.

### Nashville.

The State Horticultural Society and the State Nurserymen's Association, two important organizations, with a community of interests, federated together for mutual benefit and improvement, held their fifth annual convention January 26-27, at the Tulane hotel assembly room. It was by far the most successful and well attended meeting yet held. An increased interest in these subjects and the organizations devoted to their welfare, is being taken all over the state, as was evidenced by the large attendance, there being more than 150 delegates present during the session. Every section of the state was represented by those who desired to get the benefit of the experience of expert fruit growers.

The Horticultural Society held its meeting on the first day, with President W. P. Wade, of Kenton, in the chair. The secretary and treasurer is Charles A. Keffer, of Knoxville. The address of welcome was delivered by Hon. John W. Thompson, state commissioner of agriculture, and many interesting papers were read. At the evening session the president gave a paper on "Spraying," which was so full of good suggestions and so instructive that many questions were asked and many facts absorbed by the delegates to take home with them.

The annual election put the following in office: J. D. Ellis, Dayton, president; I. C. Murphy, Columbia, vice-president for middle Tennessee; C. Pennington, Rutherford, vice-president for west Tennessee; J. C. Easterly, Cleveland, vice-president, east Tennessee; Charles A. Keffer, Knoxville, secretary and treasurer.

The society then adjourned to make way for the meeting of the Nurserymen's Association, which was opened by an address of welcome by Col. J. H. McDowell, after having been called to order by President J. C. Hale, of Winchester. I. C. Murphy, of Columbia, instructed those present in regard to the "Care of Young Trees in the Orchard." Mr. Murphy has specialized fruit raising, and his observations were of much value to those present. Aubrey Frank, of Winchester, in a paper on "Office Methods," told how fruit growers could be helped by system; A. I. Smith, of Knoxville, told the necessity of "Growing Better Nursery Stock"; J. N. Miller, of Winchester, and W. W. Twitty, of Blanche, participated in the above discussion, giving many valuable suggestions. "Grape Growing," a profitable industry in the state, was ably discussed by T. W. Sowell, of Columbia; J. H. Austin, of Antioch, urged "Nurserymen Pulling Together a Little More," while J. D. Ellis, of Dayton, thought there should be more "Co-operation of Nurserymen and Orchardists." It was the opinion of these gentlemen that by co-operation Tennessee would become one of the largest fruit producing states of the Union. "Pruning Nursery Stock" was discussed by R. O. Lamar, of Pulaski, and A. A. Newsom, of Knoxville.

The principal address of the afternoon session was delivered by Prof. G. M. Bentley on the "San Jose Scale"; W. A. Easterly, of Cleveland, read a paper on "Desirable New Fruits Which Should be Grown in Tennessee." "Landscape Gardening from a Nurseryman's Point of View" was ably discussed by A. J. Byrns, of Sylvia; E. N. Chattin, of Winchester, talked about "Pecans—Can They be Profitably Raised in Tennessee?" James Webb, of Smithville, spoke on the "Reliability of Nurserymen," while

Otto Henninger, of Memphis, discussed "Spraying Practices Which Pay"; Charles Pennington, of Rutherford, read a paper on "How Does Selling Better Fruit Help the Nurseryman?" W. H. Stark, of the firm of Stark Bros., of Louisiana, Mo., having the largest nursery and orchard company in the world, was the guest of honor of the convention. He made an interesting address, and at the close of the meeting presented each one present with a sample of his apples, the finest to be seen anywhere. The closing address, which was fine, was made by the retiring president, J. C. Hale, of Winchester, who spoke on the "Future Nursery Business."

The election of officers for the ensuing year resulted as follows: A. I. Smith, Knoxville, president; J. M. Miller, Winchester, vice-president of the state at large; A. J. Fletcher, Cleveland, vice-president, east Tennessee; R. O. Lamar, Pulaski, vice-president, middle Tennessee; W. W. Baird Humboldt, vice-president, west Tennessee; G. M. Bentley, of Knoxville, secretary and treasurer. A legislative committee to look after the interests of the organizations before the state legislature was appointed as follows: Col. John Thompson (chairman); Prof. H. M. Morgan, Prof. G. M. Bentley, Percy Brown, Hon. Geo. E. Parks, J. L. Jones and J. C. Hale. The adjournment marked the closing of one of the most successful and enthusiastic meetings in the history of the two associations.

M. C. D.

### Nut Notes.

As yet the pecan industry is young, very young; it has not yet reached its majority as a cosmopolitan horticultural industry in its possible range of cultivation, but already forces are at work, which augur well for the future. Among them, the attention which it is receiving from experiment station workers and the organization of the National Nut Growers' Association, are noteworthy.

J. B. Wight says "Briefly putting it, there is money in pecan growing, for the one who knows his business and takes care of his trees. The careless and ignorant man, who thinks a pecan tree should be set and cared for as a post, can find other methods for throwing away his money that are just as satisfactory."

## The Newest Lilacs

Double and Single

**Extraordinary Offering**

The improvement in the Lilac, especially in the double sorts, is marvelous, and all lovers of this flower will be delighted with these novelties. In size, form and color they far surpass the old favorites and we confidently recommend them to our patrons. Nothing that has been introduced recently is likely to prove so popular as the new Lilacs.

A beautiful illustrated booklet on Lilacs will be mailed on request, also our Illustrated General Catalogue, which contains accurate and trustworthy descriptions of the best

St. Louis.

CARNATIONS PLENTIFUL.

The past week was the closing of the season. This week Lent starts and the first few days will cause a slight let up. During the past week carnations were more plentiful. There has been quite a demand for red carnations and anything good brought four cents. Quite a few split carnations are on the market. Tulips, jonquils and freesias are coming in, also some extra fine lily of the valley. The bright weather has brought out violets and they are selling from \$1.50 to \$3 per 1000. Sweet peas are coming in fine and with long stems.

NOTES.

The greenhouses and dwelling house of the Michel Plant & Bulb Co. were sold by Receiver Coleman to George Waldbart, for \$6,500. Jules Bourdet will have charge of the greenhouses. Mr. Waldbart has not decided what he intends to do with the greenhouses; probably he will grow for his retail trade and sell the surplus to the wholesale market.

We regret to announce the death of Martha Hentschel of Webster Grove,

TRADE GOOD.

Notwithstanding the high prices on foods, etc., the flower lovers manage to be quite liberal with the retailers. Combining this with the funeral work, which has been quite plentiful the past week, trade looks good. The cut flower market is still as full as can be expected, considering the extreme cold weather. Carnations are still very plentiful with a greater amount of dark pink. Prices are not as they should be. The street stands are selling good stock at 25 cents per dozen. Lily of the valley is a drug on the market, fancy stock is going at two and three cents; jonquils, lilies and roses are moving out nicely, with violets close. Lent is now very close, and we can figure on business lagging somewhat during these 40 days.

NOTES.

The Florists' and Gardeners' Club held its regular meeting February 1 and had a very enthusiastic evening; the various committees were discharged. A motion was made to decide at the next meeting what to do with the surplus funds unused at the convention. The subjects for the meeting were "Cyclamens," "Cypripediums" and "Cinerarias." The first prize was awarded to D. Frazier; second to Frank Crooks. Julius Roehrs Co., Rutherford, N. J., showed some very fine cyclamens.

Jos. Seaman Co., Washington, was sold out at receivers' sale; C. A. Dun of that place bought the store.

A. W. Smith Co. is showing a very pretty window in the way of a banquet table.

NEW

Carnations

The two prize-winning introductions of the Cottage Gardens.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full center; color deep pink, several shades lighter than Lawson, deeper than Winsor; having strong, erect stems, 24 to 36 inches in length. A vigorous, healthy grower, and has never shown disease of any kind.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y., Silver Medal Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y., Diploma for best new variety, New York, 1909.

PRICE: Rooted Cuttings, \$2.00 per 12, \$12.00 per 100, \$100.00 per 1000. 25 at the 100 rate; 250 at the 1000 rate. Delivery February 20th.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity.

ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers, 3½ to 4½ inches in diameter, on strong, erect stems, 36 to 42 inches in length.

AWARDS

The Lawson Silver Medal, Toronto, 1907 (no Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists' Silver Medal, Washington, 1908.

PRICE: Rooted Cuttings, \$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

Delivery March 1st.

These varieties bring from \$2.00 to \$4.00 per 100 more than any other carnation sold in the New York market.

Boston Notes.

The Draper funeral at Hopedale brought quantities of floral tributes from all over the country. It is only on rare occasions that we have the opportunity of inspecting the work of so many prominent artists and comparing the styles of workmanship. New York, Washington, Boston and other cities sent their best, a splendid illustration of the progress the designer has made in his art, not alone in one section but throughout the entire country.

There seems to be an unusual amount of trouble amongst the salesmen handling roses lately. Many bad cases of sore hands are reported, several cases requiring medical aid. One of the worst cases brought to our notice is that of one of Galvin's men. Both hands are badly punctured with thorns and in each instance this has caused considerable inconvenience for a long time owing to festering.

There is probably no more regular visitor to the market than Chas. R. Dane of Roxbury. Mr. Dane has always been an early bird and is generally on the way home before many of the other regulars get in.

The last assembly of the season on Friday evening at the Somerest proved to be the most brilliant of the series and the local market was thoroughly cleaned up on orchids, gardenias and lily of the valley.

John Jansky, who formerly confined himself to making florists' wire frames, has branched out and is now dealing in florists' supplies and green goods.

John Fee, for many years closely associated with the growing of good bulbous stock, is keeping up the usual high standard this season.

S. Hoffman is making elaborate preparations for Easter. He is growing a fine stock of flowering plants at Mount Auburn.

The Budlong Sons Co. is unusually strong on Mme. Chatenay and My Maryland roses just now.

E. MacMulkin reports business as good for this season, with an unusual amount of funeral work.

The Galvin stores report an unusual amount of funeral work.

R.

MONTPELIER, IND.—C. E. Stinson, of the Montpelier Greenhouses, had many more orders for carnations for McKinley day than he could fill.

BUSINESS FAIR.

There has been nothing out of the ordinary doing in the cut flower business. While wholesalers have been cleaning up fairly well it is due to small receipts of stock, rather than to an unusually heavy demand. Funeral work, with an occasional wedding thrown in, are the mainstays, nothing to brag about being done in the decorative line. Carnations are becoming more plentiful daily, the absence of a sufficient supply of roses to fill orders aiding the sale of carnations considerably. Roses of all grades are still short in supply. The demand for orchids and lily of the valley have been very slow. Violets are moving nicely and advance orders already booked for St. Valentine's day show that retailers expect a good business. Adiantum is in good demand. Asparagus plumosus and A. Sprengeri are a little short in supply, with a good demand.

NOTES.

Adam Graham, Jr., 13052 Euclid avenue, East Cleveland, captured a burglar in the home of his father at 12341 Euclid avenue at 7 a. m. Wednesday and turned him over to the police. Graham was unarmed, while the burglar had both a gun and knife on his person. Adam Graham, Sr., and wife left recently on a trip around the world and their home was unoccupied.

The wholesalers will play the retailers on the Schwartzburg alleys on Sheriff street, February 9.

Monday morning, February 7 trade opened up briskly, the funeral of H. R. Newcomb, one of the city's most prominent bankers, causing quite a stir in the flower market.

On February 15 Halle Bros. Co. will move to the new store, which ought to help considerable.

463 Summit Ave., West Hoboken, N. J.
Mention the American Florist when writing

Baltimore.

That the "cold will strengthen as the days lengthen" seems proved this winter in this area. Whilst we have had no markedly low extremes, there has been a continuous cold average far below the customary mean, and many snowstorms and high winds, which prove uncomfortable to mortals and more uncomfortable to flowers than when the mercury falls lower and there are no such untoward features. On Monday morning the thermometer nearly touched the zero mark and all night there were high winds, which made it hard to keep up the greenhouse temperature and fairly melted the coal away. The whole month of January was exceptionally cold, and most of the time the sky obscured by clouds, only eight of its 31 days being clear. Rain and snow together made a total precipitation of 4 2-3 inches, which was the greatest of any January for several years, and the mean temperature for the entire month was 34°, which is the lowest for five years. Fortunately the condition of the ground was such that most of the water penetrated into the lower strata and will replenish the depleted underground sources.

Trade has been exceptionally active, it seeming as though the approach of Lent was spurring everybody into entertaining their friends with the various forms of social diversions. Dinners, balls, assemblies, receptions, teas and functions perhaps designated by other titles have been so numerous that the stores have been fairly put to it at times for material for decorative purposes. One Charles street store last week had five or six dinners each day. Material has not been very abundant. Good roses, indeed, have been scarce. One of our largest concerns, which had a dinner order for a large lot of American Beauties, found it pretty hard work to secure them at all, and what they got did not allow of lying down that night with a soul full of contentment and peace over the job. The local supply of Beauties has come to be practically almost nil, but one would hardly have thought that our neighbor Quaker city would have needed to be gone over with a fine tooth comb to secure five or six dozen of this still popular variety, which nothing seems to displace. The season of grand opera seems to have done much to stimulate social activities, and there has been a more uninterrupted series of entertainments than for several years. Last week President and Mrs. Taft came over to hear the opera, and though their coming was unannounced to the public, some of the knowing ones had some bunches of flowers ready to present to the ladies of the party. All these things make for trade. Certainly if the ladies would adopt again the becoming fashion of wearing flowers for their personal adornment it would add to the volume of business.

S. B.

Palms and Other Seasonable Stock

We have an extra good stock of **Forsteriana**, made up, three plants in a pot or tub all clean perfect plants. (We need to reduce our palm stock, and are giving extra values.)

ERNEST OECHSLIN,

188 Madison St., RIVER FOREST, ILL.

LOCKLAND, O.—A meeting of the subscribers of the stock in the Bloom-hurst Floral Co. was held January 27 when it was decided to make the capital stock \$30,000, divided into shares of \$100 each. Wm. Sunderbruch's name has been mentioned as general manager. The capital stock of the new company has nearly all been subscribed by prominent business men of this city and active work on repairs to the greenhouses, formerly owned by W. K. Partridge, which have become the property of the new company, is to commence at once.

SAN FRANCISCO, CALIF.—The first annual banquet of the Pacific Coast Horticultural Society was held in the concert room of the Palace hotel, January 22, with 75 growers, decorators and florists present. Various matters were discussed as an aftermath of the banquet. V. Matraia, president of the society, acted as the toastmaster. John McLaren, superintendent of Golden Gate park; H. Plath, past president of the society; D. MacRorie, John R. Atkinson, C. Shellgrain, T. F. Taylor, A. G. Rossi and A. Baldocchi were among the speakers.

— YOU ARE INTERESTED IN —

Plants for Easter

We have **Azaleas**, **Hydrangeas** in all sizes. **Baby Ramblers**, **White Ramblers**, **Souperis**, **Lilies**, **Hyacinths** and other bulb stock. Write us in regard to these.

We can furnish you now in bloom, **Azaleas**, **Cinerarias**, **Cyclamens** and **Primroses**.

Young Rose Stock. We have about 20,000 young rose plants that will be ready for a shift in February. If you are interested in them, ask for our list of varieties and prices.

Ferns. If you are interested in ferns of any kind or size, write and let us know what you will want.

GEO. A. KUHL,

Wholesale Grower, Pekin, Ill.

Carnation Dorothy Gordon at Pittsburg

You must have seen and admired our Carnation Dorothy Gordon at the Pittsburg meeting, if you were there; our exhibits of this superb new variety attracted a vast amount of attention and caused much favorable comment from the hundreds of visitors who saw it. If you missed the show, just notice the very flattering mention that "Dorothy Gordon" received in the reports appearing in your trade publications of last week.

Our exhibit of 100 "Dorothy Gordon" in section "A" won Second Prize; but more than any award we value the opportunity that many more of our friends had at that meeting for seeing this worthy new variety and passing on its merits at first hand.

We have already sold more than 100,000 rooted cuttings this season and the limit of our growing capacity has been reached. If planning to feature "Dorothy Gordon" this year you should get your order in at once. Not much time is left anyway—so write us now if you want any stock this spring. Don't delay. Prices remain as previously quoted:

— \$10.00 per 100; \$75.00 per 1000 —

Come and see it if you can, or write us for literature and full particulars—free. We'll gladly answer your questions.

JOSEPH HEACOCK COMPANY, Disseminators, Wyncote, Pa.

404-412 East 34th St., NEW YORK.

THE BEST WAY

to collect an account is to place it with the

National Florists' Board of Trade

56 Pine Street, NEW YORK.

WHY? Because many debtors will pay the Board
fearing otherwise a bad rating in our Credit List.
Full information as to methods and rates given on
application.

IT IS NOT...

what you pay for the adver-
tisement but what the adver-
tisement pays you. It pays
to advertise in the American
Florist.WIZARD
BRAND
MANURES

Dried, screened and packed in bags of 100 lbs. each

PULVERIZED SHEEP MANURE

Pure - Uniform - Reliable

A strong and quick acting manure highly
recommended for carnations and chrysanthemums

SHREDDED CATTLE MANURE

Easy to Handle and Apply

Stronger and better in every way than rough
manure. Lasts much longer on the benches.
Unequalled for mulching and feeding roses, liquid
manuring and mixing with bench and potting soil.
Used by all the largest growers.Ask your supply man or write
for circulars and prices.

Price of both \$1.25 per lb. 16-oz. of actual Thread per lb.

JOHN C. MEYER & CO., 1449 Middlesex St., Lowell, Mass.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,** and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Tarrytown, N. Y.

At the regular monthly meeting of the Horticultural Society, held in its rooms February 28, after routine business had been transacted, the matter of the fall show was taken up and the dates fixed for November 1-3. The committee appointed at a former meeting to make inquiries regarding a suitable place for the show reported that the Tarrytown hall could not be had, but that very suitable arrangements could be made for the Irvington town hall. The committee reported this as being equally as large as the Tarrytown hall and even better suited for the purpose of a flower show. In its recommendation it was decided to hold it there. John Brunger, gardener to I. N. Seligman, Irvington, was appointed manager of the show. The monthly prize, for two plants of cyclamen, was won by James Stuart, gardener for Mrs. F. A. Constable, Mamaroneck, with splendidly grown specimens. So highly did they appeal to the judges that they recommended the awarding of a cultural certificate in addition to the regular prize. On a vote of the members present being taken, the certificate was unanimously awarded.

The subject of the evening being "Cyclamens," Mr. Stuart, being prize winner, was asked to set the ball rolling and gave a very instructive account of the method by which he obtained such good results. He said that the best time for sowing was the middle of August and strongly advised the procuring of new seed, as his experience was that this germinates much quicker and more strongly than old seed. For compost he used a mixture of loam, leaf-mould and sand with enough finely broken charcoal

to insure openness and free drainage. Flats are used in preference to pans and seeds sown in shallow drills in place of broadcast so that the surface of the soil can be worked over occasionally to prevent moss or scum from gathering.

The seeds are covered only lightly with soil and the boxes closely covered with glass to prevent evaporation. A temperature of 60° is maintained with plenty of atmospheric moisture. When the seedlings are up plenty of light is allowed, but shade always provided against strong sunshine. When the second or third leaf appears the seedlings are pricked over into flats again, in preference to pots, where they remain until large enough to be potted into 3 or 3½-inch pots. For Christmas flowering they are shifted when ready into 5 or 6-inch pots, but when intended for spring flowering they are given another shift, 7-inch pots being used. In summer they are kept in the coolest possible

house and when fall comes a temperature of not less than 55° is maintained until such time as the flowers begin to show. Then the temperature is lowered to from 45° to 50° at night and when in full flower air is freely given, a little being allowed at night to insure a dry atmosphere and prevent damping. In the general potting compost a liberal supply of well-rotted manure is added to that formerly advised and the potting is done moderately firm. Cleanliness, both in the house and benches, he strongly advises. Also every precaution to pre-

vent insect enemies from getting a hold on the plants. A solution of soft soap and kerosene he considers the best insecticide, this being used freely as a spray both on the plants and benches as a preventive against the cyclamen mite. In growing plants over the second year he preferred to keep them growing along steadily in place of drying off, as some do, and retaining as much of the old foliage as possible, but keeping all decayed flowers and leaves closely picked off. In conclusion, Mr. Stuart said that to be a successful cyclamen grower one had to have a special interest in the plants, to pay strict attention to details and be on the job all the time.

At the next meeting of the society the subject is to be roses, the monthly prize being offered for a vase of 12 other than American Beauty. W. Hendry, gardener to W. A. Read, Purchase, N. Y., will give a talk on "Rose Culture." For the March meeting the prize is offered for three varieties of forced vegetables. W. S.

Over six miles in use and highly recommended by all. The only **Drip Proof** gutter on the market.

The Standard Return Steam Trap

It has no equals for simplicity or its working. Catalogue free.

E. HIPPARD, Youngstown, Ohio.

Yonkers, N. Y.

A very interesting event horticulturally took place here on the evening of January 28, the inauguration of a horticultural society. It has long been felt that the time was ripe for such a society to be formed and it only required some one to make the initial start. That the efforts of the promoters was a decided success is shown by the fact that nearly 60 members were enrolled. The first meeting was a most enthusiastic one. The following officers were chosen for the year: E. Bennett, president; R. Cochrane, vice-president; W. H. Waite, secretary; Lee Whitman, corresponding secretary; P. Macdonald, treasurer. Executive committee, H. Scott, J. Goff, R. Cummings, L. Taylor, A. Macdonald and T. Mahoney. That the society will be a success there can be no doubt with such men as E. Bennett as president and W. H. Waite as secretary, both having had large experience in such societies and all the other officers and the members of the executive committee are good live men and hustlers.

L. W.

BUFFALO, N. Y.—Educators of this city are planning to have the system of summer school gardens established by the Philadelphia board of education serve as a model, they having been generally regarded as the best of their kind.

Lightness....

If greenhouse lightness be obtained at the expense of structural strength, then your house is a danger trap; if your house is so heavy it shuts out the light, your crop is inferior. You must have a "happy medium," combining sufficient strength, and securing the necessary lightness.

The construction that more than meets these requirements is our Iron Frame one. Send for information.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements appear with each issue and should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

HALF HOUR CHAPTERS FOR FLOWER GROWERS

Easter Lilies.

There is such an excellent demand for lilies at all times now that growers do not, as formerly, attempt to get all, or nearly all, of them in around Easter. Still there is always a big demand then and March 27 will soon be rolling around. The plants that are to be in on time should now be showing buds distinctly, otherwise they will take very hard forcing. They will stand this, however, if the plants are from good bulbs and well established. Forcing treatment often results in insect attacks, especially green fly, and it will be necessary to fumigate regularly, otherwise the buds will probably be injured. Lilies are often grown in dark houses and on benches a long distance from the glass but these are nearly always drawn in the stems and do not produce so good flowers as others grown in a good light. Plants in small pots will take quite a little feeding up to the time the buds are full grown and before they turn color. After this feeding will do little good.

Dahlias.

The demand for dahlias early in the season is one that cannot be neglected by up-to-date retailers or growers. A few plants should be put in the greenhouse now, whole clumps, if they are not too large, being most suitable, and these should be giving good flowers for Memorial day, long before they can be obtained from outdoor plants. Dahlias are gross feeders in the open, but under glass it is not well to make the soil too rich as the plants are apt to make too much growth at the expense of flowers. A good depth of soil should, however, be allowed and this may be covered, after the roots are planted, with a good thickness of semi-decayed manure, leaves or anything similar to keep the surface moist and prevent too rapid evaporation. Strong heat is not advisable, just a genial growing temperature and sufficient moisture in the atmosphere to keep the plants growing freely and insects in check. The only other attention necessary is to stake

or tie the plants as they grow and to disbud the plants as they advance for flower.

Hardy Perennials.

The number of plants of a perennial habit that can be raised from seed is larger than the majority of people imagine. There is a distinct advantage in raising from seed over raising plants by division. It is cheaper and the constitution of the plants is harder. Pyrethrums raised from seed sown now will flower a little this season after planting out but they will grow into grand stock for another year if set out about 15 inches apart in such a position that they can be covered in winter. Delphiniums sown now will produce fine roots by October that are not so easily lost sight of during winter as are those that are produced from fall sowing. Being strictly herbaceous the stems and foliage die down, directly the time arrives, no matter what the size of the plants and the fall or summer sown ones are so small that many are lost. Sow at once in a greenhouse or frame and plant the seedlings out at one foot apart when large enough and these will be elegant stock for use the succeeding spring as well as producing a few flowers the first year. Shasta daisies, coreopsis, perennial asters and many others may be grown just as easily as those mentioned and the plants will produce much finer and better colored flowers than old plants that are left to linger on the borders year after year, the growth getting weaker and the flowers poorer annually.

Pansies.

Pansy seed sown now will give fine flowers late in the season when the frame plants are getting weakened and the flowers running smaller. There may not be much money in them but they always sell and make a variety in the stock at a time it is needed. Grow them cool from the first in as much air and light as the weather will allow. Plants that are covered up in frames should have the lights removed on bright days when the

temperature rises a few degrees above freezing and be given a thorough airing, taking also the opportunity to remove decayed leaves should any be present. In the greenhouse the plants are flowering freely and the principal attention needed is to scratch over the surface soil to admit air to the roots, ventilate freely and water with judgment.

Cattleyas.

Commercialism is a great leveler and in no instance is this more plainly shown than in the case of orchid growing. The orchid, once the mysterious pet of the old time gardener and the pride of the owner of valuable collections, may now be purchased by those of very limited means and is as well known by sight, almost, as the violet. Strange to say the grower of orchids is the last to wake up to the fact that there is nothing mysterious, nothing difficult about growing the finest of orchids for cutting and he still imagines, if he has had no experience in it, that orchid growing is something outside the pale of the ordinary grower's province, requiring extra skill on the part of those in charge and specially built houses. The truth is that orchids generally, and cattleyas especially, are among the most easily grown plants in existence and a man who can use his eyes and brains sufficiently to grow a good crop of roses in winter has nothing to fear in orchid growing if he will take the trouble to master a few simple details. Possibly the most important thing to remember, and the rock on which many founder, is that orchids, more than most other plants, are dependent more upon the atmosphere and atmospheric moisture for their wellbeing than upon moisture supplied directly to the roots. It is possible to grow orchids on bare poles or in pots containing nothing but crocks; indeed if we could be sure of the atmosphere being correct at all times these conditions would be ideal for phalaenopsis and a few other kinds. But "there's the rub!" Fresh air, ample moisture and the gases arising from decaying vegetation are all present in the tropical homes of these plants. But how can these be provided under a glass roof? When we raise the ventilators to admit air out goes the moisture and any chemical constituent in the atmosphere that we may have supplied. This makes a certain amount of compost necessary to the roots, to conserve moisture about them and prevent sudden changes. But the material must not be close and of a nature to exclude air so we get away entirely from the ordinary potting soil and use moss, lumpy peat and crocks or charcoal, something that air and moisture can pass through readily and will not settle down into a close, wet mass.

Cattleyas in their native forests do not grow on bare branches as do some other genera. As a rule they are found in the forks or crotches of trees where a liberal amount of decayed vegetable matter settles down, where plenty of moisture runs down the stems in rainy weather, but where the heads are more or less protected from rain by the heavy foliage above. This fact should be taken advantage of by growers who should look after

root and atmospheric moisture but avoid heavy syringing overhead which is distasteful to all cattleyas. We are not saying they should never be syringed. There are times when a good washing from the syringe or hose does an immense amount of good. It washes away dust that may be choking up the pores of the leaves; it also replenishes wasted channels with moisture, say during the afternoons in summer when the sun has been shining and the atmosphere is dry. But, as a rule, cattleyas may be said to be overwatered at the roots and overhead and underwatered in the atmosphere. A little thought along this line will be helpful to those starting the culture of these most useful orchids. As to temperature a minimum night winter temperature of 53°, rising 10° by fire heat by day is suitable. A restful temperature by

John T. Timmons.
The Blind Florist of Cadiz, O.

night in summer with plenty of air and moisture and sufficient shade by day to keep the temperature around 85° to 90° will keep all right. It is not so much the actual degree of temperature maintained that leads to success in orchid growing. A suitable atmosphere with heat, air and moisture nicely balanced is far more important.

John T. Timmons.

In the historic little town of Cadiz, O., lives and works John T. Timmons who, though totally blind, is able to carry on a small florist's business. Mr. Timmons is a fine example of a man who, deprived of his sight, has—as is usual in such cases—the sense of touch very finely developed. He is a frequent contributor to several newspapers on horticultural subjects and does his work on the typewriter totally unaided and by the sense of touch. Mr. Timmons is also a naturalist of repute, his special care being for the birds that are such a problem to mankind by their destruction of injurious insects that prey on vegetation. In spite of his affliction he has built quite an elaborate bird house, as well as a greenhouse in which he and Mrs. Timmons, his devoted helpmeet, grow a

fine line of geraniums, heliotrope and other bedding plants. We are glad of the opportunity of noting Mr. Timmons' work and he is worthy of all encouragement.

THE RETAIL TRADE

ST. VALENTINE'S day trade appeared to have been good in most sections. There is no doubt that on such occasions trade is a good deal what the retailer makes it. Where good window displays are made and goods attractively shown, the trade follows.

Funeral Plants.

It is becoming quite a custom here to send plants in bloom, or fine ferns, in place of floral designs to funerals, says W. Clowe, of Corsicana, Tex. In summer we sell a quantity of large plumbagos, both blue and white, in 10 or 12-inch pots, staked four to six feet high in full bloom. These plants stand the sun and dry air here all summer fine. THE AMERICAN FLORIST is to us an old friend, as it is 23 or 24 years since we first subscribed for it, but it is also a new friend every week, which we hope to see for a long time to come.

Plain Cross of Roses.

SEE SUPPLEMENT WITH THIS ISSUE.

Plain outlines of flowers in the form of crosses, anchors, wreaths and other devices are not nearly as artistic as the more ornate designs put up by experienced retailers who have a clientele of moneyed people, who do not mind paying the price, so that the goods are what they want. But, unfortunately, all too many of the retailers' customers need low priced designs and, by the time the wire frame, flowers and other necessities are paid for, there is little left over for high priced help to spend much time on them if they are to show any profit. Here the plain designs come in. Customers may be shown photographs or illustrations of such work and can see just what they are going to get, thus avoiding dissatisfaction, either at the price or the design afterwards.

Crosses may be made solid, with flowers of carnations, asters, small chrysanthemums or whatever flower happens to be in season, other flowers being overlaid on these. Or the mossed frame may be covered with green, such as common fern, galax or leucothoe, and the flowers arranged on this, being of course first mounted on stems of suitable length. Other embellishments, such as maidenhair fern, Asparagus Sprengeri, A. plumosus, or anything else that may be chosen, are put on afterwards. This kind of thing should not be overdone. A little of it is very necessary and a decided improvement, but we have seen it used so freely that many good flowers were hidden and the effect was not nearly as good as it would have been had less green been used. It is much the same with flowers. The decorator who crowds in all the stock he can in a given space will never get so good a result as he who uses less flowers and places them more artistically and further apart. Besides this, there is the important matter of cost to be considered, and this is all in favor of the looser, more natural arrangement.

PLAIN CROSS OF ROSES.

Crepe Chasing by Department Stores.

The Baltimore brethren are apparently getting their troubles all around from the department stores. Death notices in the papers are followed up by the manager of one of these stores and a copy of a circular is mailed to the home of the mourners, giving ridiculously low prices on everything, especially in the way of funeral work. For instance, we note this enterprising firm is willing to make crosses from \$1.50 and wreaths from 39 cents up, with gates ajar, anchors, bouquets, palls and other designs at similar low prices. These are all made up of "choicest" flowers. Palms are offered at nine cents each, privet hedge plants at 25 for 35 cents, with the additional inducement to purchasers that "If they do not grow, will give others in place." Verily, the lot of the Baltimore florist will not be a happy one if this kind of thing continues.

February Flowers in the New York Stores.

Though winter blasts are still howling, thanks to the enterprise of the growers, we have an abundance of spring flowers. Tulips, narcissi and freesias are plentiful. Beside these, the lilacs, forsythias, apple blossoms and other forced stock, contribute largely to the beauty of the window displays in the retail stores. About this time of year the fancy of the people turns toward this class of stock. It may be on account of a longing for something that has a springlike appearance, or a desire for a change from the things that are always with us. Golden Spur narcissus may now be seen in fine quality and this is the most popular member of the whole family. There are various other forms of narcissi on the market, but, excepting Paper White, which is in a class by itself, no variety is at all in the race for popularity with Golden Spur.

The tulips, with a charm of their own, are seen today in profusion, their natural loveliness enhanced by the deft hand of the decorator. A good play requires good scenery and stage settings; a fine painting, to be shown with effect, must be well framed and, following this line of comparison, we find that even a box of tulips used for display purposes in a store, can be made more attractive by a few touches from a skillful hand. Crepe paper covers for the boxes and a few pussy willows distributed among the flowers, an improvised handle decorated with suitable ribbon, are among the schemes of the decorators. The cut stock of both tulips and narcissi is being, at present, much used in table decorations. It pleases the "ultimate consumer" and is good for the various branches of the trade, aside from the rose and carnation specialists, but they, it would seem, can afford to bide their time. A fine quality of white lilac is very noticeable in the retail stores. In pots, it makes a fine display; as a cut stock it is used for various purposes. A little of the purple lilac is seen, but the quality is indifferent. The great stock of freesias now on the market is a feature that cannot be overlooked. Purity is very fine and taken as a whole, while this may not be classed as a leading stock, it looms large this

month and is a pronounced factor in market conditions. We do not have to turn to our encyclopedias of horticulture to learn what forget-me-not means. In this business we cannot ignore sentiment, and the sentiments inspired by these little flowers are such as appeal to every true man and woman. We recently noted the use of forget-me-nots in bridal bouquets, and whether the idea is old or new, it is pleasing and appropriate.

We must crave the indulgence of the rose growers and fanciers for neglecting them thus far, but as they will have a great exhibition in this city in March, we expect them to grasp all the honors of next month. Roses of good quality are not particularly plentiful at present and it is just as well that such a condition exists. The other growers are entitled to their turn at the bat and we must all acknowledge that the rose growers have of late been pounding the ball. To further illuminate these statements it may be said that, with the large stock of spring flowers now on the market, heavy shipments of roses would cause a glut, and the present supply is equal to the demand. Though there are some good American Beauties on the market, considerable of that stock is of indifferent quality. Good stock of Richmond may also be seen, but Richmond is not very popular at this time of year. Killarney and My Maryland continue to be the most popular pink roses, with Killarney leading. While Kil-

The beginning of Lent affected the prices of all stocks, but the carnations seem to have suffered more than some others. From the cultural viewpoint, it is doubtful if so many good carnations were ever before seen in this market in the month of February. Enchantress and its sports, White Perfection, Mrs. J. C. Vaughan, Beacon, Victory, Toreador, and other varieties, are showing fine blooms. Blooms of White House and several other seedlings, notably a scarlet, from the range of Dailledouze Bros., Brooklyn, are attracting much attention in this market. In a measure, gardenias are now in close competition with orchids. They seem to be gaining favor for use in corsage bouquets, in preference to cattleyas. Both are used in combination with violets, and the tendency is toward an increased popularity for gardenias. On the other hand, while the cheaper grades are sometimes used in funeral work, there are objections to them for that purpose on account of their heavy perfume, an objection that cannot be raised against orchids. It is needless to add that it is only in high-priced funeral work that either stock is ever likely to be much used. Lily of the valley, always a good stock, is in fair supply and steady demand. There is a steady movement in both lilies and callas. The latter are not over-plentiful and there seems to be something of a revival of their use in funeral work. At George M. Stumpp's store we recently noted a casket cover in

THE FLOODS IN PARIS.

larney has its faults; it is evident that it will stay at the front until it is an assured fact that there is a better pink rose on the market. Nobody denies that My Maryland is a good rose, but the question is, will it pay the growers as much as Killarney? Neither Bride nor Bridesmaid are yet down and out. Good stock of both these roses is yet to be seen, and with the long run of popularity which they have had, they seem likely to be factors in the trade for some time to come.

The carnations are in great crop and fine form, but, from the financial viewpoint, they are having lean days.

which 800 Bridesmaid roses were used in addition to many callas.

J. G. Leikens had recently in the show window of his Fifth avenue store a splendid display of Golden Spur narcissus in the form of an arch in which 2,000 flowers were used. In the center there was a fine effect in orchids and lilies.

At Alexander McConnell's there is a noteworthy decoration in forsythias and many fine azaleas, rhododendrons and other flowering plants.

J. H. Small & Sons have very effective window decorations in primroses, grouped, and apple blossoms.

THE ROSE.

GROWERS of Kaiserin for summer will have to get busy now.

IN the opinion of many growers White Killarney will not displace Bride and the perfect white rose is yet to be found.

BRIDESMAID certainly seems to be on the toboggan, many experienced growers cutting it out entirely, while others are growing plants of it on order only.

RHEA REID is showing much better form with Chicago growers this season than last. Over propagation is thought to have been the cause of the loss of foliage last year.

English Versus French Manetti.

ED. AMERICAN FLORIST:—

What are the comparative merits of English and French manetti stocks? ROSARIAN.

Our good rose growers who do their own grafting concede, generally, that English manetti stocks are superior to French, because they are grown more carefully. All the bottom eyes, which would be liable to sucker, are removed, leaving only about two eyes at the top of the stock. The French stocks, as far as I have used them, have not had this careful treatment. The English stocks, moreover, are carefully graded into sizes (diameters) better than the French. ROBERT CRAIG.

We have used so little French manetti that we really have had no chance to compare it with the English.

We graft a great many roses and believe that Irish, English and Scotch are the best, though they cost very much more than the French. We therefore buy the best we can get, but have had no chance to make comparison. This year we have been unable to get our full supply of Irish, Scotch and English manetti stocks, and therefore have placed our order for some French, but have not received them yet. A. N. PIERSON.

I have never made a fair comparative test of the French and English manetti stocks. Am using English this year, as the French is very hard to get. Under ordinary conditions I have doubted if the English stocks were worth the additional cost, compared with good French stocks. W. H. ELLIOTT.

I regret my inability to answer the above inquiry as my experience has been altogether with English grown manetti. LAWRENCE COTTER.

We have never used any English manetti stocks. HOOPES, BRO. & THOMAS CO.

German Opinion on Roses for Forcing.

The cultivation of roses in pots remains still an important branch of commercial gardening, notwithstanding the advances made in cultivation in the open ground and on benches in the American mode. With pot culture it is possible for anyone with standing room for pots to force roses, and the raising of varieties well fitted for producing fine blooms on forced

plants has given a renewal of life to rose culture under glass. We give here the names of modern varieties suitable for either early or late forcing.

Gruss an Achen (polyantha).—Excellent as a pot rose, or for cutting when short stalked flowers are required. It is a profuse bloomer, color light rose, with a yellow tinge, sometimes coming of large size, full and fragrant.

Mrs. W. Cutbush (polyantha).—Flower light rose, coming in great bunches; it is presentable for a long time and a continuous bloomer; growth compact and bushy; resembling Mme. N. Levassieur, one of its parents.

Richmond (hybrid tea).—A half full flower of middle size, in color a fiery scarlet, an enduring color, which the earliest forcing does not spoil. Flowers are produced on every shoot, and these are of great length. The finest blooms come on plants grown in moderately heavy soil.

General McArthur (hybrid tea).—Flower brilliant scarlet, pretty flower bud, full and enduring when cut from the plant, very good for autumn flowering.

Elsie von Schwichow (Red Caroline Testout).—In every point excepting its color, which is brilliant carmine, this resembles its namesake. A fault found in the variety is that the shoots are as prickly as those of C. Testout.

Pharisaer (hybrid tea).—The flower is of a light rose tint, having a dark shade; very long well formed bud, which when half open is very ef-

BEGONIA GLORY OF CINCINNATI, NOW OFFERED BY J. A. PETERSON, CINCINNATI, O.

Begonia Socotrana Crossed With Sport of B. Gloire de Lorraine.

BEGONIA PATRIE AS GROWN BY SAMUEL MURRAY, KANSAS CITY, MO.

fective. It is one of the best long-stalked roses, whether in the open, in frames or forcing house. The blooms bear transport without injury, and come on continuously after the first cutting, the second flowers being the equal of the first crop.

Reichskanzler (hybrid tea).—Color a beautiful pink, with a silvery sheen; blooms very large, full and with the fragrance of La France. Flower stalks always long till the end of the season. In growth the plant resembles J. C. Schmid's Otto von Bismarck, but its identity with the latter is not as yet ascertained.

Mrs. Aaron Ward (hybrid tea).—The bloom is alabaster white, and light rose. Apart from the color effect, it has a pretty flower bud, a good full shape, and pleasant fragrance. For cutting it is excellent, and requires a heavy soil.

Mme. P. Varin Bernier (tea).—The flower varies from light to deep yellow, is moderately full, and strongly fragrant. The bud is magnificently ornamental, and should be cut at an early stage.—Die Gartenwelt.

PITTSFIELD, MASS.—S. G. Barnes has opened a retail business here with Robt. L. Smith as a partner.

Begonia Patrie.

The illustration herewith gives a good idea of the new begonia sent out by Lemoine of Nancy, France (the originator of B. Gloire de Lorraine), whose description we append: "This new winter flowering begonia is a hybrid between B. Socotrana and a variety of B. Pearcei, a tuberous species with velvety foliage and yellow flowers. It has the same growth as B. Gloire de Lorraine, but is distinguished by its greater vigor, its more stocky habit, by the nature of its larger, more solid and fleshy leaves, and lastly by the more vivid color of its flowers. Its culture is also much easier, and its propagation more rapid.

"The flower clusters cover the plant like a dome, and bend in graceful curves. The flowers, almost all male, are four-petaled and almost as large as those of B. Gloire de Lorraine; their color is a deep, coppery salmon red with a lighter reflex; they are so numerous that a plant 10 inches high and of the same diameter bears several hundred at a time, for each flower is extremely lasting; like those of B. Gloire de Lorraine, its flowers remain persistently on their pedicels, never falling, but remaining fresh for more than a month without fading. It flowers from November to April. We con-

sider Begonia Patrie a plant with a great future. It will rival B. Gloire de Lorraine, which we gave to horticulture 15 years ago, and we have reason to believe that those who have cultivated this latter with success and profit will be equally interested in this new introduction."

Repotting Geraniums.

ED. AMERICAN FLORIST:—

I have a lot of stock plants of geraniums in 4-inch pots which I have been taking cuttings from. I want them for spring sales, but they are now pot bound. The demand for 5-inch stock is small and I would like to repot them in the same size pots. Would it be advisable to take off part of the top soil and repot with fresh soil, and how much bone flour would you use?

G. A. R.

This would be an excellent plan. Remove the greater part of the soil when repotting and shorten the strongest roots a little, then repot firmly in the same size pots. One to two quarts of bone meal to a wheelbarrow load of soil, according as this is good or the reverse, will be about right.

G.

The Fancy-Leaved Caladiums.*

SPECIES.

C. speciosum, *C. venosum* and *C. Albanense*.—These three species represent a new type, which has rather long, pointed, narrow leaves, lacking the hind lobes or appendages. They were discovered by L. Forget in Brazil, and introduced by H. F. Sanders in 1897. Descriptions of these will be found in a previous paragraph.

C. sagittatum. Leaves blue green, sagittate. Brazil. Ill. Hort. xxxviii, p. 138.

HYBRIDS OF *C. BICOLOR* AND ALLIED FORMS.

Candidum (Bl.) Pure white ground, green ribs and veins. One of the finest varieties and very distinct.

Euterpe (Bl.) Center and ribs bright red border glossy green, densely spotted white.

Ibis Rose (Bl.) Delicate pure rosy red, petioles green. A rather weak grower.

Madame Alfred Bleu Major (Bl.) Dark green with metallic lustre, deep red ribs and veins, interspaces spotted pure white.

Ornatum (Bl.) Ground color deep olive-green, deep red midrib and nerves. The entire leaf is covered with a network of deep red veins. Very distinct and beautiful.

Triomphe de l'Exposition (Bl.) 1867. Large glossy crimson center and ribs, green border.

Acary (Lietze.) Violet ribs and center, lighter red zone, green border, conspicuously dotted with large carmine spots.

Araras (L.) Immense leaves, white and pink, green ribs and veins.

Arassuahy (L.) Most beautiful rose colored leaf with a golden hue, ribs and veins green edged with a fine thread-like golden stripe.

Bahia (L.) Leaves first milky-white, becoming overlaid with a most exquisite deep pink or rosy-red color.

Barao de Mamore (L.) Center and ribs very dark red and interspaces greenish gray. Later in mature leaves the interspaces change first into a beautiful pink and finally into almost pure white. Medium grower, and a favorite everywhere.

Bendego (L.) A seedling of a hybrid, fertilized with the pollen of *Alocasia plumbea*. Rose colored leaf with metallic lustre, dark green ribs and veins.

Bilontra (L.) Transparent violet-blue center, pale green zone, deep green border.

Caxias (L.) Large cream-colored leaf, crimson-brown ribs, very satiny.

Diamantina (L.) One of the finest. Ground color a deep pink or rosy red, transparent, glittering like mother-of-pearl, carmine ribs; the color of the center extends into the deep green border in the form of pearly white spots.

Dr. Augusto de Castro (L.) Very vigorous in growth with large painted leaves. Ground color white veined green and red, very conspicuous crimson ribs, bordered very dark red.

Dona Carmen de Macedo (L.) Transparent rosy red with light green ribs and veins. Very beautiful.

Gartendirektor Gireond (L.) Creamy white ground color, red spots, white ribs and clouded deep green. Very effective.

Itapocu (L.) Large red leaf with deep metallic lustre.

Mucuripe (L.) Center pink, suffused with rose, border pea green with numerous delicate violet veins, ribs violet.

Porto Novo (L.) Pink center, white zone and ribs, border deep green, conspicuously spotted all over with very

deep reddish markings, surface very wavy.

Lord Derby (Bause) Vivid deep rose ground-color, conspicuous green ribs and veins.

Clio (Bl.) Deep green, with many large transparent pink spots and numerous scarlet freckles.

Jacob Weiss (L. v. H.) Center and ribs vivid orange scarlet, light green zone and dark green border, spotted crimson and deep rosy red.

Racine (Bl.) (Pronounce Rasang.) Heart-shaped leaves, ground color rosy-red, mottled with pink and green.

Max Kolb (Bl.) Dark green ground color, light green center, blotched deep red. A favorite in most collections.

Hildegard Nehrling (N.) and *George Huster* will be described under "Caladiums of American Origin."

Coacoochee (Mead.), *Fascination* (Jaenicke.), *Snow Storm* (Jaenicke.), *Torchlight* (Jaenicke.), *Truce* (Jaenicke.), are also American and will be so described.

Lady Dorrington (Bl.) Will be described under "Recent European Productions."

Cardinale (Bl.) A red variety which will be described later.

B. S. Williams (Bl.) This variety will be described under red caladiums.

Castelnau (L.) Will be mentioned under the Amazonicum section.

Mrs. Oliver Ames (?) Will be taken up in another section.

The following varieties are not in the collection at the Missouri Botanical Garden, but they can be recommended as having exceptional merit:

Alexander III. (Bl.) Immense shield-

like leaf, very brilliant glowing red, netted deep bronze, edge bronze green.

Alfred Mame (Bl.) One of the richest of all caladiums. Center a deep satiny crimson, very glossy, which color pervades into the golden bronzy green border, spotted rosy red.

Anna de Condeixa (Bl.) Large finely shaped leaf, center purplish-rose zone a mixture of dark green, yellowish green and white, green border.

Ceres (Bl.) Center salmon colored, rosy ribs, green border.

Eucharis (Bl.) Center beautiful transparent rosy red, narrow green border. Magnificent.

Gaston Chandon (Bl.) Creamy white. *James H. Laing* (Bl.) Very large leaves. Ground color metallic deep-green, suffused entirely with coppery red, a little white and moss green, ribs pink.

L'Autonne (Bl.) Beautiful satiny white leaf with large transparent light-blue spots.

Mme. Groult (Bl.) Ground color rosy red, deep red ribs and veins, dark green border, dotted everywhere with white. A very complicated color and difficult to describe.

Mme. Imbert Koechlin (Bl.) Large creamy-white leaves spotted with crimson.

Mad. Jules Picot (Bl.) Deep pink, green ribs and veins, very effective.

Mme. Marjolin Scheffer (Bl.) Immense leaves, snowy white when fully developed with vivid scarlet ribs, border deep green, leaf stems jet black.

Maxime Duval (Bl.) Large vivid red center with glossy violet or purple sheen, deep green border.

TRANSPARENT CALADIUMS.

*A. Nehrling's paper commenced in the issue of July 10, 1909, and was continued in the issues of July 31, October 9 and November 27, 1909, and January 8, 1910.

CALADIUMS IN LATH SHED IN FLORIDA.

Michel Buchner (Bl.) Entirely glossy deep golden red. A medium grower.

Vesta (Bl.) Center salmon red, greenish white ribs and veins, spotted white.

Adamastor (L.) One of the richest and most magnificent of all caladiums. Ground color a deep transparent glowing red, with violet and golden reflections, narrow green border.

C. E. Dahle (L.) Large and very beautiful leaves, center white suffused with pink, this color encroaching into the pea green border, a few large rosy violet spots. Very distinct.

Hortulania (L.) A wonderfully beautiful variety. Ground color a deep rich transparent rose, deeper red ribs, the entire leaf delicately veined white. One of Mr. Lietze's triumphs. Unfortunately weak in growth.

Imperatriz Thereza (L.) One of the most distinct and showy of all caladiums. Ground area pure transparent white suffused with pink, ribs and veins deep blackish-green.

Itacoatiara (L.) Ground-color a fine lilac veined green, ribs blackish-brown, border green. Very distinct.

Itaqui (L.) Blackish red ribs bordered white, interspaces and border green with many pink spots. Leaf stalks jet black.

Itauna (L.) Creamy yellow, with many large deep red spots.

J. Dehmloew (L.) Deep red center, with broad yellowish white border. Beautiful.

Rio Claro (L.) Beautiful transparent rosy red center, carmine ribs, green border—the latter densely covered with white pearl-like spots. Very popular.

Rio de Janeiro (L.) This has been pronounced by specialists as the most exquisite and gorgeous variety ever raised. Its dazzling and varied coloration baffles description. Ground color a deep transparent rose with deep red ribs and veins; everywhere along green border rose-colored white-edged spots. Many leaves are entirely deep rose, others are mottled green and deep rose. Indescribably grand in masses.

Fascination (Jaenicke.) Center very beautiful rose, suffused with pink and white often also with salmon orange—pea-green zone, dark green border, ribs light red. Strong in growth and very distinct and effective; new color.

Ivory (Jaenicke.) The most beautiful white caladium yet introduced. Pure ivory white, of medium but bushy growth, leaf stalks green.

Shellpink (Jaenicke.) Ground color milk white, center a fine shell pink. New color.

Snow Storm (Jaenicke.) Deep glossy green, with pure white ribs and veins, sometimes entire leaf as if covered with snowflakes. Strong in growth.

Torchlight (Jaenicke.) Of medium growth, with glowing red center and narrow deep green border. Very brilliant.

Truce (Jaenicke.) Beautiful glossy white with mother-of-pearl reflections. One of the finest of all caladiums.

P. W. Reasoner (N.) Gigantic leaves and vigorous in growth. Green, center light green, many pure white spots, short midrib.

CHAMPAIGN, ILL.—Thos. Franks and Son are building a large addition to their greenhouse on South Goodwin avenue.

Twenty Years Ago.

FEBRUARY, 1890.

Henry Vilmorin, of the well-known French seed house, was decorated as an officer of the Legion of Honor and celebrated the event by a banquet to 410 of the firm's employees.

Dr. Parry, the well-known botanist of Davenport, Ia., died February 19 at the age of 66 years. He was an intimate friend of Asa Gray.

Mme. Hoste was a favorite rose in the New York market. Growers for other eastern markets said it was their most profitable rose.

Gesneraceous plants, such as gloxinias, gesneras, achimenes and tydeas were much more popular than now.

The late Edgar Sanders was delving into the past and writing about it very interestingly in THE FLORIST.

John McGowan was working up stock of his new carnation, Lizzie McGowan.

The Florists' Exchange, of Baltimore, Md., was incorporated February 1.

DELAWARE, ILL.—N. O. Caswell had the decorations at the Henderson-Hess wedding in Hopedale recently.

NEWELL, W. VA.—The annual business meeting of the stockholders of the Lake Newell Floral Co. will not be held until the return of Geo. W. Clarke from his extended business trip west. Mr. Clarke is one of the main stockholders in the company. He will probably return to this city the latter part of the month or early in March. In the meantime the old officers of the company have charge of the business.

Cornell Horticulturists.

In connection with the institute held at the State College of Agriculture, Ithaca, N. Y., an interesting exhibition was made. A good display of cut flowers, especially in carnations, was staged. Among the prominent commercial growers represented were the following: W. J. Palmer & Son, Buffalo, with a large group of standard varieties. The big vase of Afterglow in this lot was especially fine. The Cottage Gardens, Queens, N. Y., were represented by good vases of Alma Ward and Mrs. C. W. Ward, and several vases of the older kinds. Baur & Smith, Indianapolis, Ind., had Rose Pink May and Pocahontas in good shape. The Chicago Carnation Co., Joliet, Ill., sent fine examples of Conquest and Mary Tolman. Wodenethe, the new white, from F. E. Witney, Fishkill, proved very fine and attracted much attention from the growers who were present. W. W. Coles, of Kokomo, Ind., showed an attractive bunch of Mrs. W. W. Coles. The Lam-born Floral Co., Alliance, O., sent a vase of its White Lawson sport, and the Dorners had a very nice display of Scarlet Glow, Hoosier Lad, Winona and Pink Delight. Among the miscellaneous displays were a choice lot of lily of the valley from A. N. Pierson, Cromwell, Conn., a generous lot of double violets from the Rhinebeck Violet Growers Association, and a varied assortment of odds and ends by Siebrecht & Son. A very instructive display of about 18 varieties of forced sweet peas was shown by the college greenhouses. This exhibition was a new departure in the institute work and added much to the pleasure and instruction of the visitors. Prof. Judson, of the horticultural department, had the matter in charge and considering the short notice to the growers made the affair a success.

The recent horticultural meeting at the college called out a strong attendance of practical growers and nurserymen. The programme as arranged by Prof. Craig was full of good things and there was something doing every minute. The large room in which the meetings were held was filled to its utmost capacity and standing room only was a frequent condition. Among the essayists on the list were F. R. Pierson, president of the Society of American Florists; Prof. John Craig, Prof. H. H. Whetzel, C. R. Crosby, G. W. Herriek, C. S. Wilson, Prof. John F. Cowell, H. W. Riley, Samuel Frazier, W. W. Ware, H. B. Fullerton, T. Greiner, C. C. Vincent, C. E. Hunn, E. W. Catchpole and W. L. McKay.

On Thursday the Cornell Horticultural Union held a session occupying the entire afternoon, with a programme consisting of short talks by practical growers and professional men, under the direction of President Catchpole. Demonstrations of sprays and spraying machinery were of daily occurrence. Papers on "Top Working," "Lime Sulphur Preparations," "Tests," "Diseases of Fruit Trees," "Orchard Fruits," "Control of Fruit Diseases" and "Injurious Insects" were of especial interest to nurserymen. On Thursday evening came the first annual banquet of the Horticultural Union, which proved an immense success and a most enjoyable affair. Lime and sulphur

solutions were not used as a spray at this gathering. A very creditable exhibit of fruit to illustrate the storing and packing of apples and pears was arranged by E. W. Catchpole.

J. F. C.

The Cut Flower Industry.

A paper read by C. L. Washburn, Chicago, at the annual meeting of the Illinois State Florists' Association at Champaign-Urbana, February 15-16.

The cut flower industry of the state of Illinois has made a most remarkable progress in recent years. To fully obtain an idea of this industry we must look back some 18-20 years and compare the business then with the present time. The business then was not considered of any importance by the other commercial lines of trade, but of late years it has been recognized as one of the standard industries of the state. The quality of flowers 20 years ago would not compare with the quality handled at the present time. The stems of the best grade of roses then were only 12-15 inches long and American Beauty had stems only 30-36 inches long. Carnations were about the size of a quarter dollar, but as the demand kept calling for a better grade of flowers, the growers kept improving the quality of their product. Prices also averaged better as the quality improved. Flower buyers all through the country began to see that the better quality of flowers lasted longer as well as looked better and they preferred paying a fair price for good flowers to buying the smaller stock at lower figures. These facts compelled the growers to raise improved varieties of plants and also use better facilities and better houses in which to grow their stock.

EVOLUTION OF THE INDUSTRY.

The evolution in the cut flower industry is one continual effort towards better flowers and better methods of growing and shipping the stock. This is a peculiar feature of our line of trade for, in the competitive strife of business, we are continually on the lookout for new ideas, new varieties of plants, new methods of construction and everything else pertaining to our business which can in any way improve our output. The experiment station here at this college should prove of immense value to the florist trade, of this stature, as a large number of the new things can be tested before being offered to the trade. In fact, it would be a good idea if the trade would insist on a trial test of some of these new things before being offered for sale and a certificate from this station showing the results that were obtained from such a trial would be of immense value towards determining the quality of the goods offered for sale.

HOUSES FOR CUT FLOWER GROWING.

The growing end of the cut flower business has to keep up-to-date in everything regarding new varieties of plants, better methods of ventilation and the most improved fertilizers, fumigating compounds, etc. The houses themselves must also be kept up-to-date. The question of what is the best greenhouse is a hard one. It is generally acknowledged that a separate house is considered best for American Beauty and other roses, while for carnations and other plants

a number of connected houses seem to do as well as separate houses, while they cost less money to build and operate. A separate house should be at least 26 or 28 feet wide, if not wider, and seven to eight feet to the gutters. This will give a large body of air and a more even temperature. Such a house, if built of all iron construction, would cost complete, including its share of the heating and other apparatus, about 50 cents per square foot of glass, while a wooden house costs from 25 to 35 cents per square foot. The cost of running a greenhouse depends largely on the quantity of glass handled, but for the average place the fuel cost can be estimated at three to four cents and the labor at eight to ten cents per square foot of glass. The supplies and repairs cannot be very well estimated, as they depend on the quality of the house, etc.

CHANCE FOR BEGINNERS.

In the cut flower industry there is a continual struggle for improvement at all times and I do not know of any industry in which a man stands a better show for success if starting in new. One must, of course, have experience in the growing of the stock, but there is as good if not a better chance for individual effort in our line of trade than in any other. There never can be any monopoly or trust that would control the output or sale of the flowers for that output is raised in a thousand different places. Every man stands on an equal footing as far as the market demand is concerned, for there is no combination to help or restrain trade to any firm or set of firms. The selling of the greenhouse products, whether cut flowers or plants, is just as important a branch of the business as the growing end. No matter how good the stock is or how carefully the greenhouses have been run, all would be wasted if the product is not well sold.

SELLING METHODS.

There are two methods of selling: In one the growers sell their own stock, having their own grades and methods of sorting and of course know just when the stock was cut. A grower who sells his own stock usually caters to some special class of buyers, as the shipping trade for instance. This trade requires flowers cut tight in the bud and careful sorting and packing in order to ship to arrive in good condition. Flowers can be shipped a distance requiring them to lay packed in the boxes 48 to 60 hours. These very long distance shipments demand the utmost care, especially as to the weather conditions. During warm and wet weather it is very hard to have carnations arrive in good condition when shipped a long distance. Roses will ship in better shape during such weather. The grower who sells his own stock should take pride in having an even run of flowers in each grade. The other method of selling consists in shipping flowers to a commission firm to be sold for the account of the shipper. There are a number of such firms in the larger cities that make this selling on commission a specialty. Their charge for such work is 15 per cent of the gross sales. It is worth this amount to handle the stock right. The expenses of selling are almost this

MEMBERS OF THE ILLINOIS STATE FLORISTS' ASSOCIATION AT CHAMPAIGN, FEBRUARY 15, 1910.

amount with the larger commercial growers.

THE TRADE IN ILLINOIS.

The cut flower trade is very favorably located as far as Illinois is concerned. Our shipping facilities are unsurpassed. We supply flowers to an immense territory, going east as far as Buffalo, Pittsburg and Washington, south to the Gulf of Mexico, west to Colorado, Montana and the Dakotas and north as far as Winnipeg. This immense scope of country drains to Illinois a continual flow of money from our sales. The cut flower industry is not a jobbing trade where the most of the money received for the goods goes off to another state in payment for them, but is what might be called a manufacturing enterprise. The grower takes a piece of ground and covers it with glass. He is what might be called an intensified farmer as, from the space under his glass, he irrigates his plants, he ventilates them, he controls the temperature in cold weather by artificial heat and sometimes raises two or three crops a year from the same bench space. This product is the result of steady labor for 365 days in the year. There is no let up, but one thing crowds onto another, so that there is always something to be done.

A greenhouse is a very beneficial industry to any town. The outlay for labor and supplies is just so much cash that is brought right there to be spent and when the total amount of glass is considered in the state of Illinois, estimated at a value of about \$18,000,000, the magnitude of the trade can be appreciated. There is a total business in cut flowers and plants grown in this state of at least \$5,000,000 per year. A good share of this immense sum is drawn here from other states and all of this sum is expended right here. It will thus be seen that the cut flower industry is one of the most solid foundation stones on which the prosperity of the state of Illinois is built.

YONKERS, N. Y.—F. Knapper was injured recently by jumping off a street car which left the rails at the center of Park and Ashburton avenues. He sustained a shock and a bruised nose.

ILLINOIS STATE FLORISTS.

Fourth Annual Convention.

The fourth annual convention and exhibition of the Illinois State Florists' Association held in the buildings of the University of Illinois at Champaign, February 15 and 16, must be recorded as the most successful in the history of the organization. The exhibits were of high quality and fairly representative of the various producing centers of the state. The trade visitors numbered about 100, and the meetings were well attended and full of enthusiasm. Special interest, of course, centered in the fine new greenhouse plant of the experiment station and the work going on therein. This is a thoroughly up-to-date range, specially designed for experiment work in the growing of vegetables and in floriculture along strictly commercial lines. The use of artificial fertilizers on carnations is the principal work now in hand, this being in its second year. It is expected that some preliminary account of the experiments will be issued during the present year. The entire proceedings of the convention were of such an eminently practical character as to impress everyone taking part in them with the great practical value of the work now going forward under the auspices of this association.

The opening session of the convention was promptly called to order Tuesday afternoon by President Gullett, who introduced President James of the university for the address of welcome, which dealt mainly with the place of his institution in educational matters, P. J. Foley responding. The reports of the secretary, treasurer and advisory committee were then presented. The session closed with an address by Professor J. C. Blair on "The Value of the Experiment Station to the Florists, and the Duty of the Florists to the Station."

On reassembling at 9 o'clock Wednesday morning, Prof. J. W. Garner

gave an address on "Outdoor Art," C. L. Washburn followed with an address on "The Cut Flower Industry of Illinois." Prof. H. B. Dorner then gave an interesting address covering the work and progress at the Experiment Station greenhouses, which was followed by a lively discussion on the subject. C. L. Washburn and I. L. Pillsbury suggested the appointment of a committee to consider the matter of uniformity in the grade of cut flowers offered by growers and dealers, and President Gullett appointed C. L. Washburn, Chicago, Frank B. Smith, Danville, and C. M. Dickinson, Chicago. Resolutions by W. N. Rudd were adopted, one embodying the recommendation that O. C. Simon, the well-known Chicago landscape architect, be added to the University commission on campus and grounds and the other covering a new appropriation for the experiment station. Another resolution, by J. C. Vaughan, advocated the conservation of public grounds and waterways. The constitution was amended to permit the executive officers to arrange the date and place of the annual meetings and exhibitions. The election of officers resulted as follows:

C. L. Washburn, Chicago, president.
Chas. Loveridge, Peoria, first vice-president.

J. F. Ammann, Edwardsville, Sec'y.
F. L. Washburn, Bloomington, treasurer.

Members and friends to the number of about 100 participated in a banquet at Beardsley hotel, Tuesday evening, P. J. Foley officiated as toastmaster in his usual happy style, Dean Davenport made the principal address of the evening, touching the place of Illinois in agriculture and allied industries. The other speakers included Mr. Harris, representing the Chamber of Commerce, Prof. Blair, Messrs. Vaughan, Loveridge, Gullett, Balsley and Mrs. Blair.

Judges' Report.**CARNATIONS SCORED.**

R. Witterstaetter, Cincinnati, O.—Pres. Valentine, 85 points.
Chicago Carnation Co., Joliet.—Mary Tolman, 85 points.
W. W. Coles, Kokomo, Ind.—Mrs. W. Coles, 85 points.
F. Dorner & Sons Co., Lafayette, Ind.—No. 4206, 85 points.
R. Witterstaetter, Cincinnati, O.—No. 1407 O, 80 points.
A. C. Brown, Springfield.—Superba, 80 points.
Chicago Carnation Co., Joliet.—Conquest, 85 points.
A. C. Brown, Springfield.—Optimo, 75 points.
A. C. Brown, Springfield.—Clara Mae, 65 points.
W. N. Rudd, Morgan Park.—Greenwood, 86 points.
E. G. Hill Co., Richmond, Ind.—Annie May, 86 points.
Chicago Carnation Co., Joliet, and A. C. Brown, Springfield.—Sangamo, 85 points.
E. G. Hill Co., Richmond, Ind.—Mrs. Beckwith, 81 points.
E. G. Hill Co., Richmond, Ind.—J. W. Riley, 81 points.
A. C. Canfield, Springfield.—Red Nelson Fisher, 80 points.
Anton Then, Chicago.—No. 291, 74 points.
Baur & Smith, Indianapolis, Ind.—Shasta, 85 points.
F. Dorner & Sons Co., Lafayette, Ind.—White Wonder, 87 points.
Anton Then, Chicago.—No. 41, 83 points.
F. Dorner & Sons Co., Lafayette, Ind.—Hoosier Lad, 88 points.
F. Dorner & Sons Co., Lafayette, Ind.—Scarlet Glow, 85 points.

HONORABLE MENTION.

Chas. Loveridge, Peoria.—Fine display of carnation in standard varieties.
Bassett & Washburn, Chicago.—Carnation O. P. Bassett.
A. C. Canfield, Springfield.—Display of carnations in standard varieties.
Joseph Heinl & Sons, Jacksonville.—Vase of carnation White Enchantress.
Wirth & Gaupp, Springfield.—Display of standard varieties of carnations.
A. Washburn & Sons, Bloomington.—Display of standard varieties of carnations, sweet peas and violets.
Henry Baer, Peoria.—Display of standard varieties of carnations.
Chas. Knopf Floral Co., Richmond, Ind.—Carnation Mrs. Chas. Knopf.
Chicago Carnation Co., Joliet.—Extensive display of carnations including, Pink Delight, May Day, Beacon, Afterglow and Alvina.
Henry Eichholz, Waynesboro, Pa.—Carnation Washington, considering it an improvement over Rose Pink Enchantress, also carnation Alvina.
Henry Johann & Son, Collinsville.—Vase of assorted varieties.
W. C. Hill Floral Co., Streator.—Display of seedling and standard varieties of carnations.
J. F. Ammann, Edwardsville.—Vase of assorted varieties of carnations.
W. N. Rudd, Morgan Park.—Vase of assorted carnation seedlings.

SPECIAL MENTION.

The judges considered the exhibit of roses, taken collectively, of great merit and considered the following to be worthy of special mention: :
Wendland & Keimel, Elmhurst.—Killarney and White Killarney.
Bassett & Washburn, Chicago.—Bridesmaid.
W. H. Gullett & Sons, Lincoln.—White Killarney.
J. F. Ammann, Edwardsville.—Killarney, Mme. Chateau and Ivory.

Poehlmann Bros. Co., Chicago.—My Maryland and Killarney.

CERTIFICATE OF MERIT.

J. A. Peterson, Cincinnati, O.—Begonia, Glory of Cincinnati.
Frank B. Smith's Sons, Danville.—Display of flowering plants, including cinerarias, Primula obconica, cyclamens, violets, panises, tulips, etc.

HONORABLE MENTION.

Aug. Jurgens, Chicago.—Display of single and double daffodils.

President-Elect-Illinois State Florists' Association

Photo of 1897. He's Older Now.

Secretary Ammann's Report.

Your secretary begs to report a total membership of 175, divided as follows: Life members, 18; annual members, 153; honorary members, 4. There has been one death in our ranks during the past year namely J. B. O'Neil, of Chicago, whose early demise we all deplore. We have increased our life membership by seven. The number of annual members taking out life membership, having been greater than the new annual members received, has decreased our annual membership by two.

The trade papers have, as usual, given us good assistance in our work, and we all feel much indebted to them for it. Much progress has been made in our experimental work, which will be reported to you more fully later by Secretary Rudd of the advisory board.

In the matter of data I am sorry to report very slow progress. It seems there are still a great many florists throughout the state in a dormant condition who need forcing. For instance: Out of 400 return postals mailed, I received 125 answers, so you see the percentage of dormant stock is large. I believe, however, I have sufficient data to make a fairly accurate estimate on glass throughout the state as soon as same can be computed, which I regret to say I have so far not found time to do.

The membership of this society should be larger. I regret to say the officers (especially vice-president) do not give this important part of our work the attention it should have. Some means should be devised by which our membership would be materially increased. Present members who are in arrears for dues should be

urged to pay up and take more interest. The secretary has tried various means through correspondence to accomplish results on these lines, but so far has received little encouragement for his work.

Report of the Advisory Board.

Your board begs to report that since the last annual meeting of the association three meetings of the board have been held, two at Urbana on July 12 and December 27, respectively, and one at Chicago on February 4. The board would state that the work entrusted to it has not suffered by reason of the small number of meetings, but, on the contrary, the business has been thoroughly attended to, while as each meeting causes an expense which must come out of our fund, money has thereby been saved and added to the amount available for the practical work.

At the meeting of July 12 the full board was present, as well as Messrs. Blair, Dorner and Nehrling of the station staff. Financial statements showed something over \$200 of the appropriation unexpended on July 1. The report showed roughly that about one-half of the appropriation, namely \$7,500 or a little more, had been expended for buildings and equipment, and also that nearly an equal amount had been contributed from the general station fund toward the building of the new greenhouses which had cost about \$14,000. In this connection it is proper to make known to you the grand support which has been given us by Dean Davenport and Professor Blair. They have shown the greatest interest and enthusiasm in our work, and, although it is a well-known fact that their general funds are scanty, placed at our disposal nearly \$7,000, which enabled us to complete the greenhouse plant and get to work in a thorough and systematic manner.

Mr. Dorner read a general report of his work for the past year, that is, the year 1908-09, with suggestions for the work to be taken up during the coming year. This report was carefully considered, the matter viewed from all points, and it was decided to continue the fertilizing experiments on carnations, and also, on the completion of the new houses provided for below, to take up a similar line of work with roses, together with some work on cucumbers. It appearing that by economy the amount could be spared, the sum of \$4,500 was appropriated to complete one new double greenhouse similar to the one previously built with an additional boiler, if possible.

At the meeting at Urbana, December 27, a financial report was presented showing that the amount expended, together with the amount still unpaid on the new houses, was about \$4,651, making the total cost of the plant as you see it today about \$18,650. It was stated that this would leave a deficiency of about \$1,140 to carry forward the work to the end of the fiscal year, when the second half of the appropriation would be available, but that this deficiency would be taken care of for us from other funds until our own money was available. The balance of the meeting time was taken up, as usual, by a careful inspection of the houses and the work being done and an extended discussion of the same.

The meeting of February 4 was held at Chicago, Messrs. Davenport, Blair and Dorner from the university and the full board being present, as well as many local florists who had been invited to attend the meeting, so that explanations of the work being done could be made, and as much interest as possible aroused. A general discussion ensued, and it was the sense of the meeting that the results of the

work to date were satisfying and encouraging, and that the work should be pushed vigorously, not only along the lines heretofore taken up, but it should be expanded in every possible direction in so far as the funds available would make it possible.

In closing this report some explanation would seem to be needed. The reason for taking up the study of fertilizers was that it seemed to be the one subject of greatest interest to the florists of the state at large at the present time. The reason for selecting the carnation for the beginning of the experiments was that in certain ways

No resolution was offered endorsing the corporation tax or Forester Pinchot's removal.

J. A. Peterson's Begonia Glory of Cincinnati was still holding its big heads of bloom.

Of course it was only natural and proper to suggest improvements in "our" campus.

The Elmhurst Killarney roses is a very superior brand of those popular varieties.

Rudd plied his hammer on the lack of landscape art on the college campus.

W. N. Rudd's vase of seedlings was noteworthy.

THE AGRICULTURAL BUILDING AT URBANA, ILL.

it was the most available and desirable plant to begin with, and that a good share of the results would be almost equally applicable to other florists' flowers and, with the space available, only one variety could be handled in the complete and comprehensive way desired. The reason that no results have been published is that while much of interest has been learned, everything must be verified by repeated experiments, as conditions affecting any one series of tests might interfere with the accuracy of the conclusions drawn, and it was strongly put before the board and concurred in unanimously by it, that it was much better to let the florists wait for their information than to take any possible chance of giving them information which might, by subsequent test, be found wrong. In conclusion the board wishes to extend its thanks to Dean Davenport and Professor Blair for the many courtesies shown, to express its confidence in Mr. Dornier, and its great satisfaction with the able way in which he has handled our work, of which he had been directly in charge.

Respectfully submitted,
W. N. RUDD, Sec'y.

Convention Notes.

Mrs. Blair has all the talent of speech that comes of brevity, and Toastmaster Foley forgot all his native gallantry in placing that estimable lady so far down the programme.

Toastmaster Foley did not fail of his duty in encouraging bachelors President Gullet and Secretary Dornier to join the married ranks.

Champaign is all right, but what is the matter with Rockford, Rock Island, Danville and other places as convention cities.

Messrs. Dornier, Nehrling and Franks handled a lot of exhibition material with much dispatch and good taste.

Now encourage the ladies to aid the cause with an auxiliary which shall bring them with us.

Prof. Dornier distributed a timely sheet explaining the experimental work then in hand.

J. A. Evans was exploiting his new ventilator to be offered this season.

Nic. Zweifel's Bright Spot takes well with the carnation growers.

The Square Deal Club was still in session when the last train left.

Much wear and tear on the coal bins was the general report.

Ammann is the pattern of florist that is needed everywhere.

Anton Then remembers Logansport and Gilman only as life-saving stations.

THE AUDITORIUM, URBANA, ILL.

Where Exhibition of Illinois State Florists' Association Was Held This Week.

Phil Foley was showing his new wrought-iron gutters.

The experiment station greenhouses were in fine order.

Dean Davenport is genial, practical and convincing.

Champaign is dry in the stormiest weather.

Personal.

Mrs. Edwin Lonsdale's wide circle of friends will be pleased to learn that the climate of Lompoc, Calif., has been very beneficial to her impaired health.

H. E. Philpott and wife, of Winnipeg, Man., are in Vancouver.

ALL plant orders at retail must amount to \$1 or more, says the Storrs & Harrison Co., in its general spring catalogue.

GLADIOLUS LEMOINEI PINK BEAUTY, an early deep pink variety of European origin, will be offered by Holland growers this season.

WHEN friends of the fruits, flower and field, gather and consult in harmony as at Champaign, Ill., this week, much may come out of it for the good of all.

YOUR name is rightly booked in our Trade Directory—at least we suppose it is if you do not advise us. If you make any changes this season, please drop us a postal.

A RECENT treasury decision defines wreaths, in part of metal, as "articles in part of metal" under paragraph 193 as claimed by the importers, Spingarn Bros., New York.

Too much dormant stock among the thousand florists in Illinois, says Secretary Ammann; if we could force a few score more into growth, the association would blossom.

TEACHING children the wonders of exotic plants is part of the curriculum of the New York educational system. The Botanical Gardens at Bronx park are the classrooms.

FLORISTS of Washington have filed a protest with the house committee against Senator Johnson's (of Alabama) amendment of the bill for the "proper observance of Sunday as a day of rest in the District of Columbia."

THE poisonous nature of the oleander should not be overlooked. The Department of Agriculture reports cases of cattle poisoning from the south where this is used as a hedge plant. It should be watched in the greenhouse and especially in the home where children are apt to chew leaves of any plants they have access to.

American Rose Society Exhibition.

The Horticultural Society of New York, under whose auspices the American Rose Society exhibits in the city of New York, has taken up on its part the duty of enlisting the interest of as many members of that society as possible to develop the best attendance and support for the occasion. The New York Florists' Club has appointed a special committee to extend courtesies to all members of the Rose Society. The intent is to show off in the great hall of the American Museum on Seventy-seventh street, for popular exhibition without cost to the public, a show of the first magnitude. The hall is at present being re-painted and decorated. The measurement is 75x150 feet. The effort is to obtain, among other things, a fine exhibit of pot plants. Many a dweller in the metropolis can grow a plant in a pot and would enjoy doing so, and exhibits of that kind are likely to foster a demand for that class of roses. The full list is being revised by the chairman of the schedule committee, ex-President Robt. Simpson, and as soon as completed will be put in permanent form in conjunction with the premium list and schedule of the New York Horticultural Society. Since our last report

the following special prizes have been offered:

| | |
|------------------------------------|--------------|
| John I. Raynor, New York |\$25 |
| Henshaw & Fenrich, New York | 25 |
| Henry Froment, New York | 25 |
| William S. Allen, New York | 25 |
| Traendly & Schenck, New York | ... 25 |
| Alex J. Guttman, New York | 25 |
| King Construction Co. | 25 |
| J. A. Budlong Son & Co. | 25 |
| John N. May, Summit, N. J. | 25 |
| Frank R. Pierson, Tarrytown, N. Y. | 25 |
| Wm. Badgley, Chatham, N. J. | 15 |
| Walter F. Sheridan, New York | 15 |
| A. H. Langjahr, New York | 10 |
| L. B. Coddington, Murray Hill | 10 |
| Robert Simpson, Clifton, N. J. | 30 |
| Society of American Florists | Medals |

James Wood, president of the Horticultural Society of New York, will deliver an address upon "Ideals of Horticulture"; Geo. V. Nash will speak on "The Rose and Its History," and illustrate his lecture with colored lantern slides. Adolph Farenwald, of Roslyn, Pa., will speak on "Roses, the Brightest of Flowers." A valuable paper is being prepared by W. S. Sibson upon "The Northern Pacific Coast Roses." The Horticultural Society of New York will issue, jointly with the American Rose Society, the full prize list and rules within a few days. Joseph A. Manda has been appointed superintendent of exhibits.

BENJAMIN HAMMOND, Sec'y.

Early Forcing Tulips.

ED. AMERICAN FLORIST:—

How early can I force tulip bulbs? The kinds I want to have are La Reine and Yellow Prince. I took some boxes in from outdoors at Christmas and they were well rooted. I placed the same in a shed for about a week and then moved them into a house at about 50°, under a bench. I have given them a good watering and have shaded with paper. The results, so far, have not been very good, as they already show the flowers in the cool house, and on very short stems. I took some boxes in the forcing house, at about 65° to 70°, to get them longer, but without any improvement. I keep them always dark and I think in the right moisture. Will you kindly tell me the reason why my bulbs are not doing well?

F. A. B.

Experienced growers force tulips in time for Christmas by planting the best quality bulbs immediately they are received, and allowing them a few weeks in a cool place to root. They are then brought into heat and kept quite dark much as lily of the valley is forced. The stems are usually short at the holiday, even with this care, when forced so early, but as the season advances they get longer. The treatment described by "F. A. B." appears to be right, except that we would not advise placing the bulbs in the shed where the atmosphere is possibly very dry, as this may have the effect of checking the growth, and therefore causing the stems to be short. This very early forcing is unnatural anyway and it is best to keep them going right from the start. But bulbs taken inside at Christmas should be satisfactory, as this is not particularly early. We think, under the circumstances, that the bulbs could not have been of first quality or they would have done better.

OBITUARY.

Edward O. Schwagerl.

Edward O. Schwagerl, Seattle, Wash., landscape architect, who planned Volunteer and Kinnear parks and Seattle's first boulevard system, died January 27 at the family home, 503 Twenty-second avenue south. He was 68 years old. Mr. Schwagerl was born at Wurtzberg, Bavaria, and was educated in Paris before coming to America. At Cleveland, where Mr. Schwagerl spent 15 years, he originated the park and boulevard system, planned and laid out Gordon, Wade, Payne and Eels parks. At St. Louis he planned and laid out the famous Lindell boulevard and Vandeventer place. He planned and laid out cemeteries at Cleveland, Canajoharie Falls, N. Y., Hannibal, Mo., and at Portland, Ore. Point Defiance park, and Wright park, Tacoma, were planned by Mr. Schwagerl. He was one of the art judges at the Alaska-Yukon-Pacific exposition. Mr. Schwagerl is survived by his wife. The remains were cremated.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv.

For Plant Ads., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—By an expert American Beauty and tea rose grower. Address Key 446, care American Florist.

Situation Wanted—By first-class florist capable of taking charge; experienced in all branches. Address Key 444, care American Florist.

Situation Wanted—By practical gardener and florist, life experience; middle aged; married; want a place where first-class stock is required. J. HODGE, 163 Foster St., Mansfield, O.

Situation Wanted—By a German florist, 26 years of age; 10 years' experience; grower of roses, carnations, 'mums, pot plants, etc.; give full particulars and what wages paid in first letter. Address Key 441, care American Florist.

Situation Wanted—As gardener, private or public, 28 years old, single, 12 years' experience in all branches in Europe and this country; ready for engagement by the 15th of March; best of references. Address Key 442, care American Florist.

Situation Wanted—To take charge of the growing of cut flowers, flowering and bedding plants, also palms, ferns, etc.; 26 years' experience in those lines of the trade; middle-aged, single man, sober and honest; expect fair wages and steady work. Address Key 447, care American Florist.

Help Wanted—Gardener, married man in private place near Chicago; permanent position. Address Key 439, care American Florist.

Help Wanted—Good stenographer and book-keeper familiar with nursery office work; good opportunity to learn landscape architecture. Address Box 97, Jersey City, N. J.

Help Wanted—Two young men experienced in packing and filling orders for nursery stock; give full particulars regarding experience, salary wanted, etc. Address VAUGHAN'S GREENHOUSES, Western Springs, Ill.

Help Wanted—Young man to take care of garden and stable; have two horses, two cows, chickens and two hogs; must be experienced truck farmer and stableman; wages \$25.00 per month and board. Address R. W. TENER, Sylvan Crest Monaca, Pa.

Salesman Wanted—On the Pacific coast to sell our well known line of ribbons and chiffons; we want a man who is known among the trade to sell our goods on commission. Address LION & COMPANY, 114 Spring St., New York.

Partner Wanted—A florist with small amount of capital desires a partner; a grower with 5000 feet of glass or more located in some thriving town where there is a future to open a retail store; 18 years' experience, good designer and salesman; references exchanged. Address Key 445, care American Florist.

For Sale—First class florist business in city of 30,000; reason for selling; other business. Key 999, care American Florist.

For Sale—Some 3-inch pipe guaranteed sound-7c per foot. Also several good small boilers cheap. W. H. SALTER, Rochester, N. Y.

For Sale—Dwelling, three well stocked greenhouses; good business in an Arkansas city; good reasons for selling; if you mean business address Key 443, care American Florist.

For Sale—A good florist retail business in growing city in western New York; 5,000 feet of modern built glass, with work room and living rooms attached; best place in town; a good trade. A good place for the right man. Reasons for selling, other business. Price and details on application. Address Key 429, care American Florist.

For Sale—Florist with a small ready capital can, on March 1, buy a first-class retail flower store in Chattanooga, Tenn., with well established trade. Present owners are engaging in similar business in another city, and inability to manage both places is only reason for selling. Only interested parties need answer this advertisement. Address A. BORG, care Atlant. Floral Co., Atlanta, Ga.

Wanted—Greenhouse, about 5000 ft. o glass, dwelling, one or more acres of land. Address Key 436, care American Florist.

Wanted to Rent—Greenhouse establishment; 15,000 to 20,000 feet; must be in good repair; good location and good rose soil required; shipping distance of Chicago preferred. Address Key 438, care American Florist.

Good Opening for Young Man

Advertiser wants a bright young man to call on the trade, one who can sell goods; give full particulars in first letter, including experience, age and wages. Man with practical knowledge of greenhouse work preferred. Address Key 988, care American Florist.

Ornamental Nurseryman Wanted

One familiar with varieties, propagation and growing of ornamental trees and decorative plants. Address THE SILVA-BERGTHOLDT CO.

Newcastle, California.

TO RENT.

A very rare opportunity of one of the most modern and up-to-date florist establishments of about 15,000 sq. ft. glass; hot water heat; Superior tubular boiler; entire place equipped with electric lights, cement walks and floors; work building 20x115 two stories 8-room modern flat; good established business; the conveniences and accommodations to all transportation, etc. are too numerous to mention; they cannot be excelled; if interested an investigation will convince.

RICHARD F. GLOEDE,
1405-1407 Central St., Evanston, Ill.

FOR RENT.

Greenhouse, 12,000 feet of glass; stocked with sweet peas, carnations, bedding plants; good house; 10 acres of land; near Chicago; \$50.00 per month.

Key 425, care American Florist.

Unexampled Chance

For a first-class grower with executive ability and capacity to take charge of 50,000 square feet of glass, most modern in construction and equipment, for growing cut flowers and plants, about to be erected in most progressive part of United States, where competition amounts to almost nothing. Can sell entire product now, and plant will have to be doubled in two or three years at most with right management. If you do not possess these requirements and have not got \$3,000 to \$5,000 to take stock in the \$50,000 corporation, do not reply. But if you have and can produce the goods, you will get the chance of your life by addressing

Key 440, care American Florist.

Retail Store Man.

The advertiser, located in the south, wants a good man to take charge of the retail cut flower department. He must be fully competent to turn out high class design work and decorations. One who has a general knowledge of the seed business would be preferred, as the cut flower department is carried on in connection with a general seed business. A good salary to the right man. Address Key 431, care American Florist.

FOR SALE.

About April 1st we begin tearing down a range of 85,000 feet of glass to make room for more modern houses.

We will have for sale ventilating machines (Hippard), ventilators, ready glazed sash bars in length 8 ft. to 14 ft., gutters and 4-in. cypress and cedar posts, glass in small sizes. Just the material for building small houses, lean-tos, partitions, etc. Will sell any part or all of it.

WHOLESALE
GROWER of

CUT FLOWERS

Chicago.

GOOD ST. VALENTINE'S DAY DEMAND.

St. Valentine's day and Lincoln's birthday both helped to turn a wheel at the end of last week. Wholesalers were extremely busy with out-of-town orders, red carnations, violets and red roses being most in demand. The stock of violets was equal to the call but red roses of good quality were extremely scarce and Richmond, Cardinal and Rhea Reid made good money. American Beauty is still scarce and difficult to obtain in the best grades but short stock has been plentiful and doubtless the supply of long stemmed ones will soon improve. The sudden return to arctic conditions at the end of the week caused roses to tighten up again and everything cleaned up closely in this way. While good carnations were not too plentiful there was a big surplus of poor, small flowers, splits and other truck that could not be moved except by the dump route and many a "load of hay" went this way. Bulbous stock has seldom sold better and large quantities have been handled. Paper White was cheaper at the end of the week, also mignonette, lily of the valley and other small stocks.

The early part of the week saw a greatly increased rose supply in all the popular varieties, but out-of-town orders cleaned up everything in this line daily. Local business was not particularly good, though a fair number of retailers were around, and St. Valentine's day helped move a lot of small flowers. Speaking of the violet situation to a wholesaler, who handles possibly more violets than any other firm in town, he said that he was quite disgusted with the reports received from growers. These said they would be short for St. Valentine's day, but when the day arrived shipped them in in immense quantities, so much so that it took a lot of hustling to move flowers that, two days before, retailers were anxious to place orders for. And his case was not peculiar either. Violets at the windup of the day's business were over plentiful and the policy of the growers, in endeavoring to foist the idea upon the trade that they would be scarce, in reality reacted upon themselves and caused a distinct loss of business. Bulbous stock and carnations continued to arrive in larger quantities than could be handled in some cases, but the shipping trade, which kept up well right through, was the salvation of the market.

NOTES.

The D. D. Johnson Co. has the permit tags for its Evergreen fertilizer to be sold in Indiana state and, speaking with D. D. Johnson, rather a singular point in connection with Indiana law cropped up. It seems that no change can be made in the formula which is printed on the tags, without changing also the title of the fertilizer. Though it may have its good points in other ways, this seems rather reactionary, for a firm could not improve its goods without at the same time changing the title which may have cost a great deal to bring to public notice.

Frank H. Henry, of Henry & Lee, New York, has been in the city this week, having just returned from an eight months' trip to China, Japan and the Philippines, where he has been looking over the situation at the sources of supply of lilies and other stock of interest to his firm and florists generally. He has much that is interesting to say and unique photographs to show. He left for a day's trip to Milwaukee on Tuesday. Mrs. Henry and their daughter accompanied him.

The display of St. Valentine's baskets at Fleischman's has been very effective, showing a great variety. A large consignment of "African" baskets arrived here during the present week. They are distinctly novel, in color a deep reddish brown and in almost every conceivable size and shape. The color should show off almost any kind of flowers to the best advantage.

Terence Rodgers, secretary of the Gardeners' and Florists' Union, writes: "Through the influence of the Chicago Federation of Labor the West Park gardeners have obtained an advance in wages and now receive \$75 per month. John Fitzpatrick had a most agreeable interview with Superintendent Mugler of the West Park board.

The Desplaines Floral Co. is cutting good stock in all lines. The houses that were rebuilt last season are turning out very satisfactory, being light and in every way suitable to the culture of high-grade stock. The rebuilding will probably be proceeded with this season and when completed this firm will have a fine up-to-date plant.

J. A. Budlong's stock is in excellent shape this week, large quantities of all the leading varieties of roses, carnations and other flowers arriving daily. St. Valentine's day orders were

Greenhouses: HINSDALE, ILL.

trip east to Baltimore, New York and several Long Island points. Judging by what he saw he considers that the rose scarcity was as bad or even worse than in the middle west.

Vaughan & Sperry continue to receive large quantities of medium and short Beauties. The long-stemmed are not quite so numerous, but what are coming in are of fine quality. Violets are a strong feature here, good stock arriving daily in large quantities.

Splendid stock of carnations has been arriving at Peter Reinberg's all week, an average of 4,000 to 5,000 per day being about the figures. American Beauty is coming in better crop right along and the quality of the other roses arriving is excellent.

Miss M. C. Gunterburg has been handling very large quantities of excellent violets at her stand on the Flower Growers' Market, cleaning up well daily. The demand was large for St. Valentine's day and prices held up fairly well.

Fourteen thousand carnations in one day is pretty good selling and this was the J. B. Deamud Co.'s total one day last week. Pussy willows are a good selling line here and the tulips handled cannot be beaten on this market.

H. C. Blewitt, Desplaines, is bringing in fine sweet peas to his stand at the Flower Growers' Market. Mr. Blewitt says the dull weather has been against his plants but they are looking well and promise a good crop.

The quality of roses and carnations now being sent in from Sinner Bros.' greenhouses is at the top notch. Bride and Bridesmaid of the former are fine indeed and the carnations are in all the popular kinds.

Excellent Bride, Bridesmaid and Mrs. Jardine roses have been arriving at Wieter Bros. all week in large quantities, but the stock is so good it cleans up daily as, indeed, everything does at this store.

Weiland & Risch have been showing extra good lily of the valley during the week. Their Easter lilies are also in fine shape. Killarney and other roses have been coming good and in large quantity.

Winterson's Seed Store is showing the Illinois self-watering window and plant boxes. Some Boston ferns planted some time ago and hung in the store look well and are making a good growth.

We Are Strong On

ROSES AND CARNATIONS.

Our **Beauty** crop is just coming in and we have large supplies in all grades. For Easter we will be exceptionally strong on **Beauties, Roses, Carnations**, and all Seasonable stock. The carnations now being shipped are unsurpassed in quality in this or any other market.

PETER REINBERG, 2,000,000 Feet of Modern Glass, 35 Randolph Street, Chicago.

It is reported that N. J. Kruchten will build a large greenhouse plant in the near future. He has the option of several locations for the purpose, but has not yet decided on either of them.

Poehlmann Bros. Co. is extra strong on good roses and the supply keeps on getting better. Cardinal has been making a pretty showing during the week and is a fine red.

Ernest Oechslein has still some fine cyclamens left at his River Forest place. Bulb stock is now in fine order and he is busy preparing bedding stock and Easter lilies.

Winterson's Seed Store looks spic and span now and all hands are busy packing up goods and making other preparations for the spring rush.

Joseph Cole, of Peoria, has been in the city during the week attending the funeral of a friend. He has just returned from a trip to Oklahoma.

Kyle & Foerster report a very heavy shipping trade all through the week, especially Saturday. The local demand has also been good.

Miss Alice Keegan, bookkeeper at Zech & Mann's has been away from business for a week on the sick list.

BOWLING.

The Orchids lost two games to the Roses on Thursday night and the Violets lost three to the Carnations. Geo. Asmus and A. Zech rolled the final for the watch fob, George being the victor. The scores and standing of the teams follow:

President Asmus of the Florists' Club has announced his committees for 1910 as follows: Good of the Club—Frank Pasternick, John Degnan and Herman Schiller; Transportation—E. F. Winterson; Fred Lautenschlager and M. Barker; Sports and Pastimes—Al Zeck, T. C. Yarnall and Frank Ayres.

Bassett & Washburn report business excellent, their out-of-town trade taking care of the large quantities of fine stock now arriving. O. P. Bassett carnation was in magnificent form for St. Valentine's day and sold well.

E. B. Washburn and wife will start for California February 25, and locate near Riverside. The trip is expected to benefit Mr. Washburn, who has been in none too rugged health the past few months.

Miss Sadie Palinsky celebrated her twenty-second birthday on the evening of February 15, with many young friends, some from among the wholesalers.

Quick buyers are those who get in right on glass, says Woodyard, of Sharp, Partridge & Co.

Visitors: Alois Frey, Crown Point, Ind.; Geo. Bartholomew, manager of the Miami Floral Co., Dayton, O.; Joseph Cole, Peoria; Frank H. Henry, of Henry & Lee, New York.

Another Joliet Trip.

During the Chicago flower show, the Chicago Carnation Co. gave an excursion to its place at Joliet, Ill., but found it was inconvenient for a great many florists to attend, therefore the company is going to give another excursion on Tuesday, February 22, leaving the La Salle street station, Chicago, by Rock Island train at 11:45 a. m., arriving at the greenhouses at 1 p. m., where lunch will be served. The firm asks any interested grower to join the crowd, which is sure to be a merry one.

KENNEBUNK, ME.—J. H. Elwell is installing electric light in his greenhouses and dwelling house.

CHAMPAIGN, ILL.—L. S. Spencer, late of Pesotum and Tolono has removed his wholesale cut flower business to the corner of McKinley avenue and the Bloomington road, this city. He has much better facilities here for carrying on his rapidly growing business.

"The Busiest House in Chicago"

"NOTHING SUCCEEDS LIKE SUCCESS."

If are successful with your growers you must be with your customers, and if you are successful with your customers you must be with your growers. We are successful with both and you will be successful if do business with

J. B. DEAMUD CO.

St. Louis.

The first week of Lent brought with it a marked increase in the supply. Carnations, especially Enchantress and Rose Pink Enchantress, became a glut and many of them remained unsold. Perhaps it was better to throw away a few than to have them hawked around by some of the downtown establishments for five and 10 cents per dozen, thus ruining and demoralizing the trade. Roses appear to be coming on, also bulbous stock. Quite a few callas and Harrisii lilies are in. Violets are plentiful. Bright weather continued for St. Valentine's day and low prices prevailed.

NOTES.

The Florists' Club held its monthly meeting last Thursday, with 25 members present. Wm. C. Smith gave a very interesting talk on the troubles of a wholesaler. He spoke of being between two fires, pleasing the grower and the retailer. He thought that common sense and good judgment would smooth over many difficulties.

M. B. Leach and wife, of Taylorville, Ill., were here during the past week purchasing florists' supplies. Mr. Leach has five houses 20x140 feet devoted to carnations and bedding plants. Henry Shrodt, who formerly worked for Mr. Leach, has put up a fine house and is raising lettuce. He has been very successful.

Rufus J. Lackland, president of the Boatman's bank, and 20 years president of the board of trustees of Missouri Botanical Gardens, tendered his resignation. He is 90 years of age.

He will be succeeded by D. F. Kaime, vice-president.

The Business Men's league has written J. J. Beneke, as secretary of the Florists' Club to assist in having the convention of the American Association of Nurserymen held at this city in 1911.

The Grand Avenue Florists, at 2439 N. Grand avenue, are doing a nice business. This is a good locality. Louis J. Claus is manager and is assisted by his wife, who is a good designer.

Walter Retzer, who resigned his position at the Plant Seed Co., has bought a farm in southern Texas. He started Tuesday, his wife will follow later.

Jules Bourdet has moved over all his stock to the greenhouses recently purchased by Geo. Waldbart, and will grow stock for the trade.

Brix Floral Co. is about to transfer its greenhouses to J. Michel, their foreman, if matters can be adjusted satisfactorily.

Max Herzog has completed his house and greenhouse on California avenue, where he will carry on a retail business.

Riessen Floral Co. report large sales in violets and other flowers for Valentine day.

Werner Bros. are bringing into the market some extra fine carnations.

W. F.

SPRINGFIELD, ILL.—H. F. Janssen, who has been connected with the seed and flower store of A. C. Brown for a number of years, will open a store at 408 Adams street about March 1. Mr. Janssen recently purchased the two buildings, 408-410 Adams street.

FLORIST CLUB MEETING.

The regular monthly meeting of the Tri-City Florists' Club was held at the home of Harry M. Bills on the evening of February 10, with nearly every member in attendance. The evening topic, "How to Advance the Florists' Business Commercially and Otherwise," brought out some very good suggestions. Theo. Ewoldt and Wm. Goos were the leaders in the debate that followed. The committee reported having secured the Outing club as a place to hold the fourth an-

NOTES.

A most beautiful valentine arrived at the home of Ludwig Stapp the other day (a little early). That is what makes Lud. wear such a fine smile these days—Miss Stapp.

Our Uncle John Temple has been forced into politics and is running for park commissioner. Here's hoping he wins. (The election takes place in April.)

Henry Pauli intends to tear down several of his old houses and replace them with modern ones. T. E.

Philadelphia.

GOOD VALENTINE TRADE.

Sentiment ruled the market last Monday and if the tender passion would only well up oftener there would be signs of greater activity all along the line. On second thought, however, perhaps it is just as well, for every little accumulation means an addition to the place. "It all goes into sash" and then comes the burning question what shall be done with the surplus. This year's valentine trade was the best ever, with the demand running first for violets and then roses; in fact, all flowers sold well. Made-up work, such as heart-shaped hampers filled with violets and lily of the valley, pansies or sweet peas sold very well, as did plants in flower, nicely done up. There were also many valentine dinner parties for which the decorations were quite elaborate. Solid and hollow hearts of red roses or red carnations and some of pink were the principal features of these tables. Orchids and lily of the valley were quite popular and many nice clusters of these flowers were sent. Coming on Monday there was a great hustle for stock and on account of the cold weather many of the rose shipments were very close. Beauties were scarce, \$7.50 to \$9 being asked for the specials, and very tight buds at that. Richmonds were also very scarce—in fact, all roses sold up close. There appeared to be a sufficiency of carnations, as \$3 was about the price for specials. Violets sold very well, but the growers appeared to have been saving up and there was a large stock, which sold up clean, however, with the close of the day. Daisies and forget-me-nots were also popular and added much to the valentine specials.

Gus Doemling, of Lansdowne, has contracted with the Lord & Burnham Co., through D. T. Connor, for two houses, 21x200 feet, for roses, which are Mr. Doemling's specialty and which he does so well that his stock has attracted the attention of New York buyers. He is now a regular shipper to that market.

K.

Aphine at Philadelphia.

There was a demonstration of the efficiency of this new destroyer of insect pests on Saturday last at the new seed store of the H. F. Michell Co., Sixth and Market streets, Philadelphia. Growers had been invited to bring plants of all kinds that were infested and see the various "critters" put away in a jiffy, which prediction was certainly carried out. Martin C. Ebel, the secretary of the Aphine Co., was the demonstrator and showed how very easy it was to apply the insecticide. It is not an oily, sticky or bad smelling solution, and when applied does not require washing off, except that a good hosing the next day will remove all insects, from which all life appears to be taken with one application. In this demonstration one plant in particular, a ficus, was badly affected with the long Belgian scale and mealy bug. The Belgian black scale is said to be one of the toughest of the family, but in less than half an hour after the application the insects were easily removed by wiping, and a good stream from the hose would have cleared the leaves effectually. There are various strengths, which are best applied with an atomizer, the best forms are those in which air is pumped for power. For applications where a large number of plants are to be treated, it is best to mix a sufficient quantity to allow of their being dipped, which insures that no guilty bug escapes. We congratulate the Aphine Co. on the apparent success of their solution as seen here, for if the results attained in this test will

work out practically on a large place, the cost of growing plants will be materially reduced, and growers will have to find some other "rainy day" job than gunning for bugs. K.

Boston.

LENTEN QUIETNESS.

The advent of the lenten season invariably means a marked falling off in the trade of the retailer. This year is no exception. With one step we go from a good brisk business to a period of extreme quiet. The early part of the week was marked by severe cold weather and stock was none too plentiful. Towards the latter part the weather moderated and stock of all kinds is dragging a little. Interest in St. Valentine's day was keen. The violet growers had orders for the day exceeding those of former years by many thousands. Stock of all kinds is plentiful, especially in the bulbous line. Large quantities of Golden Spur, Von Sion and other narcissi and tulips are coming in. They clean up remarkably well. Carnations hold up well in price and the better grades are in good demand. Roses of all varieties are coming in more plentifully, especially in the smaller grades. American Beauties are coming along more freely, but still bring top prices. Sweet peas and violets are perhaps the most plentiful stock in the entire list. There is an abundance of Easter lilies, mignonette, wallflower, etc., coming in. White lilac and acacia are coming in in limited quantities and sell on sight. Pansies are in good demand and there seems to be a shortage of good stock. Orchids, gardenias and lily of the valley are much more plentiful than a short time ago, while the demand is considerably less. Many of the stores are now making elaborate window displays of cattleyas, where but a few short weeks ago they could scarcely get enough for their orders. Considerable myosotis is coming in; good freesia is still scarce. Business in the green goods' line is a little slow. Plants are selling very well.

NOTES.

The interest and preparations for St. Valentine's day this season goes ahead of all previous years. Many fine window displays were to be seen, and several artistic and timely novelties were shown. The retailers have grown to realize that this is a phase of the trade that can be cultivated, and when carefully looked after the returns are most satisfactory.

Some of the finest *Acacia pubescens* we have ever seen was brought in by Wm. Martin, of Milton, recently. It is unfortunate that more such stock is not to be had, as the better class of flower buyers appreciate quality more than ever, and it is a pleasure to sell the best to those who know what it is.

Walter Holden is bringing in a novelty grown by Small, of Tewksbury. It is on the daisy order (*Dimorphotheca aurantiacal*). It opens and closes several times, and when fully opened makes a most attractive little flower. It is not unlike the common ox-eye daisy in appearance.

T. J. Clark says trade is very satisfactory in his recently remodeled store. This is the most attractive basement store in the city, and Mr. Clark says there is a certain pleasure derived from the fact that he is not wholly working for the landlord.

Salesman Walsh has to move lively in the morning nowadays, as the demand for Sim's sweet peas, which he is handling, is so great that the buyers literally mob him in their eagerness to get their share of his goods.

W. Goodenow, of Stoughton, is bringing in some of the yellow primula that he makes a specialty of.

This bright little flower is very popular and is a good seller.

One of the most attractive Valentine day decorations was that of Hoffman's. The idea was carried out very artistically and greatly admired by all who saw it.

Welch Bros. are receiving regular shipments of Beauties nowadays. They are of fine quality and a great addition to a very limited market.

The Waban Rose Conservatories are running strong on Killarney and White Killarney. These roses, when good, are a hard combination to beat.

Frank White, of Randolph, is again on the sick list. He came out too soon after his recent illness and had a bad setback.

A. Leuthy, of Roslindale, is showing a fine lot of white lilac. This plant has become a great favorite of late years.

H. M. Robinson & Co. report trade as fair, but noticed a falling off with the starting of Lent.

P. L. Carbone had a particularly tempting display of valentine novelties in his windows.

H. M. Robinson and Wm. Penn have just returned from an extended trip through the west.

R.

Pittsburg.

This city is again in the grip of a terrific blizzard, and is almost completely snow bound with a fall of snow breaking the season's record. The subsequent drifts caused by the high winds were reported to be the worst experienced for the last 50 years. This is putting a damper on the business, both on incoming and outgoing shipments. St. Valentine's day has been looked forward to by all as a pretty good day. But this sudden change is upsetting their plans somewhat. The commission houses are loaded to the top with fine stock of all kinds. Violets are moving out fairly well, considering they arrived 12-18 hours late.

NOTES.

B. L. Elliott, formerly a well known florist of Cheswick, but for the past two years superintendent of John Bader's plant, Troy Hill, was united in marriage to Miss Mary Bader. They are spending their honeymoon at Cambridge Springs.

Casper Limbach, a member of the Florists' Club, committed suicide Tuesday evening, worry being the cause of his despondency.

W. A. Herbert, Wellsville, O., who was struck with a coaster and had his arm badly broken, is able to be around again.

Jos. Thomas, Greensburg, is going to put up two new houses which he intends to plant to white and pink Killarney roses.

J. H. Milner, Ada, O., is in town showing several new seedling carnations of his that look good.

W. Smith, formerly with A. T. Lorch Co., is now with F. H. Westhoff, De Haven.

Reich, of Reich & Barber, Alliance, O., is in town and reports business very good.

J.

GREENS FARMS, CONN.—The condition of E. B. Jennings shows signs of improvement, although he is still very weak.

WALKERVILLE, ONT.—The Horticultural Society's annual announcement and list of premiums for 1910 has been issued. J. N. Taylor is president for this year, A. Mapes and J. Pitcher, first and second vice-presidents; N. B. Vrooman, treasurer, and W. H. Smith, secretary. The association is in a sound, healthy condition financially and doing much good work locally.

Bulbous Stock

Single Daffodils, Golden Spur and Princes.
Tulips, Pink, White, Red and Yellow.
Valley, Very Choice, \$3.00 and \$4.00 per 100.

TRADE SLOW.

The beginning of Lent showed a great falling off in trade. Nobody believes that the present dull condition of the market will be long continued. The society people do not fear the devil as much as they did in former times. Bad weather has been a contributing cause toward making the past week a bad one for the trade. Another heavy snow storm visited this city and vicinity on the night of February 11. Saturday is usually a good day but the heavy fall of snow made conditions very disagreeable, consequently there was a great falling off in counter trade. Throughout the week business was very dull. Good American Beauty roses sold as low as 25c each and good carnations sold for \$1 per 100. We do not deny that a portion of these stocks sold for higher prices, but when retailers can placard their windows offering carnations at 35c a dozen, they must be buying cheap. The better grades of tea roses also suffered. The shorter grades were more in demand on account of much funeral work.

February 14.—There is a slight improvement in business this morning. Though St. Valentine's day is not considered of great importance in the trade, it helps some and there is the additional advantage of good weather. Prices have not advanced, but stock cleans up better.

February 15 (by wire).—The condition of the market is very bad. Carnations, lily of the valley, Narcissus Golden Spur and freesias are practically a glut and are being slaughtered.

NOTES.

The store of Young & Nugent, 42 West Twenty-eighth street, narrowly escaped destruction by fire on the night of February 10. The heroes of the occasion were Henry Reichers, salesman for John I. Raynor, and a little dog, an attache of the Young & Nugent store. Mr. Reichers has a room over the store. Early in the evening his attention was attracted by the frantic barking of the dog. He at once investigated and finding the building on fire, rushed out and turned in an alarm. The firemen promptly responded and extinguished the blaze, which was caused by an overheated furnace, before it had done much damage.

The most notable wedding decoration seen in this city this season was executed by M. A. Bowe on February 8, the occasion being the marriage of Miss Electra Havemeyer to James Watson Webb. Both of the contracting parties are members of old and well known families. The ceremony took place at St. Bartholomew's church. The altar was beautifully decorated with white roses and the pews were marked with bunches of lilies. Palms, white azaleas and lilacs made a grand display in the chancel and in front of the choir stalls.

Frank Traendly had a very strenuous week. As previously noted, he came near being injured in an explosion in a restaurant near his store on Monday; on Tuesday, one of his children was taken seriously ill; on Wednesday, a building which he owns in Brooklyn caught fire and was seriously damaged. The sick child is improving and "Papa" is thankful that things were not as bad as they might have been.

Seizo Suzuki, youngest son of the president of the Yokohama Nursery Co., Yokohama, Japan, is spending a week in the city with headquarters at the company's office. He will soon sail for England to look after the interests of his company at the Anglo-Japanese exhibition, which opens in

London in May. Mr. Suzuki is a young man of engaging personality and has made many friends during his visit.

J. K. Allen is now handling exclusively in this market, *Vancouveria hexandra* (the so-called Mexican ivy), a green that is more pleasing to many persons than galax. It is a native of the Pacific coast and Mr. Allen receives his shipments from California.

A recent visit to the John Scott range showed a great stock of Easter lilies coming on in fine condition. All told there are between 50,000 and 60,000 pots of lilies. There is much other fine stock including a great crop of gardenias.

Noteworthy among the fine stocks of spring flowers, are the narcissi and tulips being handled by A. H. Langjahr. In a short time he will move to a larger store where he will be better prepared to handle his increasing business.

In anticipation of Easter, the plant trade is looking up. Kessler Bros., the only exclusive plant men on Twenty-Eighth street, are already showing a very fine stock which will be greatly enlarged as Easter draws near.

Frank D. Hunter, who, as reported in our issue of February 12, was seriously injured by being run down by an automobile, is progressing favorably toward complete recovery.

Chas. H. Brown, proprietor of the Belnord Flower Store, has been taking a short vacation among his old friends at Rhinebeck.

John N. Champion of New Haven, Conn., was in the market on February 11. He reports good business at New Haven.

Chas. C. Haggerty has taken the store formerly known as the "Orchid Florist," 198 Columbus avenue.

Washington.

At the last meeting of the Florists' Club, J. H. Harty was admitted to membership. Nomination of officers was also in order: F. H. Kramer, Geo. H. Cooke, John Robertson, for president; Elmer Mayberry, vice-president; W. A. Ballinger, J. L. Carberry, secretary, Wm. F. Gude; treasurer, W. W. Kimmell, O. A. C. Oehlmeier, David Bissett, directors for three years. As it was ladies' night, the meeting adjourned as soon as possible to make the evening an enjoyable one for all present; special talent was engaged, and soon the merry throng applauded loudly. Judge Robt. Montague paid a high tribute to the ladies by comparing them with the flowers, both in beauty and innocence. Refreshments were served, and dancing was kept up until a late hour.

Business has been very brisk, every florist working his staff both early and late. Funeral work seems to be especially plentiful. Stock is in good shape, and there is plenty of it to supply the demand. Fair prices are realized. Valentine windows were in evidence at the retail stores, and there was a good demand for violets, orchids and lily of the valley for that day.

NOTES.

The Washington Florist Co. has a very attractive and pretty window. The feature is a rustic Japanese tea house, appropriately decorated with clinging vines, and flowers; the lawn is adorned with growing lilacs and Japanese plants. An old lamp post and lamp illuminated the outer surroundings, while Japanese lanterns suspended from the roof of the tea house illuminated the interior.

A floral fountain was the feature for a table decoration for a dinner given by Gov. Chas. Magoon, at the

Alibi club. Geo. C. Shaffer executed the work. The feature of this firm's windows was a floral heart of violets and orchids and other appropriate valentine novelties.

J. R. Freeman showed an excellent display of flowering plants and novelties: A red heart, decorated with violets, was placed conspicuously as a reminder of the day.

Z. D. Blackstone's windows are attractively decorated with novelties, and arrangements which appeal to the senders of floral valentines.

Gude Bros.' window is filled with Valentine novelties, a huge red heart pierced with an arrow being most conspicuous.

F. H. Kramer's display of plants and cut flowers is bound to catch the eye. He is famous for his souvenirs.

George H. Cooke, as usual, is hustling with luncheon and dinner decorations.

A circle of hearts and other novelties were the feature of Marche's window.

Visitors: Sidney Bayersdorfer and — Smith of Boas & Co., both of Philadelphia.

G. S.

Buffalo.

TRADE GOOD.

The weather is still very wintry. Trade was not lessened, however, for the last hours preceding Lent were busy ones for all. Several weddings and receptions were scheduled and played their part up to the advent of Ash Wednesday. The funeral of the city's health physician, after a lingering illness, gave the retailers some very fine orders for their choicest stock, mostly in bunches and artistic wreaths. St. Valentine's day was beyond the expectation of all last year, falling as it did on Saturday, naturally made it a good day, equaled only by Easter Saturday, but today (Monday) has demonstrated beyond all question of a doubt that St. Valentine's day is the day for the florist who can put in a window and reach the people with a good ad. Violets, valley, freesia, orchids and bulb stock, not forgetting roses and carnations, more especially in red, found a ready sale. Aided by artistic arrangement in baskets, boxes, heart designs, etc., pussy willow, well out, was a great favorite in all arrangements.

Twins were on exhibition in Palmer's last week, two perfect jonquils. Owing to their color, yellow, we did not accuse Slattery, of the Emerald Isle, of putting them in the window. The only men that could plead guilty are Grever and Stuntz.

SPORTS.

The bowling club is in a flourishing condition, so much so that one of the German element offered to bet that he could give one would-be bowler, who only has one good leg to stand on, 50 pins for four games and a side bet of 25 cents a game. The short pedal rolled one game of 133—no handicap, and the ex-knight of the milk wagon got 126—that was one game. He was nauseated after that. I wish Slattery and a few more had seen the game. Eddie should practice. The following are averages for January: Kasting, 181; Neubeck, 164; Sandiford, 164; Wallace, 163; McClure, 161; Streit, 154; Stephan, 140; Grever, 132; Slattery, 130; Stunz, 126; Gillis, 120; Toben, 117; Good, 111; Savage, 95; Wells, 62. On February 7 L. H. Neubeck rolled 234; average for the evening, 190. While the average of Mr. Good is bad, it may prove good, as he is a new member, but if Good is bad, a Savage has no thoughts of getting dipped in anything, especially Wells.

The Ideal Red Carnation

O. P. BASSETT

It has been the *Leading Red Carnation* in this market, bringing the highest price of any and selling the best. It has paid us more money per square foot of bench than any other variety. The flowers are 3 1-2 inches in diameter, a deep brilliant red, and borne on long stiff stems. Winner of First Prize everywhere. Rooted cuttings, **\$50.00 per 1000; \$6.00 per 100.**

Buy Direct From the Originators.

Bassett & Washburn,

Office and Store, 76 Wabash Ave., Chicago. Greenhouses, Hinsdale, Ill.

Lenox, Mass.

One of the most interesting and instructive meetings held by the Horticultural Society for some time was presided over by President G. Foulsham, February 5, and was largely attended. W. Maynard was elected an active member of the society. An exhibit which called forth special praise was a magnificent vase of 24 flowers of a new carnation named Wodenethe, exhibited by Frank E. Witney, Fishkill-on-Hudson, N. Y., and it was unanimously awarded a first-class certificate. This variety is pure white, the flowers being borne on long, stiff stems and measuring 3 1/2-4 inches across. It has been exhibited before the New York Florists' Club and at the annual carnation convention this year, where it was awarded a certificate of merit, having scored 91 points.

E. Jenkins gave an interesting lecture upon the growth and pruning of trees under the title of "Tree Surgery." He showed in a practical manner how trees are increased in value and live longer under judicious pruning. A. H. Wingett took up the discussion in a very interesting way; he showed how the market value of timber could be increased by thinning, etc. Most of the members asked questions upon the subject, which Mr. Jenkins answered in a very able manner, and was accorded a hearty vote of thanks for his instructive lecture. No date has been decided on for the society's annual dinner as yet. The committee in charge is composed of E. Jenkins, A. H. Wingett, A. J. Lovelless, A. J. Jenkins and A. McConachie. The annual ball, which is always looked forward to with much interest, was held January 24 and was a decided success, both financially and otherwise.

G. H. I.

Dreer's Double Petunias

OUR DOUBLE PETUNIAS, for more than half a century have been the acknowledged standard. The strain this season is equal in high quality to its predecessors, and is well known to the trade.

We offer 15 distinct varieties, in 2 1/4-inch pot plants, at 60c per dozen; \$4.00 per 100; the set of 15 varieties for 75c.

Seed of our **SUPERB STRAIN OF FRINGED PETUNIAS. Double**, 75c per 500 seeds; \$1.50 per 1000 seeds. **Single**, 50c per trade pkt.; \$1.00 per 1-16 oz.; \$1.50 per 1/8 oz.

The above prices are intended for the trade only.

Our **Quarterly Wholesale Price List**, issued January 1st, offers a full line of Seasonable Plants, Seeds and Bulbs.

The Seed Trade.

American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Durvea, New York, First Vice Pres.; F. W. Bolgiano, Washington, D.C., Second Vice Pres.; C. E. Kendel, Cleveland O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 19 0.

THE Haarlem Jubilee bulb show opens March 23.

JOHN LEWIS CHILDS passed through Chicago February 16, on his usual winter vacation trip to California.

LARIMORE, N. D.—S. F. Mercer and J. H. Magor have opened a seed store here, the firm name being the M. & M. Seed Co.

A KANSAS seedsman suggests a new ditty, bearing the saddening title, "When the Onion Sets are Sprouting on the Shelves."

MUSCATINE, IA.—J. E. Hoopes & Co. say that good help is very scarce and difficult to obtain in their section. Wages have again advanced.

THE Northern Wisconsin Seed Co., of Sturgeon Bay has been incorporated with capital stock of \$25,000. P. R. Cunningham, N. M. Birdsall, Jr., and B. J. Jellinek are incorporators.

FOR onion sets advance contracts between Chicago jobbers and outside dealers, closing of such deals moves slowly; buyers have difficulty in awakening an appetite while the 1909 stocks are still on the racks.

TACOMA, WASH., February 10.—Five travelers for eastern seed houses have been through this section of the northwest to date, also five representatives of Dutch houses, mostly in December, and two travelers representing local jobbing houses in bulbs, and two representatives of Japanese lily growers.

CHICAGO.—Contract price on the board of trade February 16, for grass seed were noted as follows: Timothy, \$4.05. White clover, from 20 cents to 25 cents.—Visitors: A. Colyn, Voorhout, Holland; J. C. Hillebrand, Hillegom, Holland; W. Bush Nelson, Lexington, Ky.; Frank H. Henry, of Henry & Lee, New York; John Lewis Childs, Floral Park, N. Y.

THE state entomologists, chemists, and some manufacturing concerns, all of whom are interested in insecticides and fungicides, are pushing the prison penalty flea powder bill, H. R. 3658,

in congress, and are advising that they propose having a hearing before the Interstate and Foreign Commerce committee of the house on March 8. This is the bill which originally contained drastic prison penalty clauses prepared by Solicitor McCabe, of the Department of Agriculture, and who has been so strongly criticized by Gifford Pinchot, president of the Conservation League. While this bill carries punishment, penalties good and strong for errors made by insecticide manufacturers, we understand it does not carry any penalty for chemists or entomologists who make errors in their work in handling and carrying out their part of the law. It is surprising that one class of men whose work and pay is contingent on the operations of another class of men should be quite willing and even anxious to put the latter class under control and management of drastic prison penalty federal legislation, and hold themselves (although dependent on the workings of this industry for their own livelihood) scot free from any legal control.

tucky blue grass contains Canada, if rye grass is found in orchard grass, if yellow trefoil is found in Alsike clover and dodder in alfalfa, providing such seeds exceed five per cent by actual count, same constitutes a violation of the law.

The commissioner of agriculture is authorized to take samples of seed from dealers and publish the results of the said examinations from time to time with the names and addresses of dealers. As we read the law the seeds do not need to be marked with the names of the foreign injurious seeds present unless the quantity exceeds five per cent by actual count. As this is an amendment to the agricultural law, this amendment must be read in connection with the entire law itself to be clear and understandable.

The Paris Floods.

It may interest the numerous friends of Vilmorin-Andrieux & Co., to know that the great disaster which has overtaken Paris does not affect this firm to a great extent. Their warehouses

THE FLOODS IN PARIS.

To Amend New York Seed Law.

In the New York State assembly has been introduced a bill No. 119, entitled "An Act to Amend the Agricultural Law in Relation to Inspection and Sale of Seeds." The same has been referred to the committee on agriculture. One of the sections of the law provides that if red clover seed contains yellow trefoil, if Ken-

in the Rue de Reuilly are beyond the reach of the floods. The buildings containing the offices on the Quai de la Mégisserie, near the Seine, had their cellars flooded by five feet of water. But here the damage is so far confined only to the engines and boilers supplying the light and heat. Stoves, lamps, candles, etc., are installed in the various offices and business is not interfered with.

The greatest drawback is the impossibility to ship goods from Paris. Several of the great railroads are under or surrounded by water, a condition which greatly delays traffic. But under the circumstances it is hoped the American trade will be patient regarding the balance of the orders.

Up to the present time (February 1) the leading growing districts in southern and western France have not suffered. But it may not be the same around Paris, where many articles are grown. The extent of the damage, however, cannot be ascertained before end of March or early April.

ANOTHER SEED BILL.

H. R. 20373. Introduced by Mr. Mann (by request), February 8, and referred to Committee on Interstate and Foreign Commerce.

[This is also known as the **Green Bill** (in the rough) and received the approval of three committees of seedsmen who met in Chicago, February 9.—ED.]

A BILL to prohibit the importation into the United States of adulterated seed and seed unfit for planting.

PAGE 1.

1 Be it enacted by the Senate and House of Representa-
2 tives of the United States of America in Congress assembled,
3 That the importation into the United States of seeds of al-
4 falfa, barley, Canadian blue grass, Kentucky blue grass,
5 brome grass (awnless), buckwheat, alsike clover, crimson
6 clover, red clover, white clover, field corn, Kafir corn,
7 meadow fescue, flax, millet, oats, orchard grass, rape, red
8 top, rye, sorghum, timothy, and wheat which are adulterated
9 or unfit for seeding purposes within the meaning of this Act
10 is hereby prohibited, and the Secretary of Agriculture and
11 the Secretary of the Treasury shall jointly or severally make
12 such rules and regulations as will provide for the exclusion
13 of such seeds from the United States; *Provided*, That such
14 seeds may be delivered to the owner thereof under bond, to

PAGE 2.

1 be reclaimed subject to such regulations as the Secretary of
2 the Treasury may provide, and when reclaimed to the stand-

3 ard of purity specified in sections two and three of this Act
4 they may be released to the owner thereof, but the screen-
5 ings removed from such seeds must be disposed of in a man-
6 ner to be prescribed by the Secretary of Agriculture.

7 SEC. 2. Seed shall be considered adulterated within
8 the meaning of this Act: First, when seed of red clover con-
9 tains more than three per centum of seed of yellow trefoil
10 or any other seed of similar appearance to and of lower
11 market value than seed of red clover; second, when seed of
12 alfalfa contains more than three per centum of seed of yellow
13 trefoil, burr clover, or sweet clover, singly or combined;
14 third, when any kind or variety of the seeds named in sec-
15 tion one of this Act contains over five per centum of seed of
16 another kind or variety of lower market value and of similar
17 appearance.

18 SEC. 3. Seed shall be considered unfit for seeding pur-
19 poses within the meaning of this Act: First, when any kind
20 or variety of clover seed contains more than one seed of
21 dodder to three thousand seeds of clover; second, when any
22 kind or variety of the seeds named in section one of this Act
23 contains more than three per centum by weight of seeds of
24 noxious weeds.

MONTREAL, QUE.—Hains & Hopton are building a new chrysanthemum house, also a mushroom house.

R. L. CANNING, of Earls court, Ont., is dead against the use of manure containing sawdust and wood fiber, which, he says, is not worth having as a gift. Although it is often cheap in a lumber country, it is very apt to breed fungus.

Growers of Irondequoit, N. Y.

The township of Irondequoit on the north side of the city of Rochester, N. Y., the south line of which meets the north line of the city, is remarkable for its extensive truck and market gardening interests, conducted on the most intensive systems. The soil throughout the greater part of the township is of a very light, sandy nature, and, in spring and summer, in the process of crop alternations, winds will cause very disagreeable sand storms, but notwithstanding these conditions, enormous crops of fine garden vegetables are produced by high cultivation and fertilization. The large crops of first-class celery raised on this light soil are equally surprising. On the east and west sides of Portland avenue, and on both sides of the Titus road, towards the west, a large number of greenhouse establishments, many of them of large area are devoted to the growing of vegetables. Perhaps no other township of the same area in the United States can show an equal amount of capital devoted to this industry.

James H. West & Son, at the corner of Portland avenue and the Ridge road, have a large amount of glass devoted to vegetable growing, besides a considerable area on which they grow celery and other vegetables. The writer spent a few minutes the other day in hurriedly looking over the glass houses. There are six even-span houses each 30x180 feet and stand 20 feet apart, running north and south. They are of simple sashbar construction, the ridge 13 feet above the ground line, and the walls or sides three feet high. The roof is supported by four iron purlins and corresponding iron pillars. The sash bars are 16 inches apart, the panes being 16x24 inches. The material was supplied by the Lord & Burnham Co., and the houses were erected by the firm about five years since. The interiors are remarkably light and airy. The center bed is 10 feet wide, and the side beds eight feet wide, with two paths 15 inches. The system is heated by two large steam boilers.

Three rotatory crops are produced in the houses during the year. At the time of our visit (the first week in February) the first house for the season's cucumbers was being prepared for immediate planting, and the successional planting of cucumbers will be kept up until about April 1. They

are planted in six rows three feet apart lengthwise, a house requiring 360 plants. The variety used is Long Green, which has been improved by the firm. They always save their own seed by careful discrimination and selection. Chauncey West told the writer that in the spring of 1908 they produced and sold 12,000 dozen cucumbers. They are mostly shipped to the Rochester, Buffalo and Pittsburg markets.

At the end of July, or about August 1 the houses are planted to tomatoes, which are turned out of 4-inch pots. The varieties used are Early Anna, Bonnie Best and Early Freedom. In reply to the question as to whether they were troubled with the white fly (*Aleyrodes vaporariorum*) which has proved to be such a bane to tomato culture in many parts of the country, Mr. West said they had been troubled with it somewhat, but they kept it under control with hydro-cyanic acid gas. The tomatoes are mostly shipped to New York, Buffalo and Rochester markets.

When the tomatoes are removed in late fall the houses are filled with lettuce and radishes, which are ready for shipment in mid-winter. Early Keene is the variety of lettuce used, and is a loose-leaf form, remarkably crisp and juicy. One house at the time of our

THE AVENUE FLORAL CO.,
3442 St. Charles Ave., NEW ORLEANS, LA.

visit was just ready for cutting, and as they are planted six inches apart, a house contains from 17,000 to 18,000 plants. This house certainly looked the acme of cultural perfection. Chauncey West said that most of the lettuce was shipped to the home market. A much larger area is devoted to lettuce than radishes. Scarlet Globe is the variety of radish used, and the round, uniform, bright red roots showed every appearance of perfect culture. Perfect cleanliness and good order is plainly evident over the whole establishment, and shows clearly the energy and push of this firm.

JOHN DUNBAR.

Notes on Hotbeds.

So far this season has proved one of the most unfavorable for the starting of hotbeds in many years. Those who depend upon hotbeds for early plants should not overlook dates, as this winter weather may come to an abrupt end and then it will be hard to catch up with the work. We know of no better way than to haul plenty of manure as near to the spot as possible and pile into one big flat pile and compact by driving a heavy team of horses over the pile twice a week, say for half an hour each time. This will compact the manure to a point where it will not burn, yet allow the heating to commence and when we get ready to push our hotbed work the material is at hand and in the best possible shape. We always like to use pre-heated manure, as we get a more uniform and also more lasting heat.

Never plant a bed before the first rank heat is over—the rule is “wait for weeds to start then it is safe.” Plant bed cloth is as effective a cover over sash as boards and much easier to handle. We make it a rule to cover whenever the sash freeze over and as long as no glass is frosted it is always safe to have covers off, sun or no sun.

MARKETMAN.

HEADQUARTERS FOR

EASTER PLANTS

PREPARE FOR EASTER

From Whom Will We Purchase Our Easter Supplies?

An Immense Stock of Choice Easter Plants Now Ready for Immediate Shipment.
Blooming Easter Week or Before if Desired.

“From whom shall we purchase our Easter supply this season?” That seems to be the cry all over the country. “We have tried so many already. I know what I am going to do,” some sensible man says. “I shall go back to Godfrey Aschmann. He is the best and most reliable man in the business. What he advertises he has and there is no bluff about it. I tell you his usual stock of Azaleas can’t be beat, and the Lilies he has this spring are the finest I have ever seen. No wonder. He imports them direct from Japan. He has a friend in Japan who looks after his interests and sends him the cream of Japan’s plants. He has enough to supply all, and I tell you no lie when I say that his other plants such as Hydrangeas, Cinerarias, Spireas, Ficus, Palms, Hyacinths, Tulips, Daffodils, Etc., are of such excellent quality that they will make a man’s mouth water, and they are so remarkably cheap that we often wonder how he can do it.”

AZALEA INDICA

We are headquarters for these plants for the past twenty-five years. We make a specialty of importing large quantities of this so well known favorite Easter novelty. Grown for us in Ghent, Belgium, by an Azalea specialist. Have now three houses full of the choicest. Only well known American varieties are imported. They are planted in the fall, as soon as they arrive from Belgium, into 6, 7 and 8 in. pots, placed in greenhouses and kept cool during winter. They are now in excellent condition, covered with buds, just right for Easter. Please bear in mind facts mostly unknown to some Azalea growers (that fully 30 to 40 per cent of the newly imported Azaleas in dormant state will lose their buds and foliage during the long transportation of the sea voyage and during winter up to Feb. 1 and have to be kept over for another year.

We only ship good stock and full of buds and flowers, and therefore you can’t expect Azaleas at this time to be as big and as cheap as if you would buy them in dormant state in the fall.

What is the name of the best double pink Azalea? Mme. Van der Cruyssen is the name. Originated by the well known Azalea specialist, Mr. Van der Cruyssen of Belgium. Millions are raised every year and shipped into every part of the globe from Belgium. We have a big stock on hand of this well known variety. Every plant is as round as an apple, covered with buds, just right for Easter. Have all sizes, 75c, \$1.00, \$1.25, \$1.50, \$1.75 to \$2.00 each.

In large sizes we have the following varieties, full of buds: Bernard Andreas Alba, pure white; Niobe, double white; Helena Thielmann, pure light pink, very fine; Souv. Mem. ric de Van Houtte, very large flowers, double pink; Empress des Indes, large flowering, double pink; Dr. Moore, double pink; Mme. Van der Cruyssen, best of all the pink; Apollo, red; De Schryveriana, double, large, variegated, Price, \$1.50, \$2.00, \$2.50 to \$3.00.

In smaller sizes we have the following varieties, full of buds: Mme. Van der Cruyssen pink; Deutsche Perle, pure double white; Vervaneana, double variegated, one of the old standard varieties; Apollo, red; Simon Mardner, double pink; De Schryveriana, large double variegated; Empress des Indes, double variegated; Niobe, double white, Price, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50. Professor Wolters, a well known variegated bright variety, at \$1.00, \$1.25 to \$1.50.

When we are out of one color we send the next similar color; also if we are out of the size ordered, we send the next size, either above or below the price mentioned.

Moonvines (Ipomaea Multiflora), best white Moonvine, for which we have a world-wide reputation now ready 2 1/2 in. pots, \$5.00 per 100.

Begonia New Improved Erfordi, 5-in., \$2.00 per doz.; **Begonia Flambeau**, 5-in., \$2.00 per doz.

Spirea Gladstone, 5-in., owing to the dry summer in Holland last year, is very scarce this Easter, but we were fortunate enough to secure sufficient to fill our usual house, and the plants are now in fine condition, full of buds, just right for Easter, 6-7 in. pots, 75c to \$1.00 each. **Spirea Floribunda**, Japonica and Superba, 6-in. pots, 25c, 35c to 50c.

Primula Obconica, 5-in. pots, \$2.00 to \$2.50 per doz.

Double Daffodils, Von Sion, best yellow, 3 bulbs in a 5 1/2 in. pot, \$2.50 per doz. pots.

Hydrangea Otaksa, in bud, 6-7 in. pots, 35c, 50c, 75c to \$1.00 each.

THE BEST EVER.

Better than ever are the plants whose gleaming Blossoms and leaves shine bright in Aschmann's store.

Flowers the kind of which we are always dreaming. More nearly perfect than all grown before. Lilies with whiter sheen, Azaleas richly tinted, Ferns with their lacy fronds like bridal veils. The Araucaria branches fruit with dollars minted For florists' use after Easter sales.

EASTER LILIES

Lilium Multiflorum, the genuine Japanese Easter Lily, directly imported by us. We have a friend in Japan who looks after our interests there. He picks out for us only the good, healthy ones, and marks them while they are growing, the 10-in. bulbs and therefore he ships us the cream of the plants of Japan. We have Lilies this year to burn: can supply, if nothing happens, every customer and others who want Lilies. 9 to 10 in. bulbs of Lilies were difficult to get from Japan last fall, but we were one of the fortunate ones to receive all the 9-10 in. Lilies (5,000) ordered last spring, 1909, from our grower in Japan. If you see them growing in our greenhouses, you must all admit they are “cracker-jacks”; we sell them cheap, too. Where other florists get 15c per bud we only charge you 10c per bud for plants in 6 in. pots, having 5, 8, 10 and more buds to the plant. Plants under 5 buds, 12c per bud, 6 in. pots.

Hyacinths, 4 best colors, King of the Blues, Grand Maitre (light blue) La Grandesse (best white), Gertrude (best pink) 4-in. pots, 12.00 per 100. Now outside in cold frames. Two to three weeks will force them into bloom.

Asparagus Plumosus Nanus, 3-in., \$5.00 per 100; 2 1/2-in., 3c; 4-in., 10c. **Asparagus Sprengeri**, 3-in., large plants 7c; 4-in., 10c.

Cineraria Hyb. Grandiflora, H.F. Michell's new improved strain. Our plants of this strain are twice the size of those of other years, with perfect large, green foliage. Some of the plants are almost as large as a bushel basket, 6-in. pots, 25c, 35c, 50c, 75c to \$1.00 each.

Arcua Lutescens, 5-in. pots, three plants in a pot, 35c.

Ficus Elastica (Rubber), 5 1/2 to 6 in. pots, 25c to 30c.

Whitmani Ferns, 7-in., 75c to \$1.00.

Neph. Amerpohli, 5 1/2 to 6 in. pots, 30c, 40c and 50c; 6 in., 60c to 75c.

Kentia Forsteriana, 6-7 in. pots, 35-40-50 in. high, perfect leaves, \$1.25 \$1.50 \$2.50 to \$3.00; 4-in., 20c. **Kentia Belmoreana**, 6-in., large stock, \$1.25 to \$1.50; 4-in., 20c to 25c; 3-in., 10c.

Cocos Weddelliana, 3 in., 15c.

Ferns for Dishes, \$3.00 per 100.

Have an Immense Stock of Easter Plants.

Please state if in or out of pots.

Importer, Wholesale Grower and Shipper of Pot Plants.

The Nursery Trade

American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;
W. P. Stark, Louisiana, Mo., Vice-President;
John Hall, Rochester, N. Y., Sec'y.

Thirty-fifth annual convention to be held
at Denver, Colo., June 8-10, 1910.

THE death of Edward O. Schwagerl of Seattle, Wash., one of the most experienced and best known landscape gardeners in the northwest, is chronicled in our obituary column.

THE La Porte Orchard Co., of Houston, Tex., has received its charter of incorporation. The capital stock is \$10,000 and the incorporators are Daniel and J. H. Powell and W. A. Pitrat, of Kansas City, Mo.

Aesculus Parviflora.

The horse chestnuts are a beautiful class of tree and this dwarf species has many admirers, especially in the middle west, where the common horse chestnut will not thrive on account of the heat in summer. *A. parviflora*, although it may not relish this treatment exactly, can stand it better than some other kinds and do fairly well under the circumstances. It is a showy, good dwarf tree well worth planting in groups for effect on lawns or shrubberies.

American Peony Society.

Matters relating to the premium list for the next exhibition are under consideration. The Massachusetts Horticultural Society will offer additional premiums, including some medals and prospects are bright for a splendid exhibition. Both amateurs and peony specialists around Boston are enthusiastic about it and will do their best to keep up the reputation of their city. The nomenclature committee, under Mr. Batchelor, did a large amount of work last year, the results of which are now being prepared for publication.

A. H. FEWKES, Sec'y.

California Eucalyptus Seeds.

A committee was appointed by the Los Angeles Florists' and Nurserymen's Society to report upon the alleged misstatements respecting the quality of California eucalyptus seed and eucalyptus planting along the Owens River viaduct, at its meeting at 251 South Main street, September 30. One of the statements was that the native eucalyptus seeds were inferior to those imported from Australia in germinating power and purity, the opposite having been proven by years of experience. The public press and misinformed persons had recommended species for timber culture that had been tried and found quite unsuitable to the climate and soil conditions of California. These and other statements are so misleading and likely to lead to so much disappointment and loss that a manifesto from such a committee was deemed desirable and the society also asks the co-operation of all public bodies in the dissemination of authentic and reliable information on the subject.

The chief offender appears to have been one R. S. Webb, a native of Australia who first appeared at Los

Angeles about two years ago and soon came to the conclusion that the Californian growers were not using the best kinds and that the Jarrah (*Eucalyptus marginata*) was the best of all. It was in vain to tell him that this had been tried for more than 20 years and found wanting. He was shown a publication in which his own government experts stated that the Jarrah delighted in an ironstone formation and will not grow on a granite formation, while the soil composition

Brazilian Railway Nurseries and Forests

In order to reduce the cost of the ties and to insure a proper supply, the principal Brazilian railways are being compelled to give their attention to the planting of forests for supplying ties, in a manner even more advanced than that followed by a number of the great railways of the United States which are nearly face to face with similar conditions. An outline of the situation and of the means taken to avoid further trouble and to reduce expenses on this score appears in the

AESCULUS PARVIFLORA.

in California was largely of a granite base with no trace of ironstone. Again, contrary to his statements, the local grown seeds are twice as potent as like seed from Australia. Yet it seems that this gentleman has been sent to Australia to make a special study of the eucalyptus in regard to the best varieties to be grown, not in Australia but on land belonging to the Los Angeles aqueduct, the Angeles forest reserve and the Standard Eucalyptus Co. He is supposed to bring back many hundred pounds of seed. The committee in a lengthy report disprove practically all this man's statements, showing that many of the kinds he advises for "lands of snow and ice" do not attain to the dignity of trees at all and are "mere shrubs of less value than our native mountain brush." It also says that he has no commission from Chief Forester Pinchot or the forest service beyond the fact that Chief Engineer Mulholland said "he might bring back a few pounds of seed for experimental purposes." The committee's report winds up as follows: "Unreliable statements concerning eucalyptus, their culture and financial possibilities are quite current at the present time throughout California and the public should be cautioned against giving credence to improbable stories concerning one of our growing industries which, if properly managed, will prove a great boon to California." It is signed by the members of the committee, Ernest Brauntun, Chas. Winsel, O. M. Morris, Jacob Dieterich and Theodore Payne.

annual report of the Paulista railway company, which operates the largest railway system in southern Brazil, of which the following is a synopsis:

"The cost of wood fuel and sleepers on the Paulista line, with a track mileage of 691 miles, is about \$390,000 per annum, the fuel being used on the short branch lines. As this is one of the largest items of expense, it was

Designs, Estimates, Construction of Grounds.

determined to experiment with afforestation. A nursery of 250 acres was established at Jundiahy in 1904 and planted with 40,000 trees, of which 30,000 are eucalyptus and the rest various other kinds, both indigenous and imported. Two other tracts, of 65 acres each, were also planted with eucalyptus, the total number being 20,000. The company now has 60,000 trees of various kinds, and the expenditures in five years, including the purchase price of the ground, have been \$45,095. The eucalyptus was found to be best adapted for the material, not only because of its weight, compactness, and holding power, but also by reason of its extraordinary vigor and rapid growth. Some trees in the nursery, planted five years ago in poor soil, are now 58 feet tall, with diameters of 15½ inches each at the base.

"The company has determined to carry out its scheme on a large scale and has acquired 3,750 more acres of fine land near the city of Rio Claro. On this and other available lands it is planned to plant 1,000,000 eucalyptus trees. At present improvements on the land last purchased will produce sufficient revenue to pay back the capital expended in buying it, it is estimated that the total cost of this experiment in forestry, which will be completed in 15 years, will be \$150,000, or 15 cents per tree, while the returns on each tree when cut up will be 20 times its original cost. It is also estimated that the 1,000,000 trees will prove an ample and continuous resource for fuel and sleepers for all the company's lines, thereby saving the company approximately \$300,000 a year. The growing of trees for railroad work in Brazil is to be taken up generally by railways serving the dry zones and those portions of the country where the cost of getting out native forest trees is excessive."

European Horticulture.**TREES AND SHRUBS.**

Clematis Armandii is an April blooming clematis, hardy with deep green trifoliate leaves which show off the dense clusters of pure white blooms. These are nearly two inches in diameter and so hardy that a sharp frost does not spoil their beauty.

Philadelphus Mer de Glace (Glacier) is one of the most recent novelties of Victor Lemoine. The leaves are larger than P. Lemoinei and are the largest of philadelphus flowers. A symmetrical bush, very free flowering; flowers silvery white, double, the exterior petals very broad, the interior ones narrower.

Some New Root Crops for the South.

The Department of Agriculture at Washington is continually discovering and testing new crops. When these give promise of becoming valuable additions to the crop resources of this country, they are recommended for trial. The department has just issued a bulletin dealing with the "Yantias, Tares, and Dasheens as Promising Root Crops for the South." These are tropical plants which can easily be grown in many parts of the south. They ought to prove valuable in many sections because they can be grown on lands too wet for other root crops or any cereal crop except rice. These plants comprise salad plants, tubers which are excellent for table use and also for stock feed, roots which are valuable sources of starch and from which alcohol can be made.

## Frey's New Single and Anemone Chrysanthemums

The sensation at the National Flower Show, 1918, was of the \$50.00 Silver Cup, two first and one second prize; Certificate of Merit of the Chrysanthemum Society of America and Minnesota State Florists' Association, two First Prizes at Milwaukee, 1909.

These are all exceptionally fine for commercial purposes either for cut or pot, it being my aim to send out only such varieties as have stood a severe test in this market. The constant gain in favor of these two types has been so rapid and their value for all sorts of decorative purposes so great that every grower will want to invest in them. It has been stated by authorities that these varieties are a great improvement over those now in commerce.

### 1910 Novelties.

**Mrs. Theodore Wirth** A most beautiful soft pink Anemone with light yellow center, preceding Mrs. John Pesther a moneymaker.

**Alpine Glow** Anemone, large white flower with a glow of pink. Very beautiful.

**Christina Scull** Single, medium sized flower like a golden Marguerite. Very profuse.

**Grace Clementina Burki** Single, pure white very substantial, follows Lady Lu.

**Mrs. John Pesther** Single of medium size. Enchantress pink, long slender, wiry stems; comes for Thanksgiving. Extra fine.

25c each; \$2.00 per 10; \$15.00 per 100, rooted cuttings or 2½-in. pots.

### 1909 Introductions.

**Anemones.**  
**Lida Thomas**, Delicate cream, late.  
**Gertrude Wilson**, Deep yellow; very fine.  
**Mrs. Edw. F. Swift**, Delicate pale lavender, one of the first to bloom.

**Beatrice Asmus**, Pure white, one of the best.  
**Mrs. Augusta Knab**, Creamy white, with yellow center.

**Miss Ida Kroeschell**, Light yellow with quilled petals.

10c each; 80c per 10; \$6.00 per 100, rooted cuttings or 2½-in. pots.

Delivery will commence second week in March. All orders will be filled strictly in rotation.

Albany, N. Y.

The March meeting of the Florists' Club will be held in its rooms, 71 State street, on the evening of March 3. The entertainment committee has been instructed to prepare for a lunch and smoker and the outlook is for a good time for all present. The arrangements were discussed at the February meeting of the club, at which only a comparatively small number were present on account of the very inclement weather. Among the visitors present was R. J. Irwin, of the Skidelsky & Irwin Co., Philadelphia. Mr. Irwin has recently been made a member of the club. Unusual interest was added to the meeting by a warm discussion that arose on the subject of accusations made outside by some florists against others. The matter was threshed out at great length with here and there a little wisdom injected by President Goldring. The result was that many things before obscure were

brought into the light and everybody went away feeling satisfied that many causes of friction had been bared and set to rights. So excellent were the results that it was determined to make the March meeting like an old family reunion, a celebration indeed of the excellent state of good fellowship that now exists. The majority of the members did not get home after the meeting until 5 a. m.

## A New Fern NEPHROLEPIS GIATRASH

Awarded a Certificate of Merit by the Horticultural Society of New York.

**Prices:** In 2¼-inch pots, \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000. 25 plants at 100 rates; 500 plants at 1000 rates. Orders delivered in rotation as received. **Now Ready for delivery,**

**GEORGE GIATRASH,**  
 463 Summit Ave., West Hoboken, N. J.

Sioux City, Ia.

Business so far this year has been keeping up remarkably well. Roses have been very scarce the last few weeks but carnations are plentiful and sell well, taking the place of roses in part. Funeral work has been very plentiful of late cleaning up everything in the way of flowers. Out-of-town shipping trade is good but we are able to take care of all orders. A considerable number of orders from nearby towns have been received here of late, retailers not caring to send to Chicago when stock can be obtained much nearer.

### NOTES.

Rocklin & Lehman have had a big demand for violets and the Japanese air plant, which latter is a big seller here.

The retailers made fine window displays for St. Valentine's day and Lincoln's birthday.

J. R. Elder, it is reported, will shortly move to larger quarters.

R.

## Almost Sold Out

Have you sent us an order for your stock of Carnation Dorothy Gordon? Easy to put it off—but our supply is limited, orders are piling in every day, and some of you who are planning to grow this splendid carnation for your trade this year are going to be disappointed.

This magnificent flower made a big "hit" at the Pittsburg meeting, but that didn't surprise us any, for a great many of our friends in the trade long ago learned that for real, substantial profits

# Carnation Dorothy Gordon

stood away up at the top of the list. We know we "harp" a lot about its merits, but when you know this grand new variety as we do, you'll be enthusiastic, too. Flowers fragrant and uniform in color—a little darker than Pink Enchantress; very large—size, 3 inches or more in diameter—buds of good substance and very lasting. All these features spell profits for growers of Carnation Dorothy Gordon—double profits, for the plants

bear more flowers which sell for a higher price, bringing your gains up to nearly twice what you can get from other commercial sorts.

Come to Wyncote and see Dorothy Gordon growing; if you cannot do that write or wire us now and we will reserve stock for you. But do it quickly if you want any rooted cuttings this spring. Interesting literature free. Prices are: \$10.00 per 100; \$75.00 per 1000.

JOSEPH HEACOCK COMPANY, Disseminators,

Wyncote, Pa.

Jos. H. Cunningham, Delaware, O.

Boy and Girl Agricultural Club.

The Department of Agriculture has issued under the above title a bulletin telling of the work done along the line of agricultural clubs for boys and girls. As a rule these have had their beginnings in some form of contest and there are in the various states clubs for corn, potato, cotton, fruit or poultry raising, studies of home life, birds, live stock and others. The members have been taught to recognize good or bad qualities in these products and have met and discussed problems in the improvement of plants, fruits, animals and housework.

### KNIVES.

Razor steel, hand forged, postpaid. Propagating, 50c; budding, 35c; grafting, 25c; pruning, 75c. Cat. free. Maher & Grosch Co., 91 A St., Toledo, Ohio.

### MISCELLANEOUS.

Meyer green silkline, \$1.25 per lb., spools to lb. Meyer violet thread for violets, \$1.25 per doz. spools of 500 yards each. John C. Meyer Co., 1449 Middlesex St., Lowell, Mass.

Rocking grate bar, saves 10 to 25 per cent coal. U. S. Rocking Grate Bar Co., 77 Jackson Blvd., Chicago.

Evergreen Brand Flower Fertilizer, \$2 per can of 12 lbs. D. D. Johnson Co., 64 Wabash Ave., Chicago.

Pillsbury's Carnation Staple, 50c per 1,000 postpaid. I. L. Pillsbury, Galesburg, Ill.

The Mastin Automatic Whitewash and Spraying Machine. J. G. Mastin & Co., 3124 W. Lake St., Chicago.

Superior Carnation staple, 50c per 1,000, postpaid. L. J. Waite, 293 Main St., Springfield, Mass.

Iron reservoir vases and lawn settees. McDonald Bros., Columbus, O.

The Florist Friend nicotine insecticide. Florist Friend Co., Owensboro, Ky.

## The "Meyer Green Silkline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also **Violet Thread** for tying up Violets. Price of both, \$1.25 per lb. express or freight paid in good sized orders.

**JOHN C. MEYER & CO.,** 1449 Middlesex St., Lowell, Mass.

## The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish. When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes. All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,** and the **Mastin Whitewash Nozzle** for Bordeaux mixture. Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

**J. G. MASTIN & CO.,** 3124 West Lake St., CHICAGO, ILL.

## ORCHID PEAT, (Osmunda Fibre)

Finest quality, hand cleaned, free from sticks and dirt.

In chunks or handpicked ready for use.

Also **Rotted and Azalea Peats, Leaf Mold, Live or Baled Sphagnum Moss.**

Prices and samples on application.

**C. W. BROWNELL & CO.,** WALDEN, N. Y.

TRADE GOOD.

Business has been firm right along since Christmas. Roses are scarce and command good prices. Beauties are no good; carnations are of good quality and plentiful; violets are plentiful now, but no surplus; they sold at \$1.50 per 100 and went up for St. Valentine's day to \$2 per 100. Bulbous stock, jonquils and narcissus are good, but tulips so far have been a failure and a big loss to the growers. It seems the bulbs were not ripe or dry enough to export from Holland last year and the growers in Holland ought to stand for part of the loss. We have passed through the hardest winter weather we ever had. From December 1 to January 10 we had continuous cold weather and no sun, and the coal men put the price way up; coal which sold for \$2.35 f. o. b. here went up to \$3.85 per ton. We paid a premium of at least \$800 in six weeks; now coal is at normal rate again. For a while it looked as if we could not get any coal; it's nothing more than a holdup. We are having now the best kind of weather, plenty of sunshine and cold at night and it will soon tell on the roses. Pot plants were good all winter; azaleas, cyclamens, cinerarias and primroses never looked so well and they sell well at

It is "THE MOREHEAD"

WHY?

**BECAUSE** it is giving them service they thought could not be bought for money.

With an installation of a **Morehead Return Steam Trap** there begins a better growth of flowers, a more even temperature in your greenhouses, a decided decrease in your fuel bill and an infinite period of satisfaction.

Let us put your name on our list of "satisfied users." Our "Trap Book" sent on request.

**MOREHEAD M'F'G. CO.,**

Dept. N, Detroit, Mich.

good prices. We had some camellias, but they are not a profitable plant to handle. Sweet peas are plentiful and bring \$2 per 100.

NOTES.

We have not heard of any one building this year, except J. F. Wilcox, who has bought 1,800 boxes of glass. Hess

& Swoboda may rebuild all their east houses on the west side, 17 old houses.

On February 2 our city lost one of its wealthiest citizens, and all the florists were very busy. Among the many pieces was a casket cover of violets and sweet peas by Hess & Swoboda.

or AUGUST ROLKER & SONS, New York Agents  
31 Barclay Street, New York City.

Glen Cove, N. Y.

The regular meeting of the Nassau County Horticultural Society was held in Pembroke hall, February 9, with over 40 members present, and President Duthie in the chair. Six applications for membership were received and C. H. Hyde, Roslyn, was elected a honorary member. The schedule for the summer show was approved, date and place to be decided later. The dahlia show will be held September 28, and the schedule for the same was accepted. Stumpp & Walter Co. offered a silver cup for our fall show, and at our last dinner Geo. Burnet offered \$25 as prizes for the same. The next meeting will be rose day, and three prizes are offered for best three white, three pink, and three any other color, respectively. Vice-president Reidenbach also offered \$5 for the best two vases of sweet peas. Geo. Wilson's essay on "Carnations" was a treat for all. It certainly deserved a first place among writings on the same subject. Messrs. Mackenzie, Marshall and Johnston acted as judges and their decision was as follows:

Twelve white, V. Cleres, first, with White Enchantress; 12 pink, A. Robertson, first, with Enchantress; 12 mixed, V. Cleres, first, Imperial, Winsor and Enchantress. Cultural certificates were awarded to the following members: W. Eccles, for vase of Winsor, also vase of Mrs. Chas. Knopf; Henry Gaut, for vase of sweet peas; E. Reidenbach, for two beautiful cyclamens; A. Robertson, for vase of Enchantress. Honorable mention

was awarded to F. Petroccia for a plant of Primula Kewensis and to E. Reidenbach for a vase of freesias. At the next meeting, E. Johnston will give us an account of his travels across the sea during his last vacation. O. E. A.

Denver.

Business, since the new year has been very brisk; but roses have been off crop; carnations have also been scarce, bringing at wholesale from four to six cents and roses from six to 15. Roses are still scarce. The weather has been very severe the past week.

The wife of N. A. Benson, 1360 South Sherman avenue, died February 7 and was buried February 11 at 2 o'clock. There was one of the finest displays of designs, artistic bouquets, etc., that one would wish to see anywhere. Funeral services were held at Horan's undertaking parlors, in the chapel, and was attended by all of the retailers and growers of the town. During Mrs. Benson's long illness from tuberculosis Mr. Benson has been wonderfully devoted to his wife. He is one of the most prominent and popular men in the trade and has had the sympathy of all in his wife's illness and death.

Trade for the month of January was very dull, the weather being cold and cloudy and flowers were scarce; carnations are very weak-stemmed yet. A few bright, sunny days will soon start business up again.

On the evening of January 24, a majority of the members of the Florists' Society met at the College inn, corner Pike street and Third avenue, and had a very enjoyable smoker. The chair was occupied by J. W. Thompson, superintendent of parks, and president of the society. After eating and drinking of the best, a hearty vote of thanks was returned to George Antenen, proprietor of the Seattle Floral Co., for the able manner in which he got up the entertainment, he being a committee of one to look after the eatables, etc., for the occasion. After the tables were cleared the president asked those present what they intended to do with the society, whether to dissolve or to start and see if we could not make good. It was talked over by all present and voted to dissolve the society and empty the treasury as the dollars there were rusty and in the near future to call all interested in floriculture and horticulture to become members of a new society and have a good live healthy club of young active members who will enthrone new life into it and make it a credit to one of the best cities on the Pacific coast. It only needs a good chrysanthemum show to get the public interested in cut flowers and plants.

J. C. R.

Oslo, Fla.

The cold weather during the early part of January did great damage in some sections here, more to the pine-apples on the east coast than anywhere else. Oranges were not hurt below 27° of latitude, but in the northern part of the state most of the fruit is frozen and unfit for shipment. Truckers generally have had very poor results this year.

Axel Hallstrom returned February 1 from a very pleasant visit to Scandinavia. He says he finds that conditions over there are away behind those obtaining in this country. The climate there is not so good for cut-flower growing, but trade, generally, was good, especially in bulbous flowers.

CAMBRIDGE, MASS.—John E. McKenzie is now recovering from a disabled foot from which he has been suffering all winter.

These are the houses, 163 x 30, 7-foot sides, at Baldwin, L. I.

## Never Had a Broken Glass, While his Neighbor's Houses Nearly Blew Down

It was during one of these near blizzards this month. Mr. Geo. Schuneman's houses are open to a clear wind sweep for miles. When our man went down after the storm there wasn't a cracked glass in all three houses, and they were as clear of snow and ice as on a summer's day.

The other fellow had a truss house (not an extra wide one, either.) When the wind struck his house, he thought sure it was going down—now he has planted a windbreak to save it.

It's these straight from the shoulder facts brought out by real tests that show just how good and staunch the Hitchings houses are. It will pay you many times over to put up Hitchings houses. Let us hear from you.

## THE WEEK AT PEACEFUL VALLEY

By The Optimist.

### A Busy Time.

There is plenty of work to keep all hands busy. With thousands of small plants needing a shift, cuttings going into the sand and coming out, seedlings to be pricked out, together with the regular routine, there are not many leisure moments. In repotting our geraniums, we had started throwing away the tops, as we did not need them, and we were so badly overstocked that we were tired of the sight of geraniums, but we had a chance to sell a few thousand unrooted cuttings, and the chance made us as happy as the finding of so much money. Wonder if that wouldn't be about the best way to handle geranium cuttings, that is, sell them unrooted! Surely it would seem best for the purchaser. Geranium cuttings can be shipped anywhere, if not more than 48 hours enroute, packed dry and light, and arrive in about the right condition to go right into 2-inch pots. The purchaser pays a minimum price and roots the plants himself. Years ago we used to buy unrooted geranium cuttings from the late Mrs. Theodosia B. Shepherd, in California, but the shipper persisted in wrapping them in damp moss, with the consequence that the cuttings were mostly rotten when received. If they had been wrapped dry, in waxed paper, I have little doubt they would have come through in good condition.

### The Boston Club.

There was a nice show of new varieties at the carnation meeting of the Boston Florists' and Gardeners' Club, February 15. Among those that attracted special attention were Mrs. C. W. Ward and Alma Ward, the latter a grand flower, though I was told by an expert that the blooms shown did not come up in size to exhibits of the same variety made some years ago. Another white that took my eye was Granite State, from Brother Buxton, Nashua, N. H. I like its shape, size, and especially its fragrance. If it looks as good to me when ready for introduction, I will buy at least a

dozen of it. Other varieties shown in good form were May Day (evidently a fine thing for the retail grower), Shasta, Red Prince, and several promising seedlings from M. A. Patten and A. Roper.

### Parcels Post.

Resolutions protesting against government free seed distribution and in favor of a parcels post were adopted at the meeting. Of course resolutions passed by this club, or any other organization, can do no harm, and may help a little bit. But in my humble opinion the way to materially advance either cause would be by direct appeal of the individual voter to the individual congressman. One letter, or a dozen letters, might be ignored by your servant and congressman, but if he were to receive an avalanche of thousands of letters, say on the subject of parcels post, he would probably wake up to the fact that there was "something doing." Will your congressman ever receive such an avalanche of letters? Not in your lifetime, gentle reader. The free and independent citizen is too busy grumbling about these matters to have time to write such a letter.

### Novelties.

As usual we, this year, bought seeds of a number of novelties from European seedsmen, and, also as usual, we found the percentage of germination very low. Why is it that invariably seeds of standard varieties from European sources give a percentage of 70 to 90, while the novelties rarely give 25 per cent germination? If you can't afford to give us 15 good seeds for 25 cents, gentlemen, why then charge us 50 cents, but please don't give us five live seeds and 10 dead ones.

### That Saucy Meat Trust.

We've been having a meat boycott around Boston the past few weeks and the result would be laughable if it were not rather pathetic, as showing the utter helplessness of the people—that is, the easy-going American peo-

ple, not necessarily all peoples—when engaged in a contest with their rulers. The No Meat club obtained a fabulous number of signatures to an agreement to buy no meat for two weeks. The next move was by the trust who promptly cut down the shipments of meats to Boston one-half and at the same time advanced the prices. They also more than doubled the shipment of cattle to Liverpool, from the port of Boston, as compared with the two weeks preceding. No pretence there, you see, that prices are governed by the law of supply and demand. Was there ever a more arrogant challenge to the people? Aren't you rather proud to be one of such a people? As to The Optimist, the more he sees of some people the more he respects his dog.

### The Spring Business.

Indications, for this part of the country, point to a big spring trade, but with supplies considerably in excess of all requirements. Wholesale prices have ruled exceptionally high for the past two months. There has been a pronounced shortage of good carnations, roses, and bulbous flowers of all kinds. I think the average for January, 1910, breaks the record for any January within my memory. If the growers had a smaller cut the advanced prices certainly made up. This shortage points to a greatly increased output in the weeks to come. The plants that were off crop in January will produce the goods in March. Retailers will welcome the return of more moderate prices. There is neither fun nor money in retailing flowers when prices are at the top notch. On the other hand a pronounced glut is deprecated by grower and dealer alike. It cheapens the business as well as the flowers. That a glut of violets is already here is evidenced by the advertisement of a large department store, offering a bunch of 50 violets, with foil, cord, special box, and free delivery, for 50 cents.

### Asparagus Plumosus Injured.

ED. AMERICAN FLORIST:—

What causes the injury to the *Asparagus plumosus* enclosed? There are centipedes in the bed. Would they cause it? C. A. M.

Malnutrition is probably the cause of the poor color in the fronds of asparagus sent, but what has caused this we cannot say without knowing anything of the treatment given. We do not think that centipedes would cause the injury. Two little or too much water causes a yellow shade, the one because of too little moisture being supplied to the plant's system, the other, by making the roots inactive, weakening them and preventing their carrying out their proper functions. The browned tips may have been caused by excessive fumigation or owing to general weakness of the plant. Anything that prevents free root action, say a close, heavy, moist soil or one through which air and water cannot move freely will cause the growth to be unsatisfactory. "C. A. M." will be the best judge as to what is wrong in his case. G.

VANCOUVER, WASH.—A. Hanson has sold his business and greenhouses to L. Gillott.

## THE RETAIL TRADE

### Basket of Azalea and Lilies.

SEE SUPPLEMENT WITH THIS ISSUE.

Azaleas are among the brightest and showiest of pot plants, either for individual use or for using in connection with other plants in baskets. Alone they have the fault of being rather flat and they need something lighter and more graceful to relieve this. Among the best things we know for this purpose are rambler roses in colors, that do not clash with those of the azaleas, Easter lilies and most of the varieties of bulbous stock, such as narcissi and daffodils, hyacinths, tulips and others. Plenty of green plants are also necessary to prevent the garish effect which is produced by the use of azaleas alone. Graceful little palms of the cocos and areca order, *Panicum plicatum* or any other fairly tall, slender-growing subjects are fine for use in the center of the baskets, while for the edges, small ferns of the pteris or ribbon order, pretty little pieces of silk oak, or even *Cyperus alternifolius* are suitable.

The demand for baskets is largest around Christmas and Easter, and there is a disposition on the part of customers to prefer them rather more closely filled than is best, from an artistic standpoint. This crowding is bad in two ways: It uses more stock than is necessary and has not so good an effect, but retailers are powerless in the matter when those who are "paying the piper" reserve the right to "call the tune." The only thing to do

the needs and likings of those who are paying for them.

The customer may like a basket stuffed so full that hardly a plant in the lot can be picked out or seen individually. We have heard people gush over the beauty of an old-fashioned bouquet in which the flowers were so closely jammed that one could hardly insert a lead pencil between them. Their wishes have to be met, but this does not prevent a retailer endeavoring to lead up to something better, provided it is done in a tactful way, almost by suggestion, as it may be termed. Each plant in a basket, like each flower in a bouquet, should be so placed that it can be seen individually and is not part of a conglomeration of leaves and flowers without rhyme or reason. Always have such baskets on show, but be prepared to make the other (any other) kind that customers may fancy.

### Some Good Window Displays.

The illustrations on pages 212-213 show two pretty window displays put up by the Idle Hour Nurseries, Macon, Ga. The one in which the church is shown was a Thanksgiving window. The church was made of wood with trimmings of rattan, the stained glass window in the end being colored with paints of different tints. Green moss was used over old boxes to form the hill on which the church stood and Japanese gravel was used for the walk, cork bark for the rocks, rattan for the fence, and on the card was written "Thanksgiving services 11:30 and 7. All welcome." Dolls were used

PILLOW OF VIOLETS AND EASTER LILIES WITH VIOLET RIBBON.

By Young & Nugent, New York.

is to put up a few baskets in a more artistic manner, i. e., less crowded, and let customers choose between these and the heavier arrangements they are used to see. In a great many instances, especially with the better class of customers, the lighter arrangements will be chosen, and a taste for this kind of thing will be gradually cultivated. It is useless trying to force it. Retailers of flowers, like retailers of any other kind of produce, have to adapt themselves and their wares to

to represent people going to church and miniature electric lights were used to light the church at night. The church had pews and a pulpit made of cardboard and the floor was painted red.

The other window represents a country house and a fish pond, containing minnows and gold fish. A nigger boy, fishing with rod and line, had a card hung around his neck with the words "My idle hour" upon it. The tank which held the water was made

BASKET OF AZALEA, EASTER LILY, HYACINTHS AND PTERIS.

of wood and zinc lined. The railings were split rattan and the steps were painted white leading to the house. The house was made of wood, the trimmings of split rattan, with glass windows, the interior painted red, the exterior white and green. Red lights were used inside and Japanese trees on the veranda, the walk was white gravel and rocks of cork bark. The whole outfit was the work of the firm's designer, H. G. Evans, who has worked in nearly all parts of the world. He worked for Wills & Segar, South Kensington, London, Eng., where he learned a great deal to his advantage, and has certainly displayed his talent since coming to Macon.

### An Elaborate Chicago Wedding.

Through the courtesy of Canger & Gormley, of State street, Chicago, we are enabled to give an outline of what they are going to do at the wedding of Miss Schuttler to Myron A. Wick, treasurer of the Delaware Steel Co., which takes place at the bride's home, 1365 North State street, March 2. We saw the order of the bridegroom for the bouquets. The bride will carry a bouquet of white orchids, while cattleyas will be used in those carried by the maid of honor and the four bridesmaids. The men will wear gardenias.

The couple will be married under a bower composed of natural grape vines, from which will hang bunches of Black Hamburg grapes, and interspersed with these will be growing orchids, the whole being lit, on the approach of the bride and bridegroom, with small incandescent electric lights. Other rooms will be treated with *Asparagus plumosus* with garlands of sweet peas, the mantels, book shelves and other prominent places in the rooms being banked with growing spring flowers. In the dining room the same thing will be carried out on two pedestals, one each side of the window, these being surmounted with large baskets of spring flowers and garlands of the latter brought down right to the floor. This room will be treated with *Asparagus plumosus* and White Killarney roses, the roses being arranged in a natural manner as if growing out of the asparagus, the whole forming a kind of artificial ceiling. The pedestals referred to will also be lit with incandescent glow lamps, the whole scheme being white and green with this exception. In the buffet the table centerpiece will be of White Killarney roses and white lilac, and as the firm has been given carte blanche in the matter of expense there is no doubt that with its clever decorators and long experience with this class of work this will turn out to be the best and most elaborate wedding decoration that has been arranged in the city for many years.

### The New Bouquets.

Old-fashioned bouquets of flowers, stiff and regular, the kind our grandmothers loved, are again in vogue. And now, instead of wearing violets and lily of the valley on every occasion, such flowers as are selected are being carried in the hands, and if the bunch can be placed in a gold or sil-

ver bouquet holder so much the better. This change is partly due to the fact that slightly damp flowers have ruined so many gowns and that larger bunches are now in demand. They are awkward if pinned to the corsage, and to wear at a dinner table are almost impossible.

The newest way of arranging flowers is formal, as one will realize by this description. One bouquet that was sent recently to a debutante was composed of tiny pale pink roses, with alternating rows of small white buds. The center was a tight little round mass of pink, then a circle of white, only one bud deep. About that was another circle of pink, and so the two continued, alternating until the bouquet was 12 inches across and as hard and round as any cabbage. Flat green leaves made a severe outer border, with a final rim of fancy, scalloped lace paper.

Bunches of pansies are fads of the moment, though for the older rather than the younger woman. Persons wearing mourning affect bouquets made of the varying purples in which the flower excels, but when used with colors the blossoms are selected with the variety in which they grow. Lily of the valley and violets continue in favor, but are arranged differently than in previous seasons. The white flowers are made into a close bunch for the center of a purple heel, with outer green leaves. These, when small, are pinned to the corsage, but if more than six inches across are carried in the hand.—Washington Star.

### St. Valentine's Day in the New York Stores.

Though most of the retailers agree that trade was better than last year on St. Valentine's day, some even going so far as to say that it was 50 per cent better, there was but little effort at elaboration. It is presumed that the customer must be content with what he can secure. A man well known in the trade recently said in effect to the writer, there is always a demand for novelties, but we do not feel that the volume of St. Valentine's day business warrants us in going to much trouble to supply novelties. Nevertheless, it seems that the experiment would be worth trying. Red roses and violets seemed this year to be the most popular stocks for valentines. A few hearts of roses and violets were seen, but nice boxes of loose flowers were the rule.

Thorley sent out a number of novel bouquets which were a happy blending of old and new styles. It has been previously noted that the old-fashioned bouquet holder is again coming into use. In these bouquets the holders were a draping of chiffon with showers of baby ribbon. One of these bouquets was made of *Enchantress* carnations and lily of the valley with pink chiffon holder or draping and pink baby ribbon. Another was composed of marguerites, violets and lily of the valley with showers of Nile green ribbon and cover of chiffon of the same tint. A third was red roses, white lilac and *cyripediums* with a miniature bouquet on the draping of lily of the valley, violets and prim-

roses; holder and showers of Nile green. These bouquets were of a convenient size, attracted much attention and sold well.

### A Nasturtium and Some Profit.

Several years ago a new variety of nasturtium was introduced under the name of Chameleon and at that time being in Ohio in a retail business that required nearly every thing a florist handles I always grew a bunch of potted nasturtiums for vases and boxes. My ideas favored trying Chameleon, so seed was procured, expensive though it seemed and in due time a very fine bench of beautiful plants and flowers was the result. Among them were several specially beautiful, one of which threw a large and very rich crimson flower. The tip was cut out and flower taken out then I set the plant aside to be reserved. The season passed, the other plants were disposed of and an eye kept on the "crimson beauty." It was set out on a bench in a very good location where it did fairly well—considering some neglect. For awhile the flowers came, all with the intense richness of crimson that was very uncommon. When passing it one day we noticed some very rare canary colored yellow among the foliage and no other color in sight. They were beautiful and large and very sweet scented. They were kept cut off closely—our intention being to "set" a liberal number of blooms for seed. Thinking the time proper—having branched the plant liberally, we let them alone. When they flowered, almost every color from the canary to the rich crimson appeared. Some of the seed was saved and in the fall the plant was cut off right next the soil that had been left for the sake of it when refilling the bench. Ere long it put up a new shoot that looked so nice it was left. Buds soon appeared, the top was cut back and part of the leaves cut off. It threw up many and varied and exceedingly rich flowers and when we saw there would be a few dozen in for Christmas we gave it special attention. There were about 50 of them, which made a most beautiful bunch. As soon as they were placed in the window in the store a customer hurried in and asked for them—threw down a dollar—wished them wrapped up quick, asked where she could get some more; then hurried on her way. The thought struck me that 25 cents a dozen and a dozen nearly every day as they promised was not bad pay for the space so we decided to try what it would amount to. The plant bloomed well and they were readily sold at 25 cents per dozen for awhile, then later at 15 cents, and finally a nice bunch at 25 cents. We kept a careful record and the plant returned \$6.60; besides I had the pleasure of several beautiful bunches of them on my own table.

When we moved from Ohio to Tacoma, Wash., we misplaced the seed from that plant so that I never have found it and although we procured more seed of the same name we never found a plant to equal that one in its richness of color and variety. One thing peculiar to it was that the foliage ranged from bronze to light green.

TACOMA.

## FLORISTS' PALMS.

### Palms Green and Variegated.

That the merits of a new palm are not always promptly recognized in the trade, may be noted in the case of *Phoenix Roebelini*, this plant only becoming popular during a few seasons past, though introduced from Siam in 1889. Probably the first plants of this species that were exhibited in this country were some imported specimens shown by Pitcher & Manda at one of the shows held in Madison Square garden, New York, about 1890, and the plants in question were not nearly so ornamental as those shown during the past year at the metropolitan shows, from the fact that the latter were young plants without any bare stem and thoroughly furnished with foliage, while the original plants noted above were much more mature specimens. The mature specimens of *P. Roebelini* show a rather slender, bare stem, with a head of fronds at the top, and frequently some suckers around the base, the plant in that condition being rather more odd than pleasing.

From a commercial point of view such a plant does not compare favorably with the fountain of dark green, feathery foliage that is presented by well-grown young plants in 8 to 10-inch pots, such as are frequently seen in these latter days. It is not to be wondered at that this palm has met with much favor, for few are more graceful or more enduring among dwarf palms and, since the seeds have been offered more freely, large quantities of the plants have been in course of preparation for the market. As to whether *P. Roebelini* will prove to be a very profitable palm to the grower or not, is yet an open question, for the plants are slow in growth for the first two or three years at least, and in these days of rapid-fire business this seems like a long time to wait for results. This palm has been frequently mentioned, as in the present article, as a species, but in the opinion of the botanists this is not strictly correct, as they hold that it is simply a variety of *P. humilis*. But be this as it may, it is a beautiful palm, and one that may be safely recommended by the retail florist to his customers, being fully as hardy as a *kentia*, and effective in any position to which a compact and bushy palm is adapted.

That *P. Roebelini* is simply a variety seems quite reasonable when we take into consideration the number of variations and hybrids that have appeared in this family of palms. For example there is *P. cycadifolia*, a very stiff and cycas-like form of the common date (*P. dactylifera*), also *P. melanocarpa*, a large edible fruited form of *P. Senegalensis*. Then there are *P. hybrida*, *P. intermedia* and *P. compacta*, all of which are garden hybrids, to say nothing of the various variegated forms that have appeared from time to time, among which *P. rupicola variegatis* is one of the most notable. In fact, almost any large grower of palms could readily pick out a number of unusual forms from a batch of seedlings, some of these being of unusual coloring, such as the red-stemmed form of *Kentia Forsteri-*

*ana*, sometimes known as *K. Mooreana*, or the light green form of that palm, with long and narrow leaflets, that some years ago was called *Kentia australis*. *K. Belmoreana* is also quite variable, both in coloring and in form, and it may be mentioned in passing that some of the botanical authorities claim that *K. Belmoreana* itself is only a form of *K. Forsteriana*, so there you are. Botany and botanical nomenclature are both fascinating to some of us, but it is likely to mix us up when someone breaks out with the statement that these plants are not *kentias*, but should be called *howeas*, even though the statement is undoubtedly correct.

And then that beautiful palm that we first knew a quarter of a century ago as *Kentia Canterburyana* is neither a *kentia* nor a *howea*, but ought to be known as *hedyscepe*. This latter palm is quite a good example of a botanical mix-up, from the fact that it thus far has had at least four generic names, being known successively as *veitchia* (after John Gould Veitch), *kentia* (in honor of Lieutenant Kent of the British navy), *howea* (from Lord Howe's Island, where it is native), and now *hedyscepe*, the latter being of Greek origin and indicating sweet covering. It seems likely that the last is the best name

for this palm, but yet it will be a long while before it becomes as popular as one of the early names. Mention has been made of the fact that variegated palms are not uncommon, though these freaks are seldom of as strong constitution as the species from which they have sprung, and in many cases are either short-lived or else revert to the original green type. One of the most attractive of variegated palms is *Rhapis flabelliformis variegatis*, in which the stripes of clear yellow contrast well with the dark green of the remainder of the leaf, and, although this plant is a slow grower, it retains its variegated character better than most of the variegated palms with which we are acquainted. Propagation of *rhapis* being usually accomplished by means of division, it is a slow process to get up a stock of the variegated form, and consequently it is seldom met with in commercial collections. Variegated *kentia* seedlings appear from time to time, some of them nicely striped, and similar freaks are occasionally found among *Areca lutescens*, and *Livistona Chinensis*, in addition to the golden form of the latter palm that is sometimes catalogued as *Latania Borbonica aurea*, the last named palm having a yellow coloring over the entire plant. But, generally speaking, palms are

WINDOW DISPLAY AT THE IDLE HOUR NURSERIES' RETAIL STORE, MACON, GA.

"My Idle Hour" is the Legend on the Negro Boy's Placard.

more beautiful, and more satisfactory, in their natural coloring than with variegated foliage, and apart from botanical collections there is not much demand for these curiosities.

W. H. TAPLIN.

### Palms Unsatisfactory.

ED. AMERICAN FLORIST:—

In November I shipped in some palms from Chicago, and they apparently arrived in perfect condition. I potted them into a size larger pot than they were taken from, used the same soil for all, and gave them all the same subsequent treatment. In about two weeks, however, the arecas began to show signs of dying, and they have continued along that line ever since. I examined the roots and found that all the substance had been drawn from them, leaving only the outer skin and a small hard core. The kentias have done nicely right along. If you can suggest any cause for this trouble I will be very glad to have you do so through the columns of your valuable paper.

R. A. N.

Areca are more tender than kentias and do not travel as well as the latter, especially if they have been grown rather warm. It is most likely the arecas in question were chilled in transit, if not actually frozen, and the damage would not show to any great extent for a few days after they arrived. These palms will also suffer in transit if packed in too dry a condition. The only thing that can be done with them is to keep them warm and moist, a night temperature of 65° being best for them.

W. H. T.

### Dracena Godseffiana.

When dracæna is mentioned the tall, single stemmed plants of the terminalis, Massangeana and similar species are usually thought of, but *D. Godseffiana*, is a totally different plant. Although this species has been in cultivation for a considerable period, having been introduced from the Congo by Sander & Son, the famous English firm, it has of recent years come more to the front as a plant for baskets and other ornamental use. It is prettily spotted with yellowish white on a deep green ground and the leaves are broadly lance shaped, quite different to those of all other species. *D. Godseffiana* is not by any means a difficult plant to grow, being easily propagated by means of the semi-ripened points of the shoots. Although it will grow in a very moderate temperature it may, if necessary, be given more heat when it will grow quicker and can be more freely propagated. A rich soil is undesirable, as in this the variegation is not so well brought out, but kept slightly pinched for pot room and in comparatively poor soil the leaves will color up beautifully and it is an elegant subject.

G.

LONG BRANCH, N. J.—The Elberon Horticultural Society held its annual banquet at the Deal County Club, February 7, and a most enjoyable entertainment resulted. The hall was finely decorated, the menu good and the speeches interesting.

THANKSGIVING WINDOW AT IDLE HOUR NURSERIES' RETAIL STORE, MACON, GA.

## HARDY HERBACEOUS PERENNIALS.

### Planting and Rearrangement.

While in the northern section of the country snow and frost still prevent anything being done on the herbaceous borders there are southern points where growers will soon be busy transplanting or preparing to transplant the forwarder species, making alterations to the borders, finishing those started in fall and adding new plants. Plants that have been wintered in frames or other protectors will be starting to grow and the sooner they are planted when this occurs the better. When preparing the whole or any portion of a border it is better to do a little and do this well than to attempt a lot and only half do it. The plants are usually in the ground for several years and, while the soil need not be made exceptionally rich with fresh manure, it should be deeply cultivated and plenty of good available plant food incorporated with it. Old compost from a rot heap, burnt earth and garden refuse, with a little lime and well decayed manure is a far better addition to the soil for these plants

than fresh manure, and such a heap should be in every place where hardy plants are grown.

It should be thoroughly incorporated with the soil, not just dug in the bottom, and the lower or subsoil should be well broken up with spades or digging forks, but not brought to the surface. Such work should never be carried out when the soil is wet or frozen, but when it is in a good workable condition. Soil moved in a wet state in early spring bakes up into lumps when the sun gains power, and anything planted in it has the roots exposed to the heat of the sun's rays and drying winds, making it difficult, or almost impossible, for the plants to obtain a good hold on the soil. When it is worked down finely, on the other hand, it settles more closely about the roots. And, by keeping a thin layer of dry soil on the surface, sun and wind are, to a great extent, kept out and the roots have a cool, moist medium to work in all summer. Any time that is lost in waiting for the soil to dry out sufficiently after frost or

rain is far more than made up in the shorter time needed to carry out the work, to say nothing of the increased health of the plants afterwards.

There is no time so suitable for transplanting and dividing up herbaceous stock of nearly all varieties as when the plants have made just a little new growth. The advancing growth acts as a stimulus to the roots, causing them to branch out and look for food and moisture to maintain the advancing leaves and stems. This, of course, serves to re-establish them and leads to a vigorous start that does not occur if they are transplanted, either before any growth has been made or after this has advanced so much that it suffers when the roots are disturbed. The latter time is probably the worst of all to move plants as, before they have time to recover, the heat of summer is upon them and they suffer accordingly. The early planting, after division, exposes parts of the plants that are not accustomed to it to cold, drying winds and light frosts that frequently occur in the early spring months, and for this reason we always apply a thin mulch of semi-decayed manure, strawy litter, leaves, or some non-conducting material that keeps the sun and wind away from the roots and young growth. This may appear a small matter to the inexperienced. As a matter of fact it is a most important detail that should not be neglected. Stock taken from protectors is more tender than open ground divisions and the protection in its case is even more necessary.

#### Plants for Memorial Day.

ED. AMERICAN FLORIST:—

You will confer a favor on many in the trade by publishing a table or list of plants that will bloom for Decoration day and the time required for them to bloom from the date of planting, giving dates.

H.

The number of plants that flower under glass around Decoration day is so large that we could not hope to do justice to the subject in a table as suggested. Not only is the number too great but all practical growers know it is impossible to give actual dates for planting in order to have plants in bloom by another given date. Many subjects have to be propagated months or even years, before they come to perfection in the greenhouses while, even with bulbous subjects such as hyacinths, narcissi and lilies, weather conditions have a great deal to do as to the length of time they take to come into flower after being introduced to heat. They are planted, of course, as early in the fall as the bulbs can be procured. Callas, which are much in demand at this time, bloom right along after once starting; they have no special season. Azaleas have to be kept quite cool to be in for Decoration day while hydrangeas will come with very little forcing if placed inside at New Year's. Easter lilies held back and started in February, will probably be about right while about two months forcing should insure rambler roses being in flower. Keep an eye on the cultural notes and suggestions that appear every week and if there is any particular plant or plants as to which any doubt exists write again, explaining the difficulty. A table such as you suggest could only be approximate in its dates and not of much service.

G.

## THE CARNATION.

SANGAMO is winning golden opinions wherever shown and the outlook for this variety is very bright.

"It's an ill wind," etc., and carnation growers have had it coming their way during the rose scarcity which has been so general.

WINSOR probably never showed better form than during the present season. Many growers prefer indoor to field culture for summer for this fine variety.

#### Holding Over Carnations.

ED. AMERICAN FLORIST:—

Can you give me any information regarding growing carnations through the second season? Does it pay? I have a fine house of Enchantress White Enchantress and Harlowarden. Would the blooms be as fine the second season? I am cutting pink and white with 24-inch stems and 11 inches in circumference, planted in the bench last June. Carnations do better with me planted inside in June than planted outdoors and then lifted. Our soil here is a stiff red clay.

Virginia.

G. T.

We do not advise growing carnation plants through the second season, finding that they do not do nearly as well as new stock. We have some plants now in their second season that were lifted from the beds and transferred to the field and again

brought inside at planting time but the results are decidedly in favor of the plants now in their first season. The older plants are noticeable by the growth being smaller and the blooms not up to the same grade as the first year plants. I have not had any experience with the Virginia climate but should imagine that it would be more difficult to carry the plants the second season there than here in the middle west.

C. W. JOHNSON.

#### Carnations Past and Present.

A paper read by W. H. Taplin, Brooklyn, N. Y., before the New York Florists' Club, February 14.

So much has been said and written on the subject of carnations and carnation culture during the past few years, and has also been expressed so well, that it seems scarcely possible that I may present anything new on this subject for the consideration of such an up-to-date organization as the New York Florists' Club. The literature of the carnation has become extensive, and there are doubtless many repetitions to be already found in it, so possibly a few more will be pardoned at this time.

That the output of carnations is steadily increasing will, I think, be readily admitted by anyone familiar with the wholesale trade of our city, and that there is no better market for high grade flowers will also be conceded by the majority, but it is also doubtless true that there are still

BOUQUET OF CARNATION WINSOR.

CARNATION MRS. C. W. WARD, PHOTOGRAPHED, FEBRUARY 7, AT THE COTTAGE GARDENS CO.'S GREENHOUSES, QUEENS, N. Y

many carnations sent into market that are far from ideal, either in size or condition, and the oversupply of such flowers breaks the market to such a degree that good stock is frequently sacrificed. It has been said that New York is the dumping ground for the growers of flowers in all the surrounding country at any time when the home markets of said growers become overloaded, and there may be some truth in that assertion, but at the same time one cannot blame the growers for hunting for a market and the commission men would probably not refuse to accept the trifling percentages that come their way from this outside business. But the New York market is critical in regard to carnations, as in other stock and it is more profitable to the grower to supply the varieties and the grade that the market calls for than to produce an ordinary run of stock.

To look back some 35 years and recall the varieties of that time, and then to glance at the carnations of today, gives room for thoughtful comparison: Astoria, Edwardsii, Peerless, DeGraw and La Purite were among the stock from which, in later years, an improved race sprang. In fact, it would seem that Astoria was the original parent of the most of the yellow varieties that have since been grown. But from DeGraw and Peerless down through the multitude of whites that have followed them up to White Enchantress and White Perfection shows

many strides of improvement, and what the next 10 years may bring forth we can only guess at. Possibly that traditional 4-inch flower on a free growing and free blooming plant may be among the good things the hybridizers will surprise us with. Then there have been the successive steps from Daybreak and Grace Wilder through the various shades of pink until Peter Fisher brought forth Enchantress, the most popular light pink of today, and in all probability the most widely grown variety in the carnation world. From Portia onward through the various shades of red there have been many changes. A red of the size of Portia, free blooming though that variety was, would not stand much chance in the market in comparison with Victory and Beacon and, according to the returns from Pittsburg, even these latter fine sorts are not in the same class in regard to size with Hoosier Lad, Dorner's latest triumph. But the majority of scarlet varieties have an unfortunate habit of being favorite hosts to the rust fungus, and Victory is no exception to the rule; in fact, it is decidedly the exception to find a bench of this variety that is free from rust.

Of course we all know that rust is not such a handicap to the grower as stem-rot, or spot, but at the same time it does not help the appearance of a carnation house, nor does it improve the stamina of a variety infected by it. In addition to this, Victory does

not branch very freely in the field, and as a natural result the plants are likely to be small at the time of lifting, but with all these drawbacks it is a fine flower, and a good keeper, and as such, sells readily. The later red, and I had almost said the favorite red of the present day, is Beacon, also a product of that clever hybridizer, Peter Fisher. It is a great record for one grower to have produced such a noteworthy trio of varieties as Mrs. Lawson, Enchantress and Beacon, all of which originated with Mr. Fisher, and while the west is undoubtedly coming forward at a good round pace in the production of new carnations, yet there may be many that "also ran," before such another team as that we have noted is brought forth. The evidence seems to be that Beacon is the most productive red in the market, and although it is not over-large, and with many growers is given to splitting badly during midwinter, yet it is a good Christmas color, and a free growing and thrifty variety, and in short "with all its faults, we love it still."

We have already mentioned Mrs. Lawson, that for several years was the leader in the dark pink class, and even yet is grown to some extent, this variety having displaced a number of others in various shades of pink. But Mrs. Lawson does not appeal to our market very strongly now, her place in turn having been taken by some later arrivals. Mrs. Lawson has, how-

ever, left a numerous family, and among them Welcome, Winsor and Variegated Lawson are still grown to a greater or less extent, and White Lawson may also be occasionally found, though these varieties are usually under the standard for length of stem.

Counting from La Purite, which I believe was introduced from Europe to this country by Dailledouze, Zeller & Co., and was the first pink carnation with which I had an acquaintance, there have been hosts of pink varieties launched on the sea of trade, and many of them have been wrecked on the rocks of criticism. But it is much easier to be a knocker than to produce the goods, and I think we should all give honor to the pioneers in the carnation trade who offered to the world for a proper consideration, in due course, such pinks as Grace Wilder, Wm. Scott, Albertine and others. The varieties we have noted were not perfect, but neither have those of the present day reached to that lofty standard, and even now there is room for a good dark pink, and there are more than whispers that such are on the way.

Crimson is not a color that is demanded in thousand lots in most markets, the most likely exception to this statement being found in the neighborhood of Harvard, but crimson carnations have been grown for a good many years when we count from Crimson King, and even now the crimson that are offered do not approach the size and vigor we find among the white and pink varieties. This fact makes us think that there is still room for improvement among the crimsons, and possibly may be found among the number of crimson seedlings that are being tried out. In some parts of the country Harry Fenn is still producing some good flowers but in our neighborhood this variety has lost its grip.

Patten and Variegated Lawson are probably the most popular of the variegated varieties, but neither of them can safely be counted upon to pay the rent, the first named being especially slow in blooming in the fall and early winter, though producing abundantly in spring. Bay State secured the gold medal last season, but from the accounts of several growers does not seem to produce much gold in the regular order of business. Among the fancy varieties of past years, Prosperity was the greatest success, and in its time brought the highest price of any, but now we would have to hunt for some time to get 100 flowers of Prosperity, for very few growers handle it. Toreador is a later variety of similar type to the last named, and though variable in color is a very attractive flower, on an unusually stiff stem.

Of dark pink and cerise there have been many novelties of late years, among them being Aristocrat, Afterglow, Rose Pink Enchantress and Dorothy Gordon, each of which has had, or still has, its champions, and each of which is beautiful in its own way, though the first three have all developed some disadvantages, and regarding the latter variety, most of us will know more in a year from now. Mrs. Ward and Alma Ward are both beautiful varieties, and have com-

manded good prices the past two or three seasons, and being on the market now may be tested by the trade in general. There still is room for a good yellow variety, for, strive as they may, the hybridizers do not seem to attain their idea in this line, yellow carnations, generally speaking, being either lacking in constitution or else not free in blooming, or under size, with the result that no yellow variety is now grown to even the extent that Eldorado was a few years ago. And now to sum up briefly, it may be said that in the opinion of an ordinary observer, and one that by no means claims to know it all, there is much that is encouraging in the progress that has been made in carnation varieties and culture during the past few years, for wonderful things have been done by Dorner, Fisher, Ward, Weber and other men of prominence in this department of our profession, and I fully believe that there will be quite as great achievement to chronicle in the next 10 years as have been witnessed in the past decade, for with increased knowledge and experience more systematic work will be possible in the future than has been accomplished in the past.

PHILADELPHIA, PA.—The Germantown Horticultural Society gave an exhibition of Chinese primroses, carnations, roses and plants in the lecture room of the local Y. M. C. A., February 14. Remarks on the plants and flowers displayed were given by the Rev. Francis Heyl, president of the association, and George Redles, the secretary.

## CHRYSANTHEMUMS

### Soil for Chrysanthemums.

ED. AMERICAN FLORIST:—

Will soil that has been used for two years for cucumbers be suitable for chrysanthemums? The soil was about one-third rotten manure when put in and some sheep manure added. It is sandy and light and ferns thrive well in it.

SUBSCRIBER.

We would advise mixing a little fresh loam with the soil and, if possible, let it lay outside one summer and winter before being used for the chrysanthemums. It may be rich enough but the addition of fresh loam will insure a more solid, better growth in the plants. If impossible to do this, fair results may be expected by the use of the soil as it is. G.

### Specimen Plants for Exhibition.

Plants intended for exhibition should be started along now and encouraged in every way to make a free sturdy growth. Clean, healthy young plants now in 2¼ or 2½-inch pots are ideal for this purpose. If growing freely, with the roots showing through the soil, they can be potted on into 4-inch pots. The soil for this potting should be light and loamy with about one-fifth well-rotted cow manure and a little sand added. Place a few small crocks in the bottom of the pots to keep the drainage and soil open, allowing for rapid root action. After potting, the plants should be set in a light, airy place as near the glass as possible, well watered in, then allowed

CARNATION HARVARD.

to stand for a few days until the soil shows signs of drying out. Syringing should be practiced every few days to keep down thrips and red spider, also to encourage a healthy leaf growth. As the roots take hold of the new soil growth will be very rapid and every day or two will find some little thing to do to keep the plants in perfect health and active growth. As soon as active growth commences attention must be given to topping back the shoots to produce a low bushy plant.

Any plants intended to be trained as standards or half standards should not have their main shoot pinched back but allowed to grow on until the desired height of the stem is attained when the work of pinching in the shoots should begin. Several plants will have to be started to obtain the right ones for standards, as many of them will not make a good clear stem and a number of the varieties have a habit of budding up at every shoot when a growth of 18 inches to two feet has been accomplished. Plants shifted into 4-inch pots early in February will be ready for another shift the early part of March. This should be into 6-inch pots. These should be well drained and a few pieces of charcoal placed over the crocks. The soil for this potting can be made richer by adding about a 3-inch pot full of a good fertilizer to about two bushels of soil and the plants potted firmly. After the plants get into 6-inch pots they require plenty of air space around them and a cool airy place to grow in.

The watering should be attended to as often as the plants require it but the soil should not be allowed to become saturated. By April 15 the plants will be ready for another shift into 8-inch pots, the standards will have attained the height necessary for the length of their stems and, from this time on, the work of pinching to form the heads should go on. The topping of the shoots of the bush specimens should also be followed up closely right along. Just at this time the suckers from the stools of the plants will be found to be very troublesome and, if the plants have to be grown with a clear stem above the soil, these shoots springing from the bottom must be removed. If there are no restrictions as to the number of stems then the suckers can be allowed to remain and be pinched back as they require it to help form the plant. Plants shifted into 8-inch pots around April 15 will be ready for their final potting about June 15. The size of pot to use for this potting must be governed according to that allowed for the purpose for which the plant is intended; 10, 12 and 14-inch are the sizes usually used for these large specimens and if the plants are well established and furnished with good healthy roots a shift from 8 to 14-inch can be carried out without any detrimental effect on the plants, providing extra caution is used until the roots again take hold of the soil.

The soil for final potting should be coarser and richer than that used for the previous pottings consist of well rotted cow manure one part to four of stiff clay soil with a little sharp sand added. Ample drainage is nec-

CARNATION AFTERGLOW.

essary. The topping back of the shoots on both bush specimens and standards can be carried on during the growing season until the middle of July when all topping or pinching of the shoots should cease and the process of training commence. The first thing to do along the lines of training these large plants is to place a few stakes throughout the plants to shape them and guard against any of the shoots becoming broken. This is a temporary measure; the final training should be done the latter part of September just before the buds appear. These specimen plants will repay liberal applications of liquid manure when they are in good health and their roots in active working order. Regular fumigations and continued spraying to keep down insects should be attended to at all times. A good selection to grow for exhibition is the following:

Bush specimens—White, Miss Clay Frick, Mutual Friend. Pink, Louis Boehmer; Wm. Duckham; A. J. Bal-four. Yellow, Golden Age; W. H. Lincoln. Red, Geo. W. Childs; Brutus; Matchless.

Standard specimens—White, Miss Clay Frick; pink, Wm. Duckham; yellow, Golden Age; red, Geo. W. Childs; bronze, J. H. Silsbury.

The single flowered varieties, together with most of the anomones, make

fine plants to grow into large specimens but they are more rapid in growth and do not have to be started as early as the large flowered varieties.

C. W. JOHNSON.

#### Poinsettia Culture.

A paper read before the Morris County Gardeners' and Florists' Society at Madison, N. J., February 9, by E. Reagan.

*Poinsettia pulcherrima* is almost indispensable for Christmas decorations and every gardener should grow a few for that purpose. I have never resorted to the planting out system on benches, although a good many are grown that way for cut purposes. The resting period beginning in January, lasts until the early part of May. The plants are cut back to within about two feet from the pots and then turned over on their sides, water being withheld all the time. We place them under the carnation benches, and there they remain until started in May, usually under the rose benches, as near the walls as possible so that they can get light, giving them a good soaking with water. We syringe them overhead two or three times a day and, in two or three weeks, the first batch of cuttings can be procured. We prefer cuttings from 2½ to three inches long, taken with a little old wood or heel, as the term is often

used by gardeners. There are other methods that can be resorted to if the stock is limited. That is by cutting up the old stem in the manner practiced with vine eyes, and still another way is by cutting the stems into lengths, so that one eye is above the sand. It is advisable when taking cuttings to have close at hand a little powdered charcoal and dry sand to directly insert the cuttings into as they are taken off, to stop the sap from flowing. Get the cuttings into the sand as soon as possible, so as to prevent flagging. Give a good watering and shade with some papers. The poinsettia is very easily rooted and by making a succession of strikings one can have plants ranging from one foot to six feet tall. Under favorable circumstances, cuttings will be rooted in about three weeks. Do not leave them in the sand for the roots to become more than an inch long, otherwise they will in all probability be damaged when being potted. For the first potting prepare a fairly light compost, using a small quantity of sand to some leaf soil and loam, well mixed. Place the young plants in a shaded part of the house. As soon as they are rooted sufficiently to stand the sun, place them in the full sunlight and when ready shift them into larger pots, making the compost heavier with loam and a little added sand to keep the soil open. By the early part of August, the plants will take their final shift into 5 or 6-inch pots. We use all loam with a small quantity of bonemeal and Scotch soot well incorporated into the soil. When potting use the rammer freely and pot firmly. In my opinion that has a tendency towards helping the plants to hold their foliage longer than if loosely potted.

Always be careful to give a plentiful supply of water, for if left to get dry and flag in the hot sun, the result will be a beautiful crop of scorched foliage. Spray the plants overhead several times a day in bright weather. Some have an idea that the poinsettia needs high feeding. That is a mistake. Two applications of Clay's fertilizer at intervals of two weeks is ample to finish bracts, say from 14 to 19 inches across, in 5 and 6-inch pots. The poinsettia is not very susceptible to the ravages of insect pests, mealy bug being the worst enemy. Even that can be warded off if a careful watch is kept to never allow them to get any headway by an occasional spray of X. L. All insecticide or Aphine.

#### Miss Maud Doyel.

Miss Maud Doyel, the popular and attractive saleslady at the retail store of McDonald & Steele, of Crawfordsville, Ind., of whom we publish an excellent portrait, is just now considerably in the limelight in that burg. Miss Doyel at present heads the list of ladies, to the most popular of which the Crawfordsville Daily News is going to give a \$600 automobile. Miss Doyel led all her competitors, by over 30,000 points, February 11, and we hope she will maintain this lead to the end.

READING, PA.—The Berks Flower House has opened a stall for the sale of cut flowers at 619 Penn street.

## HALF HOUR CHAPTERS FOR PLANT GROWERS

### Genistas.

Take a look at the genistas that are wanted for Easter, and see how they are advancing. If they were not pinched too late the flower buds will be showing, and such plants will probably be in on time without any forcing. These plants always thrive best in quite a cool, airy house, in a good light. Keep the atmosphere right by damping freely between the pots and on the benches; also spray the heads on bright days until the flowers show color. Green fly and other insects do not bother these hardy subjects much, but should they appear give gentle

Miss Maud Doyel, Crawfordsville, Ind.

fumigations every other evening until they are destroyed. A little feeding with soot and manure water, or nitrate, if the soot cannot be had, will be of great assistance where the plants are potbound. Give it little and often rather than in strong doses.

### Coleuses.

Although not of the first importance, a good stock of coleuses of suitable varieties for planting in window boxes, hanging baskets and vases is sure to be useful when the bedding season starts in. Where stock plants have been saved during winter these will, if placed in a little extra heat, after being lightly cut back, soon produce abundance of good cuttings that root readily in the propagating bench over a gentle heat. These plants are of very rapid growth and like a light, sandy soil, some growers giving them nothing but well-dried manure and sand in about equal proportions. If kept well supplied with water at the root and in the atmosphere, and the plants arranged in a good, clear light, they will grow at a rapid rate and make large leaves, which are extremely showy. But, beautiful as such

plants are, as plants, they are not suitable for the purpose indicated above. Their leafy system is too soft the drying wind and hot sun of summer and they will not stand the effect of mer. For bedding or veranda planting, the plants should be grown harder and more slowly, not stunted by any means, but not rushed in the manner described. As soon as they are well established in the pots in which they are to be finished, say 3½-inch, expose them to all the air and light possible, and so harden and prepare them for their transfer to the open air in June.

### Verbenas.

Although the verberna is a fairly hardy subject and dislikes any kind of coddling treatment, there is a time in the earliest stages when the plants are very sensitive to alternations of drought and moisture, and the seedlings damp off at a very rapid rate. This occurs in so early a stage that careless or unobservant growers never see the plants at all and look upon the few chance ones that remain as evidence of seed of low germinating quality. From the first the plants should be watched, and no extremes allowed either way in regard to moisture. The flats or pans containing them should be placed in a good light, where they will obtain plenty of air without being exposed to draughts, and in a few weeks, when they have gained strength, they will be perfectly safe if treated like other seedling stock.

### Tuberous Rooted Begonias.

In the culture of tuberous rooted begonias, a few cardinal points should be kept in mind. If starting now with tubers, do not make the mistake of thinking that these must have strong heat to start them. They do not need it and start much better without it. Just let them come away naturally in a temperature of around 50° at night, and maintain a moderately moist atmosphere about them right along. They start better in flats with light soil around them than if potted, and they may go into the pots after starting. Lift them out of the soil carefully and, if roots have started, retain any soil that adheres to them when placing them in the pots. A compost of good loam three parts, the other third being made up of well-dried cow manure, leaf mold and sand or grit will be about the most suitable. Pot moderately firm if the soil is fairly moist, as it should be; give it no water for the first few days, simply spraying over the surface and the young shoots twice daily. These shoots, after having made an inch or so of growth, should be thinned to about four or five, according to the size of the bulb, not removing them all at once, but going over them several times, especially if they are much crowded. Grow the plants right along in a cool greenhouse temperature and ventilate freely as long as the weather is suitable. Water very moderately at first, until the roots obtain a good hold of the soil, after which a free supply will be needed.

**Rapid Rose Growing.**

The accompanying illustration shows the interior of Aug. Grossman's greenhouse, located on Lincoln avenue, near Winnemac, Chicago. This was planted to Richmond roses November 28-29, 1909, and the house started in to crop about January 15, 1910. This is pretty quick work and the grower, Mike Then, is to be congratulated on his success with this rose.

**The Culture of the Chrysanthemum.\***

REVISED EDITION 1910.

This is an English book, written by that well known chrysanthemum expert, W. Wells, who, naturally, does not pretend to be an authority on the American methods of culture. But there is a lot in it that will be of great interest to the American reader and especially the ex-British sojourners on our shores, for much of the early part of the work goes back into the history of the chrysanthemum of some 20 years ago, when she was rising rapidly on the tide of prosperity. The cultural notes are good—for English growers—and probably growers for exhibition in this country could pick up many valuable hints and use them, of course, adapting them to the conditions that obtain in America. Much of the outdoor summer treatment is totally different to that practiced, or likely to be practiced here where the hot dry summers render it impossible. The chapter on "Chrysanthemums in America" is interesting reading, as showing how our methods strike the foreign eye. Mr. Wells is quite impartial in his views and by his travels appears to have lost much of the insular prejudice against everything "un-English" that characterizes the writing and speeches of so many sons of Albion. The little book is well worth perusal and no chrysanthemum grower should be without it as its price is not worth considering. We suggest to the author that if another edition is needed he have the names carefully revised and also look out for other type errors which are a defect to any book. Mrs. "Rundle" is the way we have been accustomed to spell the name of the beautiful old white incurved, now probably no more, not Mrs. "Rundell," Meg "Meriless" reminded us of Merry-legs as we used to call this old variety and "Julia" Lagravere should be "Julie" if memory serves right. But these are minor points that may probably be overlooked by the general reader and do not detract much from the value of this excellent little book. It is well illustrated and bound in green cloth, the price being 75 cents.

**The Best Dollar's Worth.**

Enclosed find \$1 subscription for AMERICAN FLORIST for 1910. It is the best dollar I spend during the year.  
H. A. HYDE.  
Watsonville, O., January 13, 1910.

**Subscriber Twenty-Five Years.**

Molinton, Pa., September 12, 1909.

\*We can supply any books noted on receipt of price quoted.

**OBITUARY.****Joseph B. Fuller.**

In the death of Joseph B. Fuller, seedsman and botanist in the employ of James Vick's Sons, Rochester, N. Y., on February 16, the seed business has lost one of its oldest and most esteemed representatives. Mr. Fuller was born in Brooklyn, N. Y., October 31, 1827. When he was only three years old his family moved to Rochester, coming by the Erie canal and stopping on their arrival at the old Rochester house, corner of Exchange and Spring street. At the age of 14 he was apprenticed to the late Henry O'Reilly to learn printing. Later he was with the Genesee Farmer, published by the late James Vick and edited by the late Patrick Barry. Being for years in close relationship with Mr. Vick, the two being drawn together by a mutual love of flowers, he was easily persuaded to engage in the seed business. In 1863 he entered the employ of Mr. Vick, and continued almost uninterruptedly with the Vick firm from that time until failing health about a year ago necessitated his giving up active work.

Mr. Fuller's influence in the development of the business was scarcely second to that of Mr. Vick. His whole life was bound up in the work and his whole energy devoted to it. For years he had pursued the study of botany and his extensive knowledge of plants was of great advantage. His knowledge of stocks was extensive and thorough; his judgment and accuracy were without equal; and his honesty unimpeachable. To his perfect integrity and absolute reliability the success of the Vick seed business was in no small degree due. He was a thorough seedsman, far-seeing, conscientious and accurate. During a trip to Europe, in 1888, Mr. Fuller was invited by Carter, Dunnett and Beale, of England, to inspect their trials of peas. Of one particular variety, his opinion was asked as to its quality. His reply was "It's a daisy." This bit of American slang evidently impressed the famous English seedsman, for a few years later this variety was introduced as Carter's Daisy, and fully justified Mr. Fuller's opinion of its good qualities. His genial manner made him hosts of friends in the trade. Many a long chat over cigars did he and the veteran seedsman, Wm. Meggatt have in the old Vick seed house on East avenue, in the eighties.

Mr. Fuller's geniality was one of his most prominent characteristics. He had a good story apropos every occasion. His reminiscences of the early days of Rochester, and of the volunteer fire department of which he was a member, were particularly enjoyable. He was a member of Valley lodge, No. 109, F. and A. M. since 1853, and Hamilton chapter, No. 62, R. A. M. He was a member of the Rochester Academy of science, giving devoted attention to the work of the botanical section of this society. In 1896, when the academy published a list of the plants of Monroe county, it was difficult to find a compositor sufficiently familiar with botanical terms to set up the list in a satisfactory manner. Mr. Fuller came to the rescue, and, though it was years since he had stood at the case, he set all the type for this work, more than 150 pages, a remarkable achievement for a man of his years, as well as from a typographical standpoint. He was the supreme authority on all botanical questions, and nowhere will his loss be more felt than in the botanical section. With his fellow workers in the seed business he was always pleasant, kind, patient and forbearing, with the old-time courtesy of manner so seldom seen nowadays. In his death they feel that "a good man has fallen."

**Joseph H. Bebus.**

Joseph H. Bebus, an expert designer and decorator, who since boyhood has been connected with the trade of New York, died there, February 16, after a short illness of dropsy. He was 55 years old. He was at one time associated with his brother, the late Jacob Bebus, in a large retail store at Broadway and Twenty-third street, where the Bartholdi hotel now stands. After the death of his brother he held different positions. He was for several years, manager for Mrs. J. J. Featherstone, 266 West Twenty-third street. For the past year, and up to within a few days of his death, he was employed by Geo. Lapp, 230 Eighth avenue. He was a widower and is survived by two daughters, both of whom have reached adult age. Mr. Bebus was a genial and kindly man and made a good impression on those with whom he did business. He was of a quiet and unassuming disposition, and on account of these and other temperamental characteristics, was not as well known as many men of less ability.

A LOCAL newspaper says that the "blue rose" from Germany is being extensively grown at the Heller greenhouses, with which Dingee & Conard Co., West Grove, Pa., are associated. Two new roses, according to the same authority, are to be brought out here, Robert Heller, a hardy, everblooming yellow, and Jeanette Heller, a new pink.

THE White Oxen meeting at Urbana adjourned without an initiation.

THE S. A. F. executive committee will meet at the Seneca hotel, Rochester, N. Y., March 12.

SOMEBODY else has discovered the secret of growing "black roses," and is seeking to patent the process. The discoverer has quite a modest idea of the value of his "invention," as, although he has been offered \$500,000, he is going slow in accepting any offers.

## American Carnation Society.

CARNATION REGISTERED.

Wodenethe.—Prosperity x Enchantress. Pure white, 3½ to 4 inches in size, strong, erect grower, runs to flower quickly; beautifully formed, full flower with the old clove scent; strong calyx; never bursts. Scored 90 points for preliminary certificate at the A. C. S. convention at Pittsburgh. Registered by Frank E. Whitney, gardener to Winthrop Sargent, Fishkill-on-Hudson, N. Y.

A. F. J. BAUR, Sec'y.

## Begonia Patrie.

Samuel Murray, Kansas City, Mo., who grew the fine plants of Begonia Patrie, illustrated in our issue of February 19, page 165, writes: "In regard to this new begonia, will say that we gave it the same treatment as B. Gloire de Lorraine for Christmas. Will give it a warmer place this year, and we are satisfied that we can do better with it. With us the flowers do not drop but dry up on the plant, and are very fine under a good light. The plants shown had been in the store considerably over a week, before being photographed. We imported them from France last May, being induced to do so by seeing an illustration in the AMERICAN FLORIST.

## Society of American Florists.

REGISTRATION OF BEGONIA.

Public notice is hereby given that J. A. Peterson, of Westwood, Cincinnati, O., offers for registration the begonia described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Begonia Glory of Cincinnati. Parentage—Socotrana x a sport of Lorraine type. Foliage large, round, resembling that of B. Socotrana, but smaller. Height one to 1½ feet; color, deep, soft, satiny pink. The individual flowers are about two inches across. The flowering period is from October to April, the plants being at their best during the latter part of December. Propagation by leaf-cuttings, or by splitting up the foliage, as with the Rex varieties. Soil, a light, sandy loam and leaf-mold, with a little well-rotted cow manure. Its lasting quality is especially recommended.

CORRECTIONS.

The name, "Alice of Ingleside," was omitted from the registration on January 12, 1910, of the rose offered by Southwick Cary Briggs, of Washington, D. C.

In the change of registration on January 20, 1910, by S. Cockburn & Sons, of Woodlawn, N. Y., the name of the chrysanthemum should have been "Mrs. Jane Cockburn," not "Mrs. Jane Cochran."

H. B. DORNER, Sec'y.

February 17, 1910.

## A Big Cup For Six Roses.

One of the prizes to be offered at the next show in New York of the American Rose Society is a \$50 solid silver cup. It is for the best display of six roses. The donors are Moore, Hentz & Nash, of New York.

This award is unique, because it is a generous one for a small exhibit—an exhibit so small that a grower with the smallest establishment will have a chance to compete. The restrictions are unusually few; for instance, excepting American Beauty, any rose of any variety is eligible.

To illustrate: one man may show two white and four pink Killarneys. Another man's six may have six varieties, say one Bride, one K. A. Victoria, one Perle, one Golden Gate, one Richmond and one Wellesley. Another six may be all hybrids, perfectly proper so long as two are white (or near-white) and the rest colored. Bon Silene and Niphotos in one exhibit may find themselves pitted against Ulrich Brunner and Merveille de Lyon is another. The judges will recognize each variety and judge each flower on its own merits. The entertainment is for the visitor and not for the judges.

The donors seek to add variety and interest to the show as a whole, introducing a new department devoted to groupings of various kinds and various colors in each six. They hope for a number of exhibits in this section of the show. And because of the assured variety of colors and of the freedom as to sorts, there should be every reason to expect a display of entertaining and instructive contrasts in color and kinds.

In this way the more scientific arrangements of all the other exhibits will have an offset to their large and solid masses of uniform and standard colors in the picturesque and diverse mass of kinds entered for this one of the several cups. The good grower in a small place has a chance against the large grower and it is hoped that he will enter his six roses.

The exact specification for this exhibit will be found in the Prize Schedule of the American Rose Society in "Class G."

## Meeting Next Week.

Albany, N. Y., March 3, 8 p. m.—Albany Florists' Club, W. C. King's, 24 and 26 Steuben street.

Baltimore, Md., February 28, 8 p. m.—Gardeners and Florists' Club of Baltimore, Florists' Exchange Hall, St. Paul and Franklin streets.

Buffalo, N. Y., March 1, 8 p. m.—Buffalo Florists' Club, Saturn Hall.

Chicago, March 3, 8 p. m.—Chicago Florists' Club, Union Restaurant, 111 Randolph street.

Cleveland, O., February 28, 7:30 p. m.—Cleveland Florists' Club, Progress Hall, 2610 Detroit avenue.

Indianapolis, Ind., March 1, 3:30 p. m.—State Florists' Association of Indiana, State House.

Lake Geneva, Wis., March 5, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association.

Louisville, Ky., March 1, 8 p. m.—Kentucky Society of Florists, Third and Broadway.

Milwaukee, Wis., March 3, 8 p. m.—Milwaukee Florists' Club, Quiet House, corner Broadway and Mason street.

New Orleans, La., March 2, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., March 2.—Newport Horticultural Society.

Pasadena, Calif., March 4, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Philadelphia, Pa., March 1, 8 p. m.—Florists' Club of Philadelphia, Horticultural Hall, Broad street, above Spruce.

Pittsburg, Pa., March 1, 8 p. m.—Florists' and Gardeners' Club of Pittsburg, Fort Pitt Hotel, 10th street and Penn avenue.

Salt Lake City, Utah, March 1.—Salt Lake Florists' Club, Huddart Floral Co., 114 East Second South street.

San Francisco, Calif., March 5.—Pacific Coast Horticultural Society.

LION & COMPANY, 114 Spring St., New York.

**For Sale or Rent**—Nicely furnished north side store, Chicago.  
Key 443, care American Florist.

**For Sale**—Some 3-inch pipe guaranteed sound, 7c per foot. Also several good small boilers cheap.  
W. H. SALTER, Rochester, N. Y.

**For Sale**—First class florist business in city of 30,000; reason for selling; other business.  
Key 599, care American Florist.

**For Sale**—A piece of ground, 150x150, with greenhouse 22x100; no other florist within six miles. Address  
Key 453, care American Florist.

**For Sale**—Dwelling, three well stocked greenhouses; good business in an Arkansas city; good reasons for selling; if you mean business address  
Key 443, care American Florist.

**For Sale**—4,000 feet of glass, eight-room house and barn, on one acre of black prairie soil in a booming town of 4,000, with 16 factories. Here is a chance of a lifetime. Price, \$3,500 if taken at once. Good reasons for selling.  
A. RICHTER, Sturgis, Mich.

**For Sale**—A good florist retail and wholesale business; six greenhouses in pot plants, carnations, violets and 'mums; 12 lots, located on a good boulevard; dwelling and barns; \$7,500.  
THE GOESCHL & WOOD FLORAL CO., 1901 So. Logan, Denver, Colo.

**For Sale**—A good florist retail business in growing city in western New York; 5,000 feet of modern built glass, with work room and living rooms attached; best place in town; a good trade. A good place for the right man. Reasons for selling, other business. Price and details on application.  
Key 429, care American Florist.

**For Sale**—Florist with a small ready capital can, on March 1, buy a first-class retail flower store in Chattanooga, Tenn., with well established trade. Present owners are engaging in similar business in another city, and inability to manage both places is only reason for selling. Only interested parties need answer this advertisement. Address  
A. BORG, care Atlanta Floral Co., Atlanta, Ga.

**Wanted**—Greenhouse, about 5000 ft. o glass, dwelling, one or more acres of land.  
Key 436, care American Florist.

**Wanted to Rent**—Greenhouse establishment; 15,000 to 20,000 feet; must be in good repair, good location and good rose soil required; shipping distance of Chicago preferred.  
Key 438, care American Florist.

**Partner Wanted**—A florist with small amount of capital desires a partner; a grower with 5000 feet of glass or more located in some thriving town where there is a future to open a retail store; 18 years' experience, good designer and salesman; references exchanged. Address  
Key 445, care American Florist.

## TO RENT.

A very rare opportunity of one of the most modern and up-to-date florist establishments of about 15,000 sq. ft. glass; hot water heat; Superior tubular boiler; entire place equipped with electric lights, cement walks and floors; work building 20x115 two stories 8-room modern flat; good established business; the conveniences and accommodations to all transportation, etc. are too numerous to mention; they cannot be excelled; if interested an investigation will convince.

RICHARD F. GLOIDE,  
1405-1407 Central St., Evanston, Ill.

## Wanted Seedsman.

One who has had considerable experience in general wholesale garden seed business. Good wages and a chance for rapid advancement.

Key 450, care American Florist.

## Situation Wanted.

By first-class young Hollander, married, no children, four years' American experience and ten years' experience in different countries in Europe and East Indies; private situation preferred; experienced in landscape gardening and managing a private estate; also capable of managing an ornamental nursery; eastern states preferred; age 30.

Key 426, care American Florist.

## Nurseryman Wanted.

A splendid chance for a young man with a few hundred dollars to establish himself in a profitable and growing business; only one nursery within 50 miles, and a large demand already created for these goods; splendid shipping facilities, good soil and large demand at home; man must be a hustler and have both the growing and the selling experience; full particulars will be given by addressing  
JOSEPH BANCROFT & SON,  
Cedar Rapids, Iowa.

## WANTED.

At once, a competent grower for retail trade for southwest Texas. A good designer; honest and reliable; able to take charge when needed; age between 22 and 35; none other need apply; \$10.00 per month, board and room.

Key 449, care American Florist.

## Good Opening for Young Man

Advertiser wants a bright young man to call on the trade, one who can sell goods; give full particulars in first letter, including experience, age and wages. Man with practical knowledge of greenhouse work preferred. Address

Key 988, care American Florist.

## Unexampled Chance

For a first-class grower with executive ability and capacity to take charge of 50,000 square feet of glass, most modern in construction and equipment, for growing cut flowers and plants, about to be erected in most progressive part of United States, where competition amounts to almost nothing. Can sell entire product now, and plant will have to be doubled in two or three years at most with right management. If you do not possess these requirements and have not got \$3,000 to \$5,000 to take stock in the \$50,000 corporation, do not reply. But if you have and can produce the goods, you will get the chance of your life by addressing

Key 440, care American Florist.

### Chas. L. Washburn.

Chas. L. Washburn, recently elected president of the Illinois State Florists' Association and of whom we publish an excellent photograph taken last week, is one of the best known and most highly respected men in the trade of Chicago and vicinity. Few men have such a wide experience of the business or are as closely in touch with it as he and the association is certainly to be warmly congratulated on its choice of a presiding officer. His knowledge of the business is not academic. It has been gathered by close personal contact with every branch of it and is of the full, practical order that comes from this close association. This being the case there is no question that could possibly arise, in which Mr. Washburn's long experience and expert knowledge will not stand the association in good stead.

Mr. Washburn was born at Albany, N. Y., February 27, 1858. He commenced work at the age of 15 in the lumber woods and remained in the lumber business until 1893. In 1884 he married Miss Kate Bassett, the only child of O. P. Bassett of Hinsdale, Ill., and in 1893 Mr. Washburn formed a partnership with his father-in-law under the firm name of Bassett & Washburn. They then started building greenhouses for cut flower growing, since which time the business has grown to its present immense proportions. Four years ago Mr. Washburn bought out Mr. Bassett's interest in the firm but still continues under the old firm name. In 1895 they started selling flowers on the Chicago market under their own name and this policy proved so successful that it has been followed ever since. Mr. Washburn is a widower, having lost his wife in 1902. Their only child, Edgar B. Washburn, is associated with his father in the business.

**OSHKOSH, WIS.**—The Oshkosh Floral Co. opened up February 19 with an excellent display of plants and cut flowers. Manager Barnett reports business the first few days as distinctly encouraging and above his expectations.

### Chicago.

#### TRADE FALLING OFF.

Although for a day or two shipping trade kept a little life in the market, the back of it was really broken after the St. Valentine's day trade, and the end of last week saw stock piling up in many of the commission houses. The number of split and second quality carnations now arriving is much greater than usual at this time of year

President C. L. Washburn.

Illinois State Florists' Association.  
From Photo Taken Last Week.

and, as is usually the case, this has a bad effect on the price of the better grades. Again, the slump that always follows a period of high prices has set in. People fight shy of the florist shop after they have been charged high prices—they think it is a holdup and steer clear accordingly. It is up to the retailers now to buy stock plentifully at the low prices prevailing, and ticket it up or advertise it at correspondingly low rates, so their customers can see what they are supposed to pay. We are not advising slaughtering prices or anything of this kind, and it

would be folly for retailers to sell at less than a living profit, but to allow the public to buy flowers cheaply when possible, and by the same means keep the stock out of the hands of the street men is good business policy, and wholesalers and retailers ought to combine as far as possible to bring this about. Roses are coming much more plentifully and are cheaper, though the good quality is maintained. Richmond is not in the best form generally, but Bride, the Killarneys, Mrs. Jardine, Uncle John and other teas are

# :: Easter Lilies ::

We are cutting a large quantity of lilies every day, very choice stock, long stems, large flowers and fine foliage. They are the best flowers in the market and are in great demand during this shortage of Beauties and Roses. We are selling them at \$15.00 per 100 or \$2.00 per dozen. Buy direct of the grower and get fresh stock. **American Beauties, Roses, Fancy Carnations, Tulips, Daffodils, Lily of the Valley, Easter Lilies and Greens.**

CHICAGO

Greenhouses: HINSDALE, ILL.

fine. American Beauty is more plentiful in the shorter and medium grades, but there is still room for more of the first quality flowers. Bulbous stock has been piling into the market all week and most of it is of elegant quality, but, unfortunately, the demand for it has not kept pace with the supply, and many fine tulips, narcissi and others left by the ash barrel route.

On Monday, trade took a little spurt, shipping orders for Washington's birthday helping out some. Speaking with one of the best known and successful wholesalers, he said their books showed that the week just ended was below that of the same week last year. This he ascribed to the early Lent in great part and doubtless he was right. Carnations continued to arrive in large quantities, but there was a marked scarcity of white, and these were continually called for. Violets have been a drug since St. Valentine's day. Cattleyas are more plentiful and the price has shaded a little. Lily of the valley is plentiful, but apparently cleans up daily. American Beauty roses are in rather better supply, some fine stock now arriving from the principal growers. Easter lilies are not quite as plentiful, but there are enough to meet the demand.

### HOLIDAY MAILS.

As usual, wholesalers received quite a lot of orders on Wednesday morning that were intended for the day before—Washington's birthday. Some out-of-town buyers never seem to get wise to the fact that there are no mails in the afternoon of these holidays and consequently their shipments are late, owing to their letters being held up until the next morning. Shippers cannot be blamed for these things and it would be well if their customers at a distance would make a note of this for future reference.

### NOTES.

Quite a scare was caused in the Atlas building about 8 a. m., February 18, the news that one of the large boilers that supply steam to the building was likely to blow up, causing many visitors to remember engagements in the suburbs. Some there were who waxed technically eloquent, when describing the trouble, about high and low pressure systems, valves, boiler ratings and other things invented to confuse the lay mind. But

### We Are Strong On

## ROSES AND CARNATIONS.

Our **Beauty** crop is just coming in and we have large supplies in all grades. For Easter we will be exceptionally strong on **Beauties, Roses, Carnations**, and all Seasonable stock. The carnations now being shipped are unsurpassed in quality in this or any other market.

as near as we could gather, an engineer got mixed in some way and the steam pressure required to run the elevators was turned into the heating system and vice versa. Later we heard that the water was run out of a boiler that had fire under it and the fires had to be drawn to save the boiler. "All's well that ends well," but there must have been culpable carelessness somewhere. John Kruchten and E. F. Winterson were named as the heroes of the occasion.

Lloyd Vaughan, of Vaughan & Sperry, has been serving on the jury in Judge Honore's circuit court since Monday, and will be in attendance two weeks. At the store long stemmed Beauties continue to arrive in quantity and their growers report another large section coming into crop shortly; this section will probably produce good Easter stock. Orchids (cattleyas) are being handled in large quantities and we noted some remarkably fine Bride and Bridesmaid roses and spring flowers in variety. During Mr. Vaughan's absence, Mr. Sperry has to do some tall hustling, but it does not

seem to worry him that we could notice.

Speaking of orchid growing at the Poehlmann Bros. Co.'s Morton Grove plant, August Poehlmann expressed himself as well satisfied with the results so far. The plants are in fine order and Cattleya Trianae is flowering well. Other large consignments of orchids are due in a couple of months and their culture will—like everything the firm handles—be taken up with spirit. A grand batch of 22,000 lilies is coming in in 5 and 6-inch pots and will be just right for Easter. Beauties are coming along well and all the roses are in excellent shape.

Bassett & Washburn report city and shipping trade excellent, though the former fell off a little at the end of the week. Lent makes more difference, locally, than to the shipping trade, this firm having a big demand from regular customers, who order in advance about the same amount of stock daily. Easter lilies are not quite so plentiful here now, but there is still quite a large number arriving and the price remains firm. The out of town demand for

# VAUGHAN & SPERRY,

52-54 Wabash Ave.,  
 L. D. Phone, Central 2571

# Chicago

Washington's birthday was very large here.

Hoerber Bros. have quite decided on building again this year. They will double the size of their new plant at Desplaines; the contracts are out for the work and this will probably be let within a few days. They are down 368 feet with the artesian well, having struck rock at about 300 and, although the work has been delayed on account of the severe weather, it is to be started up again in earnest now with a larger and more powerful drill.

The A. L. Randall Co. had a large call for blue coloring for Washington's birthday and is getting busy with the green for St. Patrick's day. Some white carnations with their stems inserted in this "dope" for 20 minutes were distinctly colored and an hour is about the time necessary to make a good job of it. They are very busy now here with Easter supplies and in the cut flower end fine stock of all kinds is being handled.

Ask J. B. Deamud to trot out the big violet that shows a good margin around a silver dollar when this is laid on the flower. (Also watch J. B. while he has the dollar.) This appears to be a fine thing. It is a seedling raised by W. F. Duntemann, of Bensenville, of immense size, good stem, very fragrant, and in color a deep lavender. It has not been named yet.

Thos. J. McNally has opened a retail store at 477 Wabash avenue. On Washington's birthday a fine design of the national flag was shown in the north window, the late president's portrait, framed in bronze magnolia leaves, occupying the center of the other. Funeral designs are expected to form a large part of the business done.

"When in doubt try Budlong's" seems to be a pretty good rule to follow for those who are looking out for first class stock. The flowers arriving from the greenhouses are excellent in every way and we especially noted very fine, Mrs. Jardine, My Maryland and Bridesmaid roses. The bulb stock, too, is excellent.

A fire occurred at the greenhouses of Edward Meuret, at Park Ridge, on February 21, but not much damage was done. Some of the carnations that were sent from there the following day were scented all right, but it was hardly the old clove fragrance—more like "Auld Reekie" ye ken.

## "The Busiest House in Chicago"

WE NEVER SUBSTITUTE.

If you order Killarney you don't get Maids. We presume you know what you want and we are here to supply your wants—not to send you what we choose. That's another reason why you should send your orders to

# J. B. DEAMUD CO.

Excellent flowers of Cattleya Trianae have been arriving at Geo. Reinberg's all the week from the greenhouses. They are fresh and of good varieties. A few Percivalianas were also noted and some of the finest smilax we have seen for a long time, long full strings of perfect color.

Winterson's Seed Store has received another large consignment of canna roots, the last carload selling so well that many of the popular varieties were exhausted. The demand is reported as excellent, as is also that for the Ajax carnation dye.

Kyle & Foerster have been doing a big shipping business and getting satisfactory returns for their growers. The daily receipts of roses and carnations are heavy and clean up well and a large and varied assortment of stock is handled.

Thursday evening, March 3, will be ladies' night at the Florists' Club. A fine musical entertainment has been prepared and dinner will be served in the ladies' parlor of the Union hotel, at 8 p. m.

Zech & Mann are especially strong on the best class of bulb stock, elegant tulips, daffodils and jonquils being seen. Bride and Bridesmaid roses have also been particularly good all week.

Peter Reinberg's Beauties are in fine crop now and magnificent flowers are being handled at the store. Carnations are also in great shape and the quality of the roses arriving is of the best.

Quality as well as variety is the keynote at E. C. Amling's. This exper-

ience wholesaler's finely equipped store is one of the first sought by discriminating buyers of good stock.

W. N. Rudd is at Edwardsville this week as one of the speakers at the farmers' institute.

C. L. Washburn will celebrate the fifty-second anniversary of his birthday, February 27.

Visitors: Geo. Spickerman, son of Mrs. Frances Spickerman, of the Sandwich Greenhouses, Sandwich; C. C. Pollworth, Milwaukee, Wis.; H. J. Ruigrok, representing P. van Deursen, Sassenheim, Holland; O. J. Olson, of Holm & Olson, St. Paul, Minn.; Louis Bauscher, Freeport; A. T. Pyfer, Joliet; E. H. Mitchell, St. Louis, Mo.; M. Crawford, Cuyahoga Falls, O.; C. E. De Wever, Clayton, Mo.; Creighton, representing A. T. Boddington, New York.

### THE TRIP TO JOLIET.

Quite a large party visited the Chicago Carnation Co.'s plant February 22, leaving over the Rock Island at 11:45 a. m., at the invitation of the above firm. Growers from surrounding centers, Morton Grove, Bensenville, Niles Center, Elmhurst, Maywood and others joined the city party, and, on arrival an excellent lunch was served, followed by a look through the greenhouses. The general stock was found in fine condition and the novelties, including Mary Tolman, Sangamo, Conquest and others proved of great interest. The return journey was made at 6 p. m. Several ladies were of the party.

We have had a delightful winter, a little cold, but steady. Coal bills have run up some, but business has been excellent—nothing spasmodic, but a good, steady demand, which seems to increase with the coming of spring. Everyone seems to be very busy. Roses have been very scarce ever since Christmas, which has helped other flowers, as customers turned from roses to other things. Carnations have been plentiful and are now much better in quality than two to three weeks ago. With only four days' sunshine from December 7 to January 19, there will certainly be many soft carnations. Bulbous stock is now coming in plentifully and with a good demand, but everyone's mind is centered on Easter, and it looks now as if some will not get their lilies in.

#### NOTES.

Henry Smith's place is looking exceedingly well; his Bride and Brides-

maid roses are very fine, also his carnations. Etta O'Neil, of Mr. Smith's store, has been on the sick list for two weeks.

N. B. Stover has just returned from a two weeks' trip through the east. He visited Washington, Baltimore, Philadelphia, New York, New Haven, Cincinnati, Rochester, Cleveland and Toledo.

The Grand Rapids Greenhouse Co. will use 100,000 feet of glass, which has been devoted to vegetables, for roses and carnations.

Wencil Cukerski has finished his houses and is stocking them up, so as to be ready for spring business.

**Philadelphia.****STOCK IN PLENTY.**

Flowers of all kinds, except a few of the high-class roses, are very plentiful at present. This is in part due to the increasing sunshine and also to a material lessening in the demand, which has fallen off considerably since St. Valentine's day. American Beauties are more plentiful and the specials have dropped to \$4-\$5 per dozen. Bulbous stock, such as tulips and daffodils, are seen in large quantities at very low prices. The large single violets are very fine and are quoted as low as 60 cents per 100. Easter lilies, fine flowers, one and two flowers to a stalk, are quoted lower than ever, which, considering the small quantity of flowers to a bulb, must be discouraging to the grower. Snapdragon is coming in larger quantities and from this time on will cut quite a figure in the market, as it is very decorative and when kept in stock is popular with most flower buyers. Carnations are difficult to handle, as they have run so fine at such low prices; \$2 per 100 for specials is certainly inviting enough for the mildest plunger.

Washington's birthday was taken advantage of by a number of the retailers who decorated their windows with flags and George's bust. Flowers of the national colors were arranged with hatchets and tricolor ribbon. Artificial cherries, wired on small trees, or boughs of cherry trees, were also prominent as decorative features. There is a fine stock of flowering plants seen in all the stores. Azaleas, primroses, lilacs, pans of tulips and hyacinths, daisies and cyclamens are seen in quantity and sell fairly well. Pennock's window last week was gorgeous with a large bank of Azalea mollis in its various shades of yellow and orange. The city is now in the midst of a street car strike which was inaugurated last Saturday. There has been much rioting, disorder and smashing of cars. The service maintained during the day is about 50 per cent of normal and no cars run after 6 p. m., except the elevated to West Philadelphia, which continues its regular schedule. This necessitates an early closing, as in most cases the help live at considerable distance from their places of business.

**NOTES.**

At the annual meeting of the H. A. Dreer Beneficial Association, February 1, the following officers were elected: J. Flynn, president; A. H. Hoyle, vice-president; treasurer, A. Lloyd; secretary, Herman Cook. Directors: J. Leib, O. Leib, Wm. O'Donnell, J. Ruppert, Jos. Schuler, M. McCreedy, H. Dingee, J. Hilson, and Max Lockowitz. The association pays sick benefits of \$5 weekly for 11 weeks. In case of death \$50 is paid to the family of deceased. The report of the treasurer showed the finances to be in a very satisfactory condition. E. G. Strohlein, of the Dreer Co., returned from his semi-annual European trip with some novelties which are as yet under cover. He reports a general prosperous condition in England and on the continent. He was in London just at the heat of the election and said they were just as strenuous there as here. It was tariff and anti-tariff, and budget, budget, budget from morning until night. He found conditions as regards the general stock about as usual on the continent. There is an apparent scarcity in the larger sizes of palms. A great deal is thought of Phoenix Roebelenii and many growers are working up stocks of this graceful variety. Specimens from five to six feet in diameter are seen and very beautiful they are. Mr. Stroh-

lein spoke very highly of Horticulture Flanderi at Bruges, one of the largest areas of glass in the world, probably the largest devoted to decorative plants. Here are seen two, three, four and five-acre blocks, all under glass, of kentias, phoenix and other palms. One block of five acres was given entirely to Phoenix Canariensis. He said that azaleas were likely to be in good demand, with the stock of Mme. van der Cruyssen running low. Efforts were being made to get a good new white, a variety for which there is a crying demand.

Mrs. Robt. Craig, who has been sojourning at Palm Beach, Fla., with John N. and Mrs. May, of Summit, N. J., Mrs. Wm. K. Harris and her daughter Marguerite, Benjamin and Mrs. Dorrance and their daughter, of Wilkesbarre, Pa., is recovering from an acute attack of indigestion, which at first was very serious. She is now, we are happy to say, out of danger and is expected to be out as usual in a few days and will return home in a week or two.

McKissick's specialties at present are single violets, Mrs. Jardine roses, Easter lilies and bulbous stock. Sweet peas are also a feature.

Leo Niessen says that Beauties are becoming much more plentiful and he finds a good demand for them at the prevailing prices.

K.

**Boston.****A GOOD DEMAND.**

There was an unusual demand for stock of all kinds the first part of the week. St. Valentine's day trade proved a pleasant surprise for everybody and quantities of the smaller flowers were disposed of. Trade held up fairly well throughout the week—a marked improvement over last. Roses are coming along well, especially the smaller grades. Beauties are still a little short and they are bringing top prices. Bulbous stock is coming in rather too freely. Violets are down in price and are coming in in large quantities. The quality is very good, both in double and single. Large quantities of lilies and callas are being disposed of. Funeral work seems to be plentiful and the present time is full of opportunity for the shrewd buyers to get good value on stock used in this class of work. Lily of the valley is unusually plentiful. Cattleyas are coming in in reduced numbers. Sweet peas, mignonette, snapdragon, acacia, myosotis, etc., are all fairly plentiful. White lilac is coming in plentifully now and is in good demand. The plant trade is holding up very well.

**NOTES.**

A new flower store was opened this week under the name of Huntington Florists. The store is neatly fitted up and is in a most desirable location on Huntington avenue.

The business of the late E. Sutermeister is being conducted as formerly and the usual large quantities of bulbous stock, both cut and potted, are coming to market.

Jas. McManus, of The Thos. F. Galvin, Inc., Tremont street store, has been under the weather for the past week and confined to his home part of the time.

H. L. Cameron, of North Cambridge, is bringing in a remarkably fine lot of cinerarias. The variety of colors is quite extensive.

Thos. Roland is making a specialty at this time of choice bunches of assorted acacia. He puts in generous value.

Wm. Kenney, formerly with Thos. F. Galvin, is now with M. Solomon at Houghton & Dutton's department store.

The growers are already talking lilies for Easter, and the outlook is bright for plenty of good material.

All the retailers are enthusiastic over the Valentine's day trade; it exceeded all expectations.

Thomas F. Galvin is in New York on a brief visit.

Visitors: Arthur Zirkman, representing M. Rice & Co., Philadelphia; S. Surney, representing Wertheimer Bros., New York.

R.

**Washington.****A BUSY WEEK.**

Another busy week is over, St. Valentine's day having created an extraordinary demand for flowers. Owing to Sunday coming the day ahead, it created a great rush, and some of the retailers experienced great difficulty in getting orders filled on time. Violets were readily disposed of at 75 cents to \$1 per bunch. Orchids and lily of the valley sold well; there was also a good demand for roses, carnations and all sorts of bulbous stock. Plants did not take so well.

**NOTES.**

At a dinner given by Secretary of the Interior Ballinger in honor of President Taft, the ballroom was handsomely decorated with groups of palms, the reception room with palms, white lilac and poinsettias; the mirrors were partially veiled with curtains of Asparagus plumosus; five centerpieces decorated the tables; a large round one with a tall vase of white lilac, which was surrounded with jonquils at the base, occupied the center of the table, while two oval ones filled with jonquils, were placed at the ends, and small round ones of the same flower were placed between the ovals. Z. D. Blackstone executed the arrangements. He had a similar decoration for a dinner given by Senator Guggenheim.

G. S.

## —WHAT— APHINE

### Will Do at Public Tests It Will Do for You.

At these demonstrations we proved conclusively that within a very short time it will destroy Black, Green and White Fly, Mealy Bug and Scale.

It is equally effective against Red Spider and Thrips.

Its comparative cost with other insecticides makes APHINE one of the most economical remedies now on the market for greenhouse and outdoor work.

### A BAD WEEK.

The business of the past week was about as bad as it could be at this season of the year. A leading wholesaler said, about the middle of the week: "I have often seen a better market in summer than we have had today." That is a good index to prevailing conditions. Carnations, tulips and lily of the valley have been practically a glut and the buyers have been fixing their own prices. There has been more than enough of roses to supply all demands and it has been hard to clean them up. Violets, as usual, are being hawked about the streets in large quantities. American Beauty roses are about the only stock that has shown any life, the supply being limited. The price of specials has pushed up to 50 and 60 cents each. There has been a number of dinners that called for good decorations, but they had little noticeable effect in reducing the surplus. An over supply of bulb stock has gone far toward demoralizing the market and there is little prospect of relief until arrivals diminish.

February 21.—There is little change in the condition of the cut flower market; if anything, it is worse. American Beauty roses are scarce and prices have been pushing up, but there is no heavy demand. There was a reasonably fair clean-up today, but on falling prices. Tomorrow, Washington's birthday, being a holiday, but little business is expected.

### NOTES.

The meeting and exhibition of the American Rose Society, next month, in this city, is awakening great interest. The American Museum of Natural History is an ideal place in which to hold an exhibition. The Florists' Club is making ample preparations to entertain the visitors and there seems to be no obstacles in the way of a most successful meeting and exhibition. President Pierson, of the S. A. F., is greatly interested; then there is ex-President Robt. Simpson, of the Rose Society, who ships to this market, and many others who will make the visiting brethren feel at home.

On February 19, A. L. Young & Co. received two cases of white and purple lilac, cut stock in flower, from Rotterdam, Holland. On account of the steamer on which the shipment arrived being delayed by a storm, it was seven days enroute, but arrived in very fair condition. The duty on this stock was 25 per cent ad valorem. If it can be successfully shipped to this country and sold at a profit our home growers may get anxious.

Robt. G. Wilson, who has two fine stores on Greene avenue, Brooklyn, is doing a fine business and showing noteworthy features at both. The store at Fulton street and Greene avenue is headquarters for his corsage bouquet holder, which is a popular device and sells well. At his other store, 341 Greene avenue, there are extensive conservatories attached and a fine display of foliage and flowering plants may always be seen.

Harry Jacobs, a well known member of the firm of S. Jacobs & Sons, who are extensive dealers in green-

house material, on Flushing avenue, Brooklyn, has just recovered from a very severe attack of pneumonia. He was confined to his room for two months and at times his life was despaired of. It is a great pleasure to his many friends to see him again at business, in good health and spirits.

John M. Hunter, an extensive grower, of Englewood, N. J., was in the city, February 19. Mr. Hunter is a grower of long experience and an interesting talker on horticultural topics. His cut flowers are handled by Chas. Millang.

Among the suitable stocks of carnations seen in this market, that of Ford Bros. is every day worthy of mention. Much of their stock is from the range of Henry Hession, Flatbush, who has a fine reputation as a grower.

Joseph G. Messman, a young man well known in the trade of this city, has taken the store at 2787 Broadway, formerly occupied by Humphrey & Co. He is an energetic young man and deserves success.

Frank D. Hunter, of J. H. Small & Sons, who, as previously reported, was seriously injured by being run down by an automobile, has so far recovered that he was able to visit the store on February 21.

Daniel S. Holden, for years a retailer at 621 Broadway, died of pneumonia February 11, in his home at 430 West Twentieth street.

## The Horticultural Society of New York.

The first meeting of the orchid section was held at the American Museum of Natural History on Wednesday, January 26, at 8 p. m., Clement Moore, chairman of the section, in the chair. A most enjoyable evening was spent, all present taking an active part in the proceedings. It is especially desirable that the meetings of the section assume an informal character, so that all may feel at home and free to enter into the discussion. It was the presence of this feeling which made the first meeting so enjoyable and an endeavor will be made to foster this condition.

Responding to the invitation extended in the announcement of the first meeting, a number brought interesting flowers for exhibition and discussion. E. H. Roehrs exhibited a large collection of cut cypripediums, especially noteworthy among these being Harefield Hall, Julius Roehrs, Wm. McKinley, Stevens, and Aureum Virginalis. J. A. Manda showed a fine form of Cypripedium Charles Canham. Lager & Hurrell added to the interest with a number of plants, among them being a fine form of Odontoglossum crispum and Miltonia Phalanopsis. George V. Nash exhibited cut blooms of some of the unusual plants of the Oakes Ames collection, now forming a part of the orchid collection of the New York Botanical Garden. Among these were: *Tainia viridi-fusca*, often known as *Calanthe viridi-fusca*, from India; an attractive form of *Paphiopedilum tonso-Chamberlainianum* and *Paphiopedilum*, Duchess of Sutherland. An *oncidium*, perhaps an undescribed species, from the higher elevations of Ecuador, was also shown.

On March 16 to 18 a joint exhibition of the American Rose Society and The Horticultural Society of New York will be given at the American Museum of Natural History. Those who were present at the successful exhibition given by this society last fall at the same place, are fully aware of the great advantages offered by the American Museum of Natural History for conducting large exhibitions, and those who did not avail themselves of the privilege then are invited to come now and see for themselves. There is plenty of room for all, so that each one may feel free to make his exhibit as large and as complete as he desires.

## New York Florists' Club.

The twenty-third annual dinner of the New York Florists' Club will take place at the Fifth Avenue restaurant, in the new Fifth Avenue building, Twenty-fourth street, west of Broadway, Thursday evening, March 17 (St. Patrick's day) at 7:30 o'clock.

Gentlemen's tickets will be \$4, ladies' \$3. Tables will be arranged to seat from 4 to 10 people each, so that members may entertain their guests at an individual table, a feature that added so much to the general sociability last year.

The special feature of this year's dinner will be the entertainment of the visiting members of the American Rose Society, as guests of the club; consequently, it is hoped that the members of the New York Florists' Club and their friends will turn out in full force and make this a red-letter occasion.

Please make your application for tickets at once to secure the best location in the room, as assignments of tables will be made in the order in which they are received.

Please make check payable to W. F. Sheridan, chairman of the dinner committee. WALTER F. SHERIDAN,

39 West 28th Street.

JOHN B. NUGENT, JR.,

CHARLES SCHENCK,

CHARLES H. TOTTY,

Committee.

## Pittsburg.

There has not been much change in the market since last writing. Roses are more plentiful owing to the past few days of sunshine. Washington's birthday caused quite a call for Beauties, Richmonds and red carnations; in fact, red carnations were very scarce. Orchids are moving very slowly, hand in hand with lily of the valley, and some very fine tulips and lilies are seen.

Mrs. Jacob Elicker, Homestead, is going to move from her present location to a new store at 312 Eighth avenue.

It is reported that several retailers were guilty of selling artificial violets and orchids St. Valentine's day.

J. B. Smith, McKeesport, has been very busy with funeral work.

Geo. L. Huscroft, Steubenville, O., is in town enroute to Buffalo.

Harry Hamm, Homewood, has been laid up with a cold.

# The Ideal Red Carnation

# O. P. BASSETT

It has been the *Leading Red Carnation* in this market, bringing the highest price of any and selling the best. It has paid us more money per square foot of bench than any other variety. The flowers are 3 1-2 inches in diameter, a deep brilliant red, and borne on long stiff stems. Winner of First Prize everywhere. Rooted cuttings, **\$50.00 per 1000; \$6.00 per 100.**

**Buy Direct From the Originators.**

## Bassett & Washburn,

Office and Store, 76 Wabash Ave., Chicago. Greenhouses, Hinsdale, Ill.

### Cleveland.

#### A TRIFLE SLOW.

The market has been a little slow the past week. Carnations piled up rapidly until a good sized glut was on. Selling them in job lots at reduced prices helped to move a considerable quantity. Roses, not quite so plentiful, fared much better, at no time being in excess of a good demand. Bulbous stock is coming in very strong, tulips and daffodills being most plentiful. Callas and Harrisii lilies are plentiful and meet with a ready sale. Sweet peas and violets are selling exceptionally well. A few Rubrum lilies are in but are in no demand. Asparagus plumosus and A. Sprengeri are still very scarce. Adiantum is plentiful and of good quality. String smilax is having a good call.

#### NOTES.

The automobile show, which opens March 5, promises to be the finest ever held in the city. Speaking of the decorations a local newspaper says: "The flower scheme will consist of Crimson Rambler roses and Japanese wistarias in full bloom. Reaching from the floor these will extend about the building, covering the walls and balconies. While thousands of artificial flowers will be used, there will also be a large number of natural flowers, which will be renewed as often as necessary. In the heart of each artificial flower will be hidden an electric light, giving a most beautiful effect."

All the retail stores had attractive St. Valentine windows. Smith & Fetter's window was arranged very artistically in pink and white, heart shaped baskets filled with violets, valley and orchids; a large double heart of pink carnations tied with a lover's knot of white carnations was the centerpiece; large hearts made up entirely of pink

roses were also a part of the decoration scheme, together with an up-to-date valentine which held the attention of passersby.

Some very attractive St. Valentine windows were shown in downtown retail stores. Smith & Fetter's window for Geo. Washington's birthday was very artistic. A tree stump with a hatchet buried in it, and above this Washington's picture draped with the stars and stripes, with Jerusalem cherries tied with red and white bows, made a beautiful and attractive window display.

At the opening of H. Piggott's new store, February 12, in the Taylor arcade, everything looked very business-like, and the store was artistically decorated with cut flowers and plants. Mr. Piggott's years of experience, together with his able force of clerks, will positively make for success. Many beautiful baskets, plants and other gifts were sent from fellow craftsmen of the city.

Ed. Travers, 8416 Hough avenue, has had his eye open for a good business partner for some time. He was married recently and we take it for granted Ed thought that was a good way to hold a partner. Ed reports business good, and his partner is a hustler. We wish them all kinds of success.

At the Halle Bros.' opening February 21, were some of the most artistic designs in floral work ever seen, besides large baskets filled with American Beauty, Richmond and Killarney roses, etc. A shoe and ladder of success were two very odd and artistic designs.

At the Jones-Russell Co.'s store, lily of the valley, violets, orchids and other flowers most appropriate for St.

Valentine's day were daintily arranged, the entire store giving the effect of one large St. Valentine's day decoration.

Ed. Travers, 8416 Hough avenue, has had his eye open for a good business partner for some time; he was married recently, and he now has a life partner. We wish him all kinds of happiness and prosperity.

In the Gasser Co.'s window a large heart, shaped from wood with little shelves on which were vases of violets, valley and orchids, made a very pretty window decoration.

H. Piggott, Taylor arcade, says business has been very good with him since the opening, Saturday, February 12.

G. M. Naumann & Son will remove to their new store at 10515 Superior street on or about March 1.

#### BOWLING.

At a hard-fought battle on the Schwartzerberg alleys between the wholesale and retail florists, the wholesalers again demonstrated that they are the better players.

The retailers won the second game of a series of three, the past week, but this week's game decides who is who. Following are the scores of the second game:

| Wholesalers— | 1st | 2nd | 3rd | 4th |
|--------------|-----|-----|-----|-----|
| G. Smith     | 122 | 104 | 136 | 118 |
| Geo. Bates   | 148 | 137 | 168 | 134 |
| Herb. Bates  | 144 | 159 | 142 | 147 |
| Guy Bates    | 129 | 121 | 167 | 126 |
| F. Friedly   | 173 | 190 | 172 | 152 |

| Retailers— | 1st | 2nd | 3rd | 4th |
|------------|-----|-----|-----|-----|
| W. Krutzen | 159 | 184 | 136 | 122 |
| H. Knoble  | 143 | 134 | 158 | 136 |
| F. Knoble  | 152 | 204 | 148 | 161 |
| O. Crabbe  | 179 | 151 | 149 | 97  |

## The Seed Trade.

### American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D.C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

RED CLOVER seed dropped 35 cents per bushel at Chicago, Friday, February 18.

OLNEY, ILL.—The weather has been so very severe this winter that mining sand for Red Top mixing has been slow work.

THE National Seed Co. has been incorporated at St. Louis, Mo., with a capital of \$20,000, 50 per cent paid in. A. W. Schisler will be, it is understood, the head of the new concern.

GRAND JUNCTION, COLO.—The Grand Junction Seed Co. has been incorporated with capital stock of \$10,000. The incorporators are Whit Rozelle, H. M. Cannon and Luther N. White.

THE name of Chas. P. Braslan, of San Jose, Calif., is mentioned as a likely candidate for congress to represent the republican machine in the forthcoming battle to unseat Congressman "Red" Hayes.

MRS. E. L. COY.—On February 13 at 74 years of age, Mrs. Coy passed away at Melrose, Mass. Her son, C. P. Coy, of Waterloo, Neb., arrived three days earlier. Her husband will remain at the old home, his health, while not of the best, being still fairly good.

NEW YORK.—Wm. Elliott, head of the firm of Wm. Elliott & Sons, is again at his desk after two weeks' jury service. This firm's first spring auction will take place on March 15, when a large stock of conifers and hardy roses will be offered.—The improvements in the Peter Henderson Co.'s store are about completed, and in addition to great interior improvements, they now have the finest show windows on Cortlandt street.—Harry Bunyard of A. L. Boddington's seed store, reached home February 21, after an extended trip. He has been at Halifax, N. S., Chicago, New Orleans and other intermediate points. Incidentally the boys in the store are working nights filling the orders which he gathered in.—Chas. Loechner was up for the first time last week.

## Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale Trade Only.

**SAN JOSE, CALIF.**

JOHN H. ALLAN.—It is not generally known that John H. Allan, the famous Canadian pea grower, passed away on October 24, 1909, after a long illness. He had been in failing health for three years. He leaves a widow, now residing at Picton, Ont. News of Mr. Allan's death reached this country through London.

CHICAGO.—Contract prices on the board of trade February 23, for grass seed were noted as follows: Timothy, \$4.05. White clover, from 20 cents to 25 cents.—The Holland (Dutch) Bloemkweeker Klester Vereeniging at the Hotel Bismarck. Broeder Kapt-jyn, Sr., in the chair, adjourned for

The Late Joseph B. Fuller.

See Obituary, Page 219.

the season after the night session on Washington's birthday.—Visitors: W. Brotherton, of Jerome B. Rice & Co., Detroit, Mich.; Robert Fulton, of Henry & Lee, New York; H. Suzuki, Japan; D. E. Martin, Salem, Ill.; S. Tokuda, New York.

HOLLISTER, CALIF.—Articles of incorporation have been filed with the secretary of state of California for the incorporation of the Pieters-Wheeler Seed Co., which will take over the seed growing business of A. J. Pieters. The stock was subscribed in the entirety by the following, who are also directors: A. J. Pieters, presi-

dent; H. M. Pieters, vice-president; L. W. Wheeler, secretary. Mr. Wheeler is well known in the seed trade, having been for some time manager of Vaughan's Seed Store, New York, and for the past three years identified with Californian seed growing interests, having represented A. J. Pieters during the past season.—Hollister Free Lance, February 17.

### The Business Outlook.

St. Paul, Minn.—L. L. May & Co., write: "From present indications the season of 1910 seems to be considerably behind the previous season, both in regard to the volume of business and to the dates of shipping. While the season seems to be several weeks late in different localities, still we expect a little later that conditions will change so that the demand will be fully as great as in 1909. We are considerably behind last year in the volume of business done and believe it will require an early spring to enable us to do the volume of business which we have done previously."

Minneapolis, Minn.—Northrup, King & Co. write: "We have had a switchmen's strike here since December 1, which has paralyzed business. We usually figure on shipping large quantities of seed grain during January, but on account of the delay on the part of the railroad companies in getting goods in and out of town, a great deal of this trade has gone to other centers this year. Traffic, at the present time, is in a most deplorable condition. It will be a serious handicap to the spring trade if things do not change very rapidly. Mail business is fairly satisfactory."

Rochester, N. Y.—James Vick's Sons write: "The season of 1910 seems to be rather a peculiar one in many ways. The early calls for catalogues was greater than last season or the season before and the seed orders for January a trifle behind last year. February business is very encouraging, even with the storms and snows, which undoubtedly are holding back many orders. Notwithstanding this, we are running about even with last year and with better weather conditions will probably run ahead."

Philadelphia, Pa.—W. Atlee Burpee & Co., state that business is "running just about the same as last year, which is all we could ask considering that there are many shortages upon which we have to decline large orders. Were it not for this feature, business would be considerably ahead of last year." I. N. Simon & Son say that they are head and ears in work, running nights until 11 p. m.

Cincinnati, O.—The J. M. McCullough's Sons Co. says: "The seed business has been opening up very well with us, particularly in the grass seed department. The frequent decided changes in the weather show tendencies to check it off, but considering the weather we think it is better and more favorable than a year ago. We anticipate a very good season."

New York.—J. M. Thorburn & Co. say that the season has opened up very favorably indeed and, so far as they are concerned, the indications for a good spring business were never better.

## Market Gardeners

### Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;  
Franklin DeKleine, Grand Rapids, Mich.,  
Vice-President; S. W. Severance, 508 Illi-  
nois Life Building, Louisville, Ky., Secre-  
tary; M. L. Ruetenik, Cleveland, O., Treas.

### Vegetable Plants.

Whether plants are intended for sale or for our own planting, it is time to commence. At this time of the year we may figure on 10 weeks to produce a thoroughly mature and hardened plant. The experienced operator knows how important it is to depend only on standard varieties, and the beginner must cut out any inclination to plant heavily of novelties. The following list is safe in most localities:

**Cabbage**—Jersey Wakefield, Charleston Wakefield, Early Spring and Glory of Enkhuizen. Charleston Wakefield is gradually taking the place of the smaller Jersey Wakefield and Enkhuizen is pushing hard for first place as a round head early.

**Tomato**—Earliana, Chalk's Jewel, Globe, Beauty and Stone. For home use, Ponderosa is popular, and for a retail plant trade Dwarf Champion and Dwarf Stone are easy sellers.

**Celery**—Golden Self-Blanching and White Plume.

**Pepper**—Recently popularity is shifting among the large-fruited peppers, but until one is acquainted by actual trial, Ruby King is the standard. Neapolitan is an early sweet, and Cayenne, a good hot pepper for pickling.

**Egg Plant**—Black Beauty is worth a place alongside of New York Purple.  
MARKETMAN.

### Prices of Indoor Fruits and Vegetables.

New York, February 19.—Mushrooms, 40 cents per pound; cucumbers, \$1.25 and \$2.25 per dozen; lettuce, 88 cents per dozen heads; tomatoes, 25 cents per pound; radishes, 3½ cents per bunch; asparagus, green, \$6 per dozen bunches; white, \$8 per dozen bunches; rhubarb, Long Island, \$7 per 100 bunches; grapes, Gros Colman, 65 cents per pound; peaches, \$3 per dozen; beet tops, \$3 per bushel; Mint, \$1 per dozen bunches.

Chicago, February 16.—Mushrooms, 25 cents to 60 cents per pound; cucumbers, \$1.25 to \$1.50 per dozen; leaf lettuce, 40 cents per box; head lettuce, Florida, \$3.50 per hamper, Louisiana, \$5 and \$7 per barrel; tomatoes, 20 cents per pound; radishes, 50 cents per dozen; asparagus, 25 cents to 40 cents per bunch; grapes, Gros Colman, 75 cents per pound; rhubarb, 60 cents.

### Indianapolis.

Trade for St. Valentine's day was exceptionally good this year. The old style celluloid and paste-board valentines are being replaced by dainty corsage bouquets or boxes of assorted cut flowers. Violets for this occasion this year moved remarkably well. Quite a number of small blooming plants were also tagged "To My Valentine" and dispatched to the fair ones. The heaviest snow for many years has been causing much delay in making de-

## SEEDS FOR THE MARKET GARDENER

are our specialty. Quality, our first consideration. We have a very large and complete stock of all kinds of seeds and everything in the line of fruit trees, berry bushes, etc.

Our new 112-page catalogue contains true description and no overdrawn illustrations. Our prices are right, quality considered. Market Gardeners are requested to write for our Market Garden Wholesale Catalogue, sent free on request.

## GERMAN NURSERIES & SEED HOUSE BOX 245 Established 1886 BEATRICE, NEB.

### Early Tomatoes In Concrete Plant Protec- tors.

A tried and proven success. Keep out frost and draw heat. Equal for forcing to the famous bell jars used in France. Field trials show four times the yield, ripening a month ahead of season and value increased 100 times. No blight or insects. Useful for lettuce, rhubarb, melons, etc. Hold water for irrigation. Patent just issued on protection; and line wire opens or closes 100 instantly. Illustrated treatise tells how to make them quickly at 2c each, how to make mold at 25c. Also full information about this method. Each purchaser of book has privilege to make mold and protector. Mention this paper and send \$1.00 for book. Money back if not satisfied.

J. H. HALEY, Seed Grower, Munith, Mich.

Get my prices.

10818 Michigan Ave., CHICAGO.

liveries and the retailers at least will give many thanks when "The Beautiful" takes to the woods.

### NOTES.

John Bertermann, of Bertermann Bros. Co., has bought a Stoddard-Dayton fine passenger touring car which is to be pressed into service to make special deliveries on holidays. The heavy snow, which we have mentioned before, broke in 40 or 50 panes in the conservatory here.

On account of the Brightwood waterworks going to the bad, J. E. Hitz was compelled to hitch on to the city waterworks, and while doing so the temperature in his greenhouses went down to the freezing point. Not much damage was done, however.

Baur & Smith are coloring carnations. The red, white and blue carnations were an attractive feature at their market stand on Washington's birthday.

Roepke-Rieman Co. has almost completed a new house working through the recent cold weather.

A movement has been started to close the retail stores at one o'clock Sundays.

The smilax, which Smith & Young Co. is cutting, is certainly very fine.

A. W. Brandt is the proud owner of a new delivery horse.

SCHENECTADY, N. Y.—Marvin K. Champlin has opened a retail store at 320 Nott terrace.

NEW HAVEN, CONN.—The Morse Floral Co. has moved from 37 Church street to 168 Orange street.

ORANGE, N. J.—Prizes were awarded to the pupils at the Day street school, February 17, for flowers grown from bulbs supplied to the children nine weeks ago.

PORTLAND, ME.—Nathaniel W. Hanaford, of Gorham, has opened a store on Preble street, to be known as the Hiawatha Flower Store. He will also reopen his store at the West End, Westbrook, this to be called the Minnehaha Flower Store.

A GREAT CUCUMBER.

Theodore Roosevelt is being paid \$1.00 a word for his remarkable articles on hunting in Africa. We are sure, had he run across a vine of Salzer's Green Cross Cucumber in that far away clime, he could easily have used 10,000 words, or \$10,000 worth of description in extolling and setting forth the many merits of this wonderful cucumber, and then some more! Look at the illustration. We had, in a small field with ordinary cultivation, hundreds and hundreds of cucumbers larger than here illustrated, attaining this enormous size within 20 to 25 days after setting! It is the most remarkable Cucumber and surely the most beautiful cucumber mortal eye has ever seen. It's infinitely ahead in beauty and appearance and quality of any hot house cucumber—each one a picture!

## The Nursery Trade

### American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;  
W. P. Stark, Louisiana, Mo., Vice-President;  
John Hall, Rochester, N. Y., Sec'y.  
Thirty-fifth annual convention to be held  
at Denver, Colo., June 8-10, 1910.

THE Yokohama Nursery Co. reports a heavy business with Texas in grafted oranges.

PAINESVILLE, O.—Robt. George and daughter are inspecting the Cuban rubber plantations and other items of interest in that country. They are expected home about March 1.

CALIFORNIA PRIVET.—E. Y. Teas, Centerville, Ind., writes February 22: "I believe all the California privet in nursery rows or newly planted hedges in this latitude, away from the sea coast, is killed to the ground. I suppose much of it will sprout again. The Amoor River, Ibota and Regelianum, fully exposed, are not injured in the least."

BOSTON, MASS.—J. W. Duncan, for some years assistant to Superintendent Pettigrew of the park department, leaves for Spokane, Wash., February 25, to take up the duties of superintendent of parks in that city March 1. The members of the Gardeners' and Florists' Club gave him a banquet at the Parker house Saturday evening, February 19, about 50 being present. J. K. L. M. Farquhar was toastmaster.

### At Ellwanger & Barry's, Rochester, N. Y. THE BLUE ROSE.

A blue rose has often been referred to as the desired goal of many rose hybridizers and at the same time the mention of blue rose to many lovers of this flower has brought out ridicule. The argument is that such a color in the rose is not desirable and cannot very well be associated with it, and further that it would not be wanted by the public. The writer stepped into the Ellwanger & Barry greenhouses the other day, February 16, and saw the new blue rose (Vielchenblau) in full bloom for the first time. The plants in bloom were about four feet in height, and covered with conspicuous clusters of violet blue flowers. The unfolding buds might be described as violet red, and when the clusters are fully expanded they assume a violet blue color. Patrick Sullivan, the foreman of the rose and herbaceous departments, told me he grafted those plants now in bloom on manetti stocks a year past last January, and they certainly have made good growth in that time. There is no denying the fact that at a short distance from the plants the massed effect of the color is unique and striking, and as it is a climbing Rambler, it is altogether probable that its effect on a pergola or trellis, at a short distance, would be pleasing and perhaps captivating. We fully expect to see a high demand for this rose and this firm is propagating it rapidly. Ottolander & Hooftman, Boskoop, Holland, controlled the first sale of this rose, but it was sent out from a German source.

Amongst the numerous other new roses that Ellwanger & Barry are testing, is the polyantha or baby Rambler, Mrs. W. H. Cutbush, with delightful rosy pink blossoms. That this will be a most decided acquisition for bedding is undoubted, and it will surely become popular. Joan of Arc is a dwarf Rambler with semi-double pure white flowers that look remarkably pleasing, and Mrs. Taft, and Orleans are two other dwarf Ramblers with different shades of bright red, that look attractive. W. C. Barry, and Charles Maloy, the manager, believe that for bedding purposes these baby Ramblers in such pleasing colors will be most desirable. Mr. Barry is a great admirer of the new hybrid tea rose, The Lyon. It is perhaps somewhat difficult to assign a proper position to this new rose on account of its heterogeneous parentage but a hybrid tea is probably the best class to place it in. The globular, full flowers, deep soft pink, and, when in bud, tinged with coppery red, are remarkably handsome. It has not been long under trial, but so far it bids fair to be a promising acquisition.

The firm makes a specialty of roses and have been for a number of weeks propagating an immense quantity. The hybrid rugosas and the Penzance briars are grafted on manetti stock, and the Wichuraiana hybrids and the Ramblers from cuttings. The hybrid teas, and a few of the hybrid perpetuals are also being propagated from cuttings. They are propagating much less of the hybrid perpetual stock from cuttings than they used to, as they are strongly of the opinion that summer budding on healthy manetti stocks is by far the best way to grow hybrid perpetual roses.

In the ornamental department of trees and shrubs, Fred Ahrens, the foreman of the ornamental department, was busy grafting 20,000 lilacs. The firm grow an immense quantity of all the best lilacs, new and old, and there is a growing public demand for them. Mr. Ahrens grafts them onto roots of California privet and plants them into deep flats, where they start into growth immediately, and they are planted out in nursery rows about the end of May. He says, if they are properly handled and planted deep enough, that the lilacs will ultimately get onto their own roots, and the privet die out. In this the writer agrees, but we think the best way is to get them on their own roots in the first place, either from green wood cuttings placed in frames in the summer time, or from layers, and the firm do propagate a good many in this way, but it is much more expensive, and such plants are worth considerably more money and it is probably difficult to get customers to pay the difference in price for such plants.

A house devoted to a great many thousands of coniferous evergreen cuttings, such as arbor-vitas, junipers, and yews looked remarkably well. These cuttings were made and placed in this house last October and November. They showed every indication of a most successful "strike." Mr. Ahrens had a number of his men busy making hardwood cuttings of bush honeysuckles, dogwoods, ornamental currants and similar shrubs that strike

easily from this class of wood. They are of course buried and kept dormant and planted in nursery rows in early spring. The benches in the houses were full of boxes of cuttings, of many species and varieties of shrubs, made in early winter.

JOHN DUNBAR.

### Rhododendrons for the South.

ED. AMERICAN FLORIST:—

Please give a list of good, hardy rhododendrons in assorted colors that will continue to bloom throughout the entire season.

Georgia.

F.

The south is made up of all sorts of soils and climates. In the mountains and Piedmont sections can be grown all of the hardy rhododendrons. In the lower portion of the Piedmont sections nearly all of the lesser hardy varieties of the Catawbiense rhododendrons stand without protection. In the middle sections, in favored localities, where the plants can receive the right soil, can be successfully grown Rhododendron ponticum, R. punctatum, and some of the Catawbiense hybrids. In the middle sections it is always best to keep the rhododendrons mulched with rotten leaves during the summer and they are then resistant to drought and heat. R. ponticum and R. punctatum are the best for this locality and they will do well in good, rich, loamy soil, when planted in a situation where they are protected from the hot afternoon sun of summer.

P. J. BERCKMANS CO.

### Selling Methods.

Albion, N. Y., February 11.—Before the afternoon session of the farmers' institute school was called to order this afternoon a meeting of the prominent fruit growers of Orleans county, who purchased young stock from a certain nursery agent, was held in the court room here. The farmers now believe they have been beaten out of about \$20,000 by what they claim was a misrepresentation on the part of the salesman.

The meeting had been widely advertised through the efforts of the Fruit Growers' Association members and those who had signed orders for stock to be delivered in the spring.

Phone Barclay 6084—229 Broadway, New York Designs, Estimates, Construction of Grounds.

The firm involved is the one the farmers alluded to at the Fruit Growers' Association meeting, when a resolution was adopted to take action against unscrupulous nursery agents. These agents were said to have taken orders for as low as one tree of a special variety, and then to have represented to the other orchardists that a prominent fruit grower giving an order for a single tree had given a large order for a special variety.

The agent has worked among the farmers of Orleans, Niagara, Genesee and Monroe counties. The estimate given on the value of the orders taken in Orleans county alone is \$20,000, and the orders were in amounts ranging from \$1 to \$450.

ROCHESTER, N. Y.—At the meeting of the Forists' Association, February 14, President Vick selected the following committees: Entertainment and essays.—H. B. Stringer, John Dunbar, C. H. Vick, R. G. FRESH CUT FLOWERS shipped to all parts of New England and Canada. **High Grade Carnation Blooms** our specialty; shipped direct from the grower to the retailer at wholesale price.

SHEPARD'S GARDEN CARNATION CO. 292 Fairmont Street, LOWELL, MASS.

Baltimore.

PLENTY OF STOCK.

Considering the continuance of unpropitious weather and the brake supposed to be put upon social gaities by the observance of the lenten restrictions, trade moves along with some degree of activity. Flowers are much more abundant, and there is some improvement, perhaps, in the quality, though the meteorological conditions are not such as make towards really fine flowers. Carnations have been in excess of the store demands and the street vendors have done a good business. Roses are not in over-supply, nor is the grading of the highest standard. Violets begin to show more plentifully and bulbous stock is more than enough for all calls. The weather grows somewhat more vernal, though one or two nights within a week have run down to 10°, but the warm rays of the sun have at last carried off the snow which has been on the ground since Christmas day—a very rare experience here of late years.

The Gardeners' Club had a good meeting last Monday night and an attractive show of carnations. Unfortunately, some of the out-of-town exhibits came too late, not reaching the hall till the morning following. The Cottage Gardens Co. sent Alma Ward and Mrs. C. W. Ward, and Baur & Smith, Shasta. Henry Eichholz, of Waynesboro, Pa., had vases of Washington and Princess; the Chicago Carnation Co., Joliet, Ill., of Conquest, Sangamo and Mary Tolman. John M. Rider, Philip Welsh, Lehr Bros., B. G. Merritt and Isaac H. Moss all had good examples of Rose Pink Enchantress, White Enchantress or White Perfection. Geo. Morrison had some good flowers, and James Hamilton showed roses and lily of the valley, Jesse P. King, sweet peas, and M. Thau had his seedling. R. Vincent, Jr., & Sons Co. had canna and dahlia roots. There was a good attendance at the show and the club gained two or three new members. At its next meeting will be held the annual election of officers, after which there will be a banquet, with speeches, etc.

NOTES.

There is quite a little contest going on just now, carried on so far with good humor, between the venerable president of the park board, Gen. Ferdinand C. Latrobe, and the general superintendent of the parks, Wm. S. Manning, as to the pruning of the trees in the parks. General Latrobe is a veteran in municipal affairs, has served seven terms as mayor of the city, had his finger in every sort of pie, with a real head on his shoulders,

Carnations ROOTED CUTTINGS

| | Per 100 | Per 1000 |
|---|---------|----------|
| Mrs. C. W. Ward | \$12 00 | \$100 00 |
| Alma Ward | 15 00 | 125 00 |

at 25c and \$1.00 per package.

CHARLES H. TOTTY, Madison, N. J.

and a pretty good opinion of his own capacity for passing judgment on affairs. Mr. Manning, on the other side, is a trained man in his business, a thorough park developer and arboriculturist and all around landscape gardener. Mr. Manning, according to custom, wishes to "trim" the trees in the parks and public gardens, but President Latrobe objects, and their divergent views cause many paragraphs in the daily papers, some practical, some narrow and others humorous. Mr. Latrobe thinks trees ought to grow as nature intended them, and that trimming them is mutilation and barbarous. He describes the trees on Mount Royal avenue (oriental planes) as having been "trimmed" within an inch of their lives, and nothing remaining but the stark branches, looking as if the tree had consumption, with a tuft of branches at the top looking like a Zulu war bonnet. Mr. Manning, of course, makes no public reply, propriety and discipline forbidding, but with his skill and fine experience he doubtless will be able to justify his method to the board which is to take the matter up. The public seems much interested.

Lehr Bros. of Brooklyn, N. Y., are shipping some fine Formosum lilies, the flowers large and of good substance. There seems, however, no fixity of type amongst them, there being green, black and red stems, the foliage short, long, obtuse or pointed, indicating probably there are seedlings going back to different ancestors. As a rule, however, they are free of disease, and produce many flowers to the bulb.

Ed. Herrmann, of North avenue, is sending to the Exchange exceptionally fine cinerarias, conspicuous for their fine colors and thrifty appearance. They are of all imaginable colors, evidently from an exceptionally good strain, and show by their condition superior cultivation. S. B.

C. HUMFELD, The Rooted Cutting Specialist, CLAY CENTER, KANS.

Cincinnati.

The arrival of the lenten season did not make any material change in business, which remained exceedingly fine with us until last Thursday, when the city was visited by a blizzard and snow storm which broke all records. Some people say there was nine inches of snow, others 11 inches and still others claim 14 inches, but no matter how much snow fell it certainly put a crimp in business. St. Valentines' day business was not up to expectations and the retailers were not compensated for the interest and preparations made for this day. The increase in the volume of spring flowers is the feature of the market the present week. Freesias are more plentiful, the finer grades having arrived in quantity and pink tulips can now be had in addition to yellow and white. Jonquils are also more plentiful and there are enough violets and lily of the valley for all requirements. Roses remain scarce, while no orders were turned down on carnations. Green goods with the exception of Asparagus plumosus has been in ample supply with a good demand.

We had the pleasure of a visit from Sidney Joseph, a Cincinnati boy, but who at present is located in Dresden, Germany, when he has quite an extensive greenhouse establishment. Mr. Joseph says there is more money growing cut flowers in Germany than there is in America, but Max Rudolph says you must show him. Well, as Sidney is on the job, he should know. He is offering some excellent stock of Adiantum cuneatum and also well grown plants of ardisias.

The bowling club was busy again last Monday night at Wielert's alleys trying to smash all previous records, but unfortunately without success. That 225 still looks mighty big to overcome. Well we will try again Monday evening, February 28, and hope to have as big a crowd as at the last meeting when there were 19 members present. Even our old friend Dominick Rusconi has the fever and promises to come again.

We hear of a movement on foot among some of the prominent retailers to organize the Retail Florists' Protective Association. The first meeting was held last Wednesday, but there was not much accomplished as there were only four persons present.

Another florist in town and he arrived last Wednesday at Aleck Ostendarp's home. Mother and son doing well and Aleck is going to buy the cigars at Wielert's next Wednesday night when the bowlers meet.

Albert McCullough, president of The J. M. McCullough's Sons Co. is in Florida with friends for a short period.

Visitors: Paul Berkowitz, of Bayersdorffers, and J. J. Karins, of Dreer's.

Of the finest varieties that ever grew, 70c per 100; \$6.00 per 1000.

Mums, the good kind, \$1.25 per 100; \$10.00 per 1000.

Daisies, white and yellow, \$1.00 per 100; \$8.00 per 1000. Our big double Giant Alyssum, 80c per 100; \$7.00 per 1000.

Feverfew, \$1.25 per 100; \$10.00 per 1000. We prepay express charges on all rooted cuttings and guarantee satisfaction.

Enchantress Carnations, R. C. very strong, \$2.25 per 100; \$20.00 per 1000.

HEADQUARTERS FOR
EASTER PLANTS

PREPARE FOR EASTER

From Whom Will We Purchase Our Easter Supplies?

An Immense Stock of Choice Easter Plants Now Ready for Immediate Shipment. Blooming Easter Week or Before if Desired.

"From whom shall we purchase our Easter supply this season?" That seems to be the cry all over the country. "We have tried so many already. I know what I am going to do," some sensible man says. "I shall go back to Godfrey Aschmann. He is the best and most reliable man in the business. What he advertises he has and there is no bluff about it. I tell you his usual stock of Azaleas can't be beat, and the Lilies he has this spring are the finest I have ever seen. No wonder. He imports them direct from Japan. He has a friend in Japan who looks after his interests and sends him the cream of Japan's plants. He has enough to supply all, and I tell you no lie when I say that his other plants such as Hydrangeas, Cinerarias, Spireas, Ficus, Palms, Hyacinths, Tulips, Daffodils, Etc., are of such excellent quality that they will make a man's mouth water, and they are so remarkably cheap that we often wonder how he can do it."

AZALEA INDICA

We are headquarters for these plants for the past twenty-five years. We make a specialty of importing large quantities of this so well known favorite Easter novelty. Grown for us in Ghent, Belgium by an Azalea specialist. Have now three houses full of the choicest. Only well known American varieties are imported. They are planted in the fall, as soon as they arrive from Belgium, into 6, 7 and 8 in. pots placed in greenhouses and kept cool during winter. They are now in excellent condition, covered with buds, just right for Easter.

Please bear in mind facts mostly unknown to some Azalea growers that fully 30 to 40 percent of the newly imported Azaleas in dormant state will lose their buds and foliage during the long transportation of the sea voyage and during winter up to Feb. 1 and have to be kept over for another year.

We only ship good stock and full of buds and flowers, and therefore you can't expect Azaleas at this time to be as big and as cheap as if you would buy them in dormant state in the fall.

What is the name of the best double pink Azalea? Mme. Van der Cruysen is the name. Originated by the well known Azalea specialist, Mr. Van der Cruysen of Belgium. Millions are raised every year and shipped into every part of the globe from Belgium. We have a big stock on hand of this well known variety. Every plant is as round as an apple, covered with buds, just right for Easter. Have all sizes, 75c, \$1.00, \$1.25, \$1.50, \$1.75 to \$2.00 each.

In large sizes we have the following varieties, full of buds: Bernard Andreas Alba, pure white; Niobe, double white; Helena Thielmann, pure light pink, very fine; Souv. Memoire de Van Houtte, very large flowers, double pink; Empress des Indes, large flowering, double variegated; Dr. Moore, double pink; Mme. Van der Cruysen, best of all the pink; Apollo, red; De Schryveriana, double, large, variegated. Price, \$1.50, \$2.00, \$2.50 to \$3.00.

In smaller sizes we have the following varieties, full of buds: Mme. Van der Cruysen pink; Deutsche Perle, pure double white; Verveneana, double variegated, one of the old standard varieties; Apollo, red; Simon Mardner, double pink; De Schryveriana, large double variegated; Empress des Indes, double variegated; Niobe, double white. Price, 60c, 75c, \$1.00, \$1.25 to \$1.50. Professor Wolters a well known variegated bright variety, at \$1.00, \$1.25 to \$1.50.

When we are out of one color we send the next similar color; also if we are out of the size ordered, we send the next size, either above or below the price mentioned.

Moonvines (Ipomæa Multiflora), best white Moonvine, for which we have a world-wide reputation now ready. 2½ in. pots, \$5.00 per 100.

Begonia New Improved Erford, 5 in., \$2.00 per doz.; Begonia Flambeau, 5 in., \$2.00 per doz.

Spirea Gladstone. This variety, owing to the dry summer in Holland last year, is very scarce this Easter but we were fortunate enough to secure sufficient to fill our ornamental house, and the plants are now in fine condition, full of buds, just right for Easter. 6-7 in. pots, 75c to \$1.00 each.

Primula Obconica, 5 in. pots, \$2.00 to \$2.50 per doz.

Double Daffodils, Von Sion, best yellow, 3 double-nosed tulips in a 6 in. pot, \$2.50 per doz. pots.

Tulips, Murillo (double pink), 3 bulbs planted in a 4 in. pot, \$2.00 per doz. pots. Tournesol Tulips (double variegated), 3 bulbs in a 4 in. pot, \$1.50 per doz. pots; ready in bloom for Easter.

Hydrangea Otaksa, already forced into buds, just right for Easter, 6-7 in. pots, 35c, 50c, 75c, \$1.00 to \$1.50 each.

THE BEST EVER.

Better than ever are the plants whose gleaming Blossoms and leaves shine bright in Aschmann's store.

Flowers the kind of which we are always dreaming. More nearly perfect than all grown before. Lilies with whiter sheen, Azaleas richly tinted. Ferns with their lacy fronds like bridal veils. The Araucaria branches fruit with dollars minted. For florists' use after Easter sales.

EASTER LILIES

Lilium Multiflorum, the genuine Japanese Easter Lily, directly imported by us. We have a friend in Japan who looks after our interests there. He picks out for us only the good, healthy ones, and marks them while they are growing, the 10-in. bulbs and therefore he ships us the cream of the plants of Japan. We have Lilies this year to burn: can supply, if nothing happens, every customer and others who want Lilies. 9 to 10 in. bulbs of Lilies were difficult to get from Japan last fall, but we were one of the fortunate ones to receive all the 9-10 in. Lilies (5,000) ordered last spring, 1909, from our grower in Japan. If you see them growing in our greenhouses, you must all admit they are "cracker-jacks"; we sell them cheap, too. Where other florists get 15c per bud, we only charge you 10c per bud for plants in 6 in. pots, having 5, 8, 10 and more buds to the plant. Plants under 5 buds, 12c per bud, 6 in. pots.

When ordering lilies a reasonable amount of other plants should be taken. We do not solicit orders for lilies alone.

Hyacinths, 4 best colors, King of the Blues, Grand Maitre (light blue) La Grandesse (best white), Gertrude (best pink), 4-in. pots, 12.00 per 100. Now outside in cold frames. Two to three weeks will force them into bloom.

Asparagus Plumosus Nanus, 3-in., \$5.00 per 100 2½ in. 3c; 4-in., 10c. Asparagus Sprengeri, 3-in., large plants 7c; 4-in., 10c.

Cineraria Hyb. Grandiflora, H.F. Michell's new improved strain. Our plants of this strain are twice the size of those of other years, with perfect, large, green foliage. Some of the plants are almost as large as a bushel basket, 6-in. pots, 25c, 35c, 50c, 75c to \$1.00 each.

Arcia Lutescens, 5-in. pots, three plants in a pot, 35c.

Ficus Elastica (Rubber), 5½ to 6 in. pots, 25c to 30c.

Whitman Ferns, 7-in., 75c to \$1.00.

Neph. Amerphol, 5½, 5½ to 6 in. pots, 30c, 40c and 50c; 6 in., 60c to 75c.

Kentia Forsteriana, 6-7 in. pots, 35-40 50 in. high, perfect leaves, \$1.25 \$1.50, \$2.50 to \$3.00; 4-in., 20c. Kentia Belmoreana, 6-in., large stock, \$1.25 to \$1.50; 4-in. 20c to 25c; 3-in., 10c.

Cocos Weddelliana, 3 in., 15c.

Ferns for Dishes, \$3.00 per 100.

Have an Immense Stock of Easter Plants.

This is our catalogue.

Please state if in or out of pots. All goods must travel at purchaser's risk only. Cash with order, please. No references will be investigated.

R. Vincent, Jr., & Sons Co.
WHITE MARSH, MD.

Wichita, Kans.

St. Valentine's day set a new record here, there being a decided increase in the amount of business for that day. There was not much call for made up work, boxes of choice flowers having the call, with the demand well divided between violets, roses and carnations, and a nice sale in choice flowering plants. The weather was favorable. The week has seen a good stiff demand for funeral flowers, which has helped to clean up surplus stocks pretty close. We got our share of the blizzard, but it was over in 48 hours.

Visitors: W. H. Hill, representing L. Baumann & Co., and W. C. Johnson, representing E. H. Hunt, both of Chicago. Both report good business in the western territory.

W. I. CHITA.

We are now shipping fine strong cuttings of **Shasta** as fast as they are ready to come out of the cutting bench. We have enough orders booked to take all that will be ready up to Feb. 15. If you want late February delivery you should get your order in at once. Come and see it growing; once you see it, you will want to grow it.

\$12.00 per 100; \$100.00 per 1000.

Send all orders to

BAUR & SMITH, Indianapolis, Ind.

Albany, N. Y.

The thirteenth annual dinner of the republican county organization took place in Odd Fellows hall on the evening of February 17. The floral decorations were again in charge of Eyres, who exhibited great taste in his arrangement of the palms and foliage plants used on the orchestra platform to screen the musicians. The table decorations were of tulips, and laurel roping was used in abundance for decorating the ceiling and walls. Prep-

arations were made to seat about 560 guests. Among the speakers was United States Senator Chauncey M. Depew.

Kurth & Burke, the Broadway florists, had a creditable job in the decorations in the Adelphi club for the Friedman-Swartz wedding which occurred February 14. The couple stood under a canopy made by the firm. Other decorations included mantels, vases, bride's and bridesmaid's bouquets.

The past week we experienced the
most severe weather recorded in 20
years. Wednesday and Thursday the
fall of snow was immense and trade,
especially transient, suffered. Violets
especially piled up, also sweet peas,
and many went to waste owing to the
inability of disposing to the shopping
public. Carnations also piled up with
the exception of white and red, as
these were somewhat in demand. Tea
roses became more plentiful, but
American Beauty remained scarce.
Cold weather hindered the work of
delivering plants. Jonquils are now
arriving in quantity, also tulips. Cal-
las are in quantity, but Harrisii lilies
are short.

NOTES.

The ladies of the home circle met
at the Washington hotel and were
entertained by Mrs. J. J. Beneke.
Questions were asked which were to
be answered with flowers. Two prizes
were offered; first was won by Miss
Meinhardt, and second by Mrs. John
Koenig. These meetings will be held
monthly.

John Moritz and his force of gar-
deners at Forest park are preparing
to put out more than a quarter mil-
lion plants which were raised in the
greenhouses during the winter
months; 125,000 plants will be used
here, the others will be divided in
the other parks.

The executive committee of the
Horticultural Society met last Tues-
day afternoon for a short session. It
was resolved to vote on a fall flower
show at the next meeting.

Smith Wholesale Floral Co. is head-
quarters for violets and sweet peas.
These are furnished mostly by the
Kirkwood contingent.

The wholesalers were a weary look
during the heavy storm, as it was
almost impossible to move stock to
advantage.

Mary Tolman

Sangamo

**Brilliant
Glistening
Pink.****Winner Wherever Shown.**The most prolific and fastest growing carnation of any; very clean, upright grower,
long stiff stems; **never splits**; flowers nicely fringed and well rounded out. It is not
too late to get cuttings of Sangamo, the most prolific carnation grown. Our best
plants we propagated in March last year. Prompt delivery; Cuttings guaranteed.**\$12.00 per 100; \$100.00 per 1000.****A. C. BROWN,****Springfield, Ill.****CHICAGO CARNATION CO.****Joliet, Ill.****JUANITA, (Wah-nee-ta)**A grand scarlet Carnation, with about a 3½-inch flower, well
built up with a two foot stem.

Its Strong Points Are: Abundance of large, high grade flowers at all times; stem very stiff, with
good habit in every way; keeping qualities are wonderful; burst blooms are rare. We have grown it
years and will still grow as many as we have now. We have **never over propagated** it, so its vitality
is not impaired. Cuttings will be taken from flower stems which are the best. The color is so bright
and rich it takes with every one. We have a very large stock. **Price:** Rooted cuttings \$8.00 per 100;
\$66.00 per 1000. Special price in large lots. Unrooted stock half price. A discount of 5% for cash.

THE FILLow FLOWER COMPANY,**Westport, Conn.**

F. H. Weber disposed of over 10,-
000 violets on St. Valentine's day, be-
sides sweet peas and other flowers.

C. A. Kuehn is handling some very
fancy long-stemmed tulips, also a
fine variety of choice carnations.

Geo. Angermueller is now getting
some extra fine Killarney roses, also
a fine supply of Von Sion.

Ayres Floral Co. is handling some
of the choicest long-stemmed violets
coming into the market.

There will be no spring flower show
this year.

W. F.

CHESTER, PA.—A hurried message, on
February 15, brought Melchor E.
Pierce from a nearby cigar store to
his home, and as he neared the green-
houses a bright light gave him the
impression that the structure was in
flames. Throwing off his coat Pierce
started for the place and fell exhaust-
ed from shock and overexertion. He
found that the lights were from 72
candles, the lighted tapers having been

Toronto.

FLOWERS PLENTIFUL.

The very ordinary business conditions, more than the weather, are responsible for a very generous supply of flowers in nearly every variety, and the prices prevailing here at present are possibly the lowest they have reached at this season for years. In roses, Richmond, Killarney, Bridesmaid and Bride, are plentiful, while in carnations there is a very generous supply in all colors. Lily of the valley and violets are plentiful and of excellent quality. The bulb season being on in full swing it seems the different growers are trying to see which can undersell the other. The storemen are taking advantage of the low prices and the window decorations are most enticing. St. Valentine's day was responsible for a very heavy demand in violets, but aside from these there was little doing in other varieties.

NOTES.

The week has been a busy one for the different horticultural societies; the prize lists are being drafted for the Canadian National Exhibition and the fall chrysanthemum show. This is the time to make suggestions and to give views of any change which may be favored. These, if sent by letters to any of the secretaries, will be given the most careful consideration.

The annual carnation exhibition was held in St. George's hall Friday, February 18, and the quality of the blooms shown testified to the efforts of success being attained by our carnation growers in perfecting this flower. Joseph Heacock Co., Wyncote, Pa., sent a vase of Dorothy Gordon which was awarded the only gold medal given. The H. Weber & Sons' Co., Oakland, Md., sent a fine bunch of Toreador, which arrived too late for the show as also did the bunch of Mary Tolman from Hunt Bros., of Park Ridge, Ill. Had these shipments arrived earlier

Lancaster, Pa.

there might have been a different award of the gold medal, as they were both in fine shape. Dillemath and Dunlop displayed these in their windows where they were much admired by local florists and the general public, possibly getting more prominence than they would have at the show.

Among the exhibitors The Dale Estate, Brampton, showed some fine carnations, their vase of O. P. Bassett being grand. The Bride and Bridesmaid roses were so fine that many of the local growers thought they would not be discarded entirely for the Killarneys. J. H. Dunlop had some finely grown varieties, his vase of Winsor receiving much comment. E. A. Crowhurst showed good commercial varieties noted for their strong, rigid stems, his Pink Delight proving quite a favorite. R. Jennings, of Brampton, showed carnations and violets. Wm. Fendley, Brampton, showed carnations, lily of the valley and violets. Wm. Jay & Son, well-grown carnations, palms and ferns. Thos. Manton groups of orchids, flowering plants and ferns. Sir Henry Pellat (J. McVittie gardener), exhibited a fine collection of plants, one specimen of *Cattleya labiata* being certificated. Allan Gardens (E. F. Collins gardener), had a fine collection of flowering plants and ferns, a specimen genista being admired by all. The judges were E. F. Collins and H. G. Dillemath.

The Gardeners' and Florists' Club held an interesting meeting on Thursday evening at St. George's hall. The eternal question, "Judging" was taken up but no definite decision was reached. The next regular meeting

A New Fern NEPHROLEPIS GIATRASI

Awarded a Certificate of Merit by the Horticultural Society of New York.

Prices: In 2¼-inch pots, \$3.50 per dozen; \$25.00 per 100; \$200.00 per 1000. 25 plants at 100 rates; 500 plants at 1000 rates. Orders delivered in rotation as received. Now Ready for delivery,

GEORGE GIATRAS,
463 Summit Ave., West Hoboken, N. J.

Mention the American Florist when writing

will be a social one. Come and make merry.

Thos. Manton had one of the best decorations of the year at the King Edward hotel. Orchids and valley constituted the principal flowers used and, having orchids in generous quantities, Thomas was not loath to use them as he had a carte blanche order. Pity 'tis there are not more of this kind.

Visitors: Wm. Gammage, London; E. L. Janzen, Berlin; Messrs. Fendley, Dale, Jennings and Cooper, Brampton; representatives of Bayersdorfers, Rice's, Wertheimer Bros. and Schloss Bros.

Frank Duffert is bringing in some well-grown lilacs which meet with a ready sale.

H. G. D.

Almost Sold Out

Have you sent us an order for your stock of Carnation Dorothy Gordon? Easy to put it off—but our supply is limited. Orders are piling in every day, and some of you who are planning to grow this splendid carnation for your trade this year are going to be disappointed.

This magnificent flower made a big "hit" at the Pittsburg meeting, but that didn't surprise us any, for a great many of our friends in the trade long ago learned that for real, substantial profits

Carnation Dorothy Gordon

stood away up at the top of the list. We know we "harp" a lot about its merits, but when you know this grand new variety as we do, you'll be enthusiastic, too. Flowers fragrant and uniform in color—a little darker than Pink Enchantress; very large—size, 3 inches or more in diameter—buds of good substance and very lasting. All these features spell profits for growers of Carnation Dorothy Gordon—double profits, for the plants

bear more flowers which sell for a higher price, bringing your gains up to nearly twice what you can get from other commercial sorts.

Come to Wyncote and see Dorothy Gordon growing; if you cannot do that write or wire us now and we will reserve stock for you. But do it quickly if you want any rooted cuttings this spring. Interesting literature rec. Prices are: \$10.00 per 100; \$75.00 per 1000.

J. LICHTENBERGER, 1566 Avenue A, NEW YORK. Telephone: Lenox 5644

—USE KRICK'S—

Perfect Pot Handles & Hangers

Just the Thing for Easter.

When crowded for space, will sustain the weight of 100 lbs. Samples and prices on request.

CHAS. A. KRICK, 1164-66 Greene Ave., Brooklyn, N. Y. Long Distance Telephone 178 Bushwick.

THE BEST WAY

to collect an account is to place it with the National Florists' Board of Trade

56 Pine Street, NEW YORK.

WHY? Because many debtors will pay the Board fearing otherwise a bad rating in our Credit List. Full information as to methods and rates given on application.

IF YOU SAW IT IN

THE FLORIST

SAY SO IN YOUR NEXT ORDER.

CUT FLOWER AND Design Boxes

All sizes, lowest prices. Write

C. C. Pollworth Co., MILWAUKEE

WIZARD BRAND MANURES

Dried, screened and packed in bags of 100 lbs. each

PULVERIZED SHEEP MANURE

Pure - Uniform - Reliable

A strong and quick acting manure highly recommended for carnations and chrysanthemums

SHREDDED CATTLE MANURE

Easy to Handle and Apply

Stronger and better in every way than rough manure. Lasts much longer on the benches. Unequalled for mulching and feeding roses, liquid manuring and mixing with bench and potting soil. Used by all the largest growers.

Ask your supply man or write for circulars and prices.

The Pulverized Manure Co., 32 Union Stock Yards, CHICAGO

Sterling Iron Reservoir Vases

Chairs, Settees, Hitching Posts, Etc.

Complete Catalogue and Discounts Upon ... Order.

The Sterling Emery Wheel Mfg. Co., OHIO, U. S. A.

Wittbold

Watering System

The saving in time and labor for one season will pay for a complete equipment.

For Sale by Leading Jobbers

Further information can be obtained from

D. D. JOHNSON CO., Manufacturers,
64-66 Wabash Ave., CHICAGO.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish. When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,

and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

RANDOLPH & McCLEMENTS, Successors to
Chas. T. Siebert, Baum & Beatty Sts., Pittsburgh.

Yonkers, N. Y.

A very interesting meeting of the
Horticultural Society was held in
Guinzberg's hall Wednesday evening,
February 16, at which several new
members were admitted. All the offi-
cers were present, with President Ben-
nett in the chair. As there was a
prize offered at our last meeting by
Peter Macdonald for the best collec-
tion of one dozen carnations of any
variety, a very fine lot of carnations
were shown. The judges appointed by
the president were M. Nichol, A. Mac-
donald and W. Wright, who awarded
the prizes as follows: W. H. Waite,
first; J. Goff, second; R. Cummings,
R. Cochran and H. Scott, honorable
mention.

After the business of the meeting
was over President Bennett read a
very able paper on "American Beauty
Roses," after which he invited a gen-
eral discussion, which was taken part
in by several members, among them

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.

FLOWERS PLENTIFUL.
 The supply of cut flowers is fairly plentiful. Dutch bulbs are in with a great variety and often help the retailer over a temporary shortage of roses and carnations which, owing to their continuous high price, have to be handled with care and caution. The prices charged by the leading retailers are continually going up, especially in the made up work, but, on the other hand, the cost of selling and delivering is also going up. Rents have taken another jump and a number of stores are quite unsettled about their present quarters. The grower, no doubt, would like to share in the present prosperity. The quality of his produce is always going up, but the price has not moved for a long time. Violets are plentiful just now; local growers have at last found out how to grow good ones. There is more space given to them this year than ever before. The old complaint that there is no profit in the handling of Dutch bulbs does not seem to hold good this year; there is more on the market than last year, and the prices charged seem to indicate a profit.

NOTES.

Hall & Robinson's carnations are the best seen this year, remarkably healthy with long stiff stems and large flowers; their roses were held back for some time to crop them for Easter. After this some will have to make room for bedding stock; one of their older houses was renovated last week, the wooden benches cleared out, up-to-date cement benches erected and the heating pipes rearranged—quite an undertaking in mid-winter.
 A visit to J. Bennett's at Lachine proved quite a treat. His roses are in first-class shape and a large house of violets was a sight to behold, with thousands of flowers in sight. The

 31 Barclay Street, New York City.

Morristown, N. J.

The second regular monthly meeting of the year of the Morris County Gardeners' and Florists' Society was held February 9; 32 members were present at roll call. The night was stormy or there would have been many more. Past President Percy Herbert came down from Newburgh, N. Y., to see us, and as Percy is a personal friend of every member of the club, you may guess how glad we were to see him. Harold B. Vyse, by request, had an essay on "Poinsettia Growing in Pots." His paper was enjoyed very much, and if we can grow them in 5 and 6-inch pots to have bracts 16 to 19 inches in diameter, as we have seen him do, we will be well repaid for going out in the storm. He received a hearty vote of thanks for his effort.

J. A. Peterson, of Cincinnati, O., had on exhibition a specimen of his Begonia Glory of Cincinnati. It looks as if it ought to net him a little fortune. Everybody admired it. It certainly is a fine thing. It was awarded a certificate of merit. Chas. H. Totty had a collection of sweet peas, from 17 to 20-inch stems. Gov. Fort was awarded a certificate of merit. The preliminary schedule for the fall flower show to be held here, November 2 to 4, is nearly ready for mailing. It carries over \$2,000 in its classes, and as this is only preliminary—a guide to growers—it is not complete. Our regular issue in July, we expect, will carry an extra thousand dollars. These funds are pledged in full, so all the committee has to do is to get up a show worthy

Mention the American Florist when writing

Nashville.

Violets, the natural valentine flowers, are buried beneath the snow banks in this vicinity, as they are all grown in cold frames which cannot be opened when the weather is extreme, as it has been the past few days. The Joy Floral Co. devoted a small part of its greenhouse space to violet culture, but not with very great success, the frame grown ones doing much better. Quite a large number of valentine orders were booked, making quite an activity in floral circles. Both the Joy Floral Co. and Geny Bros. had a fine supply of sweet peas of all colors, which were very much in demand and ranked next to violets as favorites for the day. Many violets were shipped in to supply the demand in lieu of the home supply.

The Joy Floral Co. has excellent American Beauty roses, for which there is a fine demand. They have very long stems with fine healthy foliage and large, perfect flowers, and prices are good on them. All kinds of roses and carnations of good quality are equal to the demand. Lily of the valley and Roman hyacinths are also well represented in the demand. Quite a run was made on red carnations, that color seeming to suit St. Valentine's season in the mind of the average purchaser, dividing honors with the violets. All show pretty, heart-shaped boxes which, filled with flowers, makes a very pretty gift. The usual violet colored boxes were used for violets.

The fall of nine inches of snow on Friday last was an unusual occurrence in this vicinity and it is still upon the ground.

Our Supplements.

Subscribers should see that they get copies of the fine supplementary illustrations showing high grade design and decorative work. These fine supplements appear with each issue and should be carefully preserved, as they mean much to the retail florists in dealing with their customers, illustrating as they do the various kinds of work that the everyday florist is called upon to perform.

The papers in which the supplements appear should be likewise preserved, as they contain much valuable data with regard to these special illustrations. Subscribers should see that they get every issue as otherwise they may miss some of this high grade work.

THE WEEK AT PEACEFUL VALLEY

By The Optimist.

Preparations for Building.

The Boy, with Italian Joe as a helper, has turned out quite a lot of concrete blocks the past week. We have purchased a new block machine, recently, that works much better than the old one, as it permits of faster work and a wetter mixture. The architect has presented his first sketches of that new store building, and we have spent several evenings in studying the details and puzzling our brain a little in the endeavor to crowd an 8-inch block into a 6-inch space, and on similar problems. This preliminary planning and anticipation is more than half the pleasure in any new work. To some, we presume it would be only vexation of spirit, but to The Optimist it yields more genuine satisfaction than a season of grand opera. This new building is to consist of two stories and basement, 24x40 feet, with a show house at the rear. The street floor is for the sale of flowers and plants, and has a large show window. The second floor, reached by an easy flight of stairs from the store, is intended for the display of seeds, bulbs and incidentals. We have a growing trade in these lines, but prefer to keep them separate from the floral end of the business.

For Easter.

Jack and The Optimist have been shifting and cleaning up some of the Easter stock. Owing to the early date of Easter this year, our latest lot of Chinese primroses and cyclamens will be in good form, and will help out a bit. Last fall we lifted about 200 plants of hardy English primroses (*Primula veris*) and planted them in a rather cold corner of a violet house. We are now potting them and they promise to give us something out of the ordinary for Easter trade. We procured seed of an improved strain and the range of colors and size of flowers is superb. Some of the plants already show upwards of 40 flowering stems. We do not force lilies, having

come to the conclusion that it is cheaper for us to buy the few hundred plants we require of a specialist. If we were to grow lilies again we would grow a house, as then the necessary temperatures could be maintained without detriment to other things.

Marguerites.

The time was, and not so many years ago, when Peaceful Valley was noted for the quantities of yellow marguerites grown here. I won't speak of quality, as that might be considered egotistical. Three years ago we grew and sold a little over 250,000 marguerite flowers. This year we shall not have 10,000. The reason? Oh, just the usual uncertainty always incident to the culture of *Chrysanthemum frutescens*. Many enter the field, but few stay for a great while. The marguerite is a pretty, a useful, and an always popular flower, but in growing it in this climate, for winter flowers, one undertakes a by no means easy task. The genus is a native of a clime having very cool nights and warm days, with lots of sunshine. This is true, I think, of the Canary islands, summer and winter. In our northern and eastern states the conditions are reversed. Our summers are hot and dry and our winters give one day of sunshine to four cloudy, or partially so—and the marguerite is a sun worshipper. We have found the greatest difficulty to be the carrying of the plants through the summer. Many a grower has started with a nice lot of plants in the spring, only to see them gradually decline and die, without an apparent cause, until in the fall he was lucky to have one-tenth of the number fit for planting. In speaking of marguerites, remember I mean the modern varieties of winter bloomers, not the spring blooming kinds, commonly advertised, and of little use except for bedding. Like all useless things these varieties are of easy culture, and hard to kill.

The winter-blooming varieties all originated in southern France, from

plants brought originally from the Canary islands. Etoile d'Or was the first yellow variety to come into notice. This is as easy of culture as any of the winter-flowering section, and gives flowers of medium size, quite plentifully in fall and spring, and a few in mid-winter. Some 10 years ago, an English gardener brought over plants of a yellow that flowered freely in winter, and gave us large flowers on long stems. This was Reve d'Or, now quite common in the vicinity of Boston, although few of its growers know it by name. This variety is well named. It is truly a "dream of gold." If you can do it well, you get the gold. If you can't—well, you have the dream, anyhow. Of 100 rooted cuttings—and it roots readily, from October to March—possibly 25 will make plants. The balance throw up a single stem, with a bud on the end of it, and no amount of coaxing will develop them to be of use. The variety makes few cuttings and growing plants in the field are apt to get weary and go to the long sleep. This would seem to be a case for selection of stock, but this remedy seems only partially successful. Other yellow varieties listed are: Grandiflorum Luteum, which seems much like Etoile d'Or, and Schone de Nizza and Soleil d'Or, which seem identical. We are now giving the latter variety a good test and hope it is going to prove an easier subject than the "Dream." I understand it is the variety now usually grown in the Riviera, for shipping to England and other countries of Europe.

WHITE VARIETIES.

Of white varieties, there are California Giant, sometimes called Nicholson's White, Madame Gailbert, Paris White, and Queen Alexandra. California Giant is generally grown hereabouts. Paris White is the one you usually get if you order white marguerites from a trade advertisement, and Madame Gailbert has an immense quantity of flowers, in clusters, and is a nice thing for pot plants. Queen Alexandra seems to belong to a distinct species, and comes from Africa. The same is true, I believe, of the origin of the new double flowering variety, stock of which is now being worked up by Sander & Son. The flowers of the three varieties first mentioned above, are not well adapted for evening use, as the petals reflex at night, and the blooms look as though gone by. Queen Alexandra does not have this fault, but it is rather a shy blomer in winter, and the stems rarely exceed six inches in length. This variety is new to cultivation and it is likely that the future may give us improved strains, as the variety has already given us several sports, either showing pink in the center, or with other variation. The great obstacle in improving or securing new varieties of this winter-flowering class of marguerites is the fact that they do not seed in America. I have yet to hear of any one raising a seedling from any of the above varieties. The cheap, weedy varieties, like Comtesse de Chambord, that do seed, are of little use, and I have never succeeded in getting pollen of the better varieties, for purposes of cross breeding.

THE RETAIL TRADE

Harp of Roses. Callas and Carnations.

SEE SUPPLEMENT WITH THIS ISSUE.

The harp is always a popular design and the near approach of St. Patrick's day will make the Irish harp even more so. Retailers should come out for this trade by preparing a harp design and showing it in their window, treating it in different ways on different occasions, for there are several different methods by which a fine design may be made and what does not appeal to one customer may to another. The newer wire forms for harps are far better than the old style. These had wooden struts or legs that were difficult to do anything with, but the solid wirework base on the newer forms can be covered with galax, carnations or, in fact, any flower in season and with very little trouble.

A very beautiful harp can be made by covering the frame first of all with galax or magnolia leaves, the green galax being especially suitable. For the strings use narrow white ribbon and drape this very lightly indeed with sprays of Asparagus plumosus or single strands of smilax. On the upper part or shoulder of the harp a loose knot of roses may be tied with a green ribbon, a smaller knot being placed opposite and a light draping of the same variety being arranged on the sides. The base may be worked out with medium sized callas and leucothoe

to show out distinctly and give a bold effect. The solid part of the design will give the idea of the harp all right and these loose bold clusters add a grace to the whole that is very pleasing.

Tags for Florists.

We are pleased to show herewith a reproduction of the address tag used by Thos. F. Galvin, Boston, Mass., for he not only appreciates the great value accruing from a store appropriately elegant in its appointments, but carries this same sense of the eternal fitness of things into every detail of his great business, even to his shipping tag.

The Galvin tag is large and made from a fine white stock especially prepared by the Dennison Manufacturing Co. for the florist trade, possessing a superior writing surface which is not affected by water; in fact, should the tag get wet, it would dry out, leaving no trace of stain or spot. It is beautifully printed in red and green, the name being a distinctive style of lettering, and the whole effect so attractive that this tag has acquired the importance of a trade mark and, wherever seen, enhances the prestige and extends the reputation of its sender.

It is strange how inconsistently the minds of some men work. One would think any florist, whose eyes are trained to artistic effects and whose clientage is composed of the most dis-

THE GALVIN TAG.

and a very fine design at a moderate price will result.

Another beautiful harp we saw recently was treated similarly on the strings but the frame was made of white carnation. On this loose clusters and garlands of American Beauty roses were tied at suitable places. The base was composed of brightly colored foliage, small pots of Pandanus Veitchi and dracæna being cut off and arranged at prominent points with Easter lilies standing higher up. An important point to keep in mind in the harp designs is that the knots or bunches of flowers should be sufficiently large, on the large sized harps,

criminating, would scan carefully every detail of his appointments that all might be of proper fitness. Yet to many "a tag is a tag," and any tag will do. They never seem to think that their customer sees the tag before he sees the goods and many others, who never see the flowers, see the tag in its passage from his store. On all it leaves its impression. The concern of every florist should be as to the kind of impression left, for a man's reputation is a valuable asset.

There can be no doubt as to the impression such a tag as illustrated has created and the part it is playing in extending Galvin prestige.

HARP OF ROSES, CALLAS AND CARNATIONS WITH CYCAS LEAVES.

The Grower and the Retailer

CAN HELP EACH OTHER.

One of the greatest business men of our times has said "Any fool can get prices down, but it takes a clever man to get them up," and there is a whole power of wisdom in that statement. You cannot serve the lady and the lady's maid with the same article at the same price, because it will be too common for the one and too expensive for the other. A flower is either choice or common; it cannot be both. There would be no change in fashions if it were not simply that the classes were trying to dress differently, and look distinct from the masses. Reformers and preachers alike tell us that it is simply impossible to mix class with class.

Now if good carnation blooms are hawked in the streets of our large cities at two a penny, who benefits? Not the grower, because his product is sold cheaply. In the end the commission salesman does not, because a good class flower is being degraded and his good class customers will not care to stock them, besides less money passes through his hands, says a correspondent of the English Horticultural Trade Journal. Now the retail florist surely cannot benefit, because some of his customers are being served through another channel, and his high-class customers will be disgusted, and require something different, and it does not always follow that it will be flowers. If carnations are their favorite choice. No, I would rather say that the retail florist is injured, because perchance he bought from the salesmen early in the market when carnations were at the same price as that at which the gutter hawker is able to retail his flowers. Hence he must sell at a loss, or spoil prices, or maintain prices and appear ridiculously dear in the eyes of his customers, who, in future, will hold him with suspicion.

So, who benefits? The middle class buyer has a change in flowers which he buys for the same amount of money so to a degree he benefits. But it is the hawker, the enemy of the florist and all good nurserymen, who benefits, and he is thus made more powerful and a still greater menace to the industrious citizen who has to pay his rates and taxes coupled with a heavy rent. The digest of the whole thing is simply this, that no one of any importance is satisfied.

Now if this is twentieth century business some of us had better retire on our pensions. It certainly cannot be in keeping with modern times and methods practised in other walks of life.

If the supply exceeds the demand at any one short period, would it not be a thousand times better for the nurseryman and florist, whose interest are so closely allied, if there was a reasonable minimum price fixed under which the commission salesmen were instructed not to sell, and all carnation blooms remaining unsold returned to the grower, if simply for the purpose of checking. Such an arrangement would guard all those whose interest were best served, because in time of glut the best stock would sell at a minimum price to the

best buyers who could speculate without fear. This in itself would mean that the wholesale grower in reality would receive the same returns even if fewer blooms were sold, and would preserve the dignity of his flower, which is a mutual gain.

Now, out of common fairness to the commission salesman, it is up to all growers of carnations to handle their flowers as carefully as possible, not growing too many small lots, and so having to allow some flowers to remain on the plants or in the bloom shed until there are 25, or more as the case may be, to make up an even count.

The blooms must be cut whilst they are young and in a fresh condition, remain in water for a time in a proper dark bloom shed, and be well packed if the salesman is to be able to build up a good connection at fair prices. It is also the grower's duty to take instructions from him as to best varieties to grow, and their shipping qualities; remember that it is much better to grow three varieties well, having a regular supply of bloom, than to grow six varieties badly, with an irregular supply.

Now, if you, Mr. Editor, will be long-suffering with me, I am going to have a shot at the retail florist, the man who expects to make as much profit at Christmas and Easter as he does for the rest of the year combined. He is not content with a small percentage of advance like the grower, but demands a 300 per cent profit on his sales. At these two holidays, just because he thinks the customer must have the goods, he tells him flowers are very expensive and that there is a great demand, until everyone is so frightened at the prices of flowers and plant at Christmas and Easter that the trade is not on the increase but remains where it was some five years ago, and people who would buy our produce patronize the confectioner, jewelry or other shopkeepers who are too smart to try and extort abnormal prices simply because there is an increased demand. I hope I am understood; I do not object to a fair and proper advance in price, but when it comes to narrowing down the scope of our trade by the florist trying to make as much profit in two weeks as he does in the other 50. I think the whole trade must suffer, and instead of broadening our basis, we are doing the reverse, and turning money down other channels.

We must all remember that our interests are so closely allied that we have to advance as a whole, guarding each other's interest.

MOLINE, ILL.—Julius Staack & Sons have two large new boilers on the ground ready to be installed to heat their new greenhouse plant.

SOUTHAMPTON, N. Y.—The Horticultural Society will hold its next annual exhibition July 20-21, and the flower show committee has in preparation the most attractive premium list ever issued by the society. Entries at these flower shows are open alike to commercial and amateur growers. Intending exhibitors should address A. W. McIntosh, Box 431.

Dracena Terminalis.

AN INDISPENSABLE PLANT.

Although according to botanical usage the fine plant named above belongs to cordylina, it is so universally known as *Dracena terminalis* that it is less confusing to the ordinary grower or plantsman to keep it under this name. It is one of the finest foliage plants in existence, easily grown, clean and a popular seller in all the principal markets. *D. terminalis* is usually raised from seed where a quantity is needed, but may just as easily be propagated by cutting up the stems or by notching them and laying them entire in flats or beds of moss. If there are old plants that have become lanky and naked below the top may be cut off and rooted in a bottle of water or on a propagating bench, the stems being then cut up in lengths of about two inches and stood on end in sand kept always moist over a brisk bottom heat when every one will strike. Some growers moss the tops on the plant and root them this way. It is an excellent plan for the top, but very often when this is done the lower part of the stem gets so hardened that the eyes do not break freely and many of them decay in the bench.

If the top is taken off, the stem will shoot out if left in the pot and these side shoots may be taken off later and rooted. Still, the best way of all is to raise plants from seed annually and always have plenty of them coming along in various sizes. Seed sown in March in a temperature of 70° or thereabout will produce nice plants that can be planted out on a bench, or, in the warmer parts of the country, outside, and will rapidly grow into stock fit for 4-inch or 5-inch pots. It does not need great heat, but a good light is absolutely essential to bring out the fine color of the foliage. Good fibry loam with a sprinkling of sharp sand and a small quantity of well dried cow manure makes suitable compost and this must be very firmly placed. The atmosphere should be kept moist at all times and a gentle spraying several times daily during the growing season will be in order. There are few plants that are useful in so many ways from the smallest up to well leaved specimens from three to five feet high and it is one of the most satisfactory plants for selling to customers who wish to keep it in their homes, owing to its long lasting qualities.

G.

There Are Scales and Scales.

Miss Louise Klein Miller, curator of school gardening, Cleveland, O., had been telling a crowd of pupils about the different insects that attack plants, and warned them especially against the malevolent San Jose scale. She suggested that they go to the school library and get a book about it and read of its habits and the remedy for checking its career. One young woman went to the librarian the next morning and said she wanted something about the San Jose scale. "Go to the music department," said the librarian without even looking up from her desk.

ORCHID NOTES.

THE hybrids between brassavola and cattleya (Brasso-Cattleya) are now quite a numerous set and extremely beautiful.

It is not good policy to let small seedling ferns that appear on orchid composts to grow, as they are apt to attract thrips and other insects.

CATLEYA BOWRINGEANA is now at rest and may be kept so as long as possible, but when growing it likes a lighter and warmer position than most other cattleyas.

CATLEYA CITRINA grows best in what appears to be an inverted position, that is with the head downwards, and always reverts to this, no matter how planted.

CHARLES BOND, for some years identified with the famous Wilson collection of orchids in Philadelphia, will embark in the commercial growing of these plants in the vicinity of Chicago. Mr. Bond has had wide experience in the cultivation of orchids and we wish him every success in his new departure. Geo. Hunt, of the Julius Roehrs Co.'s orchid department, will succeed him at Philadelphia.

The Cattleya Fly.

The cattleya fly is especially liable to be troublesome where there are newly imported plants. It is a pest that is introduced on these and does not thrive very long in the orchid house, though while there it does more than its share of mischief. The means usually taken to rid the plants of the pest are fumigating regularly to kill the female insects that are flying around in the house and removing the buds in which the larvæ of the fly are growing. It is well when fumigating to have the atmosphere dry and warm, as this brings the flies out from their hiding places and they are then directly exposed to the deadly fumes.

As to the buds, growers of experience can easily tell which are attacked by the fly, which lays its eggs

in the soft tissue of the forming bud long before their effect can be seen. An injured bud often appears very much stronger than a healthy one, and inexperienced growers are apt to be patting themselves on the back to think what fine growths they are getting. But the swelling is altogether abnormal and is all at the bottom, the upper part being small and pointed, the whole thing being almost bottle shaped. As soon as these are seen they should be broken off and burned. If they are cut open the larvæ of the fly can be seen burrowing among the tissues and feeding as they go, preparing to issue later on as full-grown flies and carry on the perpetuation of their kind.

In the Cattleya House.

The grower of cattleyas always appreciates a few dull days as it gives more time for cleaning, repotting and rearrangement, less being needed for damping, watering, shading, ventilating and other routine work. With the improvements in fumigating materials and insecticides there is not so much need of cleaning individual plants as formerly, but there are always newly imported or recently purchased plants that have to be looked over for insects of all kinds from the troublesome cattleya fly to the small soft scale that secretes itself under the sheaths at the bases of the pseudobulbs, where it is impossible to reach it by any other methods than hand cleaning. There are many forms of insecticide on the market that, used according to the maker's directions, are superior to the old style soap and tobacco or nicotine solutions, though this latter is excellent if properly made and used.

For a solution for spraying and cleaning a piece of soft soap as large as an egg will make about six gallons and a tablespoonful of liquid nicotine of about 40 per cent grade should be added. But before the plants are sponged they should be dipped in a weaker solution and laid on their sides so that the solution will not run down into the compost.

Where the insects can be got at easily, the sponge, kept wet, is all that is needed to get rid of them, but there are places between the bulbs and in the corrugations of the stems where the sponge will not reach, and here a small pointed stick like a toothpick may be used to dislodge it, afterwards sponging over the place. All loose sheaths likely to have scale underneath may be removed, but avoid skinning the bulbs too much, and in using sponge or brush see that either is kept wet and used lightly not rubbed hard or the leaf surface will be injured.

At this time there is a general waking up of the plants. Even those that do not show signs of it in new growth are forming their spikes in the sheaths. *C. Mendelii*, for instance, will not probably be showing new growth, but the flowers will be forming in the sheath and a certain amount of moisture will be needed. If the plants are kept overdry at this time the result will show in shriveled bulbs and both flowers and new growth will be weaker than if kept a little moist. Too much moisture, on the other hand, is equally injurious to the roots and these fail to carry the requisite nourishment to the plants. A safe plan with such plants is to give them a thorough soaking and then allow them to get well on the dry side before giving any more. A few days' drying never yet hurt a strong, healthy orchid, but a constantly wet state is bad for any plants, no matter how vigorous they may be. *C. Schroderae* is in flower and, like *C. Trianae*, will make its growth afterwards and rest in sheath. Just now give only sufficient water to maintain the bulbs in a plump condition and avoid too much atmospheric moisture. It is a good plan to remove the flowering plants to a drier house than the growing quarters.

C. Mossiæ, on the other hand, is practically at rest now. It makes its growth late in the season after flowering and rests until just before flowering again. Here very little water is needed. *G. Gaskelliana* is beginning to grow and will need more moisture

FIRST ANNUAL BANQUET OF THE PACIFIC COAST HORTICULTURAL SOCIETY AT SAN FRANCISCO.—See Page 299.

and the long-stemmed, two-leaved kinds such as *C. Harrisonæ*, *C. Leopoldi* and even *C. Bowringiana*, must be watched and, as soon as new roots are seen starting from the old pseudobulbs, the water supply must be gradually increased. This close watching of the plants and treating them individually rather than collectively is an important part of the orchid grower's work. A man who treats all alike indiscriminately and does not study their habits of growth and their condition as to growth and rest will never go very far as an orchid grower.

Independent of watering, there are other points that need consideration. Certain plants do better close up to the light, while others are not so particular. For instance, those beautiful cattleyas, *C. aurea* and *C. gigas* and the natural hybrids between them, never flower so freely as when they have their heads within a few inches of the glass horizon. The brightly tinted *C. superba* will not thrive long potted in peat and moss and grown alongside the labiate forms, but put it in the warmest, moistest house and let the sun shine on it at practically all times and don't overload the roots with compost and there will be magnificent growths and a display of beautiful flowers showy and handsome enough to stir even the least ambitious of orchid growers to enthusiasm.

Calanthes.

The flowers of the varieties of *Calanthe Veitchi* and *C. vestita* are very bright and showy in late fall and winter, and they are among the best of the orchids for cutting at that time. *C. Veitchi* has flowers of a pretty rose pink. Those of *C. vestita* are white with eye-like blotches of color, yellow in *Luteo-oculata*, red in *Rubra-oculata*, and there are sub-varieties of each more or less distinct. There is no need of a special orchid house to grow these pretty plants; they do well in any warm greenhouse in company with the ordinary greenhouse or stove plants. They take up little room in comparison with the amount of flowers produced, and are easy to grow. For cultural purposes they may be grouped together, for though the hybrid *C. Veitchi* is a little stronger in growth than *C. vestita* they get along well together. The growing season of these *calanthes* begins in spring, and the bulbs should be potted early, but not watered until some signs of growth appear. The base of the bulbs should be just buried, a little of the old root being left on to steady them in position. After potting they should be stood on a shelf or a light bench and left alone until the growth is an inch or so long and beginning to root. The best compost for these plants is quite different to that used for the majority of orchids. The roots are of such a nature that they have the power to push through a soil that would be quite too heavy and rich for the epiphytal kinds. Good fibry loam with a liberal mixture of well dried cow manure and a good sprinkling of finely broken crocks and charcoal or coarse sand will meet their case, and this must be finished an inch or so below the pots, not mounded up as for orchids generally. One soaking of water to

settle the soil about the bulbs may do no harm, though it is not actually necessary.

When the growth is in the condition above mentioned, begin to water and increase the supply by degrees, as the foliage develops. In summer, when the growth is most active, a very free supply is needed, and this must be kept up until the flower spikes appear and the leaves begin to lose color. Then much less will be needed, as an excess of water causes the flowers to be thin and poor in color. The flowers over, the plants must again be dried off, but although quite dormant and dry during winter the bulbs must not be exposed to a low temperature, 55° being a good minimum. If the room is wanted they may be turned out of their pots and kept on a dry shelf away from the heating pipes. The growth is often attacked by a soft brown scale, and this must be got after and kept under if the best results are looked for. A moist and buoyant atmosphere and plenty of sunlight as long as the foliage will stand it are the conditions for the growing season, the night temperature being kept at 60°-63°, the dry running up well with sun heat.

CATTELEYA SCHROEDERÆ.

Dr. Britton Leaves for Havana.

On February 17 there left New York for Havana, on the Ward liner, Morro Castle, a small exploring expedition, whose work is likely to accomplish results interesting not only to New York, but to the scientific world at large. Dr. N. L. Britton, director in chief of the New York Botanical Garden, is at the head of it, and he is accompanied by Mrs. Britton, who spent her childhood in Cuba, and by Percy Williams, one of his assistants, who has paid several visits to the island. They will be joined at Cienfuegos by Prof. F. S. Earle, the scientific expert of several sugar companies.

The destination of the party is southern Cuba, and the nature of the exploration will be botanical. The party will devote its efforts mainly to the province of Santa Clara, where the Trinidad mountains, near the south coast, offer an almost unknown field to the botanist. Prof. Earle has arranged for men, horses and equipment, and a base will probably be established well up in the mountains. Tents have been taken along, for Dr. Britton expects to live in the open much of the time and will remain in Cuba at least until the end of March.

THE CARNATION.

Carnations Unsatisfactory.

ED. AMERICAN FLORIST:—

We have been growing carnations for the past four years and find that every year they are a little weaker and make grassy growth. We keep them in a temperature from 50° to 55°, at night, day temperature 65° to 70°. We use very heavy soil with one-third cow manure and with our greatest care could not get them as strong as we like to. We keep a little air on at night, except in severe cold weather, and keep them watered well.

A. G.

Probably the chief cause of the plants being weak and making a grassy growth is the temperature which they are being subjected to. To be able to carry carnation plants through the whole season in perfect health, producing a continuous crop of blooms the night temperature should be held as close as possible to 50°-52° and during very severe weather, when heavy firing is necessary, 48° is even better. But to allow the temperature to run to 55° cannot fail to cause the plants to lose their vitality—65° to 70° during the day is too high under artificial conditions. When the sun is shining brightly and plenty of air is on the house it is right for the temperature of the house to run up to this degree, but it is all wrong to treat carnations to this high temperature by the artificial means of firing and a close atmosphere. During cloudy or any other weather when it is necessary to continually fire to keep up the temperature the house should not be allowed to run above 60°, and then should have a little air on.

C. W. JOHNSON.

Ripening Carnation Seed.

ED. AMERICAN FLORIST:—

How long does it take for seed pods of carnations to ripen? How long should they be dried, and what care is needed after planting? The carnations were pollenized from January 29 to February 6. Any information on this subject will be greatly appreciated.

A. G.

The carnation seed from flowers pollenized between the dates mentioned should be ready for sowing about March 15. At that time the seed pod will take on a ripe appearance and the upper part of the pod commence to split apart; the seed is then ready to gather. It should be held for a couple of days before sowing so that it will thoroughly dry. The best way is to sow the seed from each cross in separate shallow pans, watering well at sowing time, then setting in a temperature of 56°-60°. Do not cover the seed any deeper than the depth of the seeds, enough only to form a covering and protect them. It takes but a very short while for the seeds to come up, when they should be transplanted as soon as large enough to handle, repeating the same in potting the young seedlings into pots. The soil for these young seedlings should be light and active with a little fresh sand added.

C. W. JOHNSON.

Carnations After Grass.

ED. AMERICAN FLORIST:—

For a number of years we had carnation plants in a piece of ground; last year we sowed it with grass. Do you think we can safely plant it with carnation plants again this year?

L. D.

We would not use the ground this year for planting carnations in if it can be avoided but would advise leaving the ground until fall, then skin off the sod and stack it up in a pile as compost for inside planting another season. Then plough up the plot of land and let it lay fallow until needed for planting the following spring.

C. W. JOHNSON.

Carnations in the East.

At this season the young plants demand much attention, not only those that have recently been potted, but also those from the earlier crop of cuttings. In the case of the newly rooted plants, that is, those fresh from the propagating house, it will be found that the sun is much more likely to affect them for the first three or four days after potting, than was the fact with those potted off in December and January. The early pottings may not have needed any shading, but those potted at this date will surely need covering with paper for part of the day, except during a period of dull weather, and may also require to be sprayed two or three times a day until they begin to take hold of the soil.

promise of a satisfactory plant in the field. The earlier lots of young plants will have been transferred from pots to benches before this time, this operation having been performed before the plants become too much pot-bound. Spacing the young plants about 3x3 inches is about as close as they can conveniently be planted on the benches, and even this does not give space to stir the surface of the soil after they are planted, besides requiring care in cutting them out in readiness for planting in the field, for in general terms it may be said that the better ball they are planted out with in the the spring, the sooner they will start to grow and the better they will lift in summer. Spraying with nicotine or fumgating, or both, will be required from time to time in order to prevent the attacks of thrips and aphids, for all those insect punctures count in the ultimate health of the plants.

Watering also takes up more time as the sun grows stronger, but in a heavy soil may easily be overdone, for a young carnation will stand reasonable drought much better than over-watering, and after planting from pots to benches may not need a thorough watering more than once in a week or 10 days. But it has often been said that no regular rules may safely be laid down for watering, from the fact that soils differ so greatly in texture and consistency that the same rules may not apply even in neighboring towns. For example, in some portions of the western end of Long Island,

VASE OF CARNATION WINSOR.

It is a waste of time to try to harden off the young plants by exposure to the sun and air before they have become established in their new quarters and, for the first two weeks, they should have a night temperature similar to that of the propagating house from which they were brought, namely, about 50°. But, once they are rooting nicely in the pots, ventilation should be much more free and the night temperature should be dropped to about 45°, thus insuring a stocky and short-jointed growth that gives

where the soil is open and sandy, carnations may take a good watering every second day in bright weather, while in other localities where a heavy soil prevails it may only be necessary to give a good watering once a week, and to touch up an occasional dry spot between times. The flowering stock moves along rapidly as the sun grows stronger, and the combination of fire heat, a mass of roots, and sunshine together disposes of the moisture in the soil quite rapidly, and calls for careful attention on the part

of the man in charge. Colonies of red spider are very likely to appear, and soon sap the vitality of the plants and ruin the flowers unless they are stirred up with a strong spray from the hose.

But spraying does not benefit the flowers, being liable to make them sleepy, and it is best to keep the water off them as much as possible. All syringing should be done as early as possible in the day after the flowers have been cut, so that the plants have a chance to dry off before night. The earlier the flowers are cut the better, for the strong sunshine is liable to make them soft, and that means that they will take some time to recover after they are placed in water, and to that extent will retard their development. Of course, practically every grower knows that all flowers are benefited by being kept in water for several hours before they are offered for sale, for the flowers fill out and develop by this process, and the improvement will continue for 24 hours at least, at this season of the year. The peculiarities of different varieties in regard to opening their flowers make quite an interesting and important study to the grower from the fact that some varieties are better cut rather tight, while others require several more days in which to develop, and without observing these peculiarities one cannot get the best results. The plants that have been producing flowers and cuttings all season should have a good root system by this time, and will be benefited by some extra feeding, the character of the soil, and the condition of the plants determining the kind and quantity of fertilizer that shall be given. Some growers use liquid manure quite freely, and where the conveniences for that practice exist it is doubtless a cheap and effective method, but to do this work properly requires a large tank and pumping system, and not every cut-flower grower has these appliances. Liquid manure is readily taken up by the plants on account of the fertilizer being in solution, whereas a top dressing of fertilizing material has to be dissolved and washed in by watering, and naturally takes a little longer in giving results, though when the right material for that particular soil is applied the benefit may be more lasting than that received from stable manure in liquid form.

W. H. TAPLIN.

Carnations in the South.

The spring growth on the plants is well under way, but as much attention as ever is needed in detail work. If necessary run an extra wire and keep the plants upright and the stems straight. It is during a glut of flowers that a little extra attention will pay. Nice flowers with clean straight stems will always command top prices. Keep on disbudding right up to the time for throwing the plants out. I have known some growers who have left this undone until the flowers were picked and then wonder why the price was not better. A light shading on the glass will be a great benefit to the colored varieties, aiding them to retain their color and size. In a short while the whites can have a little shade also, increasing the density as the weather gets warmer. Syringe fre-

quently for red spider and fumigate for aphids.

Ventilate freely through the day and at night when possible, even if a little fire has to be kept to maintain the proper temperature. Keep the beds as cool as possible by mulching with old rotted manure and water weekly with manure water. Rush

plants. It is impossible to reach the insect with any kind of insecticide or fumigator that is not strong enough, at the same time, to injure the foliage, consequently combative methods must be on the preventive order rather than the cure. There is no hope for plants so badly affected as those "R." sends and the best thing to do is to strip

VASE OF CARNATION HARVARD.

in a late batch of cuttings for use in case of an emergency. Young plants established in pots should now be in the coolest house, or, better still, in a cold frame, where they will get hardened up for the planting out process. Those showing strong growth must be topped, using a sharp knife and cutting back to three or four eyes. It is a good plan when the young plants become badly pot-bound to plant them in shallow boxes rather thickly, using a good compost to fill up the spaces. They transplant easily to the field from such flats and go to work without a check. If any are intended for cultivation under glass they should be shifted into 4-inch pots and kept moving. A cold frame is the best place for them.

WM. LEAR.

The Leaf Borer.

ED. AMERICAN FLORIST:—

I am enclosing you leaves of Queen Alexandria daisy that are affected with a small worm that gets inside the leaves and eats the center part out. It has caused a lot of trouble around this section, many growers having to burn their stock. We have used lead arsenate, nicotine and other remedies to no purpose. Please tell us what the insect is and what to do.

Worcester, Mass.

R.

The insect is the common leaf borer a most troublesome pest to growers of marguerites and also attacking cinerarias and other soft wooded

off every affected leaf, cut the plants back and try to keep the resulting shoots clean. A means to this end is spraying regularly with nicotine preparations and Bordeaux mixture in turn. This will make the leaves distasteful to the insects and to some extent prevent their attacks. If fresh clean stock can be obtained it would be well to do so though there is always the danger that many of the adult flies are left in the house and will attack any new plants that are brought in. Fumigating regularly with the strongest fumigant that is safe for the plants grown in the house is the best means of destroying these. But it is useless looking for a remedy that will be of any assistance after the leaf has been entered or, correctly, after the eggs have been laid in the leaf tissues by the female fly. Crushing the insects on sight, of course, helps some, but nothing but constant attention along the lines laid down above will be at all likely to prove successful in getting rid of this pest.

G.

Propagating Geraniums.

ED. AMERICAN FLORIST:—

Is it too late to take geranium cuttings for 4-inch pots for about May 15?

N. S.

It is not too late to strike geranium cuttings, but they will not be strong enough for 4-inch pots by the date mentioned.

G.

WITH THE GROWERS

J. A. Budlong, Chicago.

All the stock at the J. A. Budlong greenhouses at Bowmansville, Chicago, is in fine condition now, but the palm for showiness and beauty must certainly be awarded the carnations. Not many varieties are grown but each is given the correct temperature and treatment necessary to bring out its good points and a run through the houses with Mr. Budlong's capable grower was most interesting and instructive. Lawson in so many places is showing such poor form and getting such a bad name that it was refreshing to see bench after bench of it in its true form, magnificent plants covered with a great crop of flowers of the finest possible color and quality. When Lawson can be grown this way there is certainly no need to look for anything else in its color. It is given more heat here than the Enchantress and other varieties, being run at 56° at night, while possibly the light, sandy soil here may also have something to do with its successful culture. Winsor is treated somewhat similarly, these two being at the warmest end of the house, Victory, Enchantress, White Perfection and others being grown at the coolest end. All are in the pink of condition and the crop of flowers now on is remarkably good. The following are the principal varieties grown with the number of each, other varieties being grown in smaller numbers:

CARNATIONS.

| | |
|------------------------|--------|
| White Perfection | 21,000 |
| Enchantress | 10,000 |
| Lawson | 6,500 |
| Winsor | 6,500 |
| Aristocrat | 6,500 |
| Victory | 6,500 |
| O. P. Bassett..... | 3,250 |

Just now the young stock is looking particularly well, thousands of all the varieties having been propagated and in the various stages of development. Quite a large stock was in 3½-inch pots and inquiries on this point led to the information that they are grown this way on account of the light, sandy soil in the field. Lifted from benches and planted in the field the plants do not make good balls at lifting time, all the soil falling off and leaving the roots bare. From the 3½-inch pots, on the other hand, they

transplant readily to the field and lift at planting time with this ball of roots practically intact. Naturally such plants establish themselves much more rapidly than others that have no soil around the roots and it is this watching of such points all through the growing season that leads to such excellent results here.

In the rose sections the same high cultural conditions are maintained. Up to this year a good portion of the stock has been grafted but, in future, own-root stock will be used, excepting in the case of Mrs. Marshall Field, which will not thrive on its own roots. A very striking proof of this can now be seen in the greenhouses here. As a test a portion of a bench was planted to own-root stock for comparison with the grafted plants used as the bulk of the planting. The former, though set out at the same time, have never made any headway and are little scrubby stock where they are alive at all, many having died. The grafted stock, on the other hand, is superb, fine, healthy plants, started early in February and advancing rapidly for summer flowering. This variety and Kaiserin are treated similarly, kept almost dormant during winter and started up early in the year.

My Maryland is described here as the best money maker in the business. But it has to be kept going in winter. Here it is run at 65° at night and this keeps the plants constantly growing and flowering right along. There is no doubt that practically all the dissatisfaction with this rose has arisen from the fact of its being kept too cool in winter. This checks the progress of the plants and consequently the flowering. They have such confidence in it here that just three times as many plants as have been grown will be planted this season. Mrs. Jardine is also highly thought of here. It is a grand grower and seller and flowers with great freedom all the year around. In summer it has to be cut a little tight or it flies open, but in winter it is a perfect rose. Another peculiarity is the sensitiveness of the foliage to sun heat. It burns quite a little in summer unless a light shade is given, especially after a dull period. All the other teas are in great shape, the Brides and Bridesmaids throwing elegant flowers and making a splendid growth. The Beauties are

not in full crop now but, judging by appearances, will be fine for Easter, when there will be a big crop. The following are the principal varieties grown:

ROSES.

| | |
|--------------------------|--------|
| Bride | 18,000 |
| White Killarney | 12,000 |
| Richmond | 11,000 |
| American Beauty | 10,000 |
| Bridesmaid | 9,000 |
| Killarney | 9,000 |
| Mrs. Marshall Field..... | 7,000 |
| Mrs. Jardine | 6,500 |
| My Maryland | 6,000 |
| Kaiserin | 6,000 |

The young stock of all these varieties is very forward and in the best of health and condition. Chrysanthemum propagation is going on merrily, a big batch of all the principal varieties having been already potted. These will be topped and the tops inserted as cuttings. The mechanical end of the business is very complete here. Eight 80 h. p. boilers supply the necessary steam power, these being arranged four on each side of a central chimney. Pumps for water, manure water and the return of condensation to the boilers are all run in duplicate so that if one set breaks down another can be started up to take its place. The liquid manure plant consists of a large tank in which the manure is steeped, being then run through a revolving sieve run by a water motor to remove all solid matter. This can be forced at any pressure desired through the clear water system by first emptying the latter of the water and turning in the manure. The whole is one of the finest equipped and most up-to-date plants around the city and well worth a visit by anyone interested.

The Trade of Denver.

The illustration accompanying this note will serve to show the importance of the present day flower trade in this city, the home town of President Valentine, and of many other good florists. The Park Floral Co., over which Mr. Valentine also presides, is the largest concern west of Kansas City, while Elitch's Gardens is also a remarkably fine place. This firm is comparatively new. Mr. Long, of the Elitch-Long Gardens, started in the first place so he could grow his own plants for the gardens, but finally commenced to grow roses and carnations

GREENHOUSES OF THE PARK FLORAL CO., DENVER, COLO.

In the Foreground is Plant B. Lately Purchased From The Colfax Floral Co; In the Background Plant A the Original Plant of The Park Floral Co. The Trees in the Distance Mark the Boundary of City Park.

until he has a very large plant and is growing them on an extensive scale. I believe his plant is second to the Park Floral Co. here, and both are first class growers in every way. Mr. Long also controls what used to be the Park Floral Co.'s stand at Sixteenth and Champs streets; then, when this firm moved, the Scott Floral Co. took hold of it. Mr. Long now controls that corner.

One of the greatest attractions to Ellitch's Gardens is the floating garden and moving fountain. This never fails to draw and hold visitors to the greenhouses. The rose houses, notwithstanding the difficulties of the situation in regard to the alkali in the soil, are in good shape, and very fair stock is grown. Carnations also are well done, and the whole of the large new plant is kept in first rate order.

CHRYSANTHEMUMS

Chrysanthemum Naomah.

Naomah is a large Japanese incurved variety, a seedling from Merza, more conical in form than its parent, that has been exhibited by Elmer D. Smith & Co., Adrian, Mich., under number 42-4-08. This variety was not judged by the Chrysanthemum Society of America committee, but E. D. Smith & Co. have decided to send it out on its merits as a worthy addition to the exhibition section. If the stem were a little more rigid this would be an ideal commercial sort, as it possesses every other qualification and may prove very acceptable to those who plant early and give generous treatment. It is pure white, $4\frac{1}{2}$ feet high and is ready November 1. The bud should be taken about August 25.

Propagating.

The leading feature of the chrysanthemum work at this time is propagating and working up the stock for the coming season's plantings. The early varieties, the slower growing midseason commercial kinds and those intended for staging in large bunches at the exhibitions are they that should receive attention now. Polly Rose, Robt. Halliday, Golden Glow, Monrovia, Virginia Pohlmann and October Frost are early varieties that should be got into the sand at once. Pink and White Ivory, Miss Alice Byron, Nellie Pockett, Cheltoni, Mrs. Wm. Duckham, Mlle. Clementine Touse, A. J. Balfour, Mrs. H. W. Buckbee, Timothy Eaton, Yellow Eaton and Major Bonnafton are medium early to early midseason varieties that should be got in the sand by March 15. Col. D. Appleton, Golden Wedding, Golden Eagle, Maud Dean, Mayor Weaver, W. A. Chadwick, Yellow Chadwick, Dr. Enguehard and all varieties that are rapid growers and mature their blooms from November 5 to Thanksgiving can be started March 15 to April 1. This will allow for them to be ready for potting April 15-20. It is yet too early for propagating Mlle. Jeanne Nonin, Yanoma and other very late kinds. These can be started around April 1, but the stock plants should be attended to and kept in active growth by being given plenty of light and air.

NEW PURE WHITE CHRYSANTHEMUM NAOMAH.

Grown and Exhibited by Elmer D. Smith & Co., Adrian, Mich.

The cuttings of the exhibition varieties now in the sand should be potted as soon as they have made roots enough. There is nothing gained by leaving them in the propagating bed after the roots are formed; it only tends to weaken the cutting. The novelties and newer varieties are coming to hand now and they should be given extra care to give them a chance to make good. It is poor policy to pot them and then let them take care of themselves in some out of the way corner because they are few in numbers and on trial. Young chrysanthemum plants received after March 1 are not fit subjects to increase the stock from. A cutting or two can be got from each plant perhaps, but the main plant has been so weakened as to be practically useless for producing a high grade bloom, and the cuttings taken from it are thrown back so many weeks later so that they have not an equal show with the man who is working with February or early March struck stock.

After the cuttings are taken from the sand they should be potted into

$2\frac{1}{4}$ -inch pots, using a plain, fresh soil. It is a mistake to use manure in the soil in quantity enough to cause a soft rapid growth while in the young state, it having a tendency to produce long pointed shoots. After potting, for a few days, the young plants should be treated to a little warmer temperature to start root growth in the new soil. As soon as they have taken hold, give them a cool even temperature to insure a short stocky growth. Plenty of ventilation should be given them on every favorable occasion, never allowing them to suffer for lack of water. At this season of the year plants in small pots dry out very quickly, consequently they need continual watching. The very early propagated plants for exhibition purposes should be worked along as quickly as needed. Whenever the roots show through the soil, potting into a larger size should be attended to at once. Allowing them to get root bound quickly causes the wood to harden and delays active root action after being potted again.

C. W. JOHNSON.

To Be Done Now.

IN THE GREENHOUSES.

Prick off all seedling annuals and perennials before they draw up lanky in the seed flats. Just as they show the rough leaf between the seed leaves is the proper time for most things.

Keep the flats containing the young cyclamens well up to the light on shelves, but see that they do not suffer for want of water.

Continue to root cuttings of alternantheras, iresines and other bedding stock as fast as possible. They will probably be all needed at the end of May.

Avoid overwatering geraniums after repotting and remove any decaying foliage on sight.

Plant a few dahlias on the greenhouse benches to provide flowers for Decoration day.

Leave *Tagetes pumila* to be among the last of the annuals to be sown, as this is very tender, the least frost killing it, while it is not advisable to have the plants stunted before planting out.

Thick sowing is one of the worst mistakes possible under glass, as it gives the plants a poor start.

Caladiums, fancy leaved callas, gloxinias and achimenes may all be started now.

Sow seeds of *Ardisia crenulata* in a moderately warm, light house.

Plenty of light and air are absolutely necessary to success with early tomato plants.

Avoid fumigating in the house where herbaceous spiraeas (*astilbes*) are being forced, as the growth at first is very tender and easily damaged by smoke.

A slight frost even does not do so much harm to flowering violets as a close, heated, moist atmosphere.

Cold water as an insecticide is not valued at its true worth by most growers.

Ventilate early in the morning, even if only a very small chink of air can be allowed. It is necessary to change the air in the houses as much as possible.

OUTDOORS.

In southern locations commence the planting of herbaceous stock as soon as possible.

After a prolonged siege of frost, herbaceous stock in frames is very apt to be dried out pretty severely. Look over it on bright days and water when needed.

Prepare manure for hotbeds and get the sash repaired and reglazed if not already done.

When the weather becomes mild, head back young, newly planted trees, also partly head back any old specimens that are to be regrafted.

Lift rhubarb for forcing, but leave those that are to be transplanted a little longer until growth starts.

OBITUARY.

James J. H. Gregory.

James J. H. Gregory, the veteran seedsman and founder of the firm of Jas. J. H. Gregory & Son, Marblehead, Mass., died February 20 at the age of 83. Mr. Gregory was born at Marblehead, November 7, 1828, and was educated in the public schools of his native town. At first a teacher in the public schools he entered the seed business almost by accident. A man wrote to the New England Farmer for a good winter squash and his father happened to have one he called Marm Hubbard's squash, as they had got the seed from an old lady of that name. Mr. Gregory sent him some seed and he liked it so well that he wrote about it in the papers and thus started the history of the Hubbard squash and the Gregory seed business. At first the latter was conducted at his home, then he took a small building and later, in 1863, he built his first store, which was enlarged from time to time until it evolved into the great business which will keep his memory green.

His charitable gifts were many and in 1873 he established a bread station in Marblehead, giving away daily many loaves during that period of depression. In 1907 he retired from the active head of the business and since then he has devoted himself to private concerns and characters. Gifts innumerable to schools, to scholars, colleges, churches and other institutions showed the great interest he has always taken in educational matters and he was always instrumental in forwarding the best interests of horticulture quite outside his own business. At one time he had 400 acres of land at Middleton entirely devoted to raising vegetable seeds for market gardeners, improving the strains then at command and raising new forms. He was always extremely active in mind and body, delving into science, wielding the axe and hoe and writing voluminously on all subjects pertaining to horticulture. Mr. Gregory married three times, first Eliza C. Bubier, second Mrs. Harriet R. Knight and third Sarah Lydia Caswell, the latter surviving him. He had no children of his own but adopted four, one of whom, Edgar Gregory, succeeds him in the business.

George W. Schroyer.

George W. Schroyer, pioneer florist of Lancaster, Pa., died at his home, 641 Harrisburg avenue, February 22. His death removes one of the most interesting personalities from the business as Mr. Schroyer was in his ninety-second year and a man with a good

memory so that his accounts of the oldtime life and customs were listened to and looked forward to by many friends of a younger generation. When in a reminiscent mood the old man was certainly congenial company for anyone with an interest in earlier days for his recollections were not of the wandering order so frequent in old men but clear and convincing. Up to the last he took a keen interest in public affairs and studied them closely. It was his habit of close study and application that made him the successful horticulturist that he was.

He did not enter the florist business early in life, his trade being that of a printer which he left in 1862 on account of his health. It speaks well for the florist business, as a healthy one when it is noted that Mr. Schroyer's friends thought he had only a short time to live then. The open air, after the confinement of the printing business, and the renewed interest in life which the work brought him, however enabled him to round out almost another half century, his wonderful constitution standing him in good stead during several illnesses late in life. One of the things he was most proud of was the fact that he set up the original charter of the Pennsylvania Railroad Co. in 1836, and, in recognition of this connection with this great corporation in its infancy he was invited to the celebration of its fiftieth anniversary in 1886 at Philadelphia. He was a native of Lewisburg, Pa., where he was born in 1818, a son of Colonel Christian Schrover. In 1845 he married Miss Annie E. Thompson, who died some 20 years ago and by whom he had one son who survives him.

Maurice Butterfield.

Maurice Butterfield, 64 years old, pioneer nurseryman of Lee's Summit, Mo., and widely known among horticulturists of the United States, died at Winona, Tex., February 22, from Bright's disease. Mr. Butterfield came to Lee's Summit from Ohio in 1868 and started the Lee's Summit Star nurseries, which he conducted to the time of his death. In 1900 the Missouri & Pacific-Iron Mountain Railway system and the city of Farmington, Mo., made concessions to Mr. Butterfield and induced him to go there and open the Farmington nurseries and greenhouses. Mr. Butterfield was a benefactor and one of the organizers of the Missouri State Horticultural Society, and also of the Jackson county fair at Lee's Summit, Mo. Recently he went to Texas on a visit to his son in hope that he might benefit his health. He is survived by his wife and eight children, five sons and three daughters.

NATIONAL FLOWER SHOW

To Be Held in Boston, Mass., March, 1911. Preliminary Premium List.

BURBANK'S spineless cactus, as a substitute for meat, is the latest from some of the western food authorities. It looks like an opportune time.

In the G. L. Freeman advertisement on page 244 in our last issue the line reading "Cattleyas, 15 varieties, 5,000 plants," should have read 50,000.

MARCH cometh like a lamb.

THE mysterious and elusive cattleya fly is prescribed for on page 262 in this issue.

THE annual meeting and exhibition of the American Rose Society will be held at New York, March 16-18.

DURING 1909 there were 3,360,221 visitors entered the gates of the Botanic Gardens at Kew, London, Eng.

IF the signs of the times mean anything, the orchid dealers and collectors will have their innings shortly, commercial types having the call.

REGISTER suggestions with the secretary of the Society of American Florists now, so that they may be taken up at the Rochester meeting of the executive committee March 12.

A GLADIOLUS SOCIETY or a committee of that name in the Society of American Florists is badly needed. A new variety should not be offered to the public until shown before the committee and its right to a name conceded and then registered.

THE Brussels Universal and International Exhibition of 1910 opens in April and continues to November. Exhibits must be in place April 15. Address all communications to President Executive Committee, 34 Rue des XII Apotres, Brussels, Belgium.

Illinois State Florists' Association.

The following appointments have been made by President-elect C. L. Washburn as per constitution: Members of the advisory board for three years—J. C. Vaughan, Chicago, and J. F. Ammann, Edwardsville, both to succeed themselves; vice-presidents for three years—Geo. B. Franks, Champaign, to succeed Chas. Loveridge, of Peoria, who was elected first vice-president, and H. E. Smith, Danville, to succeed A. R. Knowles, who has left the state. Our slogan is "100 members this year."

J. F. AMMANN, Sec'y.

Society of American Florists.

REGISTRATION OF ROSE.

Public notice is hereby given that the Conard & Jones Co., West Grove, Pa., offers for registration the rose described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Rose Wm. R. Smith—Flowers are large, full and double and most exquisitely formed. The petals are so firm they look like wax, softly curled, colored cream with flesh tint tips, buff yellow base and the center a heart of pink, perfect buds. The flowers are borne on long, strong stems, just right for making bouquets and the fragrance is delightful. Originator, Richard Baggs, of Bridgeton, N. J. Introduced by John Shellen and E. G. Hill Co.

H. B. DORNER, Sec'y.

February 24, 1910.

Haarlem Flower Show.

The jubilee flower show, organized by the General Bulb Growers' Society of Haarlem, will be opened by H. R. H. Prince Henry, of the Netherlands, March 23. The exhibition halls, although very spacious, will prove to be too small to contain the great many exhibits for which space has already been applied for. Another building has been constructed for plants and flowers, but as the grounds have already been planted with bulbs in autumn, and are also rather crowded, it will be quite impossible to erect more buildings.

The bulbs planted (representing nearly one million), will regularly succeed each other; the opening week will prove the usefulness of the charming crocus; next comes the stately hyacinth and its elegant "miniature" offspring. Daffodils and narcissi are naturally grouped at the feet of the old trees which are the pride of the Haarlem "wood," the site of the show. From mid-April to the end of May, glorious tulips will greet the visitor in great variety.

Meetings Next Week.

Butte, Mont., March 11.—Montana Florists' Club, Columbia Gardens.

Chicago, March 10.—Gardeners' and Florists' Union No. 10615, 10 and 12 Clark St.

Cincinnati, O., March 12, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.

Dayton, O., March 7, 8 p. m.—Dayton Florists' Club, 37 E. Fifth Street.

Detroit, Mich., March 7, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

Grand Rapids, Mich., March 7.—Grand Rapids Florists' and Gardeners' Club, office of member.

Hartford, Conn., March 11, 8 p. m.—Connecticut Horticultural Society, County building.

LaCrosse, Wis., March 8.—LaCrosse Gardeners' and Florists' Society, Hotel Stoddard.

WHOLESALE
GROWER of

CUT FLOWERS

Chicago.

A SLIGHT IMPROVEMENT

The end of the week showed a slight improvement in business and, although the city trade could not be called good, yet retailers were more in evidence around the wholesale stores. Shipping trade kept up exceedingly well and inquiries for later deliveries would seem to indicate better times ahead if the weather man consents. Prices on all stock have shaded a little and there were several days when the poorer classes of stock had to go at a very low rate. (A great time for the Greeks). Friday was an exceptionally busy day with several of the wholesale houses, growers having to buy after cleaning out heavy consignments from the greenhouses. There was a big demand for the best American Beauties and there were none too many of this class of stock. In the shorter and medium grades there was plenty. Richmond and Uncle John have been coming in fine and there has been a big supply of good Bride and Bridesmaid. Killarney has been variable in quality, some fine but others poor. Bulb stock and all small flowers have been plentiful all through the week.

Trade the early part of this week was of the quietest description and only the shipping trade saved the day. This was the more disappointing after the little spurt at the end of the week. Split carnations simply could not be moved at any price, though wholesalers tried their best by offering them at very low figures in quantity. Bulbous stock was a drag on the market and quite a lot of it had to be thrown away. Good stock, however, was not over plentiful, and prices on the best grades were fairly well maintained. Roses are plentiful in all varieties and some elegant stock is seen. Later in the week conditions were worse if anything, and carnations and other stock piled up. At the time of writing there is a great improvement in the weather and this, it is hoped, will help the transient trade some.

EASTER PROSPECTS.

Already there are many inquiries for stock for Easter and out-of-town buyers especially are anxious to know about the price lilies are likely to make around that festival. They will be high, there is no doubt about that. Just how high will not be known for some time yet, but there are a great many growers who are depending upon

purchasing stock, while others who attempted to force on time find that their plants are behind and will have to hold them over. The early date is against the Longiflorums being on time and thought doubtless, when the time arrives, there will be a big stock, there will also be a big demand and the price will soar. There is every prospect of a good crop of Beauties. Several of the largest growers around the city say their plants will be just right and these will doubtless be very acceptable for Easter, which is, above all, a Beauty holiday. Other roses will be in good shape and there will be a large supply of all classes of bulb stock and callas. It is doubtful if carnations will be as plentiful as they have been in former years; everyone having been in crop now for a considerable time. There is no need of borrowing trouble, but it looks as though there may be a little shortage here.

NOTES.

Much sympathy is felt for Geo. Hunt in the death of his wife and for her sons A. E., Fred G., and H. H. Hunt in the loss of their mother. Mrs. Hunt died at the family home, 1515 Payne street, Evanston, February 27, of dropsy and was buried at Rosehill cemetery March 1. Although for some considerable time Mrs. Hunt's death had been looked forward to it was a sad shock to both her husband and sons, all of whom were very devoted to her during her long and painful illness. Mrs. Hunt's maiden name was Mary Tolman, and the new carnation, raised by the boys, was one of her principal interests in life of late. It was a pretty and affecting tribute to her memory to make a casket cover of this carnation of which she had watched the progress with such interest and which was, of course, named after her. Mrs. Hunt was born in Norfolk, Eng., August 18, 1838, and one still notices the east country dialect when speaking to her sons. She was in her seventy-second year, and besides her sons, three married daughters in London survive her. The stall holders at the Flower Growers' Market sent a very beautiful design to the funeral.

As indicated in this column last week, Hoerber Bros. are going on with the addition to their plant at Desplaines as soon as the weather permits. The addition is of 100,000 square feet of glass, to be used for roses, carnations and chrysanthemums, and

there is a possibility that a Beauty section may be added later. This just doubles the size of the plant. The contract for the woodwork has been let to John C. Moninger Co., of Blackhawk street, and Geo. M. Garland Co., of Desplaines, has secured the contract for the Gariand gutters for the entire addition. A new 150 h. p. boiler will be installed and the firm's own fitters will do the steam fitting.

Considerable alterations to the heating apparatus will be taken in hand

BEAUTIES

Extra Long Stems,
\$3.00 per doz.

Our new spring crops of **Beauties** are now on, and they are the best in this market. We can supply them in very large quantities. Remember the extra long stems are always the best quality.

Killarneys, Richmonds, Maids, Brides and Perles

are also in with a big crop. Prices are falling every day.
We bill out at the lowest market prices each day.

EASTER LILIES

This Week,
\$12.00 per 100.

Write for our Weekly Price List. We keep you posted on the market.

Bassett & Washburn

Store and Office: 76 Wabash Ave.,

CHICAGO

Greenhouses: HINSDALE, ILL

at Peter Reinberg's home plant this season. New and larger steam mains are to be installed and readjustment of the heating coils. This is in part necessary owing to the removal of the entire stock of carnations to the new plant further north, where all these plants are now grown. Mr. Reinberg expressed himself as well satisfied with the condition of the plants at this new range and, judging by the quality of the stock now coming in to 35 Randolph street, he might well be, for it is excellent in every way.

S. Muir reports good business at his two south side stores up to the last week, when it has been a little quieter. Funeral work has been plentiful and he has had several good wedding orders. At a recent wedding it took quite a little hunting around to get the 800 American Beauties necessary. In the greenhouses a nice batch of Formosum lilies are likely to be just right for Easter, but the Longiflorums are a little behind. Bulb stock and azaleas are looking extremely well.

Frank Johnson, of the A. L. Randall Co., is back at the store after his sundry trips on the road. His last were through Ohio and Minnesota and he says that if business would come along at the rate it has been the past few weeks he would like to stay out. Good all around was his comment. Easter supplies are moving freely and a carload of caladiums and tuberose has been received and most of them sent out again this week.

John Mangel's store is extremely attractive now and he has stock of all kinds in excellent order. Trade is good here and wedding, funeral and other orders plentiful. We noted a fine lot of bulb stock in pots, also the pretty yellow *Primula Kewensis*, a species that should have a future as a market plant. The effect of the Wabash avenue windows hung with fine string smilax and filled with good stock is elegant.

The Geo. Wittbold Co. has a fine stock of palms and other decorative stock for Easter sales. Business during the last month has been excellent, according to Louis Wittbold, all classes of decorating being plentiful, so much so that it has footed up to one of the best months in the history of the firm. Rambler roses are very fine here and will be just right by Easter.

Wietor Bros. are receiving large cuts of all the popular roses daily and

We Are Cutting Heavily On Beauties, Roses and Carnations.

Our **Beauty** crop is at its best now and we have large supplies in all grades. For Easter we will be exceptionally strong on **Beauties, Roses, Carnations**, and all Seasonable stock. The carnations now being shipped are unsurpassed in quality in this or any other market.

they clean up well. Carnations, too, are in fine shape and several days at the end of the week the staff were put to it to find stock for the numerous out-of-town orders, many of the usual consignments having to be doubled.

The new seed catalogue of Winter-son's Seed Store is now on the press and may be expected in a very few days. John Degnan heaved a big sigh of relief when imparting this information. A very striking bit of color printing in the shape of a hibiscus or mallow adorns the front cover.

E. H. Hunt has been handling some elegant freesias during the week. They are almost pure white with large blooms and very fragrant. Carnations are a strong feature and eastern fancy ferns are opening up in excellent order. A big business is being done in this line.

The J. B. Deamud Co. is handling the output of the Chicago Carnation Co.'s Conquest, Sangamo and Mary Tolman carnations exclusively, and the firm has standing orders from many of the leading retailers for these varieties.

E. B. Washburn and wife left for the west over the Santa Fe on the 8 p. m. "Sunset Limited" February 25. We hope they will have a very pleasant trip and that Mr. Washburn's health will be greatly benefited by the change.

At E. C. Amling's this week we noted boxes of very beautiful pansies being opened up, all of one variety a pretty blue like the old Magpie, but much finer in bloom.

J. W. Starett, who has been connected with the business around this market for 25 years, is now in charge of the table decorations at the new La Salle hotel.

Elegant *Cattleya Schroderæ* has been arriving daily at Pochlmann Bros. Co.'s store. The flowers are good and sell on sight. Rose stock is also in fine order here.

The Bohannon Floral Co. reports excellent business, many good wedding and other decorative orders coming its way.

Harry Manheim, lately with J. A. Budlong, has taken a position on the staff of Hoerber Bros.

VAUGHAN & SPERRY,

52-54 Wabash Ave.,
L. D. Phone, Central 2571

Chicago

Bassett & Washburn have a big crop of Beauties coming along and expect to be in full crop for Easter. They are now cutting 400 long-stemmed flowers per day. The Kaisers have been started up and the first crop is expected around Memorial day. C. L. Washburn says they have now sufficient coal to last over the summer, so will have no more worry on that account for a time. The lilies now arriving are elegant stock and there will be a big line of Longiflorums for Easter.

Vaughan & Sperry are handling an exceptionally fine line of Bride and Bridesmaid roses in addition to the usual miscellaneous stock. Long stemmed Beauties have not been quite so plentiful, but there has been a fine line of short and medium flowers. Nephrolepis elegantissima, fine fronds well feathered, have been helping out the scarcity of first-class greens. They are of excellent quality and look as if they would last well.

It now seems that the wages of the West Park gardeners were raised through independent petition of the gardeners themselves and not through the Federation of Labor, as stated in our issue of February 19, according to Thomas Skorupa, one of the gardeners. T. Rodgers, the union secretary, supplied the first information on the subject.

Sinner Bros. have been busy replenishing the coal bunkers, which had been considerably depleted during the recent cold snap. They are now well stocked up. Elegant stock of roses and carnations is now arriving at their stand on the Flower Growers' Market, so good that everybody wants it and it cleans up daily.

A. T. Shotwell, of the Shotwell Floral Co., Fargo, N. D., who was in the city this week, returning from the south, says he was nearly frozen to death down there.

The wedding of Miss Ida Kroeschell, daughter of W. L. Kroeschell, and Mr. Von Ammon of this city will take place March 3.

Ladies' Night, Florists' Club, Union restaurant, Thursday, March 3, at 8 p. m.

J. B. Deamud is on a business trip in Wisconsin.

Visitors: James Souden, Minneapolis, Minn.; E. S. Thompson, Benton Harbor, Mich.; Geo. Crabb, of Crabb & Hunter, Grand Rapids, Mich.; Harry Baisley, Detroit, Mich.; G. L. Freeman,

"The Busiest House in Chicago"

DID it ever appear to you that you could increase your business by carrying a grade of cut flowers that are just a little better than your competitor's? You can get them from

J. B. DEAMUD CO.

Fall River, Mass.: John Gipner, Niles, Mich.: Geo. H. Serviss, Batavia; A. T. Shotwell, of the Shotwell Floral Co., Fargo, N. D.

BOWLING.

At the bowling on Thursday evening the Violets won three straight from the Roses and the Carnations won two from the Orchids. E. F. Winter-son has taken the place of Allie Zech. The fight for the Deamud cup is getting interesting. Last week Yarnall gained about 100 on John Zech and passed him in the averages. He is now close on the heels of Bergman, the real leader. This week the bowling was held on Tuesday instead of Thursday, on account of ladies' night at the Florists' Club. The Violets beat the Carnations two out of three, the Roses treating the Orchids to the same tune.

NEW CASTLE, IND.—Joseph Lynch, of the Dingee & Conard Co., of West Grove, Pa., has been in town on business connected with his firm and the South Park Floral Co.

POUGHKEEPSIE, N. Y.—Chas. Mitchell is making arrangements to move his greenhouse business from S. Win-nikee avenue to the end of the same street, where he has purchased a lot and will erect a new shop with more and greatly improved machinery.

CHAMPAIGN, ILL.—The Johnson greenhouses on East Springfield avenue narrowly escaped total destruction by fire during the night of February 17. The crew of the "owl" car from Urbana saw the flames and at once roused Mr. Johnson, afterwards helping to put out the fire.

SCRANTON, PA.—Director of Public Works C. V. Terwillinger and John Cleland, who will donate a greenhouse to the city, visited Nay Aug park February 19, and after a conference with Superintendent of Parks Thomas Phillips, decided upon the present site of the deer park as the best location for the greenhouse.

MARION, IND.—The Maple Heights Greenhouse, located on the Hunting-ton pike, formerly owned by Gunnar Tellman and recently purchased by Mrs. Alfred Butterworth, has been sold to David Rudicel of 919 North Wash-ington street. The consideration was \$3,800. The transfer of the property includes four acres of land, a dwelling house, barn and greenhouses. The new proprietor took possession March 1.

Philadelphia.

TRADE DULL.

Dullness has been the feature the past week, the complaint of "nothing doing" being very general. If it was not for the early morning wreaths and clusters the story would be sad indeed. With such a poor demand stock in all lines has piled up and quantity buyers get it at their own price. There were several very mild and spring-like days, of which the cash store brethren took advantage, and this helped some. Daffodils are very plentiful, as are also tulips; these are sold very low in quantity lots. Carnations that grade high are offered at low prices. Violets are also down 25 per cent, and so it is all along the line. Some lay the blame on the street car strike, which may be responsible for a part by keeping some of the would-be buyers at home. About 75 per cent of the cars are now running during the day and 25 per cent at night. There was some talk of calling out the Amalgamated Order of Florists in a sympathy movement, but it did not work, and every member will continue to draw his full pay on Saturdays. There is a talk of 90,000 men of the various trades unions walking out in sympathy on next Saturday, which will, if the threat is carried out, give a very serious turn to the situation. The growers are now offering a very nice line of flowering plants. Pans of hyacinths and tulips, daffodils and crocuses, primulas, cinerarias, daisies, azaleas, lilacs, cyclamens, bougainvilleas, Easter lilies and spireas. For these there is a fairly good demand, mild sunny days in early spring nearly always helping their sales.

NOTES.

There was a very good attendance at the March meeting of the Florists' Club held last Tuesday evening. It was carnation night, with Mr. Herr the essayist of the evening, whose excellent paper received the closest attention and for which he received the thanks of the club. The discussion which followed the reading of Mr. Herr's paper was quite spirited, Messrs. Pennock, Farenwald, Grakelow, Kruger, Seeker, Thilow, Stroud, Westcott, Wertheimer and others taking active part. The methods of business in handling and keeping flowers was the principal topic and many points were brought out. The exhibition was excellent, both in point of quantity and variety, there being a goodly proportion of new varieties, and all the exhibits showed excellent culture.

Preparations for Easter are now in full swing at all the principal growers in this vicinity. The lily question is uppermost in the minds of many, as quite a few crops are reported a little undertimed. Godfrey Aschmann is beaming over these days. He says he never had his stock in such perfect shape, everything being just right for Easter, azaleas, lilies, spireas and hydrangeas. Cinerarias and bulbous stock are his staples, with a fine assortment of araucarias as a leader all the season round. His place is well worth a visit as Mr. Aschmann is nearly always there to enthuse the visitor with his optimistic ideas of the future of the business.

David Anderson, of the Lansdowne-Garrettford contingent, is gaining in glass area along with the best of them and has just closed a contract with the King Construction Co. for two houses, 35x150 feet. The genial representative of this firm is a hard man to get away from, as by his convincing manner he shows his entire confidence and belief in the great advantage of using his style of greenhouses structures.

We Claim That APHINE Is the Most Effective Insecticide

Now on the market for the destruction of the
Mealy Bug, Brown and White Scale.

Others may claim their remedy to be "just as good," but we claim ours to be better—and have publicly proven this beyond a doubt.

We also claim **Aphine** to be no less effective against
Green, Black and White Fly, Red Spider and Thrips.

We are prepared to guarantee a uniform product at all times and one that will do all we claim for it.

For Green, Black and White Fly it is used at the strength of 1 part **Aphine** to 40 parts water.

For Red Spider, Thrips, Slugs and Ants, 1 part **Aphine** to 25 parts water.

For Mealy Bug, White and Brown Scale, 1 part **Aphine** to 15 parts water.

Price: \$2.50 per Gallon.

Aphine is becoming universally recognized as the leading general insecticide for the greenhouse and garden.

Your spring order will not be complete if it does not include **Aphine**.

If your supply house does not yet handle **Aphine**, write us for names of our nearest selling agents.

Aphine Manufacturing Company,

Madison, New Jersey

The National Association of Gardeners will hold an exhibition in connection with the Pennsylvania Horticultural Society on March 15-17. Over 40 pieces of silver plate and cups will be offered in prizes. There will be a banquet on Tuesday, March 15, which will, no doubt be a very fine affair.

The southern trade of the H. A. Dreer Co. is opening up in a very encouraging manner, many large orders having been received. The herbaceous stock is larger than ever and by the system of growing much of it in small pots it is always ready for immediate shipment.

A special selection of mignonette is one of the offerings of the Leo Niessen Co. at this time. Business is reported a trifle slow, but all right for the season.

Bayersdorfer & Co. are introducing a new expanding crepe paper cover that looks like a winner. Great preparations are being made for the Easter trade.

At McKissick's one cannot get away from Mrs. Jardine rose; as shown here, it is in it with the very best. Violets are also a specialty.

K.

Buffalo.

FUNERAL WORK ACTIVE.

The city is still enjoying all the beauties of winter from zero to a heavy fall of snow, followed by a thaw. This has been our position the past week. Very few receptions, no weddings of any size, but several dinners at the different clubs on Washington's birthday kept all busy. Funeral work has been quite active. Roses are good and in fair supply. Beauties are not in demand but good. Carnations are plentiful and good. Bulb stock is plentiful

and meeting a fair sale. Saturday found all stores on Main street announcing bargains in violets and carnations, the former selling at 25 cents the bunch of 50 positively fresh, while 25 carnations for 50 cents was another sign. All seem to be hopeful of their stock in the greenhouses for Easter.

NOTES.

S. A. Anderson has got into his new office where there is more room, also more space in the store for other work, floor space always being at a premium. On Tuesday evening all of his store people, together with the greenhouse superintendent, had a sleigh ride, followed by a luncheon at his home. To say that it was enjoyable would be putting it mildly. The playing of Miss Sauer and the singing of Miss Goehring were very much appreciated. After a pleasant evening all voted Mr. and Mrs. Anderson the best entertainers to be found.

We are on the eve of what promises to be an exciting time in the Florists' Club, the election of a president, the flower show and the banquet, all of which will take place at the Iroquois on Tuesday evening.

Arthur E. Beyer is now a resident of Denver, managing the store of J. A. Valentine. Denver has got a first-class florist and we have lost one. Everything points to the west.

The death of James Buxton removes the last of the old school of florists and growers who were both store men and growers about 40 years ago, getting their early tuition in England.

Visitors: Harry Bunyard, of A. T. Boddington, New York; J. J. Karins, of H. A. Dreer Co., Philadelphia; Reed & Keller's representative, and Wm. Dykes, of Ed. Jansen, New York.

50,000 EASTER LILIES.

EASTER will soon be here, only three more weeks. Now is the time for the Grower to consider how he will dispose of his stock to the best advantage. And the Retailer should give a great deal of thought to where he shall place his orders, where he can be confident that the consignor will only ship fresh stock. I can safely vouch that my Growers do not pickle, but ship regularly every day, and good fresh stock.

Easter coming much earlier this year, the weather is apt to be uncertain and cool, so that all the cut flowers should be of a more superior quality than heretofore, providing the Growers do not pickle same. Retailers should get in touch with the Wholesaler whose Grower will stand on his reputation. It is almost certain that at this Easter time, all crops are on and flowers of all kinds should be plentiful and reasonable, and of an exceptionally high grade all around. This will give the Retailer a fine opportunity to stock heavily on cut flowers and fill his orders to his Customers' and his entire satisfaction.

We wish to Offer for Easter the Following:

Richmond Roses, Marylands, Killarneys, Ivorys, Brides and Maids.

CARNATIONS: Afterglow, Victory, White Enchantress and Enchantress, White Lawson, Lawson and Patten. Oceans of Violets and Bulbous Flowers, Etc.

New York.

BETTER BUSINESS.

Business was quiet throughout the past week until Saturday, when there was quite a revival. Though prices did not advance to any appreciable extent, stock sold out better and there was evidence of something doing. American Beauty roses hold up well because good ones are scarce; 60 cents each is the ruling price for specials, and possibly a few are sold for higher figures, but they are the exception. There has not been a surplus of tea roses, but on the other hand, the demand has been light, consequently it has caused lively hustling to move now, a surplus of carnations, violets and tulips. Good carnations are selling for \$2 per 100; violets for 30 cents per 100, more or less, generally them all. There has been, and is less; tulips average \$1 per 100. We advise the people who are continually "knocking" on the wholesalers of this city and charging that the trade papers "stand in" with the wholesalers, to take a day off and visit this district. We feel sure that it would do them good. If any wholesaler can sell stock any cheaper than many are now compelled to sell it, pay commissions and rent and live, he is a wonder and should have a place reserved for him in the hall of fame. We had better get at the facts now, and the people who have taken up the growing of flowers with the expectation of making a fortune in a few years, had better get out or curb their ambition. It is but a plain statement of facts that the florist business is being greatly overdone. Expansion is good if it comes from a healthy growth, but the present condition of the cut flower business is not healthy. But this is a free country and we would much prefer to see a man burn up money

in the cut flower business than to see him burn it in the great White Way, where he is sure to get a headache.

On Washington's birthday there were hopes of at least average business. These were all blasted on account of the day opening with a pouring rain, which continued until noon. There was a surplus of nearly everything, and there is no help for it, as a bad storm always cuts in on counter trade. The amount of stock used in dinner decorations on such a day as this is insignificant. Many society people left town on Saturday. Carnations and violets were particularly noticeable in the surplus.

NOTES.

Herman C. Steinhoff, of West Hoboken, N. J., who ships to the New York Cut Flower Co., is now sending in Baby Rambler roses, finely flowered. A recent visit to his range showed that he has a great stock of pot roses, all in the pink of condition. These include his new Rambler, Agnes Steinhoff, which will be disseminated this year. Crimson Rambler, Magna Charta and a number of other good varieties. Among the rose stock, a noteworthy feature is a lot of American Beauties in pots. His lilies, hydrangeas, azaleas and other pot stocks are very fine, as is all his stock.

Chris. Monalons was arrested at Forty-second street and Fourth avenue, on the night of February 22, for selling flowers without a license. Chris. was mad clean through, and here are a few of the things he said: "This is a free country, huh? George Washington's birthday, huh? Father of his country, huh? Arrest a man for selling flowers on his birthday, huh?" With reference to the above it may be said that every man is supposed to obey the law.

Indications point toward good stocks of Easter plants, but there are doubts in regard to a large supply of lilies. Much lily stock seems backward and it is doubtful if it can be brought in by Easter. It is reasonable to suppose that what does come in will sell well. As an offset, it seems certain that there will be a good supply of pot roses, azaleas, hydrangeas, spireas and other pot stock.

Some of the proprietors of retail stores make a great outcry against street vendors. There is a remedy. They should buy up the stock and make it impossible for the street men to secure it. Under present conditions there are thousands of dollars worth of stock sold by the street men that would otherwise be lost. We must face conditions as they are; not as we wish to have them.

Wm. H. Young, the well known rose grower of Clifton, N. J., is now associated with his brother, John Young, in the management of the extensive rose range of the John Young Co., Bedford.

TERRE HAUTE, IND.—It is reported that Otto Heini will grow only a few chrysanthemums hereafter, devoting his attention mainly to chickens.

OSWEGO, N. Y.—The Campbell Flower and Seed Co. has incorporated with the secretary of state. The company is capitalized at \$10,000, divided into shares of \$10 each. The directors for the first year are Anna R. Partridge, Patrick G. Campbell, Charles J. Belinger, James Kelly and Harry E. Joy. The business, which has heretofore been conducted by P. G. Campbell, will be continued. The company will soon move from the present quarters of the western terminal of the lower bridge to the new building under course of erection on the river dock.

Telegraphic Order.

11 NORTH PEARL STREET.

Portsmouth, O.

Business for this month has been fine, with plenty of stock excepting green. Lincoln's birthday and St. Valentine's day business was light to what it has been in other years. The greatest amount of work has been for funerals, as, owing to the lenten season, nothing has been doing along social lines. Quite a number of salesmen have been here this month looking up their trade. Weather conditions have been very unfavorable but we are looking for brighter weather from now on.

GLEN COVE, N. Y.—The following are the officers of the Nassau County Horticultural Society: J. Duthie, president; J. Ingram, recording secretary; O. Ador, corresponding secretary.

NEW CASTLE, IND.—The F. J. Bentley Floral Co. has sustained a serious loss in the breaking in of the roof of its new rose house through the heavy snow. Not only is the house ruined but thousands of young plants have been frozen up, including 20,000 young American Beauty roses and a large quantity of budding stock. The loss is placed at \$5,000. Otto Bentley says they will rebuild the house as soon as the weather permits.

The Seed Trade.

American Seed Trade Association.

J. C. Robinson, Waterloo, Neb., Pres.; M. H. Duryea, New York, First Vice-Pres.; F. W. Bolgiano, Washington, D. C., Second Vice-Pres.; C. E. Kendel, Cleveland, O., Sec'y and Treas.; Leonard H. Vaughan, Chicago, Asst. Sec'y. Twenty-eighth annual convention, at Atlantic City, N. J. June 21, 1910.

CHAS. P. BRASLAN expects to sail for Europe about April 1.

THE text of the New York State seed bill will be found on page 287.

DETROIT, MICH.—The American Seed Co. is airing some of its internal differences in court.

NEW YORK.—Henry Nungesser is recuperating at the Marlboro-Blenheim, Atlantic City, but expects to return to business soon.

W. ATLEE BURPEE & Co. have the back cover page of the March issue of Country Life for their advertisement in colors.

BATH, ME.—William R. Kimball, proprietor of the Pine Tree State Seed Co., has enlarged his business by the purchase of the Eastman Seed Co., of East Sumner, owned and operated by Mr. Eastman for 25 years.

SEEDSMEN, through their catalogues, should tell their patrons that if sufficiently strong demands are made on their congressmen there is no good reason why free supplies of new types of cattle, horses, sheep, hogs, poultry, machinery and implements cannot be obtained on the same basis as free seeds.

It is estimated that the seed contracts just let by the Department of Agriculture for delivery the end of the year will amount to something like \$115,000 of which about half went to California growers. A Boston seedsman received an order for 15,000 pounds of beet seed at 9½ cents, while a Toledo, Ohio, concern booked 5,000 pounds Brussels sprouts at 26 cents.

THE Commercial club of Omaha announced, February 21, that only 27½ per cent of the seed corn held by the farmers in Nebraska will grow. The corn in the northern part of the state is worthless for seed, while in the southern part farmers who have tested corn find they have none to sell. Railroad companies are sending out warnings against planting untested corn.

ROCKFORD, ILL.—R. H. Shumway has booked about 60,000 mail orders during January and February.

CHICAGO.—Contract prices on the board of trade March 2 for grass seed were noted as follows: Timothy, \$3.70. White clover, from 20 cents to 25 cents.—Visitors: Chas. P. Braslan, San Jose, Calif., returning from the east; C. N. Keeney, Le Roy, N. Y.

THE seed laboratory of the Bureau of Plant Industry, Department of Agriculture, Washington, D. C., in cooperation with the Agricultural Experiment Station of Purdue University, is establishing at LaFayette a seed-testing laboratory where seeds will be

The Late James J. H. Gregory.
See Obituary Page 268.

tested for germination and adulterants. Samples for testing should be addressed to the Agricultural Extension Department, Purdue Experiment Station, LaFayette, Ind.

H. SUZUKI, of the Yokohama Nursery Co., estimates that 7,000,000 lily bulbs were exported from Japan last season, including *L. auratum* and other garden varieties, his firm shipping 30,000 cases or approximately 4,000,000 bulbs. Mr. Suzuki, now in New York, will proceed to London about March 15 to take up the work connected with his country's horticultural display at the Japanese Exposition to be held at Shepherd's Bush, May to October.

The Business Situation.

Toronto, Ont.—The general outlook with the seed business, from a trade basis, is for a good average demand. Owing to the wet, backward planting season the past spring, considerable stock was carried over by the retailer in the heavier staples, but a large volume of repeat orders is anticipated. The demand for market garden supplies is good; it is a question of quality rather than cheap seed with the successful planter. With the heavy covering of snow everywhere, the catalogue trade is somewhat slow. European, as well as American grown supplies, are unusually short and it is seldom that a like general shortage has been known. While limited quantities of surplus stocks are being offered, prices are not so vital as the question of quality and vitality. A season like the present is the opportunity for the holders of old stock to unload. The planter requires to exercise caution.

Cleveland, O.—A. C. Kendel writes: "Our spring trade is not opening. We have had winter a continuous performance since December and last night another foot of snow fell on top of 40 inches of snow during the month of January, all of which rather discourages the making of hotbeds and gardens. We are not exactly disappointed for our stocks are nowhere near all in, a considerable shipment being on the way from abroad and a few items still owing. The groundhog had a chance to see his shadow three or four hours on February 2 and the weather-wise say that means six weeks more of winter."

Boston, Mass.—H. E. Fiske Seed Co. writes: "On account of its being so late when we mailed our catalogue we expected a falling off of our retail trade, but we find, instead, that it has greatly increased this year over last, both in the number of orders and the amount, and we are very pleased with the present outlook."—Schlegel & Fottler Co. writes: "The seed business of 1910 appears to be opening with unusual briskness, so far as our house is concerned. We are also pleased to say that last autumn's business was an improvement over that of the year previous."

Cincinnati, O.—J. Chas. McCullough writes: "Our trade is almost exclusively wholesale, and the greater part of our orders come from the jobbers. Our shipments so far are up to an average season, with more orders booked for early shipment than we have ever known before in the month of February. We are prepared for a rush of orders, and everything points our way for a full line of seeds, especially Kentucky blue grass and all natural grasses, as well as sunflower and poultry seeds."

New Orleans, La.—J. Steckler Seed Co. writes: "Business is opening up very nicely, and while we feel that it would have been still better had it not been for unfavorable weather conditions, we think that it will last longer now that it has started."

Louisville, Ky.—Wood, Stubbs & Co. state that the weather this season has been exceedingly bad for spring trade but, nevertheless, business shows quite a good increase over 1909. They are anticipating the best year they have had.

VINCENNES, IND.—A loss of about \$2,000 was caused to Frisz Bros.' greenhouses just north of the city, February 16, by the heavy snow breaking in the roof. The house was only built last year and contained a crop of radishes.

SALEM, O.—Wm. Mundy, whose farm and greenhouses are located west of the city on the Stark electric, closed a contract with the H. J. Heinz Co., of Pittsburg, recently, whereby he agrees to grow and have ready for use not later than June 1, 350 000 tomato plants, which the Heinz company will distribute among farmers in this vicinity who have contracted to grow tomatoes for the big canning concern. The plants will be of the Stone or some similar smooth variety, the seed to be furnished by the Heinz company, and they will be grown under glass. Mr. Mundy has also contracted to grow three acres of tomatoes for the Heinz company on his farm.

Prices of Indoor Fruits and Vegetables.

New York, February 26.—Mushrooms, 40 cents per pound; cucumbers, 75 cents to \$2.50 per dozen; lettuce, \$1 per dozen heads; tomatoes, 25 cents to 30 cents per pound; radishes, 3½ cents per bunch; asparagus, green, \$6 per dozen bunches; white, \$7 per dozen bunches; rhubarb, Long Island, \$8 per 100 bunches; grapes, Gros Colman, 75 cents per pound; peaches, \$2 per dozen; Mint, \$1 per dozen bunches.

Chicago, March 2.—Mushrooms, 25 cents to 60 cents per pound; cucumbers, \$1.25 to \$1.50 per dozen; leaf lettuce, 40 cents per box; head lettuce, Florida, \$3.50 per hamper, Louisiana, \$5 and \$7 per barrel; tomatoes, 20 cents per pound; radishes, 50 cents per dozen; asparagus, 25 cents to 40 cents per bunch; grapes, Gros Colman, 75 cents per pound; rhubarb, 60 cents.

European Horticulture.

FROM THE FRENCH TRADE PAPERS.

Phlox Suffruticosa.—The Phlox suffruticosa varieties, being less well known than the taller decussata or common hardy phlox, merit special note at this season. They are characterized by a lower growth of 16 inches to two feet, allowing their use where the decussata varieties would be too cumbersome; they are of pyramidal growth and have an early period of bloom (April and May) as well as a tendency to bloom again in the fall. They are as hardy as the decussata sorts, as easy to grow, and are multiplied best, like them, by division. We append a list of meritorious varieties: Aimée Vibert (white), Belle Pramide (white), Burns (deep purple with a circle of white), Forward (currant red), Indian Chief (light purple), John Young (white), Lady Musgrave (violet, striped white), Magnificence (purplish rose, cerise center), Maculata (lilac striped), Miss Turner (white, red center), Mrs. Taylor (pale

NEW YORK SEED BILL.

Introduced by Mr. Callan—Read Once and Referred to the Committee on Agriculture.

AN ACT. To amend the agricultural law, in relation to inspection and sale of seeds.
The people of the State of New York, represented in Senate and Assembly, do enact as follows:

PAGE 1.

Section 1. Article fifteen and sections three hundred and forty and three hundred and forty-one of chapter nine of the laws of nineteen hundred and nine, entitled "An act in relation to agriculture, constituting chapter one of the consolidated laws," are hereby renumbered to be article seventeen and sections three hundred and sixty and three hundred and sixty-one, respectively.
Sec. 2. Such chapter is hereby amended by adding thereto a new article to be article sixteen thereof, to read as follows:

PAGE 2.

ARTICLE 16.

INSPECTION AND SALE OF SEEDS.

SEC. 360. Inspection and sale of seeds. No person shall sell, offer, expose or have in his possession for sale for the purposes of seeding, any seeds or cereals, grasses, clovers or forage plants in quantities exceeding one pound, unless every receptacle, package, sack or bag containing such seeds, or a label securely attached thereto, is marked in a plain indelible manner as follows; and said marks shall be on the receptacle, package, sack or bag itself if there is more than ten per centum of injurious foreign seed:
a. With the full name and address of the seller.
b. With the name of the kind or kinds of seeds, except in the case of mixtures prepared for special purposes, when so labeled,

and the name of any foreign injurious seeds present to the extent of five per centum or over by count and the name and per centum of the following adulterants, if present, which adulterants shall not be taken into consideration when estimating the five per centum hereinbefore referred to:
19 Yellow trefoil in red clover.
20 Yellow trefoil, burr clover, sweet clover or dodder, in alfalfa.
21 Canadian blue grass in Kentucky blue grass.
22 Meadow fescue or rye grass in orchard grass.
23 Yellow trefoil in alsike clover.
c. With the claimed per centum of purity of the sample by count which shall be not more than five above the per centum determined by official examination.

PAGE 3.

SEC. 361. Samples, publication of results of examinations.
1 Samples of seed shall be taken in duplicate, both samples to be sealed promptly and one to be tendered and, if accepted, to be delivered at the time of taking to the person apparently in charge and a receipt taken therefor, unless refused. No action shall be maintained for violation of this statute if the seed was not sold or exposed for sale. The commissioner of agriculture is hereby authorized to publish from time to time the results of seed examination, together with the names and addresses of dealers from whom the samples examined were taken.
11 SEC. 3. This act shall take effect July first, nineteen hundred and ten.

EXPLANATION.—Matter in italics is new; matter in brackets () is law to be omitted.

The Nursery Trade

American Association of Nurserymen.

F. H. Stannard, Ottawa, Kans., President;
W. P. Stark, Louisiana, Mo., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-fifth annual convention to be held
at Denver, Colo., June 8-10, 1910.

VISITED CHICAGO: Herbert Chase and family, enroute to their home in Colorado.

LINCOLN, NEB.—Yale Bros., of this city, says the Star, have recently acquired a third interest in the Harrison nursery at York.

A WELL illustrated bulletin on "The Euonymus Scale" has been issued by the Department of Agriculture, bureau of entomology.

HARRISBURG, PA.—The Franklyn Davis Nursery Co., of Baltimore, has purchased a farm of Mrs. Coder here and will at once commence raising nursery stock.

WEST GROVE, PA.—The Conard & Jones Co. is making quite a feature of the "blue" rose (Veilchenblau) and has a large stock of it. The company has been exhibiting it locally.

GRAND RAPIDS, MICH.—Wencil L. Cukerski has about 70 acres of land close to the city, where he intends carrying on a general nursery business, and especially landscape work, laying out private estates, cemeteries, railroad yards, etc. He has also about 18,000 feet of glass for plants and cut flowers.

BROOKINGS, S. D.—N. E. Hansen, secretary of the South Dakota Horticultural Society, recently returned from Siberia, where he went as agricultural explorer, has sent out a new fruit list and a list of new alfalfas found by him in his travels. Among the fruits listed and illustrated are Opata, Sapa, Hanska, Pansota and Cheresoto plums and some hardy strawberries. These and many other hardy things are offered for sale, and those interested should write Mr. Hansen for a list.

Miami Valley Nurserymen's Association.

At the meeting of the Miami Valley Nurserymen's Association held at Dayton, O., and which adjourned February 17, the following officers were elected:

J. Siebenthaler, Dayton, President.
F. Bolender, Tippecanoe City, Vice.
M. F. Gainer, Xenia, Sec'y-Treas.

Nursery Stock Inspection Bill.

ED. AMERICAN FLORIST:—

You probably are aware that the Simons bill known as H. R. 15656, requiring dock inspection of all imported nursery stock at ports of entry is still pending before the committee of agriculture and will likely come up for hearing at this session of congress. This bill is ineffective and impossible of execution, as you will see by the enclosed copy of resolutions and explanatory letter sent to the committee by the Horticultural Importers Association. Not one-tenth of the cases arriving could be properly inspected and the contents of cases unpacked would be practically worthless when released. We ask that you help protect nursery interests by using your

influence in having the Simons bill withdrawn and substituting in its place the bill prepared by the American Association of Nurserymen and which was endorsed by the Association of Horticultural Inspectors, as this bill provides for proper inspection without unnecessary loss.

MC HUTCHEISON & Co.

New York, February 26, 1910.

EXPLANATORY LETTER.

I have the honor to enclose a copy of a resolution passed at a special meeting of the Horticultural Importers' Association, held in New York, February 1, voicing their disapproval of bill known as H. R. 15656, regarding inspection of foreign nursery stock, which I understand is now before you for consideration. The following facts will, I think, prove to you that the above measure is "impracticable" and "impossible of execution." The arrivals at the port of New York for the past 11 days of French nursery stock were as follows—which is about the average weekly shipment for the past three months.

1,375

Each case contains 10-15,000 seedlings (some cases contain 40,000) so that the 1,375 cases contain an approximate total of 17,000,000 seedlings, valued, when shipped, at approximately \$60,000, or at the dock, New York, approximately \$100,000, which includes about \$26,000 paid to the United States government in import duties.

The above shipments represent almost exclusively seedlings from France (representing raw material for nurserymen) which cannot be produced in the United States. The import duty exceeds in some instances 200 per cent of foreign cost. The seedlings are packed tightly by means of machinery and appliances in paper-lined cases and unpacking in transit would greatly damage contents even if they could be repacked into the same cases.

Entry has to be made and duty paid to the United States customs within 48 hours to comply with customs' regulations. The cases must be removed within three or four days to comply with steamship regulations and a glance at above figures will prove to you that it cannot be done, even though the present congestion on the docks be entirely overlooked.

I shall be pleased to answer any questions you may wish to ask or give you any further information within my power. Like fleas on a dog, insect pests should be killed, but I do not see why a valuable dog should be killed to get rid of a few fleas, when the fleas are not harmed by the killing of the dog anyway.

RESOLUTIONS.

Whereas: In January, 1909, a bill known as H. R. 27367 was introduced into the United States congress, providing for the inspection of nursery stock at ports of entry of the United States, which bill passed the house—was before the senate and was being considered before the nurserymen had knowledge of it.

And Whereas: The legislative committee of the American Association of Nurserymen at that stage, receiving information that such a bill was being considered, secured a hearing before the committee on agriculture, Dr. Howard, the framer of the bill being present, and after lengthy argument succeeded in having the bill withdrawn

on the understanding that the legislative committee of the American Association of Nurserymen would prepare a new bill which would be acceptable to Dr. Howard and the nurserymen of the United States.

And Whereas: The nurserymen did prepare such a bill, having the endorsement and approval of the American Association of Nurserymen and the Association of Horticultural Inspectors, but though repeated efforts have been made to arrange a conference with Dr. Howard—those efforts so far have been without result.

And Whereas: On December 16, 1909, a bill known as H. R. 15656, was introduced into the house by Mr. Simons, the text and purport of which is exactly the same as the former bill known as H. R. 27367 and to which the nurserymen and kindred interests so strongly objected.

Therefore Be It Resolved: That the Horticultural Importers' Association here assembled, protests against the passage of Bill H. R. 15656 as being impracticable and in the present congested condition of the New York docks impossible of execution without large unnecessary losses being incurred—and as the nurserymen's bill provides for adequate inspection at destination—which we believe to be the only practical and effective way—we strongly urge that the bill prepared by the legislative committee of the American Association of Nurserymen be substituted for H. R. 15656.

And Be It Further Resolved: That the secretary of this association be authorized to forward a copy of this resolution to the Hon. Chas. F. Scott, chairman of the committee on agriculture, The Hon. W. W. Cocks, of New York, and the other members of the committee on agriculture.

Milwaukee's Needs.

The metropolitan park commission of Milwaukee, of which C. B. Whittall is a member, in a late report to the city council, discusses the part played by the ordinary type of park, of which Milwaukee has several, in meeting the recreation needs of the city, and calls attention to the good done by the smaller playgrounds, but it urges that to meet more completely the needs of people in congested

For Immediate Delivery ROSES

sections, recreation centers must be established similar to those in which Chicago has taken the lead. They are necessary to counteract the devitalizing and demoralizing effects of city and industrial conditions, the report holds, and cites the experience of Chicago to prove it.

The report submits a general plan of a center: "There should be provided a library and reading room, facilities for bathing for both sexes; separate playground for young children outdoors, and a winter kindergarten; playground for larger children; ball ground for summer, the same used for skating in winter, outdoor gymnasiums for summer and inside for winter; two or three game rooms, an auditorium and a lunch room."

Pink Climbing Rose— Dorothy Perkins

Without doubt the most valuable of all the new Climbing Roses of comparatively recent introduction. The beauty of the double pink flowers is admirably set off by the rich green foliage, which is free from the attacks of insects.

In addition to this charming kind, we have all the popular varieties in climbing and bush Roses. Our General Catalogue, which will be mailed on request, contains descriptions of all the best Roses—also

Fruit and Ornamental Trees, Shrubs and Hardy Plants.
